- **MCIF1979328 Inframe Kit** – 1YN Truck Engines & 1DW Industrial Engines
- **MCIF1442948 Inframe Kit** – 2KS, 8YF, 9NS, 9SM, CPD, GEP, TME Truck Engines & BDL Industrial Engines
- **MCIF1979374 Inframe Kit** – MBL Truck Engines
- **MCOH1979328 Overhaul Kit** – 1YN Truck Engines & 1DW Industrial Engines
- **MCOH1442948 Overhaul Kit** – 2KS, 8YF, 9NS, 9SM, CPD, GEP, TME Truck Engines & BDL Industrial Engines
- **MCOH1979374 Overhaul Kit** – MBL Truck Engines

The above engine kits include cylinder kits, rod bearings, main bearings, thrust plates and a custom Interstate-McBee Inframe or Overhaul gasket set. These convenient and competitively priced kits all contain Interstate-McBee forged steel piston crowns for maximum strength and durability. The cylinder liners are induction hardened for maximum wear resistance. Like all Interstate-McBee gasket sets, these sets are individually packed internally by engine systems for efficient engine assembly. Please refer to Technical Parts Gram #55 for proper piston pin assembly. Call any Interstate-McBee location with engine serial and arrangement number for correct engine kit selection.

The Interstate-McBee custom gasket sets listed above are for use on the popular Caterpillar® C15 twin turbo (ACERT) engine applications. Popular engine serial numbers include: MXS1-Up, NXS1-Up and BXS1-Up. These kits contain the M-2818261 exhaust manifold gasket / sleeve assemblies. The MCBC15222 inframe gasket set does not contain the M-1685248 oil pan isolation seal. This set can be used when the isolation gasket is used again or when a standard oil pan arrangement is found. Contact Interstate-McBee for details.

Complementing our very popular MCB3500NG head set, Interstate-McBee is now offering MCB3600NG for G3600 engine applications. These new sets include the pre-chamber gaskets and seals as well as the fire ring.

Contact Interstate-McBee for details.

**A-23539134 Liner Shim .010" Thick**

**A-23539135 Liner Shim .030" Thick**

**A-23539136 Liner Shim .060" Thick**

These stainless steel shims are used to achieve proper cylinder liner protrusion when block counter bores need to be machined. These items are now available at Interstate-McBee and offer a cost effective alternative to cylinder block replacement.
