FarMore® F300, an advanced fungicide seed treatment technology, delivers protection for a variety of small-seeded vegetable crops against a broad spectrum of seed and seedling diseases. With the active ingredients mefenoxam (Apron XL® fungicide), fludioxonil (Maxim® 4FS seed treatment fungicide) and azoxystrobin (Dynasty® fungicide), FarMore F300 technology enhances seedling emergence, plant stand establishment, plant health, early-season vigor and yield potential.

- **Dynasty**® seed treatment fungicide
- **Maxim**® 4FS seed treatment fungicide
- **Apron XL**® seed treatment fungicide
