How to Register Through eResources

Registering online can be done in four simple steps.

1. Select eResources under the Tools menu on JJC’s home page.

2. Select “Non-credit/Lifelong Learning Student Registration”

3. Select “Register and Pay for Continuing Education Classes”

4. To complete the Registration Form, start by entering the Course Code Number, for example, LLC.520. Enter the course prefix and course number with a period in between. Then hit Enter. Select the correct section in which you to enroll and continue to the payment screens. You will receive an e-mail confirmation of your registration upon completion.

ANNUAL CLERY SAFETY REPORT (ASR) NOTICE

Joliet Junior College is committed to assisting members of the JJC community in providing for their own safety and security. The annual CLERY security compliance document is available at the JJC Police Department website:
http://jjc.edu/about/operational/campus-police/Pages/crime-statistics.aspx

along with other safety information. If you would like to receive the ASR in booklet form, you may stop by the Campus Police Department located on Main Campus in G 1013 or call Campus Police at 815-280-2234. The website and booklet contain information regarding campus security and personal safety such as crime prevention and reporting, police law enforcement authority, disciplinary procedures and other related security policies. They also contain information about crime statistics for the three previous years for all JJC campuses, property owned and controlled by JJC District 525 and on public property immediately adjacent to JJC campuses.

This information is required by law and is made available by the Joliet Junior College Police Department.

Call (815) 280-1555 to register by phone or for more information.
Lifelong Learning

Career

What's in Your Career Future? (LLC 5118)
If you are considering changing your career direction, this is an opportunity to start thinking about "what's next". You’ll review your interests, skills and talents, and reflect on your uniqueness. This interactive program may even get you thinking outside the box.

T1  6-9p.m.  R  Main  $34
June 2

Find Your Fit (LLC 4251)
People who are happy in their work live healthier, better balanced lives. Get to know what you like to do, and how to earn a living doing it. In this class you will spend time engaging in activities that are core essentials to each of the six major business career groups and six major career personality types. You will also be given exercises that focus on the 17 basic job skills that ALL business professionals must have to be successful. You will be introduced to many resources that can help you continue to move forward, long after the class has ended. Whether you are looking to start your own business, returning to work, looking to change career paths, or just entering the work force for the first time, this class will help you explore your options and focus on a goal.

T1  6-9p.m.  W  Main  $64
June 8 & 15

Law School Applications-Demystified (LLC 5002)
Submitting an application to an American Bar Association accredited law school can be both an intimidating and bewildering experience. This seminar is designed to demystify the law school application process by outlining what qualities and characteristics law schools seek from prospective applicants, the documents required to complete an application, tips for completing a quality submission and common errors to avoid throughout the process. If you are a student or working professional who is considering law school in the future, do not miss this opportunity.

T1  6-8p.m.  R  Main  $24
June 9

Communication

Netiquette 101 (LLC 5119)
Cyberspace may just be the final frontier. “Netiquette” stands for network etiquette, and outlines the do’s and don'ts of online communication. Our friendly instructor will introduce students to the basics of common courtesy online and the informal “rules of the road” of cyberspace. This is a don’t-miss for anyone who would like to sharpen their communication skills, whether in the workplace or across generations of family and friends.

T1  6:30-8:30p.m.  W  Main  $24
June 8

Social Media and Employment (LLC 5117)
Stories are shared in the media daily about employees losing jobs as a result of a poor decision to post on social media. Could your social media presence be impacting your current or future career? It has been reported the 75 percent of hiring managers now check candidate’s social media profiles. Learn how posts (in what you may believe is your private account) could be damaging your career. This seminar will address social media morals, ethics, responsibility and respectability. Whether currently searching for a new career or employed, this course is a must for anyone who uses social media.

T1  6:30-8:30p.m.  W  Main  $24
June 15

An Introduction to Voiceovers (LLC 3651)
Are people always telling you that you have a great voice? Do you often find yourself listening to your favorite audio book, commercial or cartoon character and thinking, "I could do that"? This fun and empowering two-hour introductory workshop covers the different types of voiceovers and what tools are needed in order to find success in the industry. You’ll be coached as you perform a real voiceover script and be recorded so that you can receive a professional voiceover evaluation later. After class you will have the knowledge necessary to help you decide if this is something you’d like to pursue. Taught by a professional voice actor from the voice acting training company, Voices For All.

Communication—Writing Seminars

So You Have a Great Story... My Journey from Page to Publishing (LLC 5121)
Whether you already have a story to tell or are thinking about writing one, author Annalisa Russo will describe her journey from the first word on the page to working with a publisher, and what she learned in between. This class is designed as an overview of the writing process, covering the mechanics of writing, including organizing your writing, and planning your writing schedule. Participants will learn how to get their creative ideas down on paper, keep on track, and get to the publishing table.
T1 6:30-8:30p.m. T Main June 7 $24

Creative Writing (LLC 3964)
Designed for writers and/or creative spirits who want to enhance their creativity and overall zest for life! Participants will discuss the benefits of self-expression through writing and artistic necessity. Journaling and discussion of texts (read in class) will also be incorporated. Come ready to listen, write, and collaborate for a fun writing experience!
T1 6:30-8:30p.m. M Main June 13-July 11 $84
(No class July 4)

Traditional Publishing — the Non-Negotiables (LLC 5122)
Would you like to be traditionally published but don’t know where to begin? Participants of this workshop will learn how to get their manuscripts into the right hands. Author Annalisa Russo will explain how to find an agent or publisher, how to prepare a clever query letter and synopsis for submission, what you can expect after you sign on the dotted line, and how to promote your book once you are published.
T1 6:30-8:30p.m. T Main June 21 $24

Screenwriting 101 (LLC 5048)
Have you ever wondered what it takes to write a screenplay? Join this interactive class that will give a unique perspective on the elements involved in writing a screenplay. Each student will write a short screenplay, including stage, scenery and lighting directions. Students will learn about plot, characters and how to create drama on the screen.
T1 6:30-8:30p.m. W Main June 22 & 29 $48

The Art of Writing for the Web (LLC 3961)
If you blog, market online, or produce any text that is meant to be read on-screen, this revealing class is a must! Because screen-friendly writing differs from hardcopy text in both style and presentation, you’ll learn how to maximize a reader’s positive experience and minimize the lure to click away from your site all by how you structure your writing.
T1 6-9p.m. T Main June 28 $34

Creative Writing II (LLC 5051)
For those who have already taken Creative Writing I, this class will revisit students’ work from the course and go deeper into editing and refining.
T1 6:30-8:30p.m. T Main July 12-Aug. 2 $84

Writing Tips and Techniques (LLC 5123)
Join author Annalisa Russo in her all-day workshop on the craft of storytelling. Enhance your skills in the areas of plotting, developing unforgettable characters, and polishing your manuscript—so it will not end up in file thirteen after an editor or agent reads the first three pages. Learn the eye-opening aspects of grammar, sentence construction and point of view. Improve your writing’s skills to connect with your target audience. Let Annalisa guide you through what worked for her and other novelists, and inspire you on your journey.
T1 9a.m.-3p.m. T Main July 26 $54

Self-Publishing with Amazon (LLC 4913)
Learn how to self-publish your book using Amazon’s print-on-demand publishing service called CreateSpace. Print-on-demand publishing is the fastest, easiest way to get your written thoughts out to the world. Students will learn all the steps involved in bringing a project from start to finish. This includes using free tools like CreateSpace’s interior reviewer and cover creator that allow you to do-it-yourself easily.
T1 6-9p.m. T Main Aug. 2 & 9 $69

Exploring the Short Story (LLC 5120)
Short stories provide a fulfilling literary experience and the pleasure of reading an entire story without sacrificing time. Participants will enjoy this fun class designed to explore a variety of short stories. Each week a different type of short story will be featured for reading and discussion.
T1 6:30-8:30p.m. M Main July 18-Aug. 8 $89

Computers

All About PCs (LLC 520)
An introduction to computers. You will learn to create, find, and save files to basic word processing, create mailing labels, documents with graphics, certificates in PowerPoint, and work in spreadsheet documents and prepare a budget in Excel. You will also learn how to customize your desktop, work with photographs and insert them into a Word document or PowerPoint Presentations, or e-mail them to friends. Download pictures from the Internet, use Word Wizards and templates to create letters, then use mail merge to send to everyone. Lots of hands-on experience! Includes a course book for your reference.

T1 9a.m.-noon W Main May 10-June 28 $79

Keyboarding for Computers (LLC 500)
In today's computer era, almost everyone needs to know how to type. This class is perfect for people who need to learn the computer keyboard. It is designed for the person with little or no previous typing experience.

T1 9a.m.-noon T Main May 11-July 6 $225

Microsoft Word Made Easy (LLC 517)
Introduction to Microsoft Word. Learn to write and save documents, format text, add bullets, borders, and pictures. Create letters, fliers, and newsletters that look professional.

T1 9a.m.-noon T Main May 11-June 28 $79

Microsoft Excel Made Easy (LLC 562)
An introduction to Microsoft Excel. Use formulas to perform calculations, format our worksheets with different colors, fonts, and pictures then create a change of our worksheets.

T1 9a.m.-noon T Main June 22-July 2 $99

Using PowerPoint for Presentations (LLC 565)
This workshop will teach you how to use Microsoft PowerPoint to create interesting presentations. The topics include: creating and editing presentations, formatting text, printing presentations, and much more.

T1 6-9p.m. M Main June 6 & 13 $69

Selling on eBay (LLC 583)
Learn eBay selling from listing to feedback. Cover topics including an overview of auction types and fee(s), how to research the item you’re selling, how to create a listing for your item (instructor will be creating a real listing), pricing, term and conditions, shipping, monitoring your item listing, what to do once your auction has closed and disputes. This class requires each participant to bring their e-mail address with them to class.

