The Standard in Steel Carriage Doors
From a base of nine models and over 15 designer top sections, Original STEELHOUSE® Doors offer more than 200 unique configurations to ensure diversity from one home to the next and from one subdivision to the next. Homeowners, builders, architects and municipalities alike, are using Original STEELHOUSE® Doors to bring a fresh, handsome appearance to neighborhoods across the country.

Dollar for dollar the Original STEELHOUSE® Door is the best investment in a home’s exterior to enhance its value and appearance. The visual impact is as dramatic as the difference between a home with 8-foot ceilings and a home with 12-foot ceilings.

The Original STEELHOUSE® Door is the industry's heaviest gauged steel door. Using 23 gauge steel and the RITS™ “Reinforced Integral Truss System,” the Original STEELHOUSE® Door's strength and integrity are unmatched by similar products. Four-inch wide, two-sided steel insulated boards are bonded with epoxy cement and mechanically fastened to ensure positive attachment to the face of the door. All Original STEELHOUSE™ Doors come standard with CFC-free polystyrene insulation.

In an era of individualism, the Original STEELHOUSE® Door is the answer to a homeowner's need for uniqueness without a large investment. At half the cost of traditional wooden doors, the Original STEELHOUSE® Door fulfills that need.
The Original STEELHOUSE® Door combines rich traditional styling with three key benefits not found in wooden doors: half the weight, half the cost, and half the maintenance. True to Carriage House style, these doors can be detailed with classically finished handles, pulls, hinge straps, and windows.

The Original STEELHOUSE® Door features nine models that can be finished with optional window designs, arched top sections, and a variety of decorative hardware.
The design of the Original STEELHOUSE® Door brings the traditional look and design of the old-style wood carriage door without the problems that were once associated with the older wood door. Original STEELHOUSE® Doors will enhance the look of any home. There is no better investment to a home's exterior appearance.

All Original STEELHOUSE® Doors include the exclusive RITS “Reinforced Integral Truss System,” I-Beam center stiles engineered to reinforce sections, doors and components designed for the professional door installer, and optional decorative hardware designs.
Steelhouse Specifications

Original STEELHOUSE® Modern Carriage Door Series Specifications
Sections are 2-inches thick in 24-inch and 28-inch heights and are manufactured from heavy-duty 23 gauge hot-dipped galvanized steel. Sections are prime painted white and rotary embossed with a woodgrain texture. Tongue and groove meeting rails are roll formed into the panel incorporating the RITS reinforced integral truss system. CFC-free polystyrene insulation with a 20 mil high impact vinyl or 25 gauge woodgrain embossed steel backer provides the insulation for the section. Vertical stile members are 19 gauge hot-dipped galvanized I-beams pre-painted white to match the interior color of the door. Textured steel “C” channel, foam filled, facing boards 4” x .5625” are laminated to the face of the steel door with mechanical fasteners and an epoxy based cement. Bottom sections are reinforced with an aluminum “L” reinforcement angle mechanically fastened and bonded to the bottom of the section for supporting a replaceable UV protected grooved weather seal.

INSULATION: CFC-free polystyrene insulation with a rigid high impact vinyl back skin with an R-factor of 6.25, or a 26 gauge wood grain embossed back skin. Calculated door section R-Values are in accordance with DASMA TDS-163.

H-3 HARDWARE AND TRACK: Heavy Duty commercial top and bottom fixtures with 14 gauge wide body hinges. 10 Ball white nylon rollers, galvanized torsion tube, coated spring wire, self-locking fasteners, red interior lift handles, interior lock, and .051 Vertical tracks and .060 Horizontal track.

COLOR: All doors are primed, painted white from the factory and require post-painting. The examples shown have been painted to show some of the possibilities that further enhance the wood effect.

Warranty: Is a limited lifetime warranty. Contact your distributor for additional information.

Products offered by First United Door Technologies, L.L.C. and its subsidiaries are covered by issued and pending US patents. The product names indicate approved use of the terms and are trademarks and registered marks are owned by First United Door Technologies, L.L.C.

The Original STEELHOUSE® Door is an innovative “Modern Carriage Door,” manufactured entirely of steel. The Original STEELHOUSE® garage doors have two-sided steel insulated facing boards that are textured, roll formed and laminated to steel backers and then mechanically fastened and bonded to a 23 gauge steel section. A “Reinforced Integral Truss System”(RITS™) gives the Original STEELHOUSE® doors strength and rigidity that is unmatched by similar products. In addition to their distinctive style and curb appeal, the Original STEELHOUSE® (patent pending) doors are half the weight and cost of wooden doors. Virtually maintenance-free, the Original STEELHOUSE® doors will not warp, crack, or split. Quite simply, it doesn’t get better than that.

Limited Lifetime Warranty: Contact your distributor for additional information.

Why buy the Original STEELHOUSE Door?
Here are a few simple reasons:

- Beauty
- Variety
- Functionality
- Durability
- Cost effective
