Reliable, Durable Position Sensing

GO Switch leverless limit switches provide reliable, durable position sensing in the most demanding plant conditions. Unlike mechanical limit switches or inductive proximity sensors, GO Switches use a unique hybrid technology that eliminates wear and tear. As a result, GO Switches are more dependable and last longer in the toughest applications.

The GO Switch Difference

- **Unique hybrid technology**
  GO Switch’s one-of-a-kind technology combines the best attributes of limit switch and proximity sensor technologies to outperform them both. GO Switch’s patented leverless limit switch design offers high current ratings, AC/DC and NO/NC wiring flexibility, no-touch sensing, and global certifications to provide the ultimate performance in position sensing.

- **Proven reliability in a variety of industries**
  For over forty years, GO Switches have provided mission-critical position sensing in the automotive, cement, chemical, diecasting, food & beverage, hydrocarbon, manufacturing, mining, oil & gas, petrochemical, power generation, pulp and paper, steel & aluminum, tire & rubber, and water & wastewater industries.

- **Durability when it matters most**
  GO Switches last longer than limit switches and proximity sensors in plant conditions that are extremely hot, cold, wet, dirty, abusive, corrosive, and explosive.

Please see the following literature for more detailed information:

**Factory Automation**

**Process Automation**
TopWorx Catalog

Hazardous Areas
GO Switches are certified for use in Zone 0 (intrinsically safe), Zone 1 (explosion proof), and Zone 2 (non-incendive) hazardous areas.
Wet Environments
GO Switches keep moisture out – whether it’s cutting fluids, washdown solutions, salt water, or even continuous submersion to 21,000 feet.

Corrosive Conditions
GO Switches withstand caustics, corrosives, salt sprays, and chemical compounds.

Abusive Applications
GO Switches last longer in abusive applications – even in temperatures ranging from -40°F/-40°C to 400°F/204°C.
GO Switches outperform conventional limit switches and proximity sensors in the toughest applications. Virtually all GO Switches offer the following features and benefits:

GO Switch Quick Selection Guide

Industrial Environment
- General Purpose
- Intrinsically Safe Zone 0 (Class I, Div 1)
- Explosion Proof Zone 1 (Class I, Div 1)
- Non-Incendive Zone 2 (Class I, Div 2)
- Underwater
- High Temperature

Square Position Sensors
- Model 21 Side Sensing
- Model 35 Valve Position Sensor

Round Position Sensors
- Model 71 3/8" diameter
- Model 81 DPDT

Common Features & Benefits
- Model 71 Long Range
- Model 72 3/8" diameter
- Model 31 End Sensing
- Model 35 Valve Position Sensor
Features
- Proximity triggering with ferrous metal - no exposed moving parts
- Immune to electrical noise, weld fields, and radio frequency interference
- Consume no power to operate
- Can be wired AC or DC, N/O or N/C, in series or parallel
- All-metal housings with contacts potted and sealed from the environment
- Multiple wiring options, including lead wires, cables, quick disconnects, etc.
- A wide variety of hazardous area certifications for Zone 0, 1, and 2
- Operating temperatures ranging from -40°F/-40°C to 400°F/204°C.

Benefits
- Eliminate broken or bent lever arms, poor mechanical alignment, and poor repeatability
- Eliminate electrical problems common to inductive proximity sensors
- Eliminate leakage current and voltage drops
- Flexibility to cover a variety of application needs with fewer part numbers
- Performance is not affected by dust, dirt, moisture, or most caustics, corrosives, or chemicals
- Easy installation and seamless integration into your existing plant wiring standards
- Compliance with intrinsically safe, explosion proof, and non-incendive requirements
- Ability to monitor plant processes in areas too hot or too cold for conventional sensors
10-20 Series

GO Switch Models 11 and 21 are the world's original leverless limit switches.

Their simple design, rugged enclosures, long sensing ranges, and global approvals make these switches the ideal choice wherever reliable position sensing is needed.

**Features:**
- SPDT 10 amp contacts
- AC/DC, NO/NC flexibility
- Side Sensing
- Brass or Stainless enclosures
- -40° to 221°F operating temperature

**Options:**
- Zone 0, 1, or 2 hazardous areas
- -40° to 350°F high temperature
- Quick disconnect connector
- Underwater capabilities
35 Series
The GO Switch Model 35 leverless limit switch has set the standard for reliable performance in valve position monitors.

With its hermetically sealed contacts, excellent repeatability, and superior resistance to vibration, moisture, contaminants, abuse, and temperature extremes, the GO Switch 35 clearly out performs any other valve position sensor on the planet.

When ordering valve position monitors and switchboxes, be sure to specify “GO Switch Inside.”

80 Series
The GO Switch Model 81 offers end sensing and an optional Double Pole Double Throw contact arrangement.

With its brass or stainless steel housings and global certifications, it is a popular choice around the world.

