Consider Deconstruction over Demolition! See page 4.
FREQUENTLY ASKED QUESTIONS

WHAT DOES C&D STAND FOR?
Construction and Demolition.

WHY IS IT IMPORTANT THAT CONSTRUCTION WASTE BE RECYCLED?
A lot of natural resources can be saved by recycling C&D waste, which makes up 29% of the trash going into the landfill.

DO ALL THE CITIES HAVE THE SAME RECYCLING REQUIREMENTS?
No. All cities require a minimum of California Green Building Standards Code (CALGreen) detailed below. A local ordinance may have more stringent requirements and may have different penalties. Refer to the chart on pages 2-3 for details on a specific city.

WHAT ARE THE REQUIREMENTS UNDER CALIFORNIA GREEN BUILDING STANDARDS CODE (CALGREEN)?
State Code 4.408.1 requires construction waste reduction of at least 50%. Recycle and/or salvage for reuse a minimum of 50% of the nonhazardous construction and demolition debris, or meet a local construction and demolition waste management ordinance, whichever is more stringent. For more information or other specific requirements visit www.documents.dgs.ca.gov/bsc/CALGreen/2013-California-Green-Building-Standards-Code.pdf.

WHY AM I ASKED WHAT CITY MY WASTE CAME FROM?
The State requires each city and unincorporated county to reduce waste through recycling, composting or other diversion activities. To gather statistics by city, landfill and transfer station gatekeepers ask where the waste is from.

WHAT ARE INERT MATERIALS?
Inert solids or aggregates include asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone.

WHAT IS A MIXED C&D RECYCLING FACILITY?
At a mixed C&D recycling facility, different recyclables are sorted from a load of mixed debris. A load of mixed C&D generally includes drywall, metal, untreated wood, yard trimmings and small amounts of inert materials. Large amounts of inerts should go into “rock boxes.”

WHAT DOES OX MOUNTAIN LANDFILL ACCEPT FOR RECYCLING?
Ox Mountain Landfill accepts loads of certain materials for reuse onsite. These materials are: asphalt, bricks, concrete, dirt, fines, rock, sand, soil, stone, untreated wood and yard waste. Loads with untreated wood and/or green waste mixed with inerts (asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone) will not be sorted and therefore not recycled. However a load with mixed inerts only (asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone) or mixed green waste only (untreated wood and yard trimmings) will be accepted for Alternative Daily Landfill Cover.

HOW DO I MAKE SURE MY RECEIPTS SHOW THAT I RECYCLED MATERIALS?
First, you must make sure that you are taking your load to a facility that can recycle the materials you have. When you are at the gate of any facility, be sure to tell them that you would like to recycle the material and the name of the city or unincorporated county location it is from. You will need a receipt that reflects this information. The receipt will indicate that the material was either recycled or disposed.

WHAT IF A DEBRIS BOX COMPANY HANDLES ALL MY WASTE?
To meet local recycling requirements, you will need to request that the debris box company take your waste to an approved recycling facility and provide you with appropriate receipts from those facilities.

WHAT DO I DO ABOUT THE WASTE GENERATED BY MY SUBCONTRACTORS?
The general contractor or applicant is responsible for ensuring that the recycling requirements are met for all waste generated on site, including waste generated by the subcontractors.

WHAT IF MY NEW CONSTRUCTION PROJECT GENERATES ALMOST NO WASTE?
All construction projects generate waste and you are expected to recycle it. The industry average for waste generated at new construction sites is six pounds per square foot.
UNDERSTAND CITY C&D RECYCLING REQUIREMENTS
Most cities in San Mateo County have a recycling ordinance that requires contractors to recycle most waste generated on the job. Some cities may limit building contractors to a few approved recycling facilities and debris box companies. According to the CALGreen State Code; where a local jurisdiction does not have a construction and demolition waste management ordinance, a construction waste management plan shall be submitted for approval to the enforcing agency. See pages 2–3 to view San Mateo County and city requirements.

DECONSTRUCTION, SALVAGE & REUSE
Many items such as wood floors, doors, windows, electrical equipment, and bathroom fixtures can be salvaged from a building before it is demolished. You can take these usable materials to a salvage yard, where they will be resold to local builders. See page 4 to determine if salvage is appropriate at your site.

HAZARDOUS WASTE
Many types of hazardous waste are found at construction and demolition sites. These materials must be identified and handled correctly prior to demolition and during construction. See page 5 to find a list of potential hazardous wastes and where to take them.

