IP address detection and web management

On your phone, press the following keys:

- “Menu” softkey on the lower right
- “1” on numeric keypad (Status)

The status panel will now show your phone IP address. Should it be too long to fit in one line on smaller display (e.g., 192.168.110.123 vs 10.10.10.10) it will automatically scroll. Let's call such IP “ip_address”

- open a web browser to the URL: http://ip_address
- insert the default “admin” username and password and press “Confirm” button

User account configuration

Let's assume the followings:

Your PBX company domain is **mycompany.com:5061** (chosen when you created your PBX account)
Your PBX hostname is **myserver.cluana.com:5061** (provided by Cluana)
Your IP Phone User ID / Auth ID is **xten** (your choice, 11 in the picture below)
Your analog adapter password is: **password** (your choice)

After login, set the following parameters:

<table>
<thead>
<tr>
<th>Account</th>
<th>Register</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line Active:</td>
<td>Enabled</td>
</tr>
<tr>
<td>Label:</td>
<td>Your name</td>
</tr>
<tr>
<td>Display Name:</td>
<td>Your name</td>
</tr>
<tr>
<td>Register Name:</td>
<td>xten</td>
</tr>
<tr>
<td>User Name:</td>
<td>xten</td>
</tr>
<tr>
<td>Password:</td>
<td>password</td>
</tr>
<tr>
<td>Enable Out. Pr. Srv:</td>
<td>Enabled</td>
</tr>
<tr>
<td>Outbound Proxy:</td>
<td>myserver.cluana.com Port: 5061</td>
</tr>
<tr>
<td>Server Host:</td>
<td>mycompany.com Port: 5061</td>
</tr>
<tr>
<td>Server Expires:</td>
<td>120</td>
</tr>
</tbody>
</table>

Press “Confirm” button
Codec configuration

Account 1

In Audio codecs panel, insert the following codecs in the order provided:
- G.722
- PCMA (for Europe, PCMU for USA and Japan)
- G.729

Press “Confirm” button

BLF configuration
If you want to use Busy Lamp Field (BLF) on phone extension panel in order to see your extension status (idle, ringing, busy), you need to set the following parameters:

**DSSKey**

Memory Key

<table>
<thead>
<tr>
<th>Memory 1:</th>
<th>BLF</th>
<th><a href="mailto:12@mycompany.com">12@mycompany.com</a></th>
<th>Line1 12</th>
</tr>
</thead>
<tbody>
<tr>
<td>Memory 2:</td>
<td>BLF</td>
<td><a href="mailto:13@mycompany.com">13@mycompany.com</a></td>
<td>Line1 13</td>
</tr>
</tbody>
</table>

Press “Confirm” button

**Features**

Transfer

Transfer mode via dsskey: choose among

- "New call"
- "Attended transfer"
- "Blind Transfer"

Press “Confirm” button
