Miami-Dade County’s Brownfields Program

Annual Report

June 1, 2015

June 2014 through June 2015

Department of Regulatory and Economic Resources
Division of Environmental Resources Management (DERM)
Miami-Dade County Brownfields Annual Report 2014-2015

Miami-Dade County received delegation from the Florida Department of Environmental Protection in 2000 to administer the Brownfields Program locally for a period of ten years. In October 2010 the delegation agreement was renewed for another ten years. Miami-Dade County continues its efforts to encourage the expansion, redevelopment and reuse of brownfield sites, where redevelopment may be complicated by actual or perceived environmental contamination.

During this annual reporting period (June 2014 through June 2015), two new Brownfield Areas were designated, four new Brownfield Site Rehabilitation Agreements (BSRAs) were executed and one brownfield site received a Site Rehabilitation Completion Order.

**Designated Brownfield Areas:**

**Unincorporated Miami-Dade County**

On July 13, 1999, the Miami-Dade County Board of County Commissioners approved Resolution R-767-99 and Ordinance 99-85, which designated as brownfield areas all Enterprise Zones, Enterprise Communities, Empowerment Zones, Developable Areas, Targeted Urban Areas, and areas eligible for Community Development Block Grants in unincorporated Miami-Dade County within the Urban Development Boundary. The twelve brownfield areas designated in 1999 included Carol City, Central Miami, Model City/Brownsville, Opa-Locka, Perrine, Redlands/Leisure City, Richmond Heights, South Dade, South Miami, Sweetwater A, Sweetwater B, and Sweetwater C.

On May 20, 2003, the Board of County Commissioners designated Beacon Lakes as a brownfield area (BF130301000) via resolution R-559-03. The Dedicated Transportation area was designated as a brownfield area (BF130503000) on March 1, 2005 via resolution R-248-05.

The incorporation of Culter Bay, Palmetto Bay, and Miami Gardens, which changed the boundaries of the existing brownfield areas under Miami-Dade County jurisdiction, and changes in the boundaries of the Enterprise Zones and Community Development Block Grant-eligible areas, prompted Miami-Dade County to amend the map of brownfield areas to reflect these changes. On February 7, 2008, the Board of County Commissioners passed and adopted Resolution R-149-08 and Ordinance 08-19, amending the Miami-Dade County Map of designated brownfield areas within certain unincorporated areas of Miami-Dade County. As a result, twenty five additional brownfield areas within unincorporated Miami-Dade County were created, increasing the number of sites eligible to qualify for the economic incentives and benefits available for brownfield redevelopment.

Resolution R-412-11, adopted May 17, 2011, designated the parcel at 8400 Coral Way in Miami-Dade County a brownfield area (BF131101000). Wal-Mart Stores East, LP constructed a supercenter store at this previously undeveloped location. This redevelopment resulted in a total investment of $7.25 million and created 300 new jobs. Resolution R-413-11, also adopted May 17, 2011, supported Wal-Mart Stores East, LP's application for a State of Florida Brownfield Redevelopment Bonus.

Resolution R-1038-11, adopted December 6, 2011, designated land located at 12900 SW 252nd Terrace in Miami-Dade County as a brownfield area (BF131103000). Mirabella I Associates, Ltd. completed the construction of an affordable rental community at this location in early 2012, resulting in a total investment of $34 million and creation of 12 new permanent jobs.
On March 5, 2013, Miami-Dade County designated the land located at 7090 Coral Way the Coral Terrace Redevelopment Area (BF 131302000) via resolution R-142-13. The property, which has contamination associated with the site’s former use as a wood-treating plant, was vacant for thirty years prior to brownfield area designation and subsequent development. Pan American is developing the site into approximately 200,000 square feet of retail space with a capital investment of 30 million. The retail development, which includes a BJ’s Wholesale Club which opened summer of 2014, will create 120 new full time jobs.

On June 3, 2014, Miami-Dade County designated property at NW 90th Avenue and NW 58th Street as the Miami-Dade Regional Soccer Park Brownfield Redevelopment Area. The 47-acre parcel was part of the over 550-acre 58 Street Landfill property utilized as a municipal and construction landfill until 1987 when it was properly closed. The subject property was acquired by the Parks, Recreation and Open Spaced Department to allow for the development of a Miami-Dade regional soccer park.

