Intro

Important note: The symbols on these pages are not intrinsically sinister by themselves. Much of the symbols are beautiful examples of applied geometry or elements of nature, and have cultural origins that are probably much older and more benign/spiritual than their prominent masonic usage by some people and their organizations today.

However, it is clear some people want to associate those various symbols with their secret and subversive societies. Those societies use occult symbolism as a secret language of carefully hidden knowledge, and to hide their relations and agenda. Some (many?) societies may not be fully aware of the real esoteric meaning of the symbolism, since that often requires in depth knowledge of a lot of different topics: nature observations (astronomy, cataclysms, life cycles, human consciousness), early civilizations (mythology, shamanism, art, magic), technological/political/religious history, etc.

So discovering the usage of these symbols does demand further research into:
• The occurrence of these symbols (and their variations) throughout time and space.
• The meaning(s) of these symbols throughout time and space.
• The organizations that utilize/utilized these symbols, and their possible masonic history, relations and agenda.

    • To research: "The Lost Cubit was discovered in April of 2000 by German astrophysicist Hans Becker and has, in the last ten years, been extensively researched by the well known metaphysical researcher Slim Spurling. The Lost Cubit is a previously unknown cubit length which fills a harmonic gap between the Sacred and Royal cubit lengths of Ancient Egypt. Research and calculations made by Becker indicate that the Lost cubit may well have been deliberately omitted from ancient records due to its important and powerful esoteric significance. The secrets if The Lost Cubit was always strongly guarded by the priesthood of Egypt, and was reserved exclusively for high initiates and Pharaoh himself. This is why there are no records of the Lost cubit to be found in orthodox historical records. The Lost Cubit is derived from the sum of the polar and equatorial circumferences of the Earth"
The Lost Cubit therefore relates to cosmic harmonics in a special way. Due to its dual ability to resonate with cosmic energy frequencies and earth energy frequencies, The Lost Cubit is the secret key to extraordinary health and extreme longevity. The Lost Cubit has a natural resonant frequency of 177 megahertz which corresponds to the frequency of DNA (see also: video: Frequency 528, Solfège), thereby facilitating DNA repair and the capability of consciously controlled DNA activation and ascension. It is becoming more widely accepted by scientists that DNA acts as an antenna for light energy, and therefore the harmonic frequencies of light and The Lost Cubit in particular are vitally important aspects of the equation." - Various notes:
  - "The pyramid is a universal shape and one of the building blocks of nature; the 51 degree, 51 minute, 14.3 second base angle pyramid (octahedron) is the shape of the carbon atom in the red blood cell, the iron atom in the body. The solid pyramid shaped carbon atom is one of the universal combinations of all molecular and cellular structures. The human body has a lot in common with pyramid structure and Phi. The "pyramid principle" (?) states that all matter can be changed into flesh by energy crystallization into amino acids and proteins utilizing the carbon atom (pyramid) as the key building block. **In reality we humans are composed of three gasses: oxygen, hydrogen, nitrogen and one solid; carbon (pyramid)."" All-seeing Eye

- Various notes:
  - Other names: Eye of Horus ("Wadjet"), Eye of Ra, Eye of the Sun, Eye of the Moon (?), Eye of Providence.
  - "The All-Seeing Eye has been around for a long time. Many cultures throughout history have regarded the eye as a divine symbol. Representative of constant vigilance, an unblinking, untiring eye, like those of the judging Gods, would witness the ultimate truths missed by fallible men. It is also commonly associated with the sun [which itself represents "primordial intellect" or the field of Consciousness], heavenly observation and the protection of God. It is usually depicted as a single human eye surrounded by radiating beams of light. It is also often used in conjunction with other religious or superstitious symbols, like the pyramid and the circle. It appears on the Great Seal of the United States, which is printed on the American one dollar bill. Created by Benjamin Franklin, an American Founding Father and Freemason, the Great Seal took several years to create. The First Continental Congress requested a seal of state be created to show the birth of a new nation under god. Franklin and a group of men took four years to draft the seal and another two years to get it approved. The Seal depicts an unfinished Pyramid, lit from the east side and dark on the west. Representative of the state of the United States in 1776, and the east to west colonization of the New World, the Pyramid features an all-seeing eye in the capstone. Used to represent God, it was Franklin's commentary on the divine help he felt allowed the United States, as a country, to accomplish anything. The use of a noted symbol of Freemasonry, where it represents the Great Architect of the Universe, the Great Seal is at the heart of many conspiracy theories. Franklin freely admitted borrowing the symbolism from the Masonic tradition. Fears of Illuminatic control of the government of the United States based on this use of the eye symbol continue today. Known as The Cryptic Eye of Chaos, the Masonic deity of entropy and dissolution, the eye symbol used by the Freemasons was said to have been discovered on the crypt of most excellent Grand Master Hiram Abiff, grand architect of King Solomon's temple. It is often combined with the square and compass in Masonic symbolism. The Eye of Horus, an ancient Egyptian god, is believed to be the source of many of the modern uses of the eye symbol. Believed to be inspired by the "Eye of God" that appeared in the sky during total eclipses of the sun, the eye was a powerful symbol to the star watching Egyptians. To see an eclipse was to see your God. The ancient Egyptian myth that explains eclipses tells of a cosmic battle between the solar falcon god Horus and the sun eating serpent god Set. The sun's corona, visibly concentrated into the star's equatorial regions, appear around occulting disk of the moon during an eclipse. Appearing like a bird's wings spreading out on either side of the "black sun", the eye represented proof of the existence of the gods to the ancient Egyptians. Many superstitions believe that one can give an evil eye to curse somebody to bad luck and illness. The All-Seeing Eye is one of many forms of reflective eye-charm used as a talisman against this danger. In its specifically protective role, the All-Seeing Eye is always on guard to protect the bearer from evil glances. A similar talismanic function was assigned to the protective Wadjet Eye of Ancient Egypt and the Third Eye of Buddha. The common eye sees only the outside of things, and judges by that, but the 'all seeing eye' pierces through, and reads the heart and the soul, finding there capacities which the outside didn't indicate or promise, and which the other kind couldn't detect." [37]
- The **Eye of Horus** is represented as a figure with 6 parts. These 6 parts correspond to the 6 senses - Thought, Touch, Hearing, Smell, Taste and Sight. These are the 6 parts of the eye. The eye is the receptor of **input**. It has these six doors, to receive data. [38]

