Monument Liquid
Turf Herbicide

ACTIVE CONSTITUENT: 100 g/L TRIFLOXYSULFURON SODIUM
SOLVENT: 680 g/L LIQUID HYDROCARBONS

GROUP B HERBICIDE

For the control of Bindii, Burr Medic, Clover, Mullumbimby Couch, Nutgrass, Ryegrass, Winter Grass and suppression of Kikuyu in Turf as per Directions for Use

IMPORTANT: Read this booklet before use

1 LITRE

Syngenta Crop Protection Pty Limited
Level 1, 2-4 Lyonpark Road, Macquarie Park NSW 2113

In a transport emergency dial 000, Police or Fire Brigade
For specialist advice in an emergency only, call 1800 033 111 (24 hours)

APVMA Approval No: 62571/1/0309
Item Number
DIRECTIONS FOR USE

Restraints
DO NOT apply by air or through any type of irrigation equipment
DO NOT apply with smaller than **COARSE** spray droplets according to ASAE S572 definition for standard nozzles.
DO NOT apply with a nozzle height greater than 50 cm above the ground
DO NOT apply where wind speed is less than 3 or greater than 10 km/hour at application site
DO NOT apply when the turf or weeds are not actively growing
DO NOT apply to turf under stress
DO NOT apply to golf course putting greens
DO NOT apply to Bent Grass, Buffalo, Centipede Grass, Fescue, Kikuyu, *Paspalum* spp, Ryegrass or any other turf species not listed in the table below (unless listed under weeds controlled)
DO NOT apply within 10 m downwind of Bent Grass greens
DO NOT apply to newly seeded, sodded or sprigged turf. Delay application until turf is at 100% cover and root system is developed beyond a 5 cm depth
DO NOT apply if there are aquatic and wetland areas including aquacultural ponds or surface streams and rivers within 20 m downwind from application areas
DO NOT apply if there are sensitive crops, gardens and landscaping vegetation or protected non-target native vegetation within 60 m downwind from application areas

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

DO NOT USE THIS PRODUCT IN THE HOME GARDEN

MANDATORY NO SPRAY ZONES ARE REQUIRED FOR ENVIRONMENTAL PROTECTION

WITHHOLDING PERIOD: DO NOT GRAZE TREATED TURF/LAWN OR FEED TURF/LAWN CLIPPINGS FROM ANY TREATED AREA TO POULTRY OR LIVESTOCK
GENERAL INSTRUCTIONS

MONUMENT LIQUID is a selective herbicide for application after emergence of weeds, for control of certain weeds in established turf. MONUMENT LIQUID is an oil dispersion formulation that mixes readily with water and is applied as a spray.

The degree of control resulting from application of MONUMENT LIQUID is primarily dependent upon weed species, weed size at application, environmental conditions, amount of MONUMENT LIQUID applied and growing conditions. Weed control is greatly improved when weeds have emerged, ample soil moisture exists and weeds are actively growing, than when the soil is dry and weeds are under stress from lack of moisture. Growth of susceptible weeds is inhibited soon after application of MONUMENT LIQUID. The leaves of susceptible plants normally turn yellow, red or purple after several days, followed by necrosis and death of the growing point. Complete plant death generally occurs 2 to 4 weeks after application, depending on the weed species, growing conditions, etc.

Apply to actively growing weeds during early stages of development for best results. For optimum performance avoid mowing for 1 to 2 days prior to and following application.

Mode of Action
MONUMENT LIQUID controls weeds by inhibiting a biochemical process that produces certain essential amino acids necessary for plant growth. The inhibited enzyme system is acetolactate synthase (ALS).

Mixing
MONUMENT LIQUID mixes readily with water, no pre-mixing is required.

If pH of water is less than 5.5, use a buffer solution to raise pH to near 7.0. DO NOT mix MONUMENT LIQUID with acid forming compounds in the spray tank.

This product must be mixed with water and applied by suitable spray equipment.

1. Clean the spray tank before using. If it is contaminated with other materials, mixing problems and/or clogging may occur, or injury to the turf may result.
2. Fill tank no more than 25% full with clean water before adding MONUMENT LIQUID. Begin agitating tank contents vigorously and continue agitation during entire mixing and spraying operation.
3. Pour required amount of MONUMENT LIQUID steadily into tank. Allow vigorous bypass agitation to completely disperse product.
4. After adding required quantity of MONUMENT LIQUID and obtaining complete dispersion, continue to fill tank to desired level for spraying.
5. Add required quantity of non-ionic surfactant if using and continue agitation.
6. Thorough agitation (preferably mechanical) of the spray liquid is essential during the addition of the product and during the entire spraying operation. Recirculate if left to stand.