On March 10, 1998, the City of Miami Commission designated via resolution R-98-24, the Enterprise Communities, Empowerment Zone, and Empowerment Target Areas as brownfield areas, with an amendment (R-99-197) on March 23, 1999. On June 24, 2004 the City of Miami Commission designated via resolution R-04-0413, the property at 1960 NW 27 Avenue as a brownfield area (BF130401000). On February 24, 2005, the City of Miami Commission passed a resolution that incorporated the expanded Enterprise Zones as part of the brownfield areas.

On February 24, 1999, the City of Opa Locka Commission designated brownfield areas (BF139901000) via resolution 99-6013. The City of Opa Locka received an Environmental Protection Agency (EPA) Brownfield Initiative Grant in 2001.

On June 7, 2000, the City of Miami Beach Commission designated via resolution 2000-23963 a city block between Alton Road-Lenox Avenue and 5th- 6th Streets a brownfield area (BF130001000).

On December 2, 2002, the City of North Miami Beach approved via resolution (R-2002-59) the designation of the former Pace landfill located at 14700 Biscayne Boulevard as a brownfield area (BF130201000).

On October 30, 2003, the City of Hialeah Commission designated the enterprise zones as brownfield areas (BF130302000).

On February 22, 2005, the City of Homestead Commission designated the city’s Community Redevelopment Area (CRA) as a brownfield area (BF130501000).

On December 4th, 2006, the City of Medley passed a resolution (Resolution N. C-959) designating the Medley Auto Parts property, located at NW South River Drive and NW 96th Street, a brownfield area (BF130601000 - Medley Redevelopment Brownfield Area).

On September 13, 2011, the City of Hialeah adopted Resolution No. 11-95 designating property at 1350 West 49th Street a brownfield area (BF131102000). The City of Hialeah also adopted Resolution No. 11-97 supporting a Brownfield Refund Bonus application for a new restaurant facility at the site, projected to create 35 full-time equivalent Florida jobs and demonstrate a fixed capital investment of at least $2 million in mixed-use business activities, including retail. The restaurant was completed in 2012.

The Solabella Apartments Brownfield Area was designated by the City of Miami Gardens on July 11, 2012 (BF131202000), via Resolution 2012-94-1689-2-124. A history of agricultural uses was documented at the
property located at 17361 NW 7th Avenue. The Solabella Townhome Rental Community project was completed in 2013 and consists of 92 affordable housing rental units.

On August 22, 2012, the City of Homestead passed Resolution No. R2012-08-70, designating the property at 1499 North Homestead Boulevard, the Homestead Wal-Mart Brownfield Area (BF 131201000). A Wal-Mart Neighborhood Market Site will occupy the site.

The City of North Miami Beach passed Resolution No. R2012-88 on December 4, 2012, which designated the Antigua Redevelopment Site, a property located at 15780 West Dixie Highway, a brownfield area (BF131203000). The property is undergoing site rehabilitation for contamination associated with historic gas storage operations. The proposed redevelopment is mixed use residential.

On January 8, 2013, the City of North Miami designated a contaminated parcel of land, located at 1600 NE 123 Street and formerly used as a gas station, a brownfield area via resolution R-2013-4. The Land South Brownfield Area (BF131301000) will be rehabilitated and redeveloped for commercial and/or retail service use.

On September 23, 2014, the City of North Miami designated the property identified by Miami-Dade County folio number 06-2219-000-1620 as a brownfield area (BF131403000). The property was formerly occupied by the Rucks Park Wastewater Treatment Plant. Development proposals for the Rucks Park site include conservation, recreation, healthcare and/or residential uses.

The current list and map of brownfield areas within Miami-Dade County are provided in the Appendix.