- todo: research the true origins of the Kemet-Hyksos-Brotherhood of the Snake history.
  - The Hyksos seem to be but a remnant of a greater set of lost civilizations with a sophisticated culture, and perhaps even global trade/communication networks. Later-Egypt was much less sophisticated, and this can be seen in all the ~90 ancient pyramids build after the Great Pyramid of Giza. So who really build this pyramid? Sun

- Various notes:
  - The true essence of the sun symbolism is its representation of *primordial intellect*, the manifestation of *universal* (cosmic, omnipresent) consciousness which transcends *space-time* and *energy.*
The Human process of harmonizing with this force is called **at-onement**, **illumination** or **enlightenment**. Atonement of a select group of their own initiated members and the **awareness control** of the 'profane' are the core of the activities of these **Luciferian** priesthood societies - ancient and modern.

- Symbol of sexual fertility, gives life to plants, animals, humans. In ancient Canaan the sun-god Baal was worshiped as a fertility deity.
- The Sun is also a symbol of immortality or reincarnation. Just as the sun rises and sets each day, some people believe that you may die and then rise again.
- See also: **Plasma cosmos**, **Solar deity**, **Sun cross**, **Phoenix**.
- "For most people "Zion" is the name for Jerusalem as well as for the nation of **Israel** (Isis-Ra-El). More specifically "Sion" is the name given to a hill of Judea on which the city of Jerusalem is built. In reality, **the name "Zion" refers to "Sion", meaning "Sun". Therefore the name "Zionism" is actually referring to the sun-cult**, the Babylon cult, and f.i. relates to secret societies like the "Priore de Sion" or "Priory of Sion", which lost some of its secrecy because of the fact that the Rennes le Chateau mystery became so popular among certain circles. The Priory of Sion is a secret society created around the Merovingian bloodline (whose ancestors can be traced back to the royals of Sumer, Troy and the Greek "Gods") and related to the Templars as well as the Illuminati." It's particularly because of the true meaning of "Zion", that Jerusalem's hill has been named that way. As for the sun-cult adepts, hills symbolize the way to get closer to their God, due to the fact that at the top of them one is closer to the sun, symbolizing their God. Hence "mount Sion" or "Sun mountain"." [26]

**Christian sun symbolism**

- Various notes:
  - Modern Christianity incorporates Sun worship, and has in many cases been infiltrated and corrupted by Jesuit/Catholic ecumenism and Freemasonry.
  - Many Christians go to church and/or rest on Sunday, while in fact the bible only talks about the Sabbath (Saturday) as God's day of rest at the end of 'his' creation (Genesis).
  - Christmas is celebrated after the winter solstice.
  - Easter is celebrated when daytime overcoming nighttime during the spring equinox.
    - Easter itself comes from East-Star - the star which comes up in the East - meaning the Sun star. In other languages this works as well: (German for example) Ostern: Ost-Stern.
      - Lucifer is known as the "Eastern Star", "Morning Star", "Angel of Light", and "Light Bearer".
      - All Masonic temples and tracing boards face the east because that is where the Sun rises. The "Worshipful Master" resides in the eastern corner of a masonic temple.