T1 9a.m.-noon R Main May 19-June 2 $99

3-D Printing Basics (LLC 5126)
Possibly one of the most fascinating technological developments in history, 3-D printers offer endless possibilities. Whether you’re considering purchasing a 3-D printer in the future, or you would just like to experience this exciting technology in action, this class is for you. Our instructor will demonstrate how to operate a home 3-D printer, and you will experience the printer in action as it prints out a model.

T1 6:30-8:30p.m. W Main May 18-June 21 $29

Experience 3-D Printing (LLC 5127)
Designed to serve as an introduction to 3-D printing technology, this four-week class will provide students with the opportunity to print their own simple 3-D projects. Students will learn about the software involved in 3-D printing, internet resources and also experience the JJC Makerlab, in this hands-on class.

T1 6-8p.m. W Main June 15-July 6 $99

Build an Android App (LLC 5129)
Designed for students who are new to programming and want to learn how to build Android Apps, this four-week class will explore the fascinating and creative world of Android App development. Students will explore online app builder sites and use an instructor-selected site to build a simple Android App. No previous programming experience is needed, however students should be familiar with using an Android based smartphone.

T1 6-8p.m. T Main May 31-June 21 $149

Social Media for Parents (LLC 5125)
Are you concerned about your child’s use of social media? Can your own posts impact how your children post? Join this informative seminar that addresses social media morals, ethics, responsibility and respectability.

T1 6:30-8:30p.m. W Main June 29-July 20 $24

Creating Websites for Families, Nonprofits and Organizations (LLC 5998)
Learn how to create your own website. Create your own space on the Internet where you can tell your family story, share knowledge, support a cause, promote a group, or simply have fun. During this workshop you will create and publish your own website. The workshop will use the free website service, Weebly, but other website software will be discussed during the class. This class is designed for those with no experience with website design. Students will enjoy the new expanded format of this class that allows for additional in-class hands-on experience.

T1 6-9p.m. T Main June 14 & 21 $69

Concealed Carry

Illinois Concealed Carry
In order to apply for an Illinois Concealed Carry Permit, students must successfully complete both the Pistol Shooting Course (8 hours) and the Illinois Concealed Carry Permit Training Course (8 hours) for a total of 16 hours. Classroom sessions will be held at JJC. In order to successfully complete the Illinois Conceal Carry Training Course students must pass live fire test at the range. Participants do not need to own a pistol, several types will be provided for use. Training Laser pistols and targets are used to teach proper grip, stance, and sighting. The live fire range will be held at the Rink’s Gun and Sport, 14363 Archer Ave., Lockport, IL. Students will be responsible for paying the range fee to Rink's. In order to accommodate schedules the range time will be scheduled individually with the instructor. Instructors are approved by the Illinois State Police to conduct Illinois Concealed Carry Firearms Training. Students are solely responsible for completing the application process through the Illinois State Police (however the instructor will provide assistance and an I.D. picture). Additional range time can be scheduled. For more information and complete registration requirements, call (815) 280-1555. DO NOT BRING A FIREARM OR AMMUNITION TO THE COLLEGE!

Pistol Shooting Course (LLC 4850)
T1 6:30-8:30p.m. R Main $110
June 16-July 7
*Please note students 20 years of age may register in the Pistol Shooting class, but must bring a parent or legal guardian to the live fire range qualification.

Illinois Concealed Carry Permit Training (LLC 4851)
T1 6:30-8:30p.m. R Main $110
May 19-June 9
T2 6:30-8:30p.m. R Main Aug. 4-25 $110
*Please note, students may enroll in the Illinois Concealed Carry Permit Training and apply for the Illinois Concealed Carry Permit without completing the Pistol Shooting Course if they are an active, retired, or honorably discharged member of the U.S. armed forces (Must provide copy of DD214). Students may enroll at age 20, but must be 21 to apply for the Conceal Carry Permit. In order to enroll in the Illinois Concealed Carry Permit Course students must possess a valid Firearm Owner Identification card (Illinois residents), possess a valid state ID, be allowed by both federal and state law to legally possess a firearm, and be able to follow all directions given by the training staff.

Creative Arts–Crafts

Nylon Flowers Made Easy (LLC 5003)
Nylon flowers are a trendy, top pick for many that appreciate sheer beauty and creative design. These beautiful creations are surprisingly affordable and easy to make. Sometimes referred to as stocking flowers, they are a popular trend for bouquets, party favors, special occasions and home decorating. Our friendly instructor will get you started with the basics of making a nylon flower. Once you learn how to make your first flower, the possibilities are endless. All supplies will be provided in this creative, hands-on class. Please register early, enrollment is limited to six students.

Fused Glass Jewelry: Pendants & Earrings Workshop (LLC 5130)
Explore fused glass while creating a one-of-a-kind set of wearable art. Students will create a necklace and earring set, or separates to keep. A wide and varied assortment of glass in all sizes will be available to use. Stunning, dichroic glasses will also be available. Students will complete at least 2 pendants and a set of earrings. Projects will be fired at CoGoGlass studios and be picked up on a later date at JJC.

Metalsmithing Open Studio Session: Beginner to Advanced (LLC 5054)
This work-intense studio session is designed for the beginner to advanced metalsmithing student who would like to have independent studio time to develop their techniques. Equipment available during the open studio session will include soldering torches, forming hammers, rolling mill, polishing wheels and flex shaft equipment. An instructor will be available for reviewing skills. Project ideas will be provided, but students can choose to investigate their own designs if desired. Basic hand tools will be provided. While solder and some copper will be provided, students should also bring their own copper or silver to work with. Prerequisite: open to students who have taken at least one LLC Metalsmithing class, or one JJC college credit metalsmithing class.

Fused Glass: Beverage Station/Cheese Tray Workshop (LLC 5131)
This class is project and technique-driven, allowing students to design and complete a 5”x 10” flat tray to use as a beverage station or to use as a cheese tray. Beverage station designs will include making a glass stir stick for beverages. Cheese tray designs will include making a coordinating spreader knife. Projects will be fired at CoGoGlass studios and be picked up on a later date at JJC.

Fused Glass: Trivet Workshop (LLC 5132)
This fast and fun class introduces students to fused glass with a quick project. Each student will complete one 5”x 5” fused glass tile. These tiles can then be used as a trivet or a hanging sun catcher. The trivet can act as a spoon rest in the kitchen or hold your favorite mug or vase of flowers. The sun catcher can reflect light on a mirror or be hung from a window. Kids are welcome to attend this workshop with a parent or adult. Projects will be fired at CoGoGlass studios and be picked up on a later date at JJC.
Beginning Metalsmithing: Casting (LLC 5134)

If you are interested in learning about casting, this four-week workshop is for you! You will explore cuttlebone and lost-wax casting methods to make small silver objects. Think rings, pendants, earrings, or even curios—many things can be made with this versatile technique. Casting results are dynamic for beginner and advanced students alike. Please bring to the workshop: a comfortable ring (or a ring measurement size of someone for whom you will make a ring) and a found object made of hard plastic or natural materials. The object should be no larger than 1.5" in height, width or length. Tools, casting supplies and a limited amount of casting metal will be provided. You may also bring old sterling or gold jewelry (no chain, please) to melt down to use in your casting project.

T1 6-9p.m. W Main $154
June 29-July 18

Fused Glass: Buckle Workshop (LLC 5133)

This fast class will focus on creating a fused glass buckle. You will be the center of attention every time you adorn your pants with this buckle! Each student will create a fused glass buckle sized to the design of the student. The price of class includes a snap leather belt to attach the buckle to when completed. The leather belts are high quality and made in Illinois. How can you resist making yourself stand out with this one-of-a-kind accessory?! Projects will be fired at CoGoGlass studios and be picked up on a later date at JJC.

T1 6-8p.m. W Main $74
June 29

Creative Arts–Drawing and Painting

Foundations in Art (LLC 5135)

Develop a variety of foundational artistic skills in this art course, which is designed to help adult students acquire the conceptual and creation skills required to delve into the traditions of design/contemporary art. Students will build skills in drawing, image making, painting concepts and three-dimensional modeling, with an emphasis on artist/designer problem-solving skills. Students will also explore the theoretical context and approaches to a contemporary visual culture. Activities will include lectures and hands-on art projects.

T1 9:30a.m.-1:30p.m. M Main July 25-Aug. 8 $109

Painting with Oil Pastels (LLC 5136)

Learn how to use oil pastel to create lush, colorful imagery. This medium is clean, easy and fun to use. Learn how to think in color and use it with confidence. This course also touches on composition and basic drawing techniques. A supply list will be provided before the first session.

T1 9-11a.m. W Romeoville June 8-29 $109

Mixed Media Art (LLC 5137)

Learn to create works of art using traditional artist mediums, combined with everyday items. No experience necessary. Wear old clothes. A supply list will be provided before the first session.

T1 6:30-8:30p.m. W Main July 6-27 $89

Introduction to Drawing (LLC 4976)

Designed especially for those with little or no drawing experience, this four session workshop will get you started with the very basics of drawing. Enjoy exploring a new interest in a friendly, relaxed environment as you learn drawing basics such as composition, perspective and shading. All supplies will be provided.

T1 10a.m.-noon M-R Romeoville July 11-14 $89

Creative Arts–Sewing

Getting to Know Your Sewing Machine (LLC 4185)

Are you struggling with your sewing machine? Join this introductory class that will introduce you to the basics of your sewing machine. Learn to thread the machine, make a bobbin, and sew a straight line and zigzag. Please bring your sewing machine, instruction manual, scrap cotton fabric, empty bobbins and two spools of all-purpose dual-duty thread.

T1 6:30-8:30p.m. M Romeoville May 23 $32

Let’s Sew (LLC 5138)

Do you have a sewing machine and would like to brush up on sewing basics before you get started on a project you have been wanting to tackle? Join this friendly class devoted to getting you on your way. Students will review reading a pattern, cutting, pinning and hemming. One simple item will be completed during the course. Attendees will need to bring their own sewing machine, know how to thread the machine needle, and fill the bobbin.

