Are you ready to fuel the future of cities and industries across the U.S.? Here you will design and create the structures, machines, and systems that light our homes and power our economy.

What is the Engineering Development Program?
The Engineering Development Program (EDP) positions you as an integral part of the Siemens engineering team. You will use your creativity and unique skill set to take on a role in product design, feasibility analysis, manufacturing, project management, quality assurance, service solutions, applications engineering, or supply chain management. In any of these roles, participants will have the opportunity to bring about change, growth, and success for many of Siemens Energy's products and solutions.

The EDP is an 18-month program that includes three six-month rotational work assignments, with classroom training and hands-on experience. The program gives you the opportunity to transform your education into real-world skills and discover which career path most inspires you. Participants will receive mentoring from Siemens' team of innovators, gain access to and network with Siemens senior decision-makers and world class engineers, and learn what it is like to work as part of a company that is solving global challenges.

Primary responsibilities will be to apply your knowledge of engineering to address technical problems.

The goal of the program will be for participants to fine-tune their skills and demonstrate their ability to be:

- Technically competent
- Globally focused
- Capable of leading change efforts
- Strong in communication and interpersonal skills

The program is a full-time position with benefits and is designed to help you create an accelerated career path with Siemens Energy.

Who Should Apply?
We’re looking for people who are resourceful —true problem solvers who challenge themselves to find the most effective and efficient solutions to complex challenges. We provide a platform for those who want to have an impact on the future and to contribute to the successes of the company, our customers, and the world.
To apply for the Engineering Development Program, candidates must meet the following requirements:

- Preferred Majors: Aerospace Engineering, Electrical Engineering, or Mechanical Engineering
- Graduation Date: Must graduate by the program start date, but no more than one year prior
- Minimum GPA: 3.25
- Relocation and Travel: Must be willing to relocate and travel as required by program
- Work Authorization: Permanent work authorization in the U.S. is required

**About Siemens**
Siemens is a fully integrated technology company that drives innovation in energy, healthcare, industry, cities, and infrastructure.

At Siemens, we dare to ask ourselves how we can make a difference. Ours is a team of creative thinkers with a restless curiosity. To foster continuous global innovation, Siemens is dedicated to offering development and technical training opportunities to students and recent graduates at the college level, ensuring a bright, sustainable future for generations to come. Through a career at Siemens, students and recent graduates will receive top of the line training, develop professional skills, and will be at the forefront of engineering innovation. Here, the opportunities are limitless.

Siemens in the U.S. employs approximately 60,000 people in all 50 states. Siemens AG has a 160-year heritage of innovation and employs approximately 360,000 people in 190 countries. To learn more, visit: [www.usa.siemens.com](http://www.usa.siemens.com).

**Energy Sector**
The Siemens Energy Sector plays an active role in every aspect of today's increasingly complex power matrix. As a global leader in renewable energy, our Energy Sector offers vast expertise and some of the most innovative products, solutions, and services available today.

Individual businesses in the Energy Sector include fossil power generation, wind power, solar & hydro, oil & gas, energy service and power transmission. For more information, visit: [www.usa.siemens.com/energy](http://www.usa.siemens.com/energy).

**What's Next?**
If you meet the program requirements, apply directly at [www.usa.siemens.com/careers](http://www.usa.siemens.com/careers).

Start date is June 2013