Rooster

Various notes:
- "The rooster is a universal solar symbol because its crowing announces the dawn. In India, it is the attribute of Skandha, personification of solar energy. In Japan, its crowing, associated with the songs of the gods, lured Amaterasu, Goddess of the Sun, out of the cave where she had been hiding, corresponding to the manifestation of Light." ... "In Greek tradition Velchanos the Cretan rooster-god was assimilated to Zeus. A rooster was standing beside Leto, pregnant by Zeus, when she gave birth to Apollo and Artemis. Thus the rooster is dedicated to solar gods as well as to lunar goddesses. Moreover, the rooster is the specific attribute of Apollo. A rooster was ritually sacrificed to Asclepios, son of Apollo and god of medicine, because the bird heralded the soul of the dead that it was to guide to the Otherworld. Asclepios is also the god who, by his healing powers, brought the dead back to life on earth. This is precisely the reason why the rooster was also the emblem of Attis, the oriental Sun-God, who died and came to life again. This also explains why the rooster is attributed to Hermes, the messenger who travels the three levels of the cosmos. The rooster, along with the hound and the horse, is among the animals offered in sacrifice in the funeral rites of the ancient Germans. In Norse traditions, the rooster is symbol of soldierly vigilance, posted on the topmost branches of the ash Yggdrasil to warn the gods when the giants, their foes, are preparing to attack. When the bird is set on church spires, it assumes the role of protector and guardian of life. It is also an emblem of Christ, like the eagle and the lamb, symbol of Light and resurrection. In the Book of Job, the rooster is the symbol of God-given intelligence while the ibis is the symbol of wisdom. The Talmud makes the rooster a master of courtesy because it heralds his Lord the Sun with its crowing. In Islam, the rooster enjoys a particular veneration. The Prophet himself asserts that the white rooster is his friend because it announces the presence of the Angel. Moreover, the Prophet is said to prohibit cursing the rooster, which calls to prayer." [29]
- "The rooster is a frequent motif in Maltese idioms: the bird itself is most commonly described as prideful (mkabbar bih innifsu) and arrogant (ġellied)" [30]

- **Nazi black sun:**
  - **Himler** had reorganized the **SS** as a black-magic Order of Knights (Order of the Silver Star, see also: Argenteum Astrum) after the pattern of the Jesuits or even the Illuminati order. **The SS had taken over some very special magic rites from the freemasons, but some rituals were taken straight from the Knights Templar.** SS members wore carefully designed black uniforms featuring an old magic symbol - silver skulls. The symbols were also found on magic rings. This was suggested by Himmler's personal magician, the SS Brigadenfuehrer Karl Maria Wiligut (1866-1946), who was also known under the alias K. M. Weisthor (Nicholas Goodrick-Clarke, "The Occult Roots of Nazism", St Petersburg, 1993, p. 197). In 1924-1927, Wiligut had been treated in a mental hospital in Salzburg. The double S, or sun runes, resembled two lightning bolts. The leadership demanded very high standards of its members. **SS officially stood for 'Schutzstaffeln' (guard corps), but the real meaning was Schwarze Sonne - the black sun.** Himmler was the grand master. The SS headquarters were at **Wewelsburg** castle in Westphalia (northwestern Germany), which Himmler bought as a ruin in 1934 and rebuilt the next 11 years at a cost of 13 million marks and turned into a temple for his SS cult." - from "Architects of Deception" (p. 427). Over the years, it expanded to a whole week, up to 23 December. In the vagaring Roman calendar the Winter Solstice fell in this period; in imperial times that event was celebrated in honour of Sol Invictus and put on 25 December by emperor Aurelian in 274, so after the Saturnalia."

Note: So we have Saturn-Venus-Sun. We know that Saturn is the spoked god and the sun is the god with light rays. We know that Venus is Isis, the Sun is Horus and Saturn is Seth.

The sun induced the time (seasons) so the word "Hor" refers to time. Like in horoscope. Horoscope is the zodiac. Hours comes from horus. All this comes together in the Jesuit Order seal. [24]

5-pointed star

- Various notes:
  - Alternative names: Pentagram
  - Numerology: 5
  - Masonic cults:
"The five-pointed star, known as the pentagram, is probably the most blatant occult symbol in use today. Witches Janet and Stewart Farrar explain that the five-pointed star is "one of the main symbols of witchcraft and occultism in general" ('Hidden Secrets of the Eastern Star' p. 82). The star itself is known by different names throughout the occult world, such as a witch's foot, a goblin's cross, a wizard's star and the dog star. Wiccan witches use its five points to mystically represent the elements of nature, earth, fire, water, air and spirit. This symbol is one of the most prominent emblems within Freemasonry, though its significance, like every symbol inherited from the occult, is concealed behind a smokescreen of secret society ambiguity. The five-pointed star is found on most Masonic memorabilia and represents the blasphemous resurrection rite of the five points of fellowship, each point mystically symbolizing a part of the resurrection act. First - Foot to foot. Second - Knee to knee. Third - Hand in hand. Fourth - Breast to breast. Fifth and last - Left hand behind back." [11]

The Pentagram has magical associations, and many people who practice pagan faiths wear them. Christians once commonly used the pentagram to represent the five wounds of Jesus, and it also has associations within Freemasonry. The pentagram has long been associated with the planet Venus, and the worship of the goddess Venus, or her equivalent. It is also associated with the Roman Lucifer, who was Venus as the Morning Star, the bringer of light and knowledge. It is most likely to have originated from the observations of prehistoric astronomers. When viewed from Earth, successive inferior conjunctions of Venus plot a nearly perfect pentagram shape around the zodiac every eight years."