T1 6-9p.m. R Main June 2 $44

T2 6-9p.m. M Main $195
July 11-Aug. 1

Intermediate Photoshop Level Two (GRAF 1007)
Get past the basics and learn about layer masks, clipping paths, filters, and channels. You learn more advanced color correction techniques, too. Completion of GRAF 1006 or proficiency in basic Photoshop skills required.

T1 6-9p.m. T Main $195
June 29-July 20
Managing Digital Photography in Lightroom (LLC 4343)
Photographers and Graphic Artists, do you want to learn to manage your digital photography work more efficiently using Adobe Photoshop Lightroom? This is course will introduce you to Adobe Lightroom’s powerful features in a progressive series of lab sessions. Learn how to manage photography workflow from camera to finished print. Understand how to properly catalog images for ease of retrieval and use Adobe’s intuitive photographic retouching tools to enhance your work. To get the most out of this class, students should have completed “Secrets of Digital Photography” and have a base understanding of retrieving digital files from their digital camera. Students will be encouraged to bring digital photo files to class using a USB drive. Class will be conducted in a JJC Computer Lab, but students may bring their own laptops if they currently have an installation of Lightroom.

Handwriting Analysis

Do You Doodle? (LLC 4622)
Have you ever wondered why you doodle the way you do? Explore the ways your scribbles can reveal your thinking processes, temperament, and even your subconscious motivations. This enlightening and entertaining class will teach you how to interpret your doodles using basic principles of handwriting analysis. Participants are encouraged to bring samples of their doodles done at home, work or school.

Handwriting Analysis (LLC 2232)
Unlock the mysteries of personality and behavior with a fascinating four-week class that explores handwriting analysis. Using tested scientific methods, students begin to learn how graphic structures unwittingly reveal thinking styles, work habits and social skills. The personality traits discovered in different handwriting idiosyncrasies can provide dramatic insight into a person’s problem-solving techniques, stress-management abilities or even compatibility in love.

What John Says About You (LLC 3402)
Sign in, please. Your John Hancock says something unique about you. In handwriting analysis, your signature is a personal statement; sometimes a biography, trademark or persona. Signatures say a lot about the writer’s personality and how they wish to be viewed. Enjoy an evening learning about signatures and experience the opportunity to analyze your own.

Health & Wellness–Positive Living

Health & Wellness

Turning 65: Medicare 101 (LLC 3824)

*Lunch and Learn
Join in an informative and interactive program that will provide you with a better understanding of Medicare. Topics will include: Medicare eligibility and enrollment, the benefits of Medicare Parts A and B, the costs that Medicare leaves you to pay and an overview of the standardized Medicare Supplemental Plans. The second half of this program will provide you with a better understanding Medicare Part “D” prescription drug program. Topics include a detailed description of the prescription drug program, eligibility, enrollment, the three phases of prescription drug coverage and tips on how to select a plan. This program is appropriate for people becoming eligible for Medicare, caregivers of people who are on Medicare and current Medicare beneficiaries who would like to learn more about this program.

Soup and sandwich lunch provided with class.

Finding Motivation (LLC 5027)
“Don’t get your hopes up.” “You can’t do that.” “Why would you even try that?” These are the phrases we are told all too often, and it can be challenging to keep our minds focused and positive when we are surrounded by negativity. In this class, learn how to sharpen your daily activities to stay focused on your dreams and goals. Develop ways to make your habits turn your goals into reality and keep a positive attitude.
Bullet Journaling with a Twist (LLC 5145)

Create a planner journal that matches your style and will grow with you. Have you heard about or tried Bullet Journaling? Many love Bullet Journals for the flexibility they provide with an exact fit for an individual’s life, personality and creativity. But, some can feel restricted if they do not know how to create pages with loose leaf flexibility, or become frustrated with the need to redraw the pages that work for them. Join this hands-on class that will have you designing and building custom pages that are an exact fit for your life. Using Microsoft Excel and instructor provided templates; such as a bill payment tracker, monthly and daily layouts, cleaning organizer, simple budget and goal tracker, you will develop pages fully customized to work for you. Learn to get organized by keeping what you need at your fingertips, with pages that will inspire you to dream, take action and achieve.

Women in Black–Victorian Mourning Customs
(LLC 5073)
This seminar begins with an overview of the mourning customs of the Civil War historical period. Where did the terms come from, who was responsible for the start of the mourning customs, how long did this period in history actually last? Then delve deeper into each of the different customs and explore how they came about, what evolved over time, and which are still actively used today (hint – more of the customs are commonly used today than you think). Was mourning the same for the North as it was for the South? Was a wealthy family more apt to ‘showcase’ the death than a modest family? Who gained the most from a death, who suffered the most? Were the customs gender-specific, where did the words ‘wake’ and ‘widow’s weeds’ come from? How long did one stay in mourning? These and many other questions will be addressed. There will also be a display of personal mementos, jewelry and an extant dress from the time period.
T1  6:30-8:30p.m. M   Main
June 6 $24

A Desert Storm Diary
(LLC 5159)
Has the 1991 Persian Gulf War become the “forgotten war?” One Joliet-area vet is determined to make sure the Gulf War is not forgotten; and has published a new book to help mark the 25th anniversary of Desert Storm. Learn more about Desert Storm as author and combat photographer Jay Sternickle shares his “Desert Storm Diary.” Sternickle served with the US Army’s 24th Infantry Division during the 1991 Gulf War. During Desert Storm, he worked as an Army public affairs specialist and was part of a combat camera team. The 24th Infantry Division was one of the key US Army elements that conducted a “left hook” attack deep into Iraq to help destroy Saddam Hussein’s elite Republican Guard. During this class, Sternickle will share his personal stories, photographs and video, and examine the key events of Operation Desert Storm.

Old Abe-The Life of Lincoln
(LLC 4999)
President Abraham Lincoln met with tremendous political and personal challenges. He faced war with the Confederacy, a lack of political support, and the daunting task of keeping Europe out of the Civil War. Lincoln oversaw the westward expansion, war with Native Americans and the Transcontinental Railroad. Personally, he suffered extraordinary loss. The death of a son, a volatile relationship with his wife, and a grieving widow, Emily Helms, his confederate sister-in-law in the White House. Join this seminar focused on this legendary president known to many as, “Old Abe”, who led a nation through one of the most turbulent periods in history up to his assassination at age 56.

A Peace Corps Experience
(LLC 5076)
Meet John Greven, an accomplished storyteller and presenter, as he shares his personal experience as a Peace Corps Volunteer in Colombia, S.A. from 1964-68. For the first two years, he worked in a rural community development in the settlements along the Magdalena River. During the second two years, he co-produced a series of documentary films for Peace Corps Colombia to motivate Colombians into community action projects. This presentation will be a lively combination of photos, stories, readings and short video dubs of films produced for Peace Corps Colombia. John has recently published a memoir book, “Fragments of the Corps,” along with a companion book, “Photos for Fragments of the Corps.” For those who may like to have autographs, information will be given before the seminar on how to purchase the two books prior to arriving for the course. Sample books will also be available for participants to examine after the presentation.

Searching for Marquette
(LLC 4954)
Explore the life and journey of the 17th-century French Jesuit missionary-explorer, Father Jacques Marquette, through his journal excerpts, maps and images. Though his life was cut short at the age of 38, his cultural impact on the Midwest was tremendous and is told by the monuments and works of art dedicated to his memory. Re-trace Marquette’s steps throughout the Great Lakes and Mississippi River regions, and learn about Marquette’s encounters and friendships with regional Native American tribes along his route. Additionally, this seminar will examine
the factors, such as Longfellow’s “Song of Hiawatha” to the Capitol’s Statuary Hall that elevated Marquette’s status from a local explorer to national hero by the early 20th century.

Rejuvenate Your Retirement (LLC 4919)
Making your money last throughout retirement has never been more challenging. People are living longer and fewer retirees have traditional pensions. In recent years, the volatility of the stock and bond markets has been high, and interest rates paid by banks have been low. While most retirees are covered by Social Security, this program also faces financial challenges. This course is designed to help you develop a personalized retirement income plan, whether you’re planning for many years into the future, or looking for immediate answers to your financial concerns. Topics will include: determining what percentage of your assets you must withdraw to meet expenses, estimating how many years your money may last, how to make adjustments to help your money last longer and how to calculate the impact of investment choices, rate of return and inflation on your plan. Additionally, you will discover new ways to stay mentally, physically and socially active, as well as learn about important financial topics such as tax reduction planning, investment risk management, health care planning and estate planning. Above all, you will discover how to apply this knowledge to help you pursue a more active, healthy and financially secure lifestyle in retirement. You will receive a 145-page textbook featuring examples, illustrations and checklists that make it easy to understand the concepts discussed in class, and a step-by-step process to apply what you learn and serve as a convenient reference tool after the course is complete.

Photography
Intro to Digital Photography (LLC 4980)
Explore your camera’s capabilities starting with understanding the variety of available auto modes as you move toward taking greater control with semi-auto and manual modes. This 3 session class will help you understand how to achieve proper light and color, blur or freeze the motion, isolate your subject from distracting background and discover the role composition plays in creating dynamic images. This will be a hands-on class with exercises to perform at home to hone your skills. Class designed for interchangeable lens cameras. Bring your camera and manual to class.

Secrets of Great Digital Photography (LLC 3391)
Are you looking for an intensive hands-on workshop that will overhaul your picture-taking abilities? This eight-week course will give you solid photography skills that will improve the quality of your pictures. Topics will include camera basics and exposure, composition, low-light conditions, landscapes and nature, people and family, sports and technical tips, and equipment for the serious photographer. Students will take photos between sessions and bring to class for discussion. DSLR camera suggested. (This is also a core class for the digital photography certificate.)