Brownfield Site Rehabilitation Agreements (BSRAs):

From June 2014 through June 2015 the following four BSRAs were executed in Miami-Dade County:

**Executed: June 24, 2014**

**Wynwood North Miami**

Wynwood Owner, LLC entered into a BSRA (BF 139801009) on June 24, 2014 for the Wynwood Vacant Parcels property located at 2110, 2118 & 2134 North Miami Ave and 2101, 2129 & 2135 North Miami Court, Miami. The property is proposed to be redeveloped as mixed use residential and commercial land use with a projected 150 units per acre. The property has been developed commercially since at least 1926, historically conducting manufacturing operations, lumber work, metal/welding works and automobile repair. A Phase I/II and Site Assessment has been completed for the property, which documented groundwater contamination consisting of Isopropylbenzene, Polycyclic Aromatic Hydrocarbons, Chromium and Lead. Further assessment is pending.

**Vacant Lot (2015)**
The Opa-Locka Community Development Corporation, Inc. (OLCDC) entered into a BSRA (BF139901002) on September 26, 2014 for the OLCDC Property (historic Hurt Building) located at 432 (formerly 409) Opa-Locka Boulevard within the city of Opa-Locka. The OLCDC plans to redevelop the property into a pediatric primary care center, providing comprehensive health care services to the City’s 4,600-5,200 youth. A petroleum discharge was documented for the site after the discovery of three improperly abandoned steel underground storage tanks which were believed to be related to the property’s former operation as a gas station circa 1930-1950. The three underground storage tanks were removed. A site assessment has been conducted which documented petroleum contaminated soil and groundwater. Site Assessment activities are being conducted.

Historic Hurt Building (2015)

On December 14, 2014, 103 FD LLC entered into a BSRA (BF139904003) for the property located at 1255 NW 103rd Street. The site currently has groundwater contamination from a former underground storage tank system and a monitoring only plan approval has been issued. The property has been redeveloped as a Family Dollar Store.

Vacant lot (2014)  
Completed Family Dollar (2015)
On December 23, 2014, the City of North Miami entered into a BSRA (BF131403001) for a vacant property identified by Miami-Dade Folio number 06-2219-000-1620. The property was formerly occupied by the Rucks Park Wastewater Treatment Plant and contained a plant nursery. Current contaminants of concern include arsenic, ammonia and fecal coliform in the groundwater and arsenic, lead, pesticides and polycyclic aromatic hydrocarbons in soil. Development proposals considered for the Rucks Park site include conservation, recreation, healthcare and/or residential uses.

![Vacant lot (2014)](image)

### Additional Active BSRA Sites in Miami-Dade County:

**Biscayne Commons**

On April 9, 2003, Biscayne Commons, LLC, entered into a BSRA (BF130201001) for redevelopment of a former landfill located at 14700 Biscayne Boulevard in the City of North Miami Beach. Solid waste was compacted, utility trenches were completed and a shopping center was constructed in 2005. A methane gas abatement system was approved and installed. Methane and ammonia groundwater monitoring are being conducted.

![Solid Waste Removal](image)

![Completed Shopping Center](image)
A BSRA (BF139801002) was executed on December 24, 2003, with Biscayne Development Partners, LLC, for the Midtown Miami/former Buena Vista site located at 3111 N. Miami Avenue. The site was formerly owned by the Florida East Coast Railway and was used as a storage yard for freight containers in the maritime transport of goods. The contamination assessment documented lead and arsenic in the soil and arsenic and petroleum contamination in the groundwater. This site is currently in the institutional and engineering control plan phase in pursuit of a No Further Action with Conditions site closure. The development is mixed use and when completed will consist of 600,000 square feet of retail space, 3,000 condo lofts and 350 apartment units. It will have an estimated development value of $1.2 billion and will generate an estimated 1,700 permanent jobs. Construction has commenced on an additional two tracts for retail space (Wal-Mart) and residential space (multi-story apartments). The remaining tracts have interim engineering controls.
On December 20, 2004, a BSRA was executed with Liberty City Holdings, LLC (BF139904002) for the development of Corinthian Multifamily Apartments at 7725 NW 22 Avenue. The site formerly housed a plant nursery and contamination assessment documented arsenic soil and groundwater contamination. A conditional closure, with engineering and institutional controls, has been elected for the site. Construction of the apartment building was completed in July of 2007. The engineering control has been completed. Groundwater impacts at the property boundary have been documented and remedial action is pending.
Los Sueños Multifamily Apartments

On December 20, 2004, a BSRA was executed with Dreamers, LLC (BF139801004) for the property located at 500 NW 36 Street, which formerly housed an automobile repair facility with underground storage tanks. Contamination assessment identified concentrations of Volatile Organic Compounds and Polycyclic Aromatic Hydrocarbons in the groundwater above the applicable cleanup target levels. An engineering control was implemented to address petroleum-impacted soils. This property was redeveloped as Los Sueños multifamily apartments, consisting of a high-rise residential tower and parking garage. A Monitoring Only Plan for the groundwater was approved on February 27, 2013.