Note: Spray solution should NOT be left standing in the tank overnight.

Application
DO NOT apply by air or through any type of irrigation equipment.

Ground Application: Spray nozzles should be uniformly spaced and of the same size, and should provide accurate and uniform application. Use spray nozzles that produce no smaller than a COARSE spray quality. To ensure accuracy, calibrate sprayer at the beginning of the season before use and recalibrate frequently. Apply at a volume of 400 to 800 L water/ha. Higher volumes should be used for severe weed infestations and higher cut turf (>15 mm) to ensure adequate spray coverage. It is recommended that a non-ionic surfactant be added to the spray solution at a 0.25 to 0.5% v/v ratio. Good weed coverage with the spray mixture is essential for optimum weed control. Observe sprayer nozzles frequently during the spraying operation to ensure that the spray pattern is uniform. Avoid overlapping of spray runs. Ensure that boom height for broadcast application does not exceed 50 cm above the leaf blades of the turf. Avoid application under conditions when uniform coverage cannot be obtained or when spray drift may occur.

Rainfastness
MONUMENT LIQUID is rainfast within 3 hours of application.
Instructions to Avoid Spray Drift
DO NOT allow spray to drift onto adjacent turf sites or ornamental plants as even small amounts may injure sensitive plants. When drift may be a problem, take steps to reduce spray drift.
DO NOT apply where wind speed is less than 3 or greater than 10 km/hour at application site.
Use extreme caution when conditions are favourable for drift, i.e., high temperatures and low relative humidity, especially when sensitive plants are located nearby. All plants not listed as turf species on this label should be considered as sensitive plants.
If sensitive plants are downwind, extreme caution must be used under all conditions. Drift from applications of this herbicide is likely to result in damage to sensitive plants adjacent to the treatment site. This damage can occur at levels below the concentrations that can be detected with chemical analysis.
DO NOT apply when a surface temperature inversion exists. If an inversion condition is suspected, consult with local weather services before making an application.
DO NOT apply with smaller than COARSE spray droplets according to ASAE S572 definition for standard nozzles.
If conditions favour drift, recalibrate sprayer by reducing spray pressures and increasing spray volumes to produce larger droplets.
Apply as close to surface of target turf as practical to obtain a good spray pattern for adequate coverage according to the manufacturer’s recommendations. Ground applications are limited to a nozzle height of 50 cm above the ground.

Sprayer Cleanup
Thoroughly clean spray equipment using the following procedure when you have finished spraying highly active materials such as sulfonylurea products. Start with a thoroughly cleaned sprayer before beginning the next job.
1. **Mix only as much spray solution as needed. Immediately after spraying, clean equipment thoroughly using this procedure. Wear appropriate protective clothing.**
   As a first step, flush tank, hoses, boom and nozzles with clean water.
2. Prepare a cleaning solution of 300 mL of household ammonia/100 L water. Ensure ammonia used is fresh as it can degrade significantly over time resulting in a reduction in cleaning ability.
3. When available, use a pressure washer to clean the inside of the spray tank with this solution. Take care to wash all parts of the tank, including the inside top surface and lid.
4. Completely fill the sprayer with the cleaning solution to ensure contact of the cleaning solution with all internal surfaces of the tank and plumbing. Start agitation in the sprayer and thoroughly recirculate the cleaning solution for at least 15 minutes. All visible deposits must be removed from the spraying system and, in cases where there is the possibility of heavy build up of residues, the cleaning solution may need to be left in the tank for extended periods to ensure adequate decontamination of the tank.
5. Flush hoses, spray lines and nozzles for at least 1 minute with the cleaning solution.
6. Dispose of rinsate from steps 1 to 5 in an appropriate manner.
7. **Repeat steps 2 to 5.**
8. Remove nozzles, screens and strainers and clean separately in the cleaning solution after completing the above procedures. Be careful with filters, as they are a main source of contamination.
9. Rinse the complete spraying system with clean water.

