Choices and Quality: What JL Industries offers you. Now, for the first time, you will see the complete range of products from JL Industries, Samson Products and Thomas Enterprises complete in one catalog.

With the largest selection of fire extinguisher cabinets in the industry, we manufacture a full line that includes steel, aluminum, brass and bronze models. JL’s reputation for quality products has made us an industry standard for over 60 years.

Try the Spec-Ease® product specification program on our website to assist you in selecting the cabinet for your next application.

Fast Delivery: Take advantage of our Quick-Ship Program for the most popular cabinet models. We ship direct to you from six locations in North America. See the back page for locations.

AMERICANS WITH DISABILITIES ACT COMPLIANCE

Look for Model Numbers in Blue to find cabinets that comply with ADAC.

- Cabinets with the number “2” as the fourth character of the model number. These models project only 4” from the wall and include a flush pull.
- All trimless and flat trim models with any handle.
- All 1 1/4”, 1 1/2”, 2 1/2” or 3” models with any handle—including bubble cabinets.

SAF-T-LOK™ Option
Unique new design for cabinets with cylinder locks

In the panic of a fire emergency, the breaking of the glass in a fire extinguisher cabinet door can be dangerous. It creates the possibility of injury to people and serious liability to the building owner.

We’ve recently modified our existing cabinet cylinder lock design to eliminate the need to break glass to access the extinguisher.

Our SAF-T-LOK™ cam lock design allows you to open the cabinet door by pulling sharply on the handle, yet secure enough to prevent vandalism typically associated with the standard pull handles.

The SAF-T-LOK™ gives you the flexibility to choose any door style and glazing option you require.

The SAF-T-LOK™ provides a safe and fast way to access extinguishers.

FIRE-FX™ Option
Fire Rated Cabinets

AN INDUSTRY FIRST!
U.S. PATENT NO. 5,171,079

JL Industries was the first company in the industry to design and patent a fire-rated option for cabinets. We call this the FIRE-FX™ Option for cabinets that are built to meet building code specifications for fire-rated wall situations. Warnock Hersey has certified and listed JL’s FIRE-FX™ Option for 1-hour and 2-hour combustible and non-combustible walls. All JL Industries fire equipment cabinets with FIRE-FX™ Option are shown in red throughout our catalog.

FIRE-FX™ Option Eliminates:

• The costly need to line the wall opening cavity with fire-rated material.
• Guesswork as to whether the fire barrier has been compromised by the above procedure.

To order or specify, add FIRE-FX™ Option prefix to the seven-digit JL model number. For example, if you want an Ambassador 1017F10 with the FIRE-FX™ Option, ask for the FX 1017F10. Look for the Fire-Rated logo.

SPECIFICATIONS:

Furnish fire-rated cabinet with FIRE-FX™ Option manufactured by JL Industries of Bloomington, MN. Cabinet fabrication to conform to ASTM-E814-83 and UBC-43-6. Cabinets shall carry the Warnock Hersey label for 1-hour combustible and 2-hour non-combustible walls.

*FOR APPLICABLE RESTRICTIONS, SEE THE FIRE-FX™ OPTION DETAIL AND SUBMITTAL SHEET AND THE INSTALLATION INSTRUCTIONS PROVIDED WITH THE PRODUCT.

FIrE ExTINGuISHERS

COSMIC ExTINGuISHERS: Multi-Purpose Chemical

General Data: These units contain specially fluidized and siliconized mono ammonium phosphate powder, which smother and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

CLASS A,B,C Fires

GALAXY ExTINGuISHERS: Regular Dry Chemical

General Data: These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Non-toxic.

CLASS B,C Fires

SATURN ExTINGuISHERS: Class K Wet Chemical

General Data: These units are ideal for commercial restaurant applications as a portable supplement to pre-engineered suppression systems. A low pH potassium acetate solution is discharged in a fine mist that provides excellent range while preventing splashing and creating an effective saponification foam-type blanket necessary for suppressing liquid cooking media fires.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Non-toxic.

CLASS A,B,C Fires

MERCURY ExTINGuISHERS: Halotron®

General Data: This model contains the clean extinguishing agent Halotron® 1, which is EPA-approved, government-accepted and specified. This agent discharges as a liquid, then quickly evaporates, leaving no residue to clean up afterwards. U.S. FAA-approved for use in airports. NFPA-10 rating. Electrically non-conductive.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Temperature range from -40°F to +120°F.

Construction: Drawn steel cylinder with steel siphon tubes, power cone discharge stream, upright squeeze grip visual pressure gauge and corrosion-resistant paint finish.