RECYCLING
Waste generated at a construction site can be recycled in two ways. One option is to separate recyclables by material, such as cardboard, metal, clean wood, etc. into individual bins. Separating recyclables allows you to take advantage of lower dumping fees. The second option is to put recyclable materials into one bin and take it to a recycling facility that specializes in sorting materials. See pages 6–7 for a list of C&D recycling facilities in the Bay Area.

DISPOSAL
Any waste that cannot be reused or recycled is disposal. See page 8 for disposal locations.

RECYCLING HOTLINES FOR ALL BAY AREA COUNTIES
This guide is brought to you by San Mateo County RecycleWorks, which offers recycling, reuse and green building information to the residents and businesses of the County. See page 8 for recycling hotlines in other Bay Area counties.

IDENTIFY HAULING OPTIONS
You may either haul your own recyclable materials or hire a debris box company and request that the material be recycled. Note that in some cities you may be required to use a certain debris box company. See page 2–3 to view city requirements and page 9 for a list of debris box companies.

* Inert solids include asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone.  
** Fines or penalties may apply for non-compliance.
DECONSTRUCTION, also referred to as SALVAGE or SOFT DEMOLITION, is a cost-effective and environmentally responsible alternative to conventional building demolition.

In a deconstruction, hazardous materials are removed, reusable building materials are salvaged, demolition materials are recycled and only a small portion of waste ends up in the landfill.

To successfully deconstruct a building for salvage, you may have a soft demolition contractor identify and remove the usable material or you may extract the material and drop it off at a salvage yard. Please take special care to identify and remove any electrical components that may contain mercury such as lights, thermostats, and switches. These must be treated as hazardous waste.

Examples of reusable building materials:
Architectural details (columns, fireplace mantels, moulding)
Brick & block
Doors & windows
Electrical equipment
Heating ducts
Light fixtures
Lumber
Plumbing fittings
Plumbing fixtures (faucets, toilets & bathtubs)
Siding
Steel beams & studs
Wainscoting

SALVAGE YARDS & DECONSTRUCTION SERVICES

SAN MATEO COUNTY

DONATION SOLUTIONS
2033 Ralston Avenue
Belmont, CA 94002
650-226-3234
www.thedonationsolution.com
A full service building material appraisal and consulting firm.

FIREWOOD FARMS
551 San Mateo Road (HWY 92)
Half Moon Bay, CA 94019
650-726-3266
www.firewoodfarms.com
Deconstructs old barns and sells flooring and other salvaged wood products.

GREEN EARTH APPRAISALS
525 Broadway
Millbrae, CA 94030
650-455-6683
greenearthappraisals.com
A full service building material appraisal and consulting firm.

www.habitatsf.org/restore

INNER CITY RECYCLING
9009 Railroad Avenue
Oakland, CA 94603
1-510-568-7625
Offers onsite portable crushing service.

OHMEGA SALVAGE
2407 San Pablo Avenue
Berkeley, CA 94702
1-510-204-0767
www.ohmegasalvage.com
Accepts and sells vintage architectural salvage.

THE REUSE PEOPLE
9235 San Leandro Street
Oakland, CA 94603
1-888-588-9490
www.thereusepeople.org
Accepts and sells a wide variety of salvaged building materials.

URBAN ORE
900 Murray Street
Berkeley, CA 94710
1-510-841-7283
www.urbanore.com
Accepts and sells a wide variety of salvaged building materials.

SAN FRANCISCO COUNTY

BUILDING RESOURCES
701 Alameda Street
San Francisco, CA, 94124
1-415-285-7814
www.buildingresources.org
Accepts and sells a wide variety of salvaged building materials.

SANTA CLARA COUNTY

REBUILD GREEN
2625 Middlefield Road # 106
Palo Alto CA, 94306
650-720-1301
www.rebuildgreen.net
At a construction site it is very important to be aware of hazardous materials so you can separate it from other waste and properly dispose of it.

Prior to a demolition, it is necessary to identify and remove hazardous wastes. You should also be prepared to deal with hazardous waste generated during construction and at the end of the project.

**HAZARDOUS WASTE ACCEPTED BY THE VSQG PROGRAM**

- Ballasts
- Batteries
- Caulk containing PCBs
- Cleaning supplies
- Fluorescent light bulbs and tubes
- Garden chemicals
- Glues, mastics, adhesives
- Oils
- Paint chips (Paint removed from projects conducted before 1980 contain lead)
- Paints, thinners, stains
- Pesticides, herbicides
- Pool chemicals
- Switches and thermostats containing mercury

**HAZARDOUS WASTE NOT ACCEPTED BY THE VSQG PROGRAM**

- Appliances
- Asbestos
- Electronic Waste
- Pressure-treated wood
- Railroad ties
- Telephone poles

For more information on where to recycle items that are not accepted by the VSQG program visit www.RecycleWorks.org or call our toll free hotline at 1-888-442-2666.