**7-pointed star**

- Various notes:
  - Alternative names: Heptagram (or "septagram"), Heptagon
  - Numerology: 7
  - "The septagram is important in Western Kabbalah, where it symbolizes the sphere of Netzach, the seven planets, the seven alchemical metals, and the seven days of the week." "The acute heptagram is also a symbol of magical power in other Pagan religions. The obtuse heptagram was used as a symbol in the Kabbalah, and later by Aleister Crowley and the Ordo Templi Orientis (OTO) where it was known as the Star (or Seal) of Babylon. The heptagram is also used in Christianity to symbolize the seven days of creation and became a traditional symbol for warding off evil, thus the reason that most sheriff's badges are obtuse heptagonal shaped. Also the symbol of perfection (or God) in many Christian religions."

8-pointed star

- Various notes:
  - Octagram
  - Numerology: 8
  - Also known as the Chaos Star (see also: Ordo ab Chao - "Out of chaos, order").
    - "I should explain perhaps why the eight spoke wheel is so important. In the sky there is a great cross that seems stationary, and its formed by the center of the Milky Way galaxy and from the center point of our celestial equator to the southern point of the celestial equator, that's the divine cross. Down here on the ground we have the mundane cross that is formed by the angles between equinox and the solstice and so forth, so the eight armed cross, the eight rayed star, the 8 spoke wheel...all represents the alignment in space and time of the divine cross above and the terrestrial mundane cross below. Now curiously enough this alignment only happens once every 13,000 years. These crosses have not aligned since 11,000 B.C., roughly 13,000 years ago." [13] (edited)
    - See also: Great year - which is one complete cycle of the precession of the equinoxes, about 25,765 years.

  - Various notes:
    - "Ashlar is dressed stone work of any type of stone. Ashlar blocks are large rectangular blocks of masonry sculpted to have square edges and even faces." ... "Ashlars have symbolic meaning for Freemasons and those in masonic schools used as a metaphor for states of progress. In Freemasonry, the ashlar comes in two forms: the rough ashlar represents a rough, unprepared or undressed stone, and is an allegory of the uninitiated Freemason prior to his discovering enlightenment; the smooth ashlar represents the dressed stone as used by the experienced stonemason, and is an allegory of the Freemason who, through education and diligence, has achieved enlightenment and who lives an upstanding life."
    - "The general shape of a V character, or a triangular shape pointing up or more often, down." [14]
    - This is actually represents a 3 dimensional shape, not a 2 dimensional one. It represents 2 squares, one on top of the other, symbolizing the idea of one entity controlling the other.
    - "The symbol is two three-dimensional boxes (one on top of the other) with the higher box representing the secret societies literally "on top" of and regulating civilization (the lower box). The colors blue and red are also a reference to the blue and red degrees of Masonry." [15]

  o The Enneagram is used in the field of Neuro-linguistic programming:
    - Enneagram of Personality: "The Enneagram system describes nine distinct personality types and their interrelationships, mapped around an ancient symbol of perpetual motion. This is now the most well-known use of this particular enneagram figure." [16]
    - "The enneagram is an ancient technique for self-development that can be very useful in communication. The symbol for the eneagramm is a circle with 9 points, symbolising the 9 types. In short, with the Enneagram we get to 9 types of personality." ... "The choice of strategy is in fact strongly influenced by the so-called ennea type. In a few moments we can look at a person, discover, through appropriate questioning, his type and at the same time we have discovered his strategy. The second connection is with chinese elements and types of personalities. Both can be linked together in a unique framework." [17]
    - "Dr. Marco Paret has in fact developed a whole set of new patterns that interweave hypnotic communication techniques with NLP. Also, he has conducted an in-depth study of the Enneagram and its applications in a modern perspective. He has also developed a new didactic method for teaching languages which differs from that of classical suggestopedy. Inspired by hyddned-traditions, he has also created various interesting modellings, the most significant of them being the Eneagramm sensory-based model (Instant Enneagram) and the techniques pertaining states-of-consciousness. Along the years, Dr. Paret has held many conferences in the USA as well as other countries, thus meeting most of the leading american hypnotists. He has been often invited to italian television shows as an expert in hypnosis and NLP. " [18]

  - Its a known Masonic symbol that dates to the Medieval Ages and the Knights Templar. It is not an ancient Christian symbol.
  - "In the Masonic Report, we make this discovery: Question: What does Masonry's emblem of the 'Cross and Crown' actually symbolize?" Answer: "The 'Cross' of Freemasonry is a philosophical cross, according to Albert Pike, 'Morals and Dogma', p. 771. It is philosophical in the sense that it [also] represents the "generating fecundating principle" by the perpendicular shaft [Phallus], and the matrix of womb of nature, the female producing principle [Female Vulva], by the horizontal shaft. The philosophy of the Masonic cross is totally phallic. The 'Crown' of this Masonic emblem is also phallic, it being the first emanation of the

- Various notes:
  - Hermes is one of the twelve Olympian gods (the "Dodekatheon"), which were the principal gods of the Greek pantheon, residing atop Mount Olympus. Hermes was the god of boundaries and of the travelers who cross them, of shepherds and cowherds, of thieves and road travelers, of orators and wit, of literature and poets, of athletics, of weights and measures, of invention, of general commerce, and of the imagineing of thieves and liars. His symbols include the tortoise (patience/time/wisdom?), the rooster (sun symbolism/primordial intellect), the winged sandals (spiritual/enlightenment), and the caduceus (priesthood magic). The analogous Roman deity is Mercury. [1] (adapted)
  - In Etruscan mythology, Turms was the equivalent of Greek Hermes, god of trade and the messenger god between people and gods.
  - In Roman mythology, Mercury was a messenger, and a god of trade, profit and commerce, the son of Maia Maiestas and Jupiter. His name is related to the Latin word merx ("merchandise"; compare merchant, commerce, etc.).

