Clinical documentation reinvented

Healthcare’s realities
A host of critical imperatives—from Meaningful Use and ACOs, to ICD-10, pay-for-performance and the continuous pressure to deliver more for less—are accelerating significant changes in healthcare organizations of all sizes. Budget pressure, increased compliance risk and frustration around the physician and patient experience are everyday realities. Nuance can help. We offer a more natural, clinically focused approach to capturing the complete patient story—improving quality care, physician satisfaction, financial integrity, and compliance.

Nuance’s physician-centric approach
Our unique clinical documentation approach comprises a combination of innovative solutions and services. Together, they advance an organization’s financial, clinical and operational well-being by improving its entire clinical documentation process and empowering you to:
- Capture documentation, accurately and efficiently
- Improve documentation for better quality outcomes
- Communicate the right information at the right time

Why? Because the physician delivering care, and the point at which the care is delivered, are the best person and place to document it with the most accuracy.

Transform patient stories into high-value information
Nuance’s proven foundation in voice capture and speech-enabled clinical documentation, extended into understanding and analytics, unlocks and transforms captured data into actionable information the healthcare enterprise can use to improve patient care, meet compliance regulations and improve financial integrity.

Our family of clinical documentation solutions is fully integrated with leading EHR and RIS/PACS solutions, helping to streamline and automate workflow and improve the adoption of health information technology. And if that weren’t enough, Nuance extends the value of its capabilities by providing world-class transcription and professional services to healthcare providers around the world.

Empowering clinicians and hospitals worldwide
With more than 500,000 physicians and 10,000 healthcare facilities worldwide leveraging Nuance’s award-winning, voice-enabled clinical documentation and analytics solutions, we understand how physicians document care and how to make it easier for them to do it as part of their everyday workflow.

Nuance Healthcare Solutions

**Dragon® Medical**
Dragon Medical provides clinical documentation understanding solutions for over 300,000 physicians. This portfolio captures the physician narrative to document care in the EHR—anywhere, any time and on any device. It spans both our front-end and back-end speech recognition solutions for clinical narrative, and enables documentation at the point of care through a wide range of capture solutions. Dragon Medical allows physicians to spend more time with patients and accurately document their story at the point of care.

**Clinic 360**
Designed specifically for the ambulatory environment, Clinic 360 solutions allow clinics and specialty practices to increase clinician productivity and improve the overall quality and timeliness of clinical documentation. Clinicians can choose the method of documentation that works best for them—use front-end voice recognition or dictate on a mobile device, recorder or telephone. Clinic 360 streamlines workflow, boosts clinician productivity and creates useful documentation.

**PowerScribe® 360**
PowerScribe 360 instills radiology departments with the confidence of using leading-edge technology designed to support best practices, and works seamlessly with leading RIS/PACS solutions. It enables continuous quality improvement by streamlining the reporting delivery cycle, and communicating relevant data through speech recognition, critical test results management, and performance analysis. PowerScribe 360 improves radiologists' productivity with unparalleled speech accuracy, and encourages referring physician loyalty with actionable reports and immediate communication of critical test results.

**PowerShare™ Network**
The PowerShare Network facilitates better quality patient care, improved operational efficiency, increased referrals and greater collaboration via the secure, real-time exchange of medical images and diagnostic reports. Quickly and securely view, manage and share medical images and diagnostic reports with healthcare professionals and patients anytime, anywhere.

**Clintegrity®**
Clintegrity represents an enterprise-wide, single platform for computer-assisted clinical documentation, coding, compliance and quality. It relies on Nuance’s market-leading Clinical Language Understanding (CLU) technology to power the key steps in the value chain, creating an end-to-end computer-assisted documentation, coding, CDI, and analytics platform. Clintegrity is a clinically driven approach to creating complete and compliant documentation accurately coded for reimbursement, compliance and quality reporting on a real-time basis.

**Nuance Healthcare Development Platform**
The Development Platform is designed for healthcare independent software vendors (ISVs) as well as internal development teams at provider and payer organizations that want to embed advanced speech recognition and clinical language understanding (CLU) functionality into their healthcare workflow solutions.

**Nuance Transcription Services**
Nuance Transcription Services is a flexible, full lifecycle transcription solution that delivers cost-effective, on-time, high-quality clinical documentation. Powered by Dragon Medical eScription™, Nuance Transcription Services reduces outcome variability caused by human error because 90% of dictated volume is processed through speech recognition. Transcription of the original physician narrative is delivered as extremely accurate, formatted drafts that highly skilled MTs review and edit. The result is a combination of unparalleled consistency, quality, and efficiency that can be measured in lower turnaround times, reduced costs, and increased physician satisfaction.

Learn how Nuance can help you improve patient care, enhance financial integrity and satisfy ever-increasing compliance standards.