**PROPER DISPOSAL OF HAZARDOUS WASTE**

**SAN MATEO COUNTY HAZARDOUS WASTE - VERY SMALL QUANTITY GENERATOR (VSQG) PROGRAM**

A VSQG (per state law) is any business that generates less than 100 kilograms (about 220 pounds or 27 gallons) of hazardous waste per month. The VSQG Program is designed to provide an inexpensive hazardous waste disposal option to eligible businesses, non-profits, and other government agencies. See the list of accepted materials to the left.

Visit www.smhealth.org/vsqg for details. Call 1-800-207-8222 to make an appointment at the next collection event. Minimal fees.

**TRANSPORTING HAZARDOUS WASTE**

Legally, you can only transport up to 10 gallons of hazardous waste at one time without a special license and permit. Qualified VSQG businesses may legally carry up to 27 gallons or 220 pounds of a hazardous waste for disposal to the VSQG Facility.

You may also select a hazardous waste management company to collect and haul hazardous waste for you.

**IF YOU DO NOT QUALIFY FOR THE VSQG PROGRAM**

If your business generates more than 100 kilograms of hazardous waste per month, you will need to find the appropriate commercial hazardous waste management company to handle your material. Companies that provide this service may be found in the yellow pages, by visiting www.smhealth.org/vsqg or by contacting the County’s Hazardous Materials Program at 650-372-6200.

**PAINT RECYCLING**

Paint (interior/exterior) can be recycled at many locations throughout the Bay Area. For a complete list of products that can be recycled and the locations to bring it to visit: www.RecycleWorks.org or call toll free 1-888-442-2666.

**LOCATIONS IN THE BAY AREA TO DISPOSE OF:**

- Asbestos
- Pressure-treated wood
- Railroad ties
- Telephone poles

**ALTAMONT LANDFILL**

10840 Altamont Pass Road
Livermore, CA 94551
Call First 1-925-455-7300
(Friable and non-friable asbestos)

**NEWBY ISLAND LANDFILL**

1601 Dixon Landing Road
Milpitas, CA 95035
Call first 1-800-204-4242
(Non-friable asbestos only)

**KIRBY CANYON RECYCLING & DISPOSAL FACILITY**

910 Coyote Creek Golf Drive
Morgan Hill, CA 95037
Call first 1-559-834-9151
(Non-friable asbestos only)

**OX MOUNTAIN SANITARY LANDFILL**

12310 San Mateo Road
Half Moon Bay, CA 94019
Call first 1-800-204-4242
(Non-friable asbestos only)
A **SORTING FACILITY** specializes in sorting recyclable construction material. Mixed C&D loads can include all the materials listed below, and the majority of it will be recycled. Large quantities of inert solids (asphalt, concrete, dirt) should be kept separate from mixed C&D loads.

Unless you are taking your recycling to a sorting facility, the following materials must be separated and brought in as loads of only one material type. Some facilities accept **MIXED INERTS** (mixed loads of crushed asphalt, concrete, dirt) for recycling. Mixed inert loads will cost more than separated loads.

### Know Your Waste

- Offers portable crushing services.
DISPOSAL

Identify Hauling Options

Materials that are NOT RECYCLABLE and NOT HAZARDOUS should be taken to a DISPOSAL facility.

Examples of disposable materials may include:
- Bagged waste
- Damaged flexible ductwork
- Dirty drop cloths
- Foam
- Insulation
- Mixed composite materials
- Painted wood, drywall or stucco
- Polystyrene packaging
- Vinyl flooring
- Visqueen

One way of hauling waste from the construction site is through a DEBRIS BOX COMPANY. When you contact a debris box company, you need to request that your C&D materials be recycled and receipts can be provided. Key questions to ask when selecting a company are:

- What recyclable materials are you willing to pick-up?
- Do you offer a reduced fee if recyclables are separated from other waste?
- What are your requirements for separating recyclable materials?
- How much contamination do you allow?

The following areas have exclusive contracts with specified debris box companies or only allow registered debris box companies:

Brisbane, Colma, Daly City, El Granada, Hillsborough, Millbrae, Miramar, Montara, Moss Beach, Pacifica, San Bruno and South San Francisco. All other cities may use any of the following companies that haul mixed loads and sorted materials in San Mateo County.