Pan

- Various notes:
  - Pan (Greek Πάν, genitive Πανός) is the Greek god of shepherds and flocks, of mountain wilds, hunting and rustic music: paein means to pasture. He has the hindquarters, legs, and horns of a goat, in the same manner as a faun or satyr. He is recognized as the god of fields, groves, and wooded glens; because of this, Pan is connected to fertility and season of spring.
  - Pan's ancient Roman equivalent was Faunus, and they were both horned god deities. For this reason he is popular among many Neopagans and occultic groups.
"It is likely that the demonized images of the incubus and even the horns and cloven hooves of Satan, as depicted in much medieval and post-medieval Christian literature and art, were taken from the images of Pan." [2]

Demons

Incubus

- Various notes:
  - In Western medieval legend, an incubus (plural incubi) is a demon in male form supposed to lie upon sleepers, especially women, in order to have sexual intercourse with them. It was believed to do this in order to spawn other incubi. The incubus drains energy from the woman on whom it performs sexual intercourse in order to sustain itself,

    - "As far as I can tell, the first modern references to "The Brotherhood of the Snake" to be taken very seriously were made by the great William Cooper. He thought of the Brotherhood of the Snake as the source of all ancient mystery societies and the secret source of, above all, the Eleusinian Mysteries. The cults of Ra, Osiris, Orpheus, Isis, Dionysus, etc. were, in Cooper's view, partially corrupted emanations of this great Original Mystery. Cooper also felt that the original Bavarian Illuminati as conceived and founded by Weishaupt was little more than a front for The Brotherhood of the Snake. By extending this line of reasoning, we could say that all relevant Secret Societies even in the 21st century are emanations of, and perhaps even fronts for, this original secret society." [21]

Biscione

- **Biscione**: "(Italian for 'large grass snake'), also known as the Vipera ('viper' or in Milanese as the Bissa), is a heraldic charge showing in Argent an Azure **serpent in the act of consuming a human; usually a child and sometimes described as a Moor**. It has been the emblem of the Italian Visconti family for around a thousand years. Its origins are unknown. However it has been claimed that it was taken from the coat of arms of a Saracen killed by Ottone Visconti during the crusades. The biscione appears also in the coats of arms of the House of Sforza, the city of Milan, the historical Duchy of Milan and Insubria. It is also used as a symbol or logo by the football club Inter Milan, by Alfa Romeo and, in a version where a flower replaces the child, by Fininvest."

**Phoenix**

• Various notes:
  - "In **ancient Egyptian mythology** and in myths derived from it, the phoenix is a **mythical sacred firebird**. Said to live for 500, 1461 or for 12594 years (depending on the source), the phoenix is a **male bird with beautiful gold and red plumage**. At the end of its life-cycle the phoenix builds itself a nest of cinnamon twigs that it then ignites; both nest and bird burn fiercely and are reduced to ashes, from which a **new, young phoenix arises**. The new phoenix embalms the ashes of the old phoenix in an egg made of **myrrh** and deposits it in **Heliopolis** ("**the city of the sun**" in Greek), located in Egypt. The bird was also said to **regenerate when hurt or wounded by a foe, thus being almost immortal and invincible** - a symbol of fire and divinity. Although descriptions (and life-span) vary, the phoenix became popular in early Christian art and literature as a symbol of the resurrection, of immortality, and of life-after-death. **Originally, the phoenix was identified by the Egyptians as a stork or heron-like bird called a benu, (see **Bennu**), known from the **Book of the Dead** and other Egyptian texts as one of the sacred symbols of worship at Heliopolis, closely associated with the rising sun and the Egyptian sun-god Ra." Peacock

- Various notes:
  - In general, the Peacock is representative of glory, immortality, royalty, and incorruptibility. It is a possessor of some of the most admired human characteristics, and is a symbol of integrity and the beauty that can be achieved when we endeavor to better ourselves and better our lives. "Symbolic Meaning of Peacocks"
  - In Greco-Roman mythology the Peacock is identified with Hera (Juno) who created the Peacock from Argus whose hundred eyes (seen on the tail feathers of the Peacock) symbolize the vault of heaven and the “eyes” of the stars. In Hinduism the Peacock is associated with Lakshmi who is a deity representing benevolence, patience, kindness, compassion and good luck. Similar to Lakshmi, the Peacock is associated with Kwan-yin in Asian spirituality. Kwan-yin (or Quan Yin) is also an emblem of love, compassionate watchfulness, good-will, nurturing, and kind-heartedness. Legend tells us she chose to remain a mortal even though she could be immortal because she wished to stay behind and aid humanity in their spiritual evolution. In Babylonia and Persia the Peacock is seen as a guardian to royalty, and is often seen in engravings upon the thrones of royalty. In Christianity the Peacock symbolism represents the “all-seeing” church, along with the holiness and sanctity associated with it. Additionally, the Peacock represents resurrection, renewal and immortality within the spiritual teachings of Christianity. Themes of renewal are also linked to alchemical traditions to, as many schools of thought compare the resurrecting phoenix to the modern-day Peacock. [25]

