The Maryland Relay is a telephone system that permits users of standard telephones to communicate with TTY (text telephone) users (persons who are deaf, hard of hearing, deaf-blind, or speech disabled), and vice versa. It is available to anyone with a telephone, 24 hours per day, 365 days per year, it’s toll free, and requires no additional equipment to access.

To use Maryland Relay, dial 7-1-1 (in Maryland only) or 1-800-201-7165 from anywhere, and give the operator the name and phone number of the person you are calling. The operator will call the other party and everything the hearing party says will be typed to the TTY user and everything the TTY user types will be voiced to the hearing party. Absolute confidentiality of the call’s content is assured, and no printed records of the call are kept.

When using Maryland Relay, speak directly to the person you are calling, not to the operator. Be aware that there is a slight lag time because typing takes slightly longer than a voice call.

For more information, contact the Maryland Department of Information Technology, Telecommunications Access of Maryland at 1-800-552-7724 (TTY or voice).

Please note: 7-1-1 is not available through many PBX Systems. Call 1-800-552-7724 for information regarding gaining access to 7-1-1.