Beginners Guide to Digital Cameras (LLC 3688)
Do you have a new or used digital camera, but feel overwhelmed with the new features and technology? In this relaxed but informative class, you will learn the basics of digital cameras. The class is specifically designed for people who are new to digital cameras, photography and the technology behind them. This wonderful introduction into the digital world is slow-paced and goes through every step of the photography process to allow you to take the best possible photos with your camera. Together we will explore how to hold the camera, use a tripod, and what the camera icons mean. We will also learn about how to use your camera settings to your advantage, photographic composition and basic lighting. This class is designed for point and shoot cameras only. Students with DSLR cameras should consider Intro to Digital Photography or Secrets of Great Digital Photography.

Taking Great Photos of Children (LLC 4019)
Learn how to take great photographs of children by uncovering secrets that will turn your kiddie snapshots into photos worth framing. During this class, students will learn about taking great candid and formal photos, keeping your child’s attention, and getting the perfect smile. This class is geared to the beginning and intermediate digital or film photographer. Students should bring a camera to class. This seminar is not suggested for those who have completed Secrets of Great Digital Photography.

Photography-Basic

The digital photography certificate is awarded to students who have successfully completed 2 core classes (Secrets of Great Digital Photography and Secrets of Lighting), 5 elective classes (no more than 3 editing classes will apply) and have successfully completed a portfolio review. For an application or additional information on the Digital Photography Certificate, please contact Brenda Large at blarge@jjc.edu.

Core Classes

Secrets of Great Digital Photography (LLC 3391)

Are you looking for an intensive hands-on workshop that will overhaul your picture-taking abilities? This eight-week course will give you solid photography skills that will improve the quality of your pictures. Topics will include camera basics and exposure, composition, low-light conditions, landscapes and nature, people and family, sports and technical tips, and equipment for the serious photographer. Students will take photos between sessions and bring to class for discussion. DSLR camera suggested. (This is a core class for the Digital Photography Certificate.)

Elective Classes

Image Editing for Photographers-Level 1 (LLC 3392)

Use Photoshop to get the most out of your photographs. This five-week intensive hands-on workshop will include color-correcting images, raw image workflow, resampling images and using special effects. Students will have homework assignments each week. This class is a perfect follow up to Secrets of Great Digital Photography. Photoshop CS6, Adobe Bridge and Camera Raw will be covered. Please bring a 4G flash drive to class.

Secrets of Lighting (LLC 4016)

Learn the disciplines of lighting and using studio lighting equipment in a hands-on environment that provides all necessary lighting equipment. This class will cover the essentials of lighting arrangements for studio portrait lighting. Topics will include how to read a hand-held light meter, corporate and illustrative photography and portrait settings. You will need a DSLR digital camera, however all lighting equipment will be available for use in classroom projects. Secrets of Great Digital Photography is required. (This is a core class for the Digital Photography Certificate.)

Secrets of Lighting II (LLC 4136)

Expand upon your knowledge of lighting techniques. Get out of the studio and learn to set up lighting on location. This is an elective class for the Digital Photography Certificate: students need to have completed core classes before start date.

Black and White Digital Photography (LLC 4904)

Black and white photography is reduced to nothing more than form and tonal range to convey the artist's expression. This five-session class allows you to think in black and white, visualize how subject matter will translate from color, explore the zone system and discuss the importance of composition and texture to the black and white image. Shooting black and white in-camera vs. color conversions in Camera Raw/Photoshop will be explored. Three classroom sessions and two Saturday field sessions will provide hands-on experience photographing and editing the images you capture. Bring camera, tripod and 2G flash drive to class. (Note: Saturday field sessions will meet from 10a.m.-1p.m.) This is a great class to take if you are considering Street Photography.

Street Photography (LLC 4684)

If the recent discovery of Vivian Maier's work prompted an interest in street photography, this class is for you. Grab your gear and hit the streets with a class that will cover the various aspects of street photography. Topics include; what exactly is street photography; past and present examples; recommendations for do's and don'ts; techniques and equipment, post-processing, how and where to share work and receive feedback from other street photographers. There will be two class field trips to Chicago's Loop where students can practice techniques covered in class. Travel is on your own. The final classroom session will be open discussion to share experiences, images and answer questions. Wednesday classes meet 6:30pm-9:00pm. Saturday morning sessions will be 3 hours with time and location determined during previous class.
Single Light Photography (LLC 5105)
Get out in the field and use single light lighting techniques to create impact. Hands-on sessions will feature techniques in Bounce Lighting (Ricochet Lighting), use of reflectors, natural light, speed lights and more. Class meets at Joliet Junior College the first night of class, Wednesday, July 27, 2016 and the last night of class, Wednesday, Aug. 31, 2016 from 6-9p.m. All other sessions will meet on location, Sundays, Aug. 7, 14, 21, 2016. Travel is on your own.

**Tarot Suits-An Overview**  
(LLC 5173)  
Learn about the four suits in tarot. Unlike the ordinary offering of Tarot Suits, this class is an overview of meanings and will give you a way to jump right in and start reading. This is also a great review class.  
**T1  6:30-8:30 p.m.  R  Main**  
July 7 & 14  $39

**Tarot-Layouts**  
(LLC 4849)  
Do you want to learn more about how Tarot cards relate to each other and learn to read multiple cards at once? Layouts pull your understanding of individual Tarot cards into fluid interpretations as you learn how the cards interact and the significance of their position in the chosen layout. This hands-on class will guide you through various readings using several layouts as you work together interpreting what the Tarot reveals. Class will consider both upright and reversed meanings of cards. Students will also be able to work with the Transparent Tarot, a see-through deck whose meaning changes as you stack the cards on top of one another. If you have your own deck, please bring it to class. A limited number of decks will be available for use. Please note this course is for personal interest and is not to be considered part of the JJC science curriculum.  
**T1  7-8:30 p.m.  R  Main**  
Aug. 11 & 18  $39

Link/SNAP program funds are accepted. For the first $10 you spend every week, you will double your Link dollars.
Commercial Driver’s License

Commercial Driver’s License A (CDL 101)

Designed for individuals with little or no commercial driving experience, this program includes everything you need to receive a Commercial Driver’s License. You will receive a Department of Transportation physical, Commercial Driver’s License learner’s permit and endorsement preparation. Department of Transportation rules and regulations, log books, instruction in map reading and trip planning, and complete vehicle training to prepare you for an entry level position in the trucking industry. In addition, the program includes the Secretary of State administered Class A road test. The program can be completed in four weeks by attending full time, Monday through Friday, 8a.m. to 4:30p.m. Each student is required to complete 30 hours of home study during the program. Students are required to take a physical/drug screening test. For more information on current schedule and class fees, call (815) 280-6902 or email CDLinfo@jjc.edu.

Drone Training

Basic Drone Operations (MGT 7874)

Joliet Junior College is partnering with the Potential AG Company to offer this basic class on Unmanned Aircraft Systems (UAS) or more commonly known as “drones”. Learn what the Federal Aviation Administration (FAA) defines a drone, what is considered recreational vs. commercial use, what regulations apply to what situations and what training is required to operate a drone. Discuss how drones are currently being used in business and industry and what the future holds. Be able to select the correct drone for the right application. The class includes hands on training with discussions on machine maintenance, repairs, and flight demos (weather and airspace permitting).

T1 6-8p.m.  R  Weitendorf  $119
July 14-28

Forklift Training

Forklift Training (FORK 201)

The Joliet Junior College district has become a distribution centers for the Midwest in the last decade. Local warehouses and distribution center offer numerous job openings for trained industrial truck drivers. The powered industrial truck, commonly referred to as the forklift, is used in every distribution center, major retail store, and manufacturing facility. Class is held at the Joliet Junior College Weitendorf facility. Individuals will receive training on the various forklifts including the sit-down, order picker, slip sheet, stand-up, and walkie rider. Participants will receive drive time on each machine as well as earning the National Safety Council Certification for Industrial Lift Trucks. Go to www.trainingupdate.org then click on “career training” for additional course details.

T1 8a.m.-2p.m.  M-R  Weitendorf  $1,250
June 6–9
Health Care

Personal Trainer Certification (MGT 858)
Take advantage of this unique program to become certified in the expanding fitness industry. This challenging course meets for six Sundays. The morning lectures are dedicated to such topics as anatomy, exercise physiology, fitness testing, equipment usage, nutrition, and health assessment. The afternoon sessions take place at a local fitness center where students learn “hands-on” techniques and approaches that prepares the student to work with clients. On the sixth week of class, students will take the Certified Personal Trainer (CPT) national certification exam.

Joliet Junior College has partnered with the World Instructor Training Schools (WITS) in offering this program. To order the text book, go to www.witseducation.com. Certification requires passing written and practical exams, current CPR/AED certification, and a thirty hour internship with a certified personal trainer. Internship can be arranged through WITS.

Pharmacy Technician Training (MGT 5170)
This program will prepare the student for an entry-level pharmacy technician position in a wide variety of settings such as retail, hospital, and managed health care facilities. Pharmacy technicians report directly to a licensed pharmacist and perform many pharmacy-related functions such as entering prescriptions into a computer, verifying prescriptions, ordering medication, and preparing medication inventories. Upon completion of the program, students will be prepared to take the Pharmacy Technician Certification Board examination. Go to www.trainingupdate.org then click on “career training” for additional course details.

Legal Field
Security Officer Certification Training (MGT 6440)
Are you interested in finding a career in the security field as an unarmed security guard or would you like to enhance your present job skills and earn state certification? Security officer basic training will prepare new security officers and experienced employees for employment with a certified agency under the Illinois Private Detective, Private Security and Private Alarm Act. This training meets the requirements of the Illinois state mandate for 20-hour unarmed private security training. Class fee does not include PERC card registration fee or the cost of the fingerprint background check. Go to www.trainingupdate.org then click on “career training” for additional course details.