This sacrificial tradition represents the domination of the 'elite' over the potentials of the 'common' people.
    - Televised sport events are one modern variant of this occult tradition. The 'elite' know many people want to align themselves with the dominators (winners), not the suppressed (losers). They hypnotize and pacify people with simple systems of glorified male competition and domination. A politically harmless, commercial venting system for the boredom and anger of many people - especially 'lower-class' young males.

- "The Merovingian kings were noted sorcerers in the manner of the Samaritan Magi, and they firmly believed in the hidden powers of the honeycomb. Because a honeycomb is naturally made up of hexagonal prisms, it was considered by philosophers to be the manifestation of divine harmony in nature. Its construction was associated with insight and wisdom - as detailed in Proverbs 24:13-14: “My son, eat thou honey, because it is good... So shall the knowledge of wisdom be unto thy soul..." To the Merovingians, the bee was a most hallowed creature. A sacred emblem of Egyptian royalty, it became a symbol of Wisdom. Some 300 small golden bees were founded stitched to the cloak of Childeric I (son of Meroveus) when his grave was unearthed in 1653. Napoleon had these attached to his own coronation robe in 1804. He claimed this right by virtue of his descent from James de Rohan-Stuardo, the natural son (legitimized in 1667) of Charles II Stuart of Britain by Marguerite, Duchesse de Rohan. The Stuarts in turn were entitled to this distinction because they, and their related Counts of Brittany, were descended from Clodion’s brother Fredemundus - thus (akin to the Merovingians) they were equally in descent from the Fisher Kings through Faramund. The Merovingian bee was adopted by the exiled Stuarts in Europe, and engraved bees are still to be seen on some Jacobite glassware." - from "Bloodline of the Holy Grail" by Laurence Gardner
- "Freemasonry & bees":
  - "The bee and the hive have long been symbols of industry and regeneration, wisdom and obedience, with a place in Egyption, Roman and Christian symbolism. The hive is often seen in Masonic illustrations of the 18th and 19th century and both Clovis and Napoleon adopted the bee as their symbol. Although "the bee was among the Egyptians the symbol of an obedient people, because, says Horapollo, 'of all insects, the bee alone had a king.’1, its use in Freemasonry was secondary to any number of other symbols based on the working tools of a stone mason. "Looking at the regulated labor of these insects when congregated in their hive, it is not surprising that a beehive should have been deemed an appropriate emblem of systematized industry. Freemasonry has therefore adopted the beehive as a symbol of industry, a virtue taught in the instructions"

**Pine cone**

- Various notes:
  - The pine cone, on the tree of life, slowly ripens the conifer's female seeds, and in the later stages the cone opens up to release its matured seeds. This process symbolizes the expansion of consciousness together with its seeding effect on other people and culture. Note how the cone at the Vatican (see below) is immature and therefore unopened - just the way they want it!
  - "In Greek mythology, a Thyrsus (thrysos) was a staff of giant fennel (Ferula communis) covered with ivy vines and leaves, sometimes wound with taeniae, and always topped with a pine cone. Where these emblems were, there was the spirit of Dionysus also. Euripides wrote that honey dripped from the thyrsos staves that the Bacchic maenads carried. It was a sacred instrument at religious rituals and fetes." [8]
  - "The pine and its cone is a symbol of the rebirth cycle, eternal life etc. and therefore the sun and the Amanita mushroom ("phoenix") with the enlightenment it brings when you experience the shamanic spiritual death/rebirth from its drug effects (the 'gateway' to the other realm, polarity unification, Venus etc) The Amanita grows under the pine tree. Our red and white 'presents' under the xmas tree. The pine cone is hanging in the branches, perhaps then also a direct symbol of the drying mushroom, like the Church would hang the eucharist on their xmas trees inside the churches and we hang our xmas ornaments on the pine tree to symbolise the Amanita. Which is why the pine cone is seen with the snakes like that. And why it is associated with IHS (Bacchus/Dionysos), the mystery god of inebriation, and his 'thyrsus', connected to both Demeter and her shroomy Eleusinian Mysteries aswell as the Orphic Mysteries." "The Fountain of the Pine-cone" (1927)

This fountain sits in front of San Marco church, one of Rome's oldest churches (4th century).

Pigna ("pine-cone") refers to a famous bronze sculpture of Roman origin, in the shape of a huge pine-cone. According to a popular mediaeval legend, it once stood on top of the Pantheon, as a lid for the round opening in the center of the building's vault. Instead, the sculpture is likely to have been used as a fountain in the Baths of Agrippa, Rome's earliest ones (late 1st century BC), which stood just behind the Pantheon's site. In the early Middle Ages the pine-cone was moved to the old St.Peter's basilica, and placed in the court before the church, to be used again as a fountain.

