Introduction to CMA Part 1 .................................................................................................................. 1

Section A – External Financial Reporting Decisions ....................................................................... 3

Users of Financial Information ........................................................................................................... 3
The Financial Statements ...................................................................................................................... 4
Differences Between IFRS and US GAAP ............................................................................................ 4
1) The Balance Sheet (Statement of Financial Position) .................................................................... 5
2) The Income Statement .................................................................................................................... 11
3) The Statement of Cash Flows (SCF) ............................................................................................ 17
Preparation of a Statement of Cash Flows Using the Indirect Method .............................................. 23
4) Statement of Comprehensive Income ......................................................................................... 31
5) Statement of Changes in Stockholders’ Equity ............................................................................ 33
Limitations of Financial Statements in General .................................................................................. 34

Recognition, Measurement, Valuation, and Disclosure .................................................................... 35

Basic Accounting Principles .............................................................................................................. 35
Specific Elements of the Financial Statements .................................................................................. 37

1a) Cash ................................................................................................................................................ 38
Cash Equivalents .................................................................................................................................. 38

1b) Accounts Receivable ...................................................................................................................... 39
Valuing Accounts Receivable ............................................................................................................ 39
Factoring: Using Receivables as an Immediate Source of Cash ..................................................... 47

1c) Inventory ........................................................................................................................................ 52
Valuing the Inventory When It Is Purchased ...................................................................................... 52
Which Goods Are Included in Inventory ............................................................................................. 53
Costs Included in Inventory .................................................................................................................. 54
Determining Which Item Is Sold: Cost Flow Assumptions ................................................................ 54
Effect of the Different Methods ........................................................................................................... 58
The Frequency of Determining Inventory Balances ......................................................................... 58
The Physical Inventory Count .............................................................................................................. 64
Errors in Inventory .............................................................................................................................. 65
Recognizing Permanent Declines through the Lower of Cost or Market (LCM) ............................... 66

1d) Investments ................................................................................................................................... 69

1e) Fixed Assets ................................................................................................................................... 74
Initial Recording of the Fixed Asset .................................................................................................... 74
Depreciation ........................................................................................................................................ 75
Net Book Value of Fixed Assets ......................................................................................................... 75
Calculation of Depreciation ................................................................................................................ 75
Depreciation Methods ....................................................................................................................... 75
Depreciating Entire Groups of Assets .................................................................................................. 78