Massage Therapy
Massage Therapy Free Information Session
Interested in becoming a massage therapist? Find out about potential income, the licensing process, and the steps to take to become a massage therapist in the state of Illinois. The Department of Labor projects a 23% growth in the massage profession within the next ten years. A massage therapist will be available to provide insight into the profession so that you can decide if this is the career choice for you. Come prepared with all your questions. Reservations required. Call (815) 280-1555 to sign-up.

Online Learning is Easy, Convenient and Effective!

Education to Go courses are delivered over the Internet and run approximately six weeks following the start date. You will need an e-mail address and Internet access. The start date varies between the second and third Wednesday of each month. MOST CLASSES $99
Online Career Training

Professional Bookkeeping with QuickBooks (MGT 859)
JJC is partnering with the ed2go career training center to offer this online course. This program will instruct students in basic bookkeeping fundamentals for managing both a personal/service-type business and a merchandising business. Learn to use QuickBooks, a popular bookkeeping software used by many small businesses. Be able to set up an organization in QuickBooks, enter data accurately and manage the overall bookkeeping function. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995.

Executive Assistant (MGT 899)
Joliet Junior College partners with Career Step, LLC to offer this online course. Designed to help students gain the software and business skills needed to succeed in the modern office environment, the Executive Assistant program focuses on the Microsoft Office 2010 application suite and office management skills. Students learn to use Microsoft Word, Excel, Outlook, and PowerPoint in addition to strengthening their typing skills and studying office procedures and communication. Upon graduation, students are prepared to earn the Microsoft Office Specialist Master certification (MOS), strengthening their resumes and proving their software skills to employers. In addition to one-on-one instructor support and personalized graduate support, students receive eleven textbooks, a voucher for the MOS exam, and a business writing style guide. Go to www.careerstep.com/jjc for more information. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,895.

Freight Broker/Agent Online Training (MGT 828)
JJC is partnering with the ed2go career training center to offer this online course. Learn the process of freight brokering from start to finish. Topics include broker laws, Federal Motor Carrier Safety Administration requirements, broker/brokerage services, record keeping, rebating, and compensation. Examine transactions from the point of view of the shipper, carrier and consignee. Learn about shipping rates, rate confirmation, fuel and surcharges, building and posting a load, special shipping instructions, and insurance claims. The freight brokerage business is rated as one of the top home-based businesses to own, and a recent Wall Street Journal article cited freight brokering and logistics as the largest growing sector of the transportation industry. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,895.

Management Training (MGT 870)
JJC is partnering with the ed2go career training center to offer this online course. The Management Training program will provide you with an understanding of financial and accounting terms and successful negotiation strategies. Topics include the marketing process, employment law, compliance and regulatory requirements, licensing, permits and taxes. Learn skills in project management, organizational development and change and businesses best practices. Know the seven management disciplines essential to management and business success. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,295.

Microsoft Office 2010 (MGT 901)
Joliet Junior College partners with Career Step, LLC to offer this online course. The Microsoft Office 2010 training course prepares students to earn the Microsoft Office Specialist Master certification by training them on the Microsoft Word, Excel, PowerPoint, Outlook, and Access applications. Students learn beginning and advanced concepts and complete a variety of hands-on exercises, allowing them to apply and practice the skills learned throughout the curriculum. The course’s online format provides students the flexibility to study on the schedule and at the pace that fits their needs. In addition to one-on-one access to experienced instructors and technical support team throughout the course, students receive ten textbooks and five quick reference cards. Go to www.careerstep.com/jjc for more information. Call (815) 280-1555 to register. All class materials are included in the class fee of $499.
Payroll Practice and Management (MGT 868)
JJC is partnering with the ed2go career training center to offer this online course. The objective of this program is to instruct the payroll professional in all facets of payroll from the basics to the intricate complexity of fringe benefits, taxation and garnishments. Learn the federal taxation regulations as it pertains to payroll preparation. Be able to process the Form W-4 and understand the basics of each type of fringe benefit covered including qualified and nonqualified deferred compensation, third party sick pay, relocation, and personal use of a company vehicle. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,795.

Project Management (MGT 871)
JJC is partnering with the ed2go career training center to offer this online course. The purpose of this course is to improve your knowledge and skills in project management. Learn to initiate a new project and developing the project scope, identify work efforts and developing the schedule, and define measurable quality metrics for the project. Topics include understanding how procurement applies in the project framework, mitigate project risks, and develop a communications plan to meet the stakeholders’ needs. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,695.

Purchasing and Supply Chain Management (MGT 869)
JJC is partnering with the ed2go career training center to offer this online course. Students will learn the various aspects of the supply chain environment, including enterprise resource planning systems and requirement systems. The relationships between purchasing, vendor selection, sources of supply and the role of technology will also be addressed. Become familiar with the integrated approach to planning, acquisition, flow and distribution, from raw materials to finished products. Topics such as developing a corporate culture, working successfully with teams, implementing successful people management strategies, and workflow and performance management will be explored in this program. The art of negotiation is covered in great detail. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,295.

Technical Writing (MGT 872)
JJC is partnering with the ed2go career training center to offer this online course. Students will develop their technical writing abilities to a professional level. Learn research methods, audience considerations, and style, drafting and revision techniques. Discuss a variety of media and formats including websites, emails, proposals, memos, and instructions. Learn the seven principles of good writing. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,795.

Webmaster (MGT 873)
JJC is partnering with the ed2go career training center to offer this online course. Understand the Web as it relates to both personal and business. Use solid design techniques and audience analysis to construct a webpage that fits a target purpose and audience. Formally design, compose, and structure the information to appear on a website. Be able to use HTML and DHTML to construct web pages with text, lists, links, tables, graphics, frames, forms, and other features of a dynamic webpage. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995.

Computer Technician
Computer Technician Certification Training (MGT 7864)
Joliet Junior College partners with Career Step, LLC to offer this online course. The Computer Technician program trains students for entry-level jobs in the information technology field and specifically prepares them to earn CompTIA A+ Certification. The A+ Certification is recognized nationally and is a highly regarded certification in this rapidly growing field. The online format offers 24/7 access to the curriculum, allowing students to study on a schedule that fits their individual lifestyles. Career Step offers interactive learning tools and student and graduate support. Students learn about hardware, operating systems, networking, security, and troubleshooting as well as more specialized topics such as mobile devices, laptops, and printers. In addition to one-on-one support from experienced instructors throughout the course and access to personalized graduate support after graduation, students receive two textbooks, two quick-reference exam study guides, a computer repair toolkit, a power supply tester, a USB drive, and two CompTIA A+ Certification exam vouchers. Computer technicians fall into the Computer Support Specialists category as defined by the U.S. Department of Labor’s Bureau of Labor Statistics (BLS). The BLS reports that this field is expected to grow by 18%, or over 110,000 new jobs, between 2010 and 2020. Go to www.careerstep.com/jjc for a video tour. Career Step offers payment plans for all of their programs with JJC. Please visit careerstep.com/jjc to learn more. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995. Ask about current sales promotions and discounts.

Green/Renewable Energy Careers
Biofuel Production Operations (MGT 878)
JJC is partnering with the ed2go career training center to offer this online course. The term “biofuel” implies production of petroleum-like fuel from sources such as corn and other vegetation. This course prepares the student for a career as a biofuel production worker. Learn basic math, physics and chemistry knowledge necessary for a biofuel production operator. Topics include safety, technical process drawings, pump maintenance, and electrical procedures related to biofuel production. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,595.

Indoor Environmentalist (MGT 879)
JJC is partnering with the ed2go career training center to offer this online course. Be able to prevent, diagnose and resolve indoor environmental problems in homes, offices and schools. Learn to use indoor air quality instruments and equipment to measure contaminants such as mold, bacteria, VOCs, carbon monoxide, radon, particulates, triggers to asthma & allergies and more. Apply current industry guidelines to standardize assessments and reporting. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $895.
Performing Comprehensive Building Assessments (MGT 880)

JJC is partnering with the ed2go career training center to offer this online course. This program introduces students to the comprehensive building assessment process. Be able to conduct visual building inspections, perform diagnostic testing, and determine residential building improvements. Perform visual observations including evaluation of envelope components, mechanical systems and base loads such as appliances and lighting. Learn how to use the blower door for building pressurization/depressurization testing. Discuss combustion safety testing and testing appliances for CO including: furnaces, boilers, water heaters and other combustion appliances. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $895.

Wind Energy (MGT 881)

JJC is partnering with the ed2go career training center to offer this online course. Wind energy companies are growing exponentially to meet America’s demand for clean, renewable, and domestic energy. In the course, students will learn the basics of wind energy principles including wind technology, wind energy anatomy, wind farm design, wind business and characteristics of energy sources. Discuss the fundamentals of hydraulics and basic theory and practice of electrical circuits, including calculations as applied to alternating and direct currents. Topics include air flow characteristics and blade efficiencies, principles of magnetism, and electrical measuring instruments. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,395.

Health Care

ICD-10 Fast Track Course (MGT 902)

Joliet Junior College and Career Step, LLC have partnered to offer this online course. This program is designed to help individuals currently in the medical coding and billing field to transition from the current ICD-9 coding system to the ICD-10 coding system. This is a 135 hour course for those who have already taken a coding course (learning ICD-9) or who are working or have worked in the field of coding using ICD-9. In this course, they will learn the necessary biomedical sciences that will be needed in order to effectively do ICD-10 coding. These include advanced anatomy, physiology and pathophysiology. The balance of the course will concentrate on the ICD-10 coding. Go to www.careerstep.com/jjc for information. Call (815) 280-1555 to register. All class materials are included in the class fee of $695.

