Milbank: Quality Metering Products for 80+ Years

Milbank Manufacturing Company was established in 1927 by Charles A. Milbank. Originally, the company manufactured high voltage switches; however, by 1941 Milbank devoted itself primarily to the manufacture of sheet metal enclosures and related equipment for the electrical generation and distribution industry. Today we are an industry leader in the manufacture of electrical meter sockets. Through a national network of manufacturer’s representatives we provide wholesale electrical distributors with quality electrical products for the utility, contractor, industrial and OEM markets.

As the meter standards have changed, Milbank has been successful in adapting its product line to these changes. Our full scale engineering department designs products to meet customer specifications and satisfy all utility requirements. Milbank’s employee base of over 1,000 workers, along with our five manufacturing facilities comprising almost 550,000 square feet give us the flexibility to schedule, produce, and ship orders quickly. Currently, Milbank manufactures over 10,000 different catalog items, and this list continues to grow. Our unique product offering includes: Residential & Commercial Meter Sockets; Residential & Commercial Meter Pedestals; RV/MH Power Outlets, Service Pedestals, and Transformers; Commercial & Industrial Electrical Enclosures; Circuit Breakers; Disconnects & Safety Switches; Safety Sockets; Utility & Residential Secondary Pedestals; Hubs, and related accessories. If you don’t find a unit in this catalog to service your needs, send us your specifications and we will be happy to work with you.

Our success has come from a loyal customer base that can rely on us to build quality products at a fair price in a timely manner. Our willingness and ability to design and produce new products to meet our customer demands is an important factor to remain competitive in today’s electrical market.

Milbank has been serving the electric utility & wholesale distribution industries for more than 80 years with innovative, quality engineered products. So remember us for all of your meter mounting and related requirements, and we will be happy to serve you as we have in the past—with dependable service and quality products!

We take great pride in being one of the few family-owned businesses left in our industry. We are a third generation run business and truly believe that...

FAMILY MAKES A DIFFERENCE!

**SPECIFICATIONS**

- UL Listed 100 Amp, 120/240 Volt—1Ø Power Outlet.
- Ring-type version only.
- Metered and unmetered versions available.
- Short circuit current withstand rating 10,000 RMS symmetrical amperes.
- Type 3R welded enclosure for durable outdoor use.
- Direct burial or pad mounted post constructed with 14 gauge galvanized steel. Removable covers for ease of installation.
- ASA 61 grey polyester powder coat finish.
- Wire terminations accept copper or aluminum conductors for loop feed wiring.
  Line: (4) #6-350 kcmil  
  Ground: (2) #14-2/0  
  Neutral: (2) #6-350 kcmil
- Four circuit plated copper interior accepts standard plug-in type circuit breakers. Rated up to 100 amps.
- Components factory wired with stranded aluminum wire.
- Lockable hinge cover and dead front are removable for installation and maintenance.
- Unit weight — Direct Burial: Metered 55 lbs., Unmetered 37 lbs.  
  Pad Mount: Metered 44 lbs., Unmetered 26 lbs.

**Stock model. Availability subject to prior sale.**

Note: 20 Amp GFI required at each RV site by UL and NEC 551-71

**INTERNAL LIGHT KITS** Factory or field installed. See Lighting Accessories page.

*NOTE: Weather resistant / tamper proof

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment in this catalog.
MILLENNIUM SERIES FEATURES

- MILBANK UTILITY GRADE 125 AMP DRAWN RING TYPE METER SOCKET
- SIX CIRCUIT 125 AMP INTERIOR WITH PLATED COPPER STABS & GLASS FILLED C/B BASE
- RECEPTACLES MOLDED FROM DURABLE NYLON MATERIAL
- STANDARD COPPER FACTORY WIRING ON ALL RECEPTACLES AND CIRCUIT BREAKERS
- OPTIONAL LEFT OR RIGHT INSTALLATION PHOTO-ELECTRIC LIGHT CONTROL
- LOW WATTAGE FLUORESCENT LIGHT (OPTIONAL)
- REMOVABLE DEADFRONT
- SELF-GROUNDED UNIVERSAL BRIDGE FOR UP TO THREE RECEPTACLES
- GFI RECEPTACLE WITH MISWIRE/TRIP INDICATOR LIGHT
- PAD LOCKABLE DEADFRONT PROVISION
- LEFT & RIGHT LOCKING COVER PROVISIONS
- GLASS FILLED LUG LANDING WITH TWIN #6-350 KCMIL LINE CONNECTORS FOR LOOP FEED WIRING
- MULTIPLE HOLE GROUNDING BAR
- INSULATED BONDABLE MULTIPLE HOLE NEUTRAL BAR
- MILBANK UTILITY GRADE MILLION SERIES BY MILBANK
INTERNAL LIGHT KITS FOR POWER OUTLETS

Application:
• Internal light kit for U5000 & U5200 UNMETERED power outlets.