  - This is an *entheogenic* plant (see also this video).
    - "It was considered extremely significant in *Egyptian mythology*, since it was said to rise and fall with the *Sun*. Consequently, due to its colourings, it was identified, in some beliefs, as having been the original container, in a similar manner to an *egg*, of *Atum*, and in similar beliefs *Ra*, both *solar deities*. As such, its properties form the origin of the lotus variant of the *Ogdoad* cosmogeny. It was the *symbol of the Egyptian deity Nefertem*." [10]

• Various notes:
  o In Ancient Egypt:
    ▪ (todo), see also: Sacred blue lily.
  o Ancient south american culture:
    ▪ "Mochica erotic pottery is fascinating, not only due to the vast number of sexual activities represented, but also because procreative coitus was only depicted in a limited number of circumstances when the male involved wore ceremonial garb, the female had two braids which ended in snake's heads, and the copulation occurred under an elaborate roof of a ceremonial building. In these scenes of procreative sex, additional figures are always depicted watching the couple in the building and holding their hands as though in supplication. The precise meaning of this has never been established."
  o In Ancient Greece:
    ▪ "Orgion was a secret rite of the Greek Mystery religions, practiced in the worship of Demeter at Eleusis (mentioned in the Homeric Hymn to Demeter) or in worship of Dionysus (Herodotus 2.81), the Cabeiri, Demeter Achaia (Herodotus 2.51, 5.61), Orpheus, Eumolpus, or Cybele. The term could also refer to rites or sacrifices in general, the verb ὀργίαζω denoting ritual celebration." [6]

Squares

- Various notes:
  - The square symbolism (in part) seems to symbolize that which is formed by the human intellect - nothing in nature creates such a shape. More specifically, in freemasonry the square stands for the perfect molding of a person against its natural shaping. A state-of-mind which fits more easily into a control structure together with the other 'square minded' masons. No individual mason is truly important, its the overall social structure and execution of "The Great Work" or "The Plan" that is important. The Jesuit Order and many other fascistic orders follow a similar path of molding the individual (a spiraling cycle of: neurosis -> deceit -> self destruction -> group-think construction), until the Mason denies his personal sovereignty by
assimilating all the indoctrinated value dogma's and the constricted thought and emotional mechanisms.

- In Freemasonry, you are a "square man" and you do things "by the square".
  - Square mathematics:
    - Squaring the circle

Checkerboard

- Various notes:
  - Most masonic lodges have checkerboard floors. This goes back to King Solomon's Temple having a checkerboard floor. It is known in freemasonry as the "Checkerboard of Joy".
  - Many board games (which are games of the mind - mind games!) consist of black and white squares (often forming a larger square!). These game have overlayed rules which dictate the allowed movement by the players. Who makes the games? Who makes the rules? Who is allowed to play?

- Various notes:
  - The oblong square is well-known in masonic circles.
    - *The form of a masonic lodge is said to be a parallelogram, or oblong square;* its greatest length being from east to west, its breadth from north to south. A square, a circle, a triangle, or any other form but that of an oblong square, would be eminently incorrect and un-masonic, because such a figure would not be an expression of the symbolic idea which is intended to be conveyed.* [30]
    - In Freemasonry, you stand before the "Worshipful Master" with you body erect and your feet forming the angle of an oblong square.
  - Sassanid architecture: "The principal peculiarities of the style are, first, that the plan of the entire building is an oblong square, without adjuncts or projections" ... "The oblong square is variously proportioned. The depth may be a little more than the breadth, or it may be nearly twice as much."
  - Geometry/Mathematics:
• "Pythagorean Figured Numbers: Oblong, Square, Triangular"
• "The 47th Problem of Euclid"
  • "It might also be considered that the oblong square, which is two 3, 4, 5 triangles sharing a common diagonal, may express a reflective relationship between the celestial and the earthly, such as that embodied in the Hermetic theosophy that the earthly plane is a reflection of the Divine ("That which is above is like to that which is below, and that which is below is like to that which is above."

- The **tassel**: "In U.S. graduation ceremonies, the side on which the tassel hangs is important. Sometimes it is consistent among all students throughout the ceremony, in other cases it differs based on level of study with undergraduate students wearing the tassel on the right, and graduate student wearing them on the left. In some ceremonies, the student wears the tassel on one side up until reception of the diploma, at which point it is switched to the other. At the high school level, the tassel is usually either the school's primary color or a mix of the school's colors, as many as three colors in a tassel. Universities in the United States might use tassels in black or the school's colors, usually for higher degrees. For Bachelor degrees the tassel may be colored differently from the traditional black or school colors to represent the field in which the wearer obtained his or her education. In 1896 most colleges and universities in the United States adopted a uniform code governing academic dress. The tassel may be adorned with a charm in the shape of the digits of the year."

(b. 1708 - d. 1781)

Founder of the infamous and notorious Hellfire Club in England. Quite possibly a Jacobite secret agent. Rumored to have also been involved in the Rosicrucian movement and Freemasonry.