The above method is only effective if the cleaning solution comes into contact with every surface or contact point that may contain even minute sulfonylurea herbicide residues. In some boom sprayers this may not be physically possible and hence it may be advisable to use a different boomsprayer that has not been used to spray sulfonylurea herbicides, when spraying sensitive crops or turf species.

Compatibility
As formulations of other manufacturers’ products are beyond the control of Syngenta, and water quality varies with location, all mixtures should be tested prior to mixing commercial quantities.

Replanting interval
DO NOT replant any crop or ornamentals to treated areas other than turfgrasses listed in the Directions for Use for a period of 12 months after application.
Resistant Weeds Warning  
MONUMENT LIQUID Turf Herbicide is a member of the sulfonylurea group of herbicides and has the ALS Inhibitor mode of action. For weed resistance management this product is a Group B herbicide. Some naturally occurring weed biotypes resistant to MONUMENT LIQUID and other sulfonylurea herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by MONUMENT LIQUID or other Group B herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Syngenta Crop Protection Pty Limited accepts no liability for any losses that may result from the failure of MONUMENT LIQUID to control the resistant weeds. Advice as to strategies and alternative treatments that can be used should be obtained from your local supplier, consultant, local Department of Agriculture, Primary Industries Department or a Syngenta representative.

PRECAUTION
Re-entry Period:  DO NOT allow entry into treated areas until the spray has dried unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing), and chemical resistant gloves. Clothing must be laundered after each day’s use.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS
This product is very highly toxic to non-target plants including aquatic plants. DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands, pastures and other non-target plants or natural and impounded lakes, dams or other waterways. Avoid applications to areas where product may accumulate under the drip line of trees or where product may come into contact with roots of desirable plants. Refer to Instructions to Avoid Spray Drift.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
Very highly toxic to aquatic organisms.  DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT apply if heavy rain is forecast.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. DO NOT burn empty containers or product.

SAFETY DIRECTIONS
Will irritate eyes and skin. May irritate nose and throat. Avoid contact with eyes and skin. DO NOT inhale vapour or spray mist. When opening the container, mixing and loading and preparing spray and using the prepared spray wear:

- cotton overalls buttoned to the neck and wrist (or equivalent clothing)
- elbow-length chemical resistant gloves.

If product on skin, immediately wash area with soap and water. Wash hands after use. After each day’s use wash gloves and contaminated clothing.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 131 126. If swallowed, DO NOT induce vomiting. Give a glass of water.

MATERIAL SAFETY DATA SHEET
If additional hazard information is required refer to the Material Safety Data Sheet. For a copy phone 1800 067 108, or visit our website at www.greencast.com.au or www.syngenta.com.au
MANUFACTURER’S WARRANTY AND EXCLUSION OF LIABILITY

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

DO NOT USE THIS PRODUCT IN THE HOME GARDEN

MANDATORY NO SPRAY ZONES ARE REQUIRED FOR ENVIRONMENTAL PROTECTION

WITHHOLDING PERIOD: DO NOT GRAZE TREATED TURF/LAWN OR FEED TURF/LAWN CLIPPINGS FROM ANY TREATED AREA TO POULTRY OR LIVESTOCK
GENERAL INSTRUCTIONS

MONUMENT LIQUID is a selective herbicide for application after emergence of weeds, for control of certain weeds in established turf. MONUMENT LIQUID is an oil dispersion formulation that mixes readily with water and is applied as a spray.

The degree of control resulting from application of MONUMENT LIQUID is primarily dependent upon weed species, weed size at application, environmental conditions, amount of MONUMENT LIQUID applied and growing conditions. Weed control is greatly improved when weeds have emerged, ample soil moisture exists and weeds are actively growing, than when the soil is dry and weeds are under stress from lack of moisture. Growth of susceptible weeds is inhibited soon after application of MONUMENT LIQUID. The leaves of susceptible plants normally turn yellow, red or purple after several days, followed by necrosis and death of the growing point. Complete plant death generally occurs 2 to 4 weeks after application, depending on the weed species, growing conditions, etc.

Apply to actively growing weeds during early stages of development for best results. For optimum performance avoid mowing for 1 to 2 days prior to and following application.

Mode of Action
MONUMENT LIQUID controls weeds by inhibiting a biochemical process that produces certain essential amino acids necessary for plant growth. The inhibited enzyme system is acetolactate synthase (ALS).

Mixing
MONUMENT LIQUID mixes readily with water, no pre-mixing is required.