McArthur Dairy 7th Avenue

On October 14, 2005, McArthur Dairy Inc. executed BSRA (BF139801005) for the property located at 2451 NW 7 Avenue. McArthur Dairy operated a dairy products distribution facility with a fleet management garage at the site until March 31, 2008. Oil water separators, hydraulic lifts, and underground storage tanks were removed and the site is now vacant. The site assessment was completed and approved on January 28, 2011. Groundwater monitoring was conducted in support of a No Further Action with Conditions Closure. The contaminants of concern include Volatile Organic Compounds, Phenols, Polycyclic Aromatic Hydrocarbons, Total Recoverable Petroleum Hydrocarbons and Arsenic. Submittal of a Declaration of Restrictive Covenant Package is pending.
Medley Redevelopment Site

On October 13, 2011, CRUGAR Development, LLC, entered into a BSRA (BF130601001) to rehabilitate and redevelop a vacant property located in Medley, Florida (Folio Numbers 22-3003-001-0601 and 22-3003-002-0090). Dumping activities were documented at the site in the late 1960s and the site formerly housed automobile parts and repair facilities. Site assessment activities have documented Ammonia, Lead, Iron and Aluminum groundwater contamination. A Groundwater Monitoring Plan in support of a No Further Action with Conditions Closure was approved by DERM on March 2, 2015. Redevelopment plans for the site are still unknown.

Medley Redevelopment Site (2012)

Wal-Mart Neighborhood Market

On December 31, 2012, Walmart Stores East, LP executed a BSRA (BF131201001) for the property located at 1499 Homestead Boulevard. The site previously operated as an automotive dealership and mechanical repair shop until 1996. Oil water separators, hydraulic lifts, and underground storage tanks were removed from the site. The site assessment was completed and approved on December 6, 2012, and documented Volatile Organic Compounds and Polycyclic Aromatic Hydrocarbon groundwater contamination. Groundwater monitoring is being conducted for a No Further Action site closure. The Wal-Mart Neighborhood Market opened in January of 2014 and created up to 95 full and part-time jobs.

Constructed Walmart (2015)
On December 31, 2012, Trademark Metals Recycling, LLC, entered into a BSRA (BF139901001) for the property located at 13200 Cairo Lane in the City of Opa Locka. The site has been and is currently used as an automobile parts metal recycling facility and the redevelopment consists of site improvements. Both petroleum contamination and non-petroleum contamination (iron, ammonia, etc.) have been identified in both groundwater and soils at the site. Site assessment activities are complete and the facility currently has an approved Engineering Control Plan in place that is being implemented in phases based on an approved time schedule. The first phase is complete. Groundwater has been addressed through a completed monitoring only plan. The site will be closed under the No Further Action with Conditions provisions with on-site groundwater impacts and on-site soil impacts requiring an engineering control.