The Hellfire Club was a secret society which engaged in depraved sexual orgies, drunkenness, Satanism, and held Black Masses. Members included prominent men of the British aristocracy, and the most influential politicians of the day.

In 1883, after 8 years as Commander-in-chief of the U.S. Army, Freemason and General George Washington bid sad farewell to his brothers in arms at New York.

Hidden hand

- Various notes:
  - The "hidden hand" sign, is the sign of Jah-buh-lun (Jahbuhlun), the sacred God of Masonry. Jahbuhlun is known to the Masons as the "The Lost Name of God".
  - When the Mason learns of the "The Lost Name of God", it is in receiving the 13th degree in the Scottish Rite or the 7th degree for the York Rite (known as the Mason of the Secret, or the Royal Arch degree [58]). This name of the Masonic God is so sacred it takes three Royal Arch Masons to be able to speak it.

The "three times three" position, which is assumed by the three Masons preforming the ritual of the Royal Arch Degree, in which they utter the name of the Masonic God - Jah-buh-lun.

- Masonic notes:
  - Jahbuhlun is Masonry's "Grand Omnific" word, the name of their omnipotent deity. The name Jahbuhlun has nine letters and is made up of three syllables, Jah, buh, lun. In the ritual for the Royal Arch Degree, the three Royal Arch Masons pronounce the name three times each, therefore, twenty-seven syllables are pronounced. This represents the twenty-seven days it takes the moon to pass through the circle of zodiacal signs.
  - The name Jahbuhlun has three syllables representing a composite God made up of three subordinate deities. The Masonic material identifies the three as Yah (or Yahweh), Baal, and Osiris or On (spelled Un in the name Jahbuhlun). On was a city in Egypt where the worship of the sun God, Osiris, is alleged to have begun. Logically, the name should be spelled Yah-Baal-On, but Duncan's Masonic
Ritual and Monitor admits that over the years the spelling has been "corrupted" by Freemasonry until it reached its current form.

- The three Masons grip hands high and low and chant, "Jah-buh-lun, Jah-buh-lun, Jah-buh-lun, Je-hov-ah". These three Masons pronouncing the name of Jahbuhlun are said to have come from Babylon. The candidate is told that these three "Masters" or "Sojourners" have come from Babylon to instruct him on how to symbolically build the Royal Arch. (Temple of Solomon in Jerusalem). According to Duncan's Masonic Ritual and Monitor, the candidate presents the hidden hand of Jahbuhlun when he is approached by the three "Sojourners" from Babylon.

- The three Masons performing the ritual, are in a position known as "three times three". They have their three right feet forming a triangle, three left hands forming a triangle, and three right hands forming a triangle. It is while in this position each repeats the name of Jahbuhlun.

- The official Masonic explanation for hidden hand sign of Jah-buh-lun, is that it comes from a passage from the fourth chapter of Exodus in the Bible:
  - "And the Lord said unto Moses, put now thine hand into thy bosom; and he put his hand into his bosom; and when he took it out, behold his hand was leprous as snow."

For additional information, about the hand sign of Jahbuhlun and the ritual of the Royal Arch Degree, go here.

There is no direct proof that Jay was a Freemason. However, in a letter to George Washington on April 21st, 1779 he wrote the following text which

Washington visited several lodges and attended many Masonic functions. His correspondence has many references to Freemasonry.

In a 1791 letter to members of St. David's Lodge in Newport, Rhode Island, Washington stated: "..I shall always be happy to advance the interests of the Society, and to be considered by them as a deserving Brother."

And in a 1798, letter to the Grand Lodge of Maryland: "So far as I am acquainted with the doctrines and principles of Freemasonry, I conceive them to be founded in benevolence, and to be exercised only for the good of mankind. I cannot, therefore, upon this ground, withdraw my approbation from it." [12]

**Cosmos signal**

- Various notes:
  - Alternative names: "Dragon symbol of the Cosmos", "Cosmos signal", "Throwing the Cosmos".
  - To process: [59]
  - "Remember if we take a side on look at this Dragon symbol of Cosmos, we find it looks like a six. The six of Saturn the Masculine Dragon, otherwise known as El or the Anti-Christos 666 Beast. The very enemies of the 888 Jesus Christ. **We can see this Cosmos signal as a 66** which itself is Idol Worship. Something forbidden by God Adonai in the real ten commandments. The anti-Christos Catholic continuation of Rome and Nimrod removed that second commandment. They then split the tenth into two in order to make up the ten commandments. This all reminds me of this a-okay symbol which is in fact the **666**. If we take the Cosmos signal again but this time separate the two vertical fingers into a Astarte 'V' what do we have? We have the occult symbolism for the masonic 'Law of Five' veiled in profane nonsense such as victory. Note how with one same hand signal we can have both the six and the five? The masculine and feminine energy of El and Astarte in one. Just like the circle from the Goddess **Circe**, the upper half feminine, the lower half is masculine. If we add these two numbers together we get the **eleven** of **Boaz and Jachin** (two pillars) and Judgement! Now if we just have a six and five next to one another we have the number for water representing the currency of Yarikh and Astarte the feminine. If we reverse this to five and six then we have the number of Yarikh herself." - **Craig Oxley**