If pH of water is less than 5.5, use a buffer solution to raise pH to near 7.0. DO NOT mix MONUMENT LIQUID with acid forming compounds in the spray tank.

This product must be mixed with water and applied by suitable spray equipment.
7. Clean the spray tank before using. If it is contaminated with other materials, mixing problems and/or clogging may occur, or injury to the turf may result.
8. Fill tank no more than 25% full with clean water before adding MONUMENT LIQUID. Begin agitating tank contents vigorously and continue agitation during entire mixing and spraying operation.
9. Pour required amount of MONUMENT LIQUID steadily into tank. Allow vigorous bypass agitation to completely disperse product.
10. After adding required quantity of MONUMENT LIQUID and obtaining complete dispersion, continue to fill tank to desired level for spraying.
11. Add required quantity of non-ionic surfactant if using and continue agitation.
12. Thorough agitation (preferably mechanical) of the spray liquid is essential during the addition of the product and during the entire spraying operation. Recirculate if left to stand.

Note: Spray solution should NOT be left standing in the tank overnight.

Application
DO NOT apply by air or through any type of irrigation equipment.

Ground Application: Spray nozzles should be uniformly spaced and of the same size, and should provide accurate and uniform application. Use spray nozzles that produce no smaller than a COARSE spray quality. To ensure accuracy, calibrate sprayer at the beginning of the season before use and recalibrate frequently. Apply at a volume of 400 to 800 L water/ha. Higher volumes should be used for severe weed infestations and higher cut turf (>15 mm) to ensure adequate spray coverage. It is recommended that a non-ionic surfactant be added to the spray solution at a 0.25 to 0.5% v/v ratio. Good weed coverage with the spray mixture is essential for optimum weed control. Observe sprayer nozzles frequently during the spraying operation to ensure that the spray pattern is uniform. Avoid overlapping of spray runs. Ensure that boom height for broadcast application does not exceed 50 cm above the leaf blades of the turf. Avoid application under conditions when uniform coverage cannot be obtained or when spray drift may occur.

Rainfastness
MONUMENT LIQUID is rainfast within 3 hours of application.
Instructions to Avoid Spray Drift
DO NOT allow spray to drift onto adjacent turf sites or ornamental plants as even small amounts may injure sensitive plants. When drift may be a problem, take steps to reduce spray drift.
DO NOT apply where wind speed is less than 3 or greater than 10 km/hour at application site. Use extreme caution when conditions are favourable for drift, ie high temperatures and low relative humidity, especially when sensitive plants are located nearby. All plants not listed as turf species on this label should be considered as sensitive plants.
If sensitive plants are downwind, extreme caution must be used under all conditions. Drift from applications of this herbicide is likely to result in damage to sensitive plants adjacent to the treatment site. This damage can occur at levels below the concentrations that can be detected with chemical analysis.
DO NOT apply when a surface temperature inversion exists. If an inversion condition is suspected, consult with local weather services before making an application.
DO NOT apply with smaller than COARSE spray droplets according to ASAE S572 definition for standard nozzles
If conditions favour drift, recalibrate sprayer by reducing spray pressures and increasing spray volumes to produce larger droplets.
Apply as close to surface of target turf as practical to obtain a good spray pattern for adequate coverage according to the manufacturer’s recommendations. Ground applications are limited to a nozzle height of 50 cm above the ground.

Sprayer Cleanup
Thoroughly clean spray equipment using the following procedure when you have finished spraying highly active materials such as sulfonylurea products. Start with a thoroughly cleaned sprayer before beginning the next job.
10. Mix only as much spray solution as needed. Immediately after spraying, clean equipment thoroughly using this procedure. Wear appropriate protective clothing.
   As a first step, flush tank, hoses, boom and nozzles with clean water.
11. Prepare a cleaning solution of 300 mL of household ammonia/100 L water. Ensure ammonia used is fresh as it can degrade significantly over time resulting in a reduction in cleaning ability.
12. When available, use a pressure washer to clean the inside of the spray tank with this solution. Take care to wash all parts of the tank, including the inside top surface and lid.
13. Completely fill the sprayer with the cleaning solution to ensure contact of the cleaning solution with all internal surfaces of the tank and plumbing. Start agitation in the sprayer and thoroughly recirculate the cleaning solution for at least 15 minutes. All visible deposits must be removed from the spraying system and, in cases where there is the possibility of heavy build up of residues, the cleaning solution may need to be left in the tank for extended periods to ensure adequate decontamination of the tank.
14. Flush hoses, spray lines and nozzles for at least 1 minute with the cleaning solution.
15. Dispose of rinsate from steps 1 to 5 in an appropriate manner.
16. Repeat steps 2 to 5.
17. Remove nozzles, screens and strainers and clean separately in the cleaning solution after completing the above procedures. Be careful with filters, as they are a main source of contamination.
18. Rinse the complete spraying system with clean water.
The above method is only effective if the cleaning solution comes into contact with every surface or contact point that may contain even minute sulfonylurea herbicide residues. In some boom sprayers this may not be physically possible and hence it may be advisable to use a different boomsprayer that has not been used to spray sulfonylurea herbicides, when spraying sensitive crops or turf species.