Executed: December 31, 2012

Resorts World Miami

A BSRA was executed for the Resorts World Miami Brownfield Site (BF139801006) in downtown Miami on December 31, 2012. The site includes a parcel which housed the former Miami Herald building at One Herald Plaza. Site assessment activities documented Arsenic, Barium and Polycyclic Aromatic Hydrocarbon soil contamination and Arsenic, Ammonia and Vinyl Chloride contamination of the groundwater. Monitoring of the groundwater is currently being conducted. Demolition of existing structures has been completed. The developer intends to redevelop the site as a major hotel, residential condominium and entertainment complex.
On March 13, 2013, a BSRA was executed for Land South Partners I Brownfield Site located at 1600 NE 123 Street (BF131301001). The site formerly operated as a gas station and has documented contamination associated with a 1988 petroleum discharge. The site is being redeveloped for commercial and/or retail use. The underground storage tank systems were removed in February 2015 and demolition of the site's one story building occurred May 2015. Site assessment activities are being conducted.
On November 1, 2013, a BSRA was executed for the Miami River Marina, LLC site (BF130502001) located at 1975, 1995 and 2051 NW 11th Street and 1142 NW 21st Avenue. The 8.56 acre site is the former location of the Consolidated Yacht Corporation boat yard which built, repaired and renovated marine vessels and associated equipment. The contamination at the site consists of metals in soil and in limited areas of groundwater. Site assessment and groundwater monitoring activities are currently being completed in pursuit of a No Further Action with Conditions. Miami River Marina, LLC plans to redevelop the site as an active boatyard and/or facility which services the marine industry.

On December 31, 2013, a BSRA was executed with Mandy Market, LLC (BF139801007) for the property located at 7200 NW 2 Ave. The site has petroleum groundwater contamination from a former underground storage tank and site assessment activities are currently being conducted. The site was redeveloped as a Family Dollar store. A Site Assessment Report was approved on August 21, 2014 and groundwater monitoring in support of a No Further Action with Conditions is currently being conducted.
On December 31, 2013, a BSRA was executed between MDC and Proccaci 1400, LLC for the property at 1400 NW 110th Avenue (BF130843002). Cemex formerly operated at this facility. Records at DERM also indicate the underground storage of petroleum products between 1987 and 1993. The eastern portion of this property is encompassed by the former Marks Brothers Dump/Lakefill and contains buried solid waste. Site improvement and development activities were initiated in 2014 in accordance with plans approved by DERM, and a Certificate of Construction Completion was received in February 2015. Site assessment is being conducted. The site will be redeveloped as a hotel.

On December 31, 2013, a BSRA was executed between Miami Dade County (MDC) and Proccaci Sweetwater, LLC for the property located at 1556 NW 110th Avenue (BF130843001). Records at DERM indicate that the parcel was previously used for concrete block manufacturing and as a parking lot with underground storage of petroleum products between 1987 and 1993. The eastern portion of this property is encompassed by the former Marks Brothers Dump/Lakefill and contains buried solid waste. Site improvement and development activities were initiated in 2014 in accordance with plans approved by DERM, and a Certificate of Construction Completion was received in February 2015. Site assessment is being conducted. The site will be redeveloped as a hotel.
On December 31, 2013, a BSRA was executed between MDC and Antigua at NMB Development, LLC for the property located at 15780 West Dixie Highway (BF131203001). On September 4, 2014, Moore 77, LLC was added to the BSRA by amendment. The parcel is currently vacant, but it was previously part of a Manufactured Gas Plant (MGP) that began operation in 1930. DERM records indicate that the parcel was mainly used for gas storage, which ceased in 1984. The site rehabilitation activities conducted since 1984 have consisted of assessment, soil removal (also targeting residual coal tar) in the late 1980s and early 1990s, hydraulic pump tests in 2007 and a biosparge/soil vapor extraction pilot test in 2010. Between December 2013 and May 2014, an Interim Source Removal (ISR) was implemented to address all the direct exposure risk concerns from contaminated surface soils within the site and to remove observed visible MGP residual within the footprint of the shallow groundwater plume. The ISR resulted in the excavation and proper disposal of approximately 54,000 tons of soils and 4000 gallon of contaminated water. Following source removal, a cap of 2 ft of clean fill underlain with a high-visibility permeable geosynthetic liner, was placed in all areas subject to remediation and in a former borrow area. Hydroseeding of the capped surface was then implemented for long term dust control. Between May and July 2014, approximately 4.2 acres of a 4.8 acre former borrow pit located in the southern half of the property was filled with clean sand. A remedial action plan (RAP) and addendum consisting of an air sparging/soil vapor extraction curtain along the eastern boundary of the property was submitted between March 2014 and November 2014. DERM has required revisions to the proposed remedial approach in view of documented off-site contamination. The submittal of a RAP Addendum is pending.
Completed BSRA Sites in Miami-Dade County:

**Wagner Square, LLC**

On August 13, 2004, a BSRA was executed for the property located at 1700 NW 14th Avenue, Wagner Square, LLC (BF139801003). The site was historically a nursery and debris was dumped on-site after nursery operations ceased. Ash from a former city incinerator was also present at the site. Concentrations of arsenic, barium, lead, and dioxins/furans were detected in debris and soils present on-site at concentrations exceeding soil cleanup target levels. Wagner Square received a $1 million Brownfields Economic Development Incentive (BEDI) grant from the U.S. Department of Housing & Urban Development (U.S. HUD) towards remediation, as well as a $4,000,000 Section 108 U.S. HUD loan. All contaminated soil and ash were removed from this site (15,863 tons) and a Site Rehabilitation Completion Order was issued on October 7, 2005. Economic difficulties delayed the proposed development project, consisting of affordable/workforce housing, a medical office building and a parking garage, and in 2012, the Wagner Square developers filed for bankruptcy. A portion of the property was sold to the US Department of Veterans Affairs and remaining portions were conveyed to the City of Miami. The site is currently utilized as a parking lot.

**Siegel Gas**

On February 24, 2004, a BSRA was executed for Siegel Gas (BF139904001), located at 7400 NW 30 Avenue, for expansion of their operations. Petroleum soil and groundwater contamination were documented in an area formerly housing above-ground storage tanks. Approximately 2,336 tons of impacted soil and 9,750 gallons of Free Floating Product/Petroleum Contact Water were removed during source removal activities. A Site Assessment Report and Remedial Action Plan were approved on May 29, 2009 and June 5, 2009, respectively. The remedial activities included the placement of RegenOx™ and ORC Advanced™ within a source area excavation. Following the successful completion of a Post Active Remediation Monitoring Plan, this site was granted a Site Rehabilitation Completion Order on May 16, 2011. The property was sold and currently operates as a propane retail facility.

**AR&J SOBE**

A Site Rehabilitation Completion Order with Conditions was issued on March 14, 2012, for the AR&J SOBE site located at 1101-1141 5th Street in Miami Beach, Florida (BF1300010001). The BSRA was executed on December 29, 2000 for redevelopment of a city block between Alton Road-Lenox Avenue and 5th - 6th Street in Miami Beach. The site formerly housed a car dealership, various automobile repair facilities, and a gas station. The contamination consisted of petroleum and metal compounds. Construction of the Shops at Fifth & Alton was completed in August 2009 and the building serves as the engineering control. The $80 million dollar project contains 180,000 square feet of retail, spread over three levels. There are also six levels of
parking and 1,080 spaces. The project was awarded the Urban Land Institute's Vision Award for 2010 Project of the Year.

AR&J SOBE/Former Potamkin Properties

[Image]

On May 9, 2012, a Site Rehabilitation Completion Order was issued for the AMB Codina Beacon Lakes, LLC site, for which a BSRA (BF130301001) was executed on November 24, 2003. Located in the vicinity of NW 117th Avenue and NW 25th Street, the site was contaminated with Polycyclic Aromatic Hydrocarbons, Total Recoverable Petroleum Hydrocarbons and arsenic as a result of the former mixing of soil and horse manure at the site and the dumping of construction and demolition debris. Solid waste was removed and source removal was conducted. The redevelopment consists of a business park with warehouses, office buildings and retail space.

[Image]
A BSRA was executed on March 17, 2014 for the St. Martin’s Place facility (BF139801008), located at 1128, 1154 and 1170 NW 7th Avenue in Miami. The subject site was formerly occupied by several businesses including an auto repair facility. Site assessment activities were completed and documented the presence of chlorinated solvent constituents in the groundwater in the southeastern corner of the site attributed to migration from the former Biscayne Chemical facility located to the northeast of the subject site. Site assessment activities also documented limited Polycyclic Aromatic Hydrocarbons soil impacts which were addressed through source removal. A Site Rehabilitation Completion Order was issued on December 18, 2014. There are restrictions on use of groundwater at the site based on the groundwater contamination originating from an off-site source. The vacant land is currently being developed into multi-family, transit-oriented, affordable housing.