Medical Administrative Assistant with Electronic Health Records Online Training (MGT 904)

JJC partners with Career Step, LLC to offer this online course. The medical administrative assistant online training program helps students gain the specialized skills and business knowledge needed to work in a variety of medical facilities. The interactive online curriculum teaches students Microsoft Word and Excel basics, healthcare documentation and reimbursement, medical terminology, and basic anatomy as well as specific medical office management topics such as practice finances and standard office procedures. Students learn how to effectively manage front desk reception, patient scheduling, insurance and billing, and more. Upon graduation, students will be prepared to enter the workforce and pass the Certified Medical Administrative Assistant exam (CMAA) and the Certified Electronic Health Record Specialist (CEHRS) sponsored by the National Healthcare Association (NHA). Train on industry standard ezEMRs HER software. Receive one-on-one support from experienced instructors throughout the course and access to personalized graduate support after graduation. Career Step offers payment plans for all of their programs with JJC. Go to www.careerstep.com/jjc and take a video tour. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,995.

Professional Medical Coding and Billing Online Training (MGT 900)

Joliet Junior College partners with Career Step, LLC to offer this online course. This program helps students prepare for rewarding careers in medical coding. The Professional Medical Coding and Billing program was designed by leading industry experts to prepare students for the ICD-10 code set, and this training is used by some of the largest and most respected healthcare organizations in the country. The course prepares students to pass the Certified Coding Associate (CCA) and Certified Professional Coder (CPC) certification exams and covers healthcare information management, reimbursement methodologies, and biomedical sciences, among other topics. ICD-10, CPT, and HCPCS codes are taught in an extensive practical section, giving students valuable hands-on experience. Students are prepared for national certification exams with curriculum on medical terminology, coding standards, and specific inpatient and outpatient medical code sets. The program’s unique online platform provides students access to program materials whenever it is most convenient for the student, allowing them to study at the pace that fits their lifestyles. Graduates of this course are prepared to take the Certified Coding Assistant (CCA) sponsored by the American Health Information Association or the Certified Professional Coder (CPC) sponsored by the American Academy of Professional Coders (AAPC). Students must have a high school diploma or GED to enroll in this program. Go to www.careerstep.com/jjc for a video tour. In addition to one-on-one instructor support and personalized graduate support, students receive textbooks, a complete set of industry code books, a voucher to take one of the certification exam, and access to an online reference library. Career Step offers payment plans for all of their programs with JJC. Please visit careerstep.com/jjc to learn more. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,995. Ask about current sales promotions and discounts.
Medical Transcription Editor Online Training (MGT 896)
This online program helps students develop the knowledge and skills of quality medical transcriptionists in addition to the specialized skill set of medical transcription editors. The demand for well-trained medical transcription editors is rapidly increasing, and this program prepares students for both career paths, making them more flexible after graduation. Within the program, students focus on keyboarding, medical terminology, language and grammar, and the editing skills required to work with speech recognition technology. The program also emphasizes practical experience, and by graduation, students will have transcribed hundreds of authentic dictations, preparing for a quick and successful transition to the workplace. Graduates of this course are prepared to take the Registered Healthcare Documentation Specialist (RHDS) sponsored by the Association for Healthcare Documentation Integrity (AHDI). Go to www.careerstep.com/jjc for a video tour. In addition to one-on-one instructor support and personalized graduate support, students receive ten textbooks, a transcription foot pedal, a 15-month membership to AHDI, a voucher to take the RHDS exam, and a 15-month subscription to an online reference library. Career Step offers payment plans for all of their programs with JJC. Please visit careerstep.com/jjc to learn more. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995. Ask about current sales promotions and discounts.

Pharmacy Technician Online Training (MGT 830)
JJC partners with Career Step, LLC to offer this online course. This program will prepare the student to obtain employment as a pharmacy technician in a variety of pharmaceutical settings while under the supervision of a registered pharmacist. Some of the areas covered are: drug inventory and storage, abbreviations, pharmaceutical calculations, label preparation, anatomy and physiology, insurance procedures, basic chemistry of drug molecules, and customer service skills. Students study pharmacology, pharmaceutical calculations, nonsterile compounding, and pharmacy law, regulations, and standards as well as topics specific to working in retail or institutional pharmacies. Graduates are prepared to sit for the national certification examination, which is administered by the Pharmacy Technician Certification Board. Go to www.careerstep.com/jjc for a video tour. In addition to one-on-one support from experienced instructors throughout the course and access to personalized graduate support after graduation, students receive six textbooks, a voucher for the PTCB exam, and a drug reference handbook. Career Step offers payment plans for all of their programs with JJC. Please visit careerstep.com/jjc to learn more. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995. Ask about current sales promotions and discounts.

Hospitality
Travel Agent Training (MGT 825)
JJC is partnering with the ed2go career training center to offer this online course. This program will help prepare students for the Travel Institute (formerly ICTA) TAP certification. Learn the basic skills needed to operate a computer reservation system, whether with the airlines, travel agencies, car rental agencies, cruise lines, hotels or resorts. Learn how to make a sale, create custom vacation plans and market your skills. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,795.

Event Management and Design (MGT 874)
JJC is partnering with the ed2go career training center to offer this online course. This program is structured to provide both practical knowledge and a comprehensive understanding of the modern special event industry. Discuss the administration, coordination, and marketing required for a successful event. Be aware of the legal, ethical and risk management issues. Learn how to organize all types of events such as weddings, corporate meetings, fairs, parades and festivals. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $1,995.

Wedding Planner Online Training (MGT 823)
JJC is partnering with the ed2go career training center to offer this online course. Wedding planners are in demand as more brides discover they cannot be the bride and the wedding planner on the day of their wedding. This program is perfect for the individual looking to get started as a professional wedding planner right away.

Nonprofit Organizations
Grant Writing (MGT 876)
JJC is partnering with the ed2go career training center to offer this online course. Learn the essentials in writing or acquiring grants for private, public or government use. Discuss the essentials of writing, researching, obtaining and maintaining operations and strategies within the grant system. Start with the basics by learning how to research for and find available grants. Understand the fundamental elements of a grant proposal such as the objectives, problems addressed, methodology, evaluation and assessments, budget and cover letter. Examine the essential aspects of fundraising and how to maximize fundraising opportunities. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,295.

Nonprofit Management (MGT 877)
JJC is partnering with the ed2go career training center to offer this online course. This course is targeted for anyone in the nonprofit field who wants a perspective on some of the unique issues facing management of a nonprofit organization. Discuss the principles of nonprofit management as well as the roles and responsibilities of a nonprofit board of directors and the management team. Topics include negotiating strategies, forms of persuasive communications, and the legal aspects unique to nonprofit organizations. Go to www.ed2go.com/career for more class details and review their financial assistance program. Call (815) 280-1555 to register. All class materials are included in the class fee of $2,295.

Food Sanitation

Food Service Sanitation Manager Certification Exam Prep (FOOD 440)
Course covers critical principles including personal hygiene, cross contamination, time and temperature, receiving and storage, food safety management systems, and training hourly employees. Learn to identify the causes of foodborne illness, identify and apply correct procedures for cleaning and sanitizing, recognize problems and potential solutions associated with facility, equipment and layout, and understand the Illinois code related to food service establishments. Successful completion of this course will prepare you to sit for one attempt of an ANSI-CFP Accredited Food Protection Manager Certification Examination. Textbook and test scan sheet are included in the class fee. The first day is a full day of instruction. The examination is given on the second day (8am to 11am).

Grades 1-2

Simple Machines (LLC 4352)
Young engineers will be fascinated building simple machines using Lego's newest kits. Each session will encourage team building as students will work in teams to build a simple machine. A different project will be completed each day.

TY121  9:30-11:30a.m.  M-R  $89
June 20-23

TY122  12:30-2:30p.m.  M-R  $89
Aug. 1-4

Engineering and Urban Planning (LLC 5109)
The city needs you! You are one of the most highly recognized engineers in the world and this project is calling your name! Come out and work with a team of fellow engineers to develop a plan and build a structure to help the city in its time of need. Students who attend this camp will learn about civil engineering and how urban planning is a field where they can be creative and innovative builders.

TY351  9a.m.-noon  M  $50
June 20

TY352 9a.m.-noon  M  $50
July 18

Grades 3-5

Camp Improv (LLC 4294)
A great, creative camp designed to inspire youngsters with Improv Acting. Students will enjoy exercises designed to develop acting skills while teaching youngsters how to be positive, listen to others, take risks and work within a team environment.

TY35  9:30-11:30a.m.  M-R  $99
June 13-16

3-D Printing Camp (LLC 5163)
Young students will be enthralled with the opportunity to explore the world of 3-D printing, where the possibilities seem endless. Students will learn about the world of 3-D printing, have an opportunity to print a 3-D project of their own, and tour the JJC Makerlab in this technology-rich camp.

TY35  1:30-3:30p.m.  M-R  $89
June 20-23

Minecraft Designers (LLC 4965)
If you love the game Minecraft, but always wanted to design your own characters and buildings for your games, this class is for you! Learn the basics of creating 3D models using a new software to design your very own objects, create skins for characters, and import them into your favorite Minecraft games. To access their project at home students, must own a PC/MAC version of Minecraft. Tablet, phone, and game console version of Minecraft are not compatible. Parent email address is required to use 3D modeling software. Students will work in pairs or teams for most of the program.

TY38  9a.m.-noon  M-R  $224
June 20-23

Young Engineers Camp (LLC 4085)
Build a different project each day. Young engineers will love this hands-on camp with projects students can design and build with everyday materials. Whether a balloon powered car or a crush resistant package, your child will gain knowledge of the team work and creativity used by teams of engineers when designing and refining these hands-on projects. All supplies will be included in camp cost.

TY351  12:30-2:30p.m.  M-R  $89
June 20-23

TY352  9:30-11:30a.m.  M-R  $89
Aug. 1-4

Let's Sew a Pillowcase (LLC 5087)
Join an introductory sewing class that will get your younger started with the very basics of sewing. Students will make a pillowcase in this hands-on course. Bring a sewing machine. A supply list will be furnished.