Features
- SPDT 4 amp contacts
- AC/DC, NO/NC flexibility
- Hermetically Sealed contacts

Features:
- SPDT or DPDT 10 amp contacts
- End Sensing
- Brass or Stainless housings
- -40° to 221°F operating temperature

Options:
- Zone 0, 1 or 2 hazardous areas
- -40° to 350°F high temperature
- Quick disconnect connector
- Underwater capabilities

Models 11, 21 & 81

Models 31, 32, 33 & 35
Round Sensors

With their stainless steel sensing faces, flexible AC/DC, NO/NC, and SPDT/DPDT contact configurations, superior corrosion resistance, and global approvals for all hazardous areas, 70 Series GO Switches outperform inductive proximity sensors in the toughest applications.

Models 71-72

GO Switch Models 71 and 72 have the smallest diameters of any round leverless limit switches, and are used extensively in factory automation applications.

Features:
- SPDT 4 amp contacts
- AC/DC, NO/NC flexibility
- Stainless steel housings
- -40° to 221°F operating temperature

Options:
- Zone 0, 1, or 2 hazardous areas
- -40° to 400°F high temperature
- Quick disconnect connector
- English or Metric threads

End sensing range can be extended using external target magnets.

Permanent magnets never lose their strength, even when threaded into ferrous metal.

Sensing face is stainless steel rather than plastic, preventing damage due to incidental physical contact.

Three magnets provide snap action and solid contact pressure, eliminating ‘contact teasing’ and ‘contact chatter’ in high vibration applications.

English or metric threads available.

Unique sawtooth contacts are suitable for high and low electrical loads, and can be wired AC or DC, N/O or N/C.

Sealed contact chamber prevents moisture or dust from reaching the contacts.

Potting fills the entire switch cavity, forming a barrier against moisture.

Consumes no power to operate and has no current leakage or voltage drop.

Multiple wiring options:
- Lead Wires
- Cable
- Quick Disconnects
Models 73-77
The GO Switch Model 73 is our most popular leverless limit switch. Its solid stainless steel construction and global certifications make it the ideal choice for a variety of applications. Model 74 is the same, without the conduit hub. Models 75, 76, and 77 are longer, with more thread surface and adjustability.

Features:
- SPDT 4 amp contacts
- AC/DC, NO/NC flexibility
- Stainless steel housings
- -40° to 221°F operating temperature

Options:
- Zone 0, 1, or 2 hazardous areas
- -40° to 400°F high temperature
- Quick disconnect connector
- Underwater capabilities
- English or Metric threads

Models 7G-7I & 7L
GO Switch Models 7G, 7H, and 7I offer hermetic seal or Double Pole Double Throw contact configurations. Model 7L has LEDs for local performance monitoring.

Features:
- SPDT or DPDT contacts
- AC/DC, NO/NC flexibility
- Stainless steel housings
- -40° to 221°F operating temperature

Options:
- Zone 0, 1, or 2 hazardous areas
- -40° to 400°F high temperature
- Quick disconnect connector
- Hermetically sealed contacts
- English or Metric threads

Ordering Guide
Valve Sensors

The GO Switch 35 Series has set the standard for reliable performance in valve position monitors.

With hermetically sealed contacts, low hysteresis, and super resistance to vibration, moisture, contaminants, and temperature extremes, the 35 Series clearly outperforms any other valve monitoring switch or sensor available.

When ordering valve position monitors and switchboxes, be sure to specify “GO Switch inside.”

Cylinder Position Sensors

With their stainless steel housings and sensing faces, probe lengths up to 5”, high temperature capabilities, and 3,000 PSI pressure ratings, Stroke-to-GO cylinder position sensors deliver the ultimate in reliable and durable cylinder position sensing.

Features:
- SPDT 4 amp contacts
- AC/DC, NO/NC flexibility
- Stainless steel housings
- 3,000 PSI operating pressure
- -40° to 221°F operating temperature

Options:
- -40° to 400°F high temperature
- Quick disconnect connector
- Underwater capabilities
- LED indication
Power Industry Solutions

GO Switches are the ideal solution for troublesome limit switch applications in power plants, including coal and ash handling equipment, soot blowers and wall blowers, dampers, igniters, feedwater heaters, and hopper, water demineralization, and scrubber valves.

Defender™ Turbine Trip Monitors

The Defender provides dependable position monitoring of throttle, governor, intercept, and reheat stop valves.

It is packed with up to ten GO Switch leverless limit switches and is a drop-in replacement for existing limit switches on Westinghouse valves, and is adaptable to valves from General Electric and others.

Features:
- Easy switch setting
- Switches rated to 400°F/204°C
- Mil spec quick disconnect

NuProx™ Nuclear Qualified Proximity Sensors

NuProx leverless limit switches are ideal replacements for expensive mechanical limit switches in nuclear applications.

Longer life, no-touch sensing, tighter deadband, and better pricing make this a must upgrade for nuclear power facilities.

Features:
- Proven GO Switch technology
- Qualified for containment and balance of plant
- No external moving parts to bend, break, or wear
- No power, contact, or torque required to operate

Turbine Trip Switch