Features:
• Includes 5 watt fluorescent lamp socket, ballast, lamp shield and opaque hinge cover lens. Factory wired to 20 amp GFI circuit. May be wired to separate 20 amp circuit breaker. Order Q120 separately.
• Cover on unmetered power outlet is 19 1/8” in height.

Ordering:
• Order with -L suffix (after catalog number) for factory installed.
• Order catalog number K5411 for field installed.

Application:
• Internal light kit for U5100 & U5300 METERED power outlets.

Features:
• Includes 5 watt fluorescent lamp socket, ballast, lamp shield and opaque hinge cover lens. Factory wired to 20 amp GFI circuit. May be wired to separate 20 amp circuit breaker. Order Q120 separately.
• Cover on metered power outlet is 15 1/4” in height.

Ordering:
• Order with -L suffix (after catalog number) for factory installed.
• Order catalog number K5412 for field installed.

PHOTOELECTRIC LIGHT CONTROL KIT

Application:
• Photoelectric light control kit for K5411 & K5412 light kits.

Features:
• 2.5 amp, 120 Volt photo electrical control wired in series with K5411 & K5412 light kits.

Ordering:
• Order with -LPC suffix for factory installed light and PE control.
• Order catalog number K5413 for field installed.

WARNING: Always disconnect power prior to installing these devices.
**TELEPHONE AND CABLE TV KIT**

**Application:**
- Mounts to rear of pedestal series **U5200 & U5300**. May also be adaptable to a wooden or similar structure.

**Features:**
- Single: 16” galvanized raceway, (1) RJ11 telephone jack & (1) Type F coaxial CATV jack.
- Dual: 16” galvanized raceway, (2) RJ11 telephone jack & (1) Type F coaxial CATV jack.
- Includes mounting hardware & instructions.

**Ordering:**
- Single Line Telephone & Cable TV kit order catalog number **K4709-02**.
- Weatherproof Type 3R “in-use” cover available. Add -3R to catalog numbers above.

**NOTE:**
- Confirm acceptability with Cable TV & Telephone provider before ordering or installing these devices.

---

**WATER SHROUD WITH HARDWARE**

**Application:**
- Used to cover water pipe and provide means to mount hose bib to rear of pedestal.

**Features:**
- Includes mounting hardware and instructions.
- Matches **K4709** kits when mounted side by side.

**Ordering:**
- Order catalog number **K4709-WS**.
FIELD INSTALLED PAD MOUNT KIT

Application:
• Field installed pad mount kit with (6) 3/4” mounting holes.

Features:
• Includes 1/4-20 stainless steel hardware to attach pad mount base to post.
• Anchor bolt kit sold separately (order catalog number K5421).

Ordering:
• Order catalog number K5410.

STABILIZER FOOT WITH HARDWARE

Application:
• Stabilizes direct burial type posts in unstable soil conditions.

Features:
• Includes 1/4-20 hardware to attach to CU5200 & CU5300 pedestals.

Ordering:
• Order catalog number K5415.

ANCHOR BOLT KIT

Application:
• Concrete anchor bolt kit designed to attach pad mount base to concrete.

Features:
• (4) sets of zinc-plated 5/8-11 x 10” bolt with 2” toe.
• Includes nut and flat washer.

Ordering:
• Order catalog number K5421.
FIELD INSTALLED METER KITS

Application:
• Field installed meter kit for U5000 & U5200 power outlets.

Features:
• 100 amp cast meter socket, CL200 E-Z Read Meter, sealing ring, security seal, 1” Milbank hub, nipple and mounting screws.
• Optional 1” liquid-tight hub available for existing units without extruded hub opening. See ordering information.
• See CL200 for Watt-hour meter specifications.

Ordering:
• Order catalog number K4800-01.

E-Z READ WATT-HOUR METER

Application:
• 200 Amp E-Z read watt-hour meter designed to be field installed on the U5100 & U5300 metered power outlets.

Features:
• 200 Amp Form 2S 120/240 Volt.
• Numeric read-out in full kilowatt increments. No “tenths” dial.
• Remanufactured to 1% accuracy.

Ordering:
• Order catalog number CL200. Sold in multiples of (4) per carton.

