Sappi Limited results for the year and fourth quarter ended September 2015. Strong performance with full year earnings per share excluding special items up 55%.

Highlights for the Year

- EPS excluding special items 34 US cents (FY14 22 US cents)
- EBITDA excluding special items US$625 million (FY14 US$658 million)
- Profit for the period US$167 million (FY14 US$135 million)
- Net debt US$1,771 million, down US$175 million year-on-year

Highlights for the Quarter

- EPS excluding special items 16 US cents (Q4 FY14 12 US cents)
- EBITDA excluding special items US$201 million (Q4 FY14 US$200 million)
- Profit for the period US$83 million (Q4 FY14 US$68 million)

Commenting on the key financial highlights of the year and fourth quarter, Sappi Chief Executive Officer Steve Binnie said:

“I am very satisfied with the strong performance by the group during the financial year. Importantly, net profit for the year increased by 24% to US$167 million and earnings per share excluding special items for the year increased by 55% from US 22 cents to US 34 cents. Operating performances improved in all regions in their underlying currencies. In particular, the group benefitted from the strong export performance of the Southern African business combined with a weaker South African Rand. In Rand terms group EBITDA excluding special items increased by approximately 8% from ZAR7 billion to ZAR7.5 billion and group net profit increased by 40% from ZAR1.4 billion to ZAR2 billion on group sales of ZAR64.5 billion for the year.
“The refinancing of higher cost debt, and the reduction in net debt by US$175 million resulted in significantly lower ongoing interest charges. The completion of major capital projects at Gratkorn, Kirkniemi and Somerset Mills will lower our cost base further in the coming years.

“For the quarter, all regions increased their profitability through stronger seasonal demand and improved markets for graphic paper and dissolving wood pulp. For the quarter, profit increased by 22% to US$83 million due to the higher operating profits and lower interest costs.

“The Specialised Cellulose business generated improved returns due to increased US Dollar spot prices for dissolving wood pulp in China; driven by improved conditions for viscose staple fibre. The weaker Rand also helped margins, lowering our cost base and improving selling prices.”

The European business achieved an increase in graphic paper sales volumes of 5% and average sales prices of 4% over the equivalent quarter last year, with particular strength in the woodfree coated segment. This was mainly due to the Euro/Dollar exchange rate on export sales pricing and the graphic paper price increases implemented in the past quarter. The speciality paper business continued to improve its sales volumes and prices compared to both the prior quarter and the equivalent quarter last year.

The North American business showed a good recovery in a seasonally stronger quarter. This is despite the continued impact of the strong US Dollar on the graphic paper markets in the US and continued weak demand from China for the release paper business. Coated paper sales volumes were flat year-on-year, with net sales prices slightly lower.

The Southern Africa business had a strong quarter and year. Average prices and volumes were higher for both the equivalent quarter last year and the prior quarter. Demand for dissolving wood pulp remained strong and sales volumes were higher in both instances. Demand for virgin packaging grades was also strong.

We expect the first quarter to show an improvement in EBITDA excluding special items and a substantial increase in earnings per share excluding special items compared to the equivalent quarter last year as a result of improved operating performance and lower interest charges. However, a severe drought is currently being experienced in many parts of South Africa and may adversely impact our mill production and consequent profitability should normal summer rainfall not be forthcoming.

The table above has not been audited or reviewed.

**The year and quarter under review**

Net cash generated for the quarter was US$159 million, compared with US$288 million in the equivalent quarter last year. The comparative period last year included proceeds from the sale of the Usutu forests of approximately ZAR1 billion (US$97 million). Capital expenditure in the quarter was US$85 million compared to US$105 million a year ago. Special items amounted to a gain of US$54 million, and comprised mainly of gains from the transfer of the Sappi Dutch pension fund to a general fund and plantation fair value pricing, offset by once-off losses resulting from mechanical breakdowns and plantation fires.
Net finance costs for the year were US$182 million, an increase from the US$177 million in the prior year as a result of one-time charges of US$61 million associated with the refinancing of the 2018 and 2019 bonds.

Earnings per share for the quarter excluding special items were 16 US cents, compared with 2 US cents for the prior quarter and 12 US cents for the equivalent quarter last year.

Net debt at financial year-end decreased to US$1,771 million as a result of the cash generated and gains on the translation of Euro-denominated debt.

At the end of September 2015, liquidity comprised cash on hand of US$456 million and US$537 million from the committed revolving credit facilities in South Africa and Europe.

**Outlook**

Dissolving wood pulp markets have improved considerably this year as a result of higher pricing and improved operating rates for viscose staple fibre in China. Higher hardwood paper pulp prices are also impacting dissolving wood pulp supply as some swing producers continue to manufacture paper pulp rather than dissolving wood pulp.

Graphic paper markets in Europe are slightly better than anticipated, albeit they are still expected to decline. Production at our mills is full and export pricing is benefitting from a weaker Euro. However, the business faces pressure from higher pulp prices. In North America, the strong US Dollar continues to impact graphic paper trade flows negatively.

Capex during 2016 is expected to be in line with 2015 and is focused largely on energy and debottlenecking projects in South Africa together with the annual maintenance at the mills.

Depending on market conditions, we are considering utilising some of our cash reserves to repay and refinance a portion of our debt in order to lower our future interest costs. We expect to reduce our net debt further over the course of the year and reduce our financial leverage towards our target of two times net debt to EBITDA.

Based on current market conditions, and assuming current exchange rates, we believe that EBITDA excluding special items in the 2016 financial year will be higher than 2015. We also expect strong growth in our earnings per share excluding special items as a result of expected lower interest costs, offset somewhat by increased cash taxes.

ENDS

There will be a conference call to which investors are invited. Full details are available at [www.sappi.com](http://www.sappi.com) using the links Investor Info; Investor Calendar; 4Q14 Financial Results.
Forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions, which are predictions of or indicate future events and future trends and which do not relate to historical matters, and may be used to identify forward-looking statements. You should not rely on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclical nature, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the impact on our business of a global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for our products;
- the emergence of new technologies and changes in consumer trends including increased preferences for digital media;
- consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructurings, investments, acquisitions, dispositions and other strategic initiatives (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions or implementing restructuring and other strategic initiatives and achieving expected savings and synergies; and
- currency fluctuations.

We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.