TY38  6-8p.m.  M  $29
June 13

Register by phone at (815) 280-1555
Video Game Camp (LLC 4737)
This creative camp is designed to teach video game enthusiasts how to design and build their own video games. This hands-on camp is designed to teach kids the principles of game design and systems thinking in an engaging and fun environment. During camp students will utilize several online Flash based systems that require no coding or programming skills. Video games will be accessible online so family and friends can enjoy student games.

TY351 12:30-3:30p.m. M-R Main
June 20-23 $149

Aug. 1-4 $149

Make Your First 3D Video Game! (LLC 4962)
Try this new version of a Black Rocket classic! This class allows you to develop a game concept that goes well beyond the limitations of the traditional 2D game design classes. Students will learn the physics behind 3D games, explore beginner event scripting, level design, controlling flow of gameplay, and storytelling. Student created games will be available on a password protected Black Rocket website to share with friends and family. Students will work in pairs or teams for most of the program.

TY38 1-4p.m. M-R Main
June 20-23 $224

Golf Camp (LLC 3404)
Join in four days of golfing basics. Learn how to hold a club, swing, putt, chip and more. Discover the strategy of the game, which clubs to use, along with golf etiquette. Golf clubs will be provided. Please inform registration if right- or left-handed. Class is held at Broken Arrow Golf Course in Lockport.

TY38 9-10:30a.m. M-R See Above
June 27-30 $304

Mandarin for Kids (LLC 5044)
Young children are full of curiosity and are uniquely suited to learn languages, as their developing brains are at the perfect stage to soak up a new language. In this Mandarin class, students will learn to speak, read and write in Mandarin; learn to make traditional Chinese arts and crafts; and learn the do's and don'ts in Chinese culture, including what colors, numbers, and more represent.

TY35 9-11a.m. M-R Main
June 27-30 $99

Digital Storytellers (LLC 5115)
From the Hunger Games to Harry Potter we all love a great story. Whether you want to rewrite the ending to Star Wars, add yourself to a Divergent tale, or create a new adventure about your friends - any topic is possible in this class! Start with a concept, design the storyboard, add some dialogue, and watch as the characters in your imagination come to life in your first graphic novel! Projects will be available on a Black Rocket website to share with friends and family. Students will work in pairs or teams for most of the program.

TY38 9a.m.-noon M-R Main
June 27-30 $224

App Attack! (LLC 4829)
Take the first steps into the world of mobile app design and customize your own game app! Using a specialized app & game development tool, students will explore the world of web-based (HTML5) mobile apps. In addition to learning the basics of mobile app design and game development, you will also see firsthand how the world of App publishing functions. Student-created apps will be accessible on a private site and can be played on any mobile device or computer. Publishing to App Stores not included. No prior experience is necessary and students do not need to own a smartphone or tablet to take the class. Students will work in pairs or teams for most of the program.

TY38 1-4p.m. M-R Main
June 27-30 $224

Young Crime Solvers-CSI Kids (LLC 4470)
Students become CSI detectives as they solve a series of mysteries using forensic science. This fun class features engaging, hands-on activities with real scientific tools that show kids how science can help solve a crime. Some of the activities will include learning about fingerprints, eye-witness testimony, DNA analysis, analyzing tires tracks and casting footprints.

TY35 9:30-11:30a.m. M-R Main
June 27-30 $99

Let’s Sew Pajama Pants (LLC 5088)
Make a super comfy pair of pajama (lounge) pants. This two-session hands-on class will have students sewing up a storm. “Let’s Sew a Pillowcase,” or basic sewing skills are required. Students will begin the first session learning about measurements, fabrics and patterns. During session two, students will cut fabric and sew it up to a finished pair of pajama pants. Please note, the first session meets for one hour and the second session will meet for two hours. Bring a sewing machine. A supply list will be furnished.

TY38 6-8p.m M Main
June 20 & 27 $39

Register by phone at (815) 280-1555
Simple Electronics with Snap Circuits® (LLC 4944)
Snap Circuits® makes learning electronics easy and fun! Students will enjoy working with their very own Snap Circuits kit as they build a simple project in class and learn how to use the Snap Circuit System. Each student will receive a Snap Circuit Kit (Suggested Retail: $34.95) capable of building over 100 basic electronic projects so they can continue the fun at home.

TY35  9-11a.m.  T  Main  July 5  $49

Lego Car Race (LLC 5171)
Spend a morning building a simple Lego car and compete with other students in a Lego car race. Students will enjoy working with this Lego car kit that they will be able to take home at the end of the class.

TY35  9-11a.m.  W  Main  July 6  $29

Robolab with Grandparents (LLC 3720)
Participate in an exciting morning of activities which foster teamwork and engineering skills with the Lego Mindstorms NXT Robotics system. Adult and child teams will enjoy building a robot and participating in fun activities – such as working together to make your robot complete a course with the fastest and most accurate path. Enrollment per adult/child team. Teams may consist of child and any adult family member.

TY35  9a.m.-noon  R  Main  July 7  $44

App Adventures: The Next Level! (LLC 4830)
Continue your quest to make the next viral app! Whether you want to move past the basic techniques learned in App Attack or want to jump right in, we are ready for you! Students will choose from a selection of different web-based (HTML5) mobile apps and explore more in-depth programming concepts. Student-created apps will be accessible on a Black Rocket site and can be played on any mobile device or computer. Publishing to App Stores not included. No prior experience is necessary and students do not need to own a smartphone or tablet to take the class. Students will work in pairs or teams for most of the program.

TY38  9a.m.-noon  M-R  Main  July 11-14  $224

Minecraft Modders (LLC 4963)
Use your favorite game to learn the basics of modding and foundations of programming. Learn scripting and logic statements as you create your first mod! Introductory coding will also be taught through a simulated environment inspired by Minecraft. Student projects will be available on a Black Rocket website to share with friends and family. To access their project at home students must own a PC/MAC version of Minecraft. Tablet, phone, and game console version of Minecraft are not compatible. Students will work in pairs or teams for most of the program.

TY38  1-4p.m.  M-R  Main  July 11-14  $224

Delightful Dessert Camp (LLC 3423)
Join in two days of hands-on fun creating delightful desserts with one of JJC’s chefs from the Culinary Arts Department. Each day you will learn to create new desserts that you can recreate for your family at home. The last day of class will include a delightful buffet highlighting the delicious creations from the class. You may bring one guest with you the last day of class to enjoy the delightful dessert buffet. Open to students entering grades 4-8.

TY48  8-11a.m.  M-W  Main  July 18-20  $159

Minecraft Animators (LLC 5116)
Bring your favorite Minecraft characters to life in an animated short film! Learn how studios like Pixar and Disney make movies like Inside Out and Frozen through using techniques like keyframing, tweening, texturing, and animating rigged 3D models! Student projects will be available on a Black Rocket website to share with friends and family. You do not need to own a Minecraft account to use the software in this class. Students will work in pairs or teams for most of the program.

TY38  1-4p.m.  M-R  Main  July 18-21  $224

Note!
Students should be dropped off no earlier than 10 minutes before a class begins. Students are to be picked up immediately at class dismissal time. Please walk students directly to classrooms and pick up at classroom.

Register online at www.jjc.edu and click on eResources  
K-4
Kids College

Let’s Make a Commercial! (LLC 4824)
During this video production class students will construct imaginary products and make commercials to “sell” their new creations. Students will learn how to create storyboards, film their products, then edit and produce their own commercials. Video cameras will be provided. Commercials will be accessible on a password-protected website so family and friends can view the final student productions. This camp is limited to 8 students, so register early to ensure a spot for your child.

TY35 12:30-3:30p.m.  M-R  Main  
July 25-28  $149

Photoshop for Kids (LLC 4419)
Students learn how to make photos look amazing with Adobe Photoshop CS6, the free online Photoshop Express Editor and the free Gimp photo editor. These programs give kids easy options for quick fixes, creative enhancements and endless photo fun. Students will learn a variety of image editing techniques, including touching up photos, creating layers, adding text, removing backgrounds and combining images.

TY35 12:30-3:30p.m.  M-R  Main  
Aug. 1-4  $149

Mythbusting Kids (LLC 4992)
Students explore science by testing common “myths” with fun, often messy, experiments. Kids will learn all about the scientific method as they investigate science concepts like inertia, mass, energy and light. During their experiments, students will collect data, clues and other information to separate truth from myth and find out what is really fact or fiction.

TY35 9:30-11:30a.m.  M-R  Main  
Aug. 8-11  $99

Let’s Make A Website! (LLC 4825)
During this class students will build their own personal websites. These websites can focus on any student interest including: family, pets, sports, video games, movies or music. Students will use simple drag and drop software to create webpages, so no complex programing is required. Children will learn how to build webpages, create hyperlinks, and add photos and videos to their websites. In addition, students will be introduced to basic HTML and CSS concepts.

TY35 12:30-3:30p.m.  M-R  Main  
Aug. 8-11  $149

New!
Babysitting Certificate (LLC 926)

Want to begin babysitting for extra cash, or are you ready to be in charge of siblings at home? This course will educate youth ages 11 to 16 to provide basic child care. Participants who complete this course will earn the American Red Cross Babysitting Certification. Bring a large stuffed animal or baby doll. A peanut free lunch will be provided. Classes held at Joliet Park District, Inwood Recreation Board Room, 3000 W. Jefferson, Joliet.

**Creative Writing (LLC 4088)**

Young authors will enjoy learning techniques to express themselves through writing. Poetry, prose, fiction and non-fiction expand creative talent through writing and journaling exercises in a fun and friendly environment. Whether already writing or exploring a hidden talent, this camp is appropriate to help develop all skill levels.

**Robolab Camp/Engineering (LLC 921)**

Young engineers will work in teams as they design and build robots using the Lego Mindstorm NXT Robotics. Students will learn basic building and programming techniques as they work on projects that will build in complexity each day of this camp.