Compatibility
As formulations of other manufacturers’ products are beyond the control of Syngenta, and water quality varies with location, all mixtures should be tested prior to mixing commercial quantities.

Replanting interval
DO NOT replant any crop or ornamentals to treated areas other than turfgrasses listed in the Directions for Use for a period of 12 months after application.
Resistant Weeds Warning

**GROUP B HERBICIDE**

MONUMENT LIQUID Turf Herbicide is a member of the sulfonylurea group of herbicides and has the ALS Inhibitor mode of action. For weed resistance management this product is a Group B herbicide. Some naturally occurring weed biotypes resistant to MONUMENT LIQUID and other sulfonylurea herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by MONUMENT LIQUID or other Group B herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Syngenta Crop Protection Pty Limited accepts no liability for any losses that may result from the failure of MONUMENT LIQUID to control the resistant weeds. Advice as to strategies and alternative treatments that can be used should be obtained from your local supplier, consultant, local Department of Agriculture, Primary Industries Department or a Syngenta representative.

**PRECAUTION**

**Re-entry Period:** DO NOT allow entry into treated areas until the spray has dried unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing), and chemical resistant gloves. Clothing must be laundered after each day’s use.

**PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS**

This product is very highly toxic to non-target plants including aquatic plants. DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands, pastures and other non-target plants or natural and impounded lakes, dams or other waterways. Avoid applications to areas where product may accumulate under the drip line of trees or where product may come into contact with roots of desirable plants. Refer to Instructions to Avoid Spray Drift.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT**

Very highly toxic to aquatic organisms. DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT apply if heavy rain is forecast.

**STORAGE AND DISPOSAL**

Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. DO NOT burn empty containers or product.

**SAFETY DIRECTIONS**

Will irritate eyes and skin. May irritate nose and throat. Avoid contact with eyes and skin. DO NOT inhale vapour or spray mist. When opening the container, mixing and loading and preparing spray and using the prepared spray wear:

- cotton overalls buttoned to the neck and wrist (or equivalent clothing)
- elbow-length chemical resistant gloves.

If product on skin, immediately wash area with soap and water. Wash hands after use. After each day’s use wash gloves and contaminated clothing.

**FIRST AID**

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 131 126. If swallowed, DO NOT induce vomiting. Give a glass of water.

**MATERIAL SAFETY DATA SHEET**

If additional hazard information is required refer to the Material Safety Data Sheet. For a copy phone 1800 067 108 or visit our website at www.syngenta.com.au
MANUFACTURER’S WARRANTY AND EXCLUSION OF LIABILITY
Syngenta Crop Protection Pty Limited has no control over storage, handling and manner of use of this product. 100 mL

Syngenta Crop Protection Pty Limited
Level 1, 2-4 Lyonpark Road, Macquarie Park NSW 2113

APVMA Approval No: 62571/100/0309
Item Number
STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. DO NOT burn empty containers or product.

SAFETY DIRECTIONS
Will irritate eyes and skin. May irritate nose and throat. Avoid contact with eyes and skin. DO NOT inhale vapour or spray mist. When opening the container, mixing and loading and preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), and elbow-length chemical resistant gloves. If product on skin, immediately wash area with soap and water. Wash hands after use. After each day’s use wash gloves and contaminated clothing.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 131 126. If swallowed, DO NOT induce vomiting. Give a glass of water.

MATERIAL SAFETY DATA SHEET
If additional hazard information is required refer to the Material Safety Data Sheet. For a copy phone 1800 067 108, or visit our website at www.greencast.com.au or www.syngenta.com.au