SINGLE RECEPTACLE ONLY POWER OUTLET

Application:
• Overhead/underground power outlet receptacle, suitable for RV, temporary service, campground, marina & boatyard equipment.

Features:
• Type 3R, 120/240 Volt single phase.
• Lockable cover.
• Weather-resistant, tamper-resistant.

Ordering:
• Order catalog number from chart below.

WARNING: Always disconnect power prior to installing these devices.

**SPECIFICATIONS**

- Built in accordance with NEMA, ASA and AIEEE standards. Designed and tested to withstand 150% of rated load for two hours continuously. 480 Volt units are UL listed. Consult local utility for acceptance of this product.
- Integrated design of the enclosure, core and coil, and secondary distribution panel permits convenient vertical line and load terminations.
- Primary and/or secondary main circuit breaker protection available. Consult local utility for 480 volt overcurrent protection requirements. Single fuse primary overcurrent protection provided on 2400 volt and above units.
- Other primary voltages available: 4160, 4800, 7200, 7960, & 12,470. Consult factory.

*Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment in this catalog.*
**CORE AND COIL:**
- Aluminum wound (Copper available)
- Standard voltage taps @ 2FCAN and 4FCBN
- Rated at 150° C temperature rise

**DISTRIBUTION BUS:**
- 1600 Amp tin plated aluminum
- Space available for up to (12) circuit breakers – 1600 amp maximum
- Uses Milbank type UQFP-100 through 200 amp circuit breakers (See page 18)

**ENCLOSURE:**
- Type 3R enclosure
- Powder coated galvanized steel (aluminum available)
- Lockable primary and secondary doors
- Lifting hooks and fork lift slots provided

* These models are NOT UL listed.

SPECIFICATIONS

- 600 to 1200 amp, 120/240 Volt, 1Ø distribution bus accepts up to (6) 2 pole, 200 amp circuit breakers. Order from chart below.
- Costly main breaker not required per NEC 230-71.
- Economical alternative to costly wall hung or strut-mounted panel boards and load centers.
- Low profile, aesthetic design can be located near utility transformers or fed from a main service to a convenient location.
- Pad mounted Type 3R powder coated aluminum enclosure – Standard color is gray.
- Hinge door and lift off rear service door are lockable and sealable for security.
- **NOTE:** Consult local code enforcement for pad size requirements. Order Catalog # CP24-PDMNT-CALT pad mount base or Catalog # CP-ABK5/8 anchor bolt kit separately.

**HUB:** Standard hub opening on top with closing plate attached.

**FEATURES:** Pad lockable Type 3R enclosure listed by Underwriters Laboratory.

**3Ø 120/240V APPLICATION:** Field installable 3Ø lug kit converts 1Ø unit to 3Ø unit.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment in this catalog.
**U5300-O SERIES**

**RATING:** 125 amps maximum–120/240 VAC–1ØW  
**METER SOCKET:** 100 amp continuous–600 VAC–Rainproof NEMA Type 3R  
**SHORT CIRCUIT CURRENT RATING:** 10,000 RMS symmetrical amperes at 240 VAC maximum, but is limited to the lowest short circuit current rating of any installed circuit breaker. Watthour meter not included in short circuit current rating.

**REPLACEMENT CIRCUIT BREAKER:** Must be the same type and rating. Use Milbank: UCP; Siemens/ITE: QP, QT; Cutler-Hammer /Westinghouse: QP, BD, BR; General Electric: TQ, THQ, THQL; Challenger: C, Q, QC, QP, A.

**SUITABLE FOR USE AS:** Service equipment, mobile home service equipment, temporary power service equipment and recreational vehicle site supply power.

**DANGER**  
Hazard of Electrical Shock or Burn  
**TURN OFF POWER**  
Suppling this equipment before working inside  

**Shipping tends to loosen bolted connections. Check and tighten all hardware before energizing unit.**

---

**WARRANTY**

- If any equipment manufactured by seller fails due to defects in material or workmanship within one year from the date seller shipped the equipment, such equipment will be replaced or repaired at seller’s option. This warranty is limited to the repair or replacement of the equipment or component part or parts of the equipment and becomes void if any equipment failure is due to improper installation, purchaser’s negligence, unreasonable use, damage (not resulting from defects in material or workmanship) or misapplication. This warranty does not include reimbursement for the expense of installation, removal of the equipment from the line, transportation, or any other expenses which may be incurred.

- In no event shall seller be liable for consequential or incidental damages and seller’s liability for any and all losses and damages sustained by the purchaser or any other person arising out of or by reason of the use of the equipment, a defect in the equipment (whether discoverable or latent), a claim of negligence or for any other reason, shall not exceed the purchase price paid by the purchaser.