**Register online at [www.jjc.edu and click on eResources](http://www.jjc.edu)**
3-D Innovations Camp (LLC 5167)
What could be more fascinating than the opportunity to print a 3-D masterpiece? This camp will give students the opportunity to explore the world of 3-D printing. Students will be introduced to a simple 3-D printing software program, learn how to search for 3-D printable objects on the Internet, and ultimately create a simple 3-D printed project. This camp will also feature the JJC Makerlab where students will also have the opportunity to learn about additional 3-D technologies, such as a laser cutter and mini milling machine.
TY68  1:30-4:30p.m.  M-R  Main  June 27-30  $129

App Adventures: The Next Level! (LLC 4830)
Continue your quest to make the next viral app! Whether you want to move past the basic techniques learned in App Attack or want to jump right in, we are ready for you! Students will choose from a selection of different web-based (HTML5) mobile apps and explore more in-depth programming concepts. Student-created apps will be accessible on a Black Rocket site and can be played on any mobile device or computer. Publishing to App Stores not included. No prior experience is necessary and students do not need to own a smartphone or tablet to take the class.
TY38  9a.m.-noon  M-R  Main  July 11-14  $224

Let’s Make a Commercial! (LLC 4824)
During this video production class students will construct imaginary products and make commercials to “sell” their new creations. Students will learn how to create storyboards, film their products, then edit and produce their own commercials. Video cameras will be provided. Commercials will be accessible on a password protected website so family and friends can view the final student productions. This camp is limited to 8 students, so register early to ensure a spot for your child.
TY68  9a.m.-noon  M-R  Main  July 11-14  $149

Learn Computer Programming (LLC 4821)
This hands-on camp teaches students the basic concepts of computer science and programming. This camp is designed to teach kids the principles of programming in an engaging and fun environment. Kids begin by playing simple games that introduce core programming logic. Students then move on to use programs like Scratch, Alice, Tynker and AgentCubes. The focus is on learning very basic concepts like understanding how to sequence commands, identify patterns, use procedures, and utilize loops. This camp is designed for beginners. Programming languages, like BASIC, C++, and Java, will not be covered.
TY68  12:30-3:30p.m.  M-R  Main  July 11-14  $149

Minecraft Modders (LLC 4963)
Use your favorite game to learn the basics of modding and foundations of programming. Learn scripting and logic statements as you create your first mod! Introductory coding will also be taught through a simulated environment inspired by Minecraft. Student projects will be available on a Black Rocket website to share with friends and family. To access their project at home students must own a PC/MAC version of Minecraft. Tablet, phone, and game console version of Minecraft are not compatible. Students will work in pairs or teams for most of the program.
TY68  9:30-11:30a.m.  R  Main  July 14 & 21  $44

Want to be an Architect? (LLC 5166)
The buildings and structures around us have an incredible impact our lives! Every day we live, attend school, work, worship, and even play in these buildings. Architects design these structures keeping both art and science in mind as they blend beauty with function and safety. Students will love this fun, fast paced class filled with hands-on activities as they explore architecture and what it takes to become an architect. Open to students in grades 3-8.
TY38  1-4p.m.  T-R  Main  July 12-14  $89

Short Stories for Jr. High (LLC 5164)
Don’t sell them short. Short stories provide a fulfilling literary experience and the pleasure of reading a whole story without sacrificing time. Students will enjoy this fun and friendly camp designed to celebrate the literary experience of the short story.
TY68  9:30-11:30a.m.  R  Main  July 14 & 21  $44
Let's Make A Website! (LLC 4825)
During this class students will build their own personal websites. These websites can focus on any student interest including: family, pets, sports, video games, movies or music. Students will use simple drag and drop software to create webpages, so no complex programming is required. Children will learn how to build webpages, create hyperlinks, and add photos and videos to their websites. In addition, students will be introduced to basic HTML and CSS concepts.
TY68 9a.m.-noon M-R Main
July 18-21 $149

LEGO YOUniverse: Make Your Own Adventure! (LLC 4964)
In this LEGO adventure YOU are the star! Pick your favorite LEGO genre or create an alternate universe to create a digital illustrated story. Whether you want to fight alongside Batman, be part of a Ninjago clan, hang with Ninja Turtles, or go into space with the Bionicles, the only requirement is that you put yourself in the story! All students will end the class with a digital comic book that can be shared with friends and family on a password protected website! Students will work in teams for most of the program.
TY38 9a.m.-noon M-R Main
July 18-21 $224

BOYS-Technology Camp (LLC 4460)
Take a three day fascinating journey into the world of Technology. This hands-on camp taught by JJC technology instructors will inspire young minds to explore the possibilities in the multifaceted field of technology. Students will have the opportunity to learn about many areas of the world of technology and potential career paths. Hands-on experiences will include Manufacturing, Welding, Automotive, Computer Aided Design and Drafting (CADD), Architecture, Engineering, and Construction, Orthotics and Prosthetics, Industrial Maintenance Technology, Electrical, and Robotics. Whether using the virtual welder, taking foot impressions or studying pneumatic power students will be amazed by their journey into the world of technology.
TY68 8a.m.-4p.m. T-R Main
July 26-28 $75

EXPLORE LIGHT, LASERS & OPTICS (LLC 5174)
Quite possibly the career path of the future, students will be fascinated by this four day journey into the world of Optics and Photonics. Based on the science of light, optics and photonics are specialized fields of physics and engineering. These technologies are prevalent in almost every aspect of day-to-day life, from an iPad screen to the inner workings of a mobile phone and high-speed Internet connection, and will continue to grow and enhance people's lives. Students will explore STEM topics with hands-on experiences introducing the fundamentals of light, lasers, fiber optics, and their 21st century applications.

High School

Introduction to Veterinary Medical Technology (LLC 119)
This course is designed to explore the many opportunities available to students pursuing a degree in veterinary technology. Careers including small animal medicine, large animal medicine, research, exotics, wildlife rehabilitation, and education will be overviewed. Field trips to various facilities that employ technicians are included in the course curriculum. Students will also be required to complete 60 hours of on-the-job volunteer work by the end of the course. This course can be used as an alternative to the 100-hour of veterinary experience required for admittance to the veterinary technology program at Joliet Junior College.

TY1 9a.m-1p.m.  W  Main  June 1-29  $495

Find Your Fit-Teens (LLC 4655)
Choosing a career track can be very confusing. Join this highly interactive class designed especially for high school students. Get to know what you like to do, and how to earn a living doing it. In this class you will spend time engaging in activities that are core essentials to each of the six major business career groups and six major career personality types. You will also be given exercises that focus on the 17 basic job skills that ALL business professionals must have to be successful. You will be introduced to many resources that can help you continue to move forward, long after the class has ended. This class will help you explore your options and focus on a goal.

TY1 5:30-8:30p.m.  W  Main  June 22 & 29  $64

Creative Thinking and Engineering (LLC 5111)
Ideas worth spreading! Come out and be engaged and inspired by young leaders from around the world. Through visual graphics, videos and short readings, students will develop 21st century skills and open their minds to a world of adventure and problem solving. This class will allow students to become better readers, writers, thinkers and doers who design and engineer solutions to help solve global real world problems. Students in the class will learn real world application of Science, Technology, Engineering and Math (STEM).

TY1 9a.m.-noon  T  Main  June 21  $50
TY2 9a.m.-noon  T  Main  July 19  $50

3-D Literacy Camp – The Foundation for Innovation (LLC 5168)
This camp will give high school students an opportunity to explore the skills and technology needed to create and print 3-D pieces. Students will print a simple project of their own as they are introduced to the elements of 3-D literacy; 3-D printing, 3-D CAD, and 3-D programming in this hands-on camp. This camp will also feature the JJC Makerlab where students will have the opportunity to learn about additional 3-D technologies such as a laser cutter and mini milling machine.

TY1 1:30-4:30p.m.  M-R  Main  July 11-14  $129

2016 Nursing Exploration Day!
Tuesday, June 14, 2016 • 8:30a.m. - 1:30p.m. • Cost: $20
Join us for a Day in the Life of Nursing at JJC. This high school only program is offered in partnership with local high schools. If you are considering a career in nursing, come see first-hand our state of the art facility; get feedback from some of our current nursing students and get a sneak peek of actual nursing classes. The Nursing Exploration Day will be held at Joliet Junior College’s Main Campus, 1215 Houbolt Road, Joliet, IL. If a career in nursing is for you, then make JJC your 1st choice!

Registration is limited. Call (815) 280-1555 for more information.

Kids College Culinary Camp (LLC 3600)
This camp is for high school age students who want to learn how to prepare and present artful meals. They will learn safe knife skills, how to roast, grill and braise meats, and pastry techniques from a certified executive pastry chef. The cost is less than $12 per instructional hour which is a great price for learning cooking from our award-winning certified chefs.

TY1 8:30a.m.-3:30p.m.  M-R  Main  July 25-28  $299

Hunger Games Survival Club (LLC 5110)
This two day adventure will take students on an amazing journey based on “The Hunger Games” by Suzanne Collins. Students will spend Day 1 learning survival skills such as camouflaging and learning how to build a shelter. On Day 2, students will represent one of the twelve districts and navigate their way to be the victor? Ready. Set. Go!

TY1 9a.m.-noon  W,R  Main  June 22 & 23  $50
TY2 9a.m.-noon  M,T  Main  July 11 & 12  $50

Test Preparation

ACT Prep Workshop (LLC 7230)
This workshop provides an overview of the ACT test and recommends success strategies for teens. Students take a pre-and post-assessment test that addresses the subjects of English, mathematics, science, and reading. Included in the class materials are two complete practice tests, review sections, study cards and test-taking strategies. Text book and other class materials are included in the class fee. Students must bring a calculator and #2 pencil to class.

TY1 4:30-8:30p.m.  W  Main  July 27-Aug. 10  $184

Please note: Students will need to complete a practice ACT test independently before the first class meeting on July 27. A practice test with directions and scoring information will be mailed upon student registration and payment. Please contact Brenda Large at blarge@jjc.edu for additional information.