- **THIS WARRANTY IS MADE EXPRESSLY IN LIEU OF ANY OTHER WARRANTY AND SELLER MAKES NO OTHER REPRESENTATION OR WARRANTY OF ANY OTHER KIND, EXPRESS OR IMPLIED, WITH RESPECT TO THE EQUIPMENT, WHETHER AS TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER MATTER.**

- **AUTHORIZATION MUST BE OBTAINED FROM MILBANK’S GENERAL OFFICE BEFORE EQUIPMENT IS RETURNED.**

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment in this catalog.

Overall ampere ratings of U/L listed Milbank multiple position meter sockets are based on 2008 N.E.C. Handbook Article 220-84 and ANSI / UL-414 (except where restricted by line connector size.) These requirements provide for a diversity factor / demand factor being utilized in determining the overall (main bus / lug) rating of a gang socket. All Milbank U/L listed gang sockets meet or exceed these diversity factor/demand factor requirements. Standard overall ampacity ratings for U/L listed and non-U/L listed gang sockets are as shown in the chart below. Ampere ratings of meter sockets are based on the meter socket being wired with 75°C insulated wire conductor, sized in accordance with Table 316-10 of the National Electric Code.

† Unless otherwise permitted elsewhere in the Code, the overcurrent protection for conductor types marked with an obelisk (†) shall not exceed 15 amps for 14 AWG, 20 amps for 12 AWG, and 30 amps for 10 AWG copper; or 15 amps for 12 AWG and 25 amps for 10 AWG aluminum and copper-clad aluminum after any correction factors for ambient temperature and number of conductors have been applied.

# Some constructions are rated at 400 amps overall. Contact your sales representative for more information. Refer to latest NEC Code or Local Codes for updated requirements.
IMPORTANT NOTE

In addition to national and local electrical codes, many utilities have specific requirements for metering equipment. Always consult the serving utility for their specifications and requirements prior to ordering or installing Milbank meter mounting equipment.

BEFORE ENERGIZING

A. Give equipment a thorough visual examination to determine that:
   1) No shipping or installation damage exists.
   2) Proper clearances have been maintained.
   3) All connections have been made.
   4) Equipment is clean and dry.

B. Make a thorough examination to:
   1) Verify tightness of all bolted connections (see table below).
   2) Manually operate all circuit breakers, switches, relays, etc.
   3) Check rigidity of all mountings, bus bars and components.
   4) Use test equipment to check continuity of circuitry and integrity of insulation.

C. All switches and circuit breakers should be in the “off” position.

D. Verify that manual meter bypass (if applicable) is in non-bypass position.

E. Install cover and/or close doors.

F. If installation is not being energized at this time, follow “after-energizing” steps listed below. These steps will secure the installation in case of accidental energization.

WHEN ENERGIZING

A. Use caution and follow established safety procedures:
   1) Wear safety apparel.
   2) Use safety equipment.
   3) Take action to prevent injury to yourself and others in the event of failure of the installation.
   4) Take action to prevent/decrease damage to property in the event of failure of the installation.
   5) If you are unsure how to safely energize the installation, get someone who is knowledgeable to do it.

AFTER ENERGIZING

A. Secure the installation:
   1) To prevent accidental contact with energized parts, cover all openings with approved filler devices.
   2) To prevent unauthorized access, secure all covers and/or doors with approved security devices.
   3) Attach/post information to advise others of potential hazards associated with the installation.

*Interior labels typically indicate the required torque for wire connectors and studs, and should be referenced first.

EH: Extruded Hole
CU: Copper
AL: Aluminum
Other quality products available from Milbank

In addition to RV Park Electrical Products & Accessories, Milbank also manufactures utility-approved meter mounting equipment and supporting products, such as...

- Air Conditioner Disconnects
- Hot Tub Disconnects
- Terminal Boxes
- Temporary Power Outlets
- Commercial Pedestals
- Commercial Enclosures
- CT Enclosures
- Circuit Breakers
- Enclosed Circuit Breakers
- Safety Switches
- Test Switches

Contact your local distributor or go to www.milbankmfg.com to find additional product literature.
Meter Mounting Equipment & More!

Commercial Electrical Enclosures
Residential & Commercial Metering
Commercial Meter Pedestals
Disconnect Devices
Current Transformer Enclosures
RV/MH Pedestals
Temporary Power Outlets
Circuit Breakers
Enclosed Circuit Breakers
Safety Switches
Test Switches