CLASS A,B,C Fires

GALAXY ExTINGuISHERS: Regular Dry Chemical

General Data: These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

CLASS A,B,C Fires

SENTINEL ExTINGuISHERS: Carbon Dioxide

General Data: This extinguisher contains liquid carbon dioxide under pressure.

Operation: Squeeze the lever, which opens the valve, allowing the carbon dioxide to be forced out. The discharge, which changes into a gas and appears as a smothering cloud of white snow, is then directed to the fire through a funnel-shaped horn. Electrically non-conductive.

Construction: Lightweight, high-pressure, aluminum cylinder with O-ring seal and straight thread brass valve fits all sizes. The Sentinel is absolutely rust-free and up to 30% lighter than CO2 units with steel cylinders.

CLASS B,C Fires

272: Water Mist for Electrical

General Data: The water mist extinguisher is ideal for Class A fires where a potential Class C (electrical) hazard exists.

Operation: The unique misting nozzle provides safety from electrical shock, making this extinguisher ideal for use in telecommunications and cleanroom environments.

Construction: Non-magnetic cylinder and misting nozzle. For use in medical facilities.

CLASS A,C Fires

GRENADIER ExTINGuISHERS: Pressurized Water

General Data: The “water press” extinguisher contains water and compressed air. Units shipped empty.

Operation: Squeeze the lever, which opens the valve, allowing the water to be forced out. Upright squeeze grip operation.

Construction: Butt-welded 304-L stainless steel cylinder (eliminates all internal and external crevices). Rugged stainless steel discharge lever and fixed carry handle with visual pressure gauge, pull pin. Heavy-duty, brass, chrome-plated valve body with replaceable molded valve stem seal. UL labeled chemical engine hose.

CLASS A Fires
**495: Wheeled Multi-Purpose Chemical 50-lb Unit**

**General Data:** Portable, large-capacity extinguisher units contain specially-fluidized and siliconized mono ammonium phosphate powder which smothers and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

**Operation:** Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

**Construction:** Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

**CLASS A,B,C Fires**

**FIrE ExtinguIShErS**

**496: Wheeled Dry Chemical 50-lb Unit**

**General Data:** These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

**Operation:** Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

**Construction:** Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge, pull pin and upright squeeze grip.

**CLASS B,C Fires**

**Note:** Other types of wheeled fire extinguishers are available including carbon dioxide unit and nitrogen cylinder-operated units. Please contact JL Industries for further details.

**PANORAMA SERIES: Frameless Acrylic Door**

**Door and Trim Construction:** The Panorama features a frameless acrylic door with scratch-proof lettering. The “stippled” texture of the opaque doors and exclusive aluminum backing protect the lettering, which is available in 3 colors and configurations. Clear doors also available. Flush cabinet doors with a 5/8” door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch. Trim is cold rolled steel with white powder-coat. #180 clear anodized aluminum, or #4 stainless steel.

**Trim Style and Depth:** Recessed - 3/8” flat trim or trimless. Semi-Recessed - 1 1/4”, 1 1/2” Square Edge or 2 1/2”, 3”, 4”, 4 1/2” Rolled Edge. Surface-mount has a square edge or optional rolled edge for steel or stainless steel upon request. 1 3/4” face trim on frame.

**Tub:** Constructed of cold rolled steel with white powder-coat finish standard.

**Fire-Rated Option Available:** Yes

TO ORDER CALL 1-800-554-6077 OR VISIT WWW.JLINDUSTRIES.COM
AMBASSADOR SERIES: Steel Trim and Door

Door and Trim Construction: Cold rolled steel with white powder-coat finish standard. Flush cabinet doors with a 5/8" door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch.

Trim Style and Depth: Recessed - 3/8" flat trim or trimless. Semi-Recessed - 1 1/4", 1 1/2" Square Edge or 2 1/2", 3", 4", 4 1/2" Rolled Edge. Surface-mount has a square edge or optional rolled edge upon request. 1 3/4" face trim on frame and door.

Tub: Constructed of cold rolled steel with white powder-coat finish standard.

Fire-Rated Option Available: Yes

ACADEMY SERIES: Aluminum Trim and Door

Door and Trim Construction: No. 180 clear anodized aluminum. Flush cabinet doors with a 5/8" door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch.

Trim Style and Depth: Recessed - 3/8" flat trim or trimless. Semi-Recessed - 1 1/4", 1 1/2" Square Edge or 2 1/2", 3", 4", 4 1/2" Rolled Edge. Surface-mount has a square edge or optional rolled edge upon request. 1 3/4" face trim on frame and door.

Tub: Constructed of cold rolled steel with white powder-coat finish standard. Surface-mounted models have clear anodized aluminum tubs.

Unique Options: Light, medium or dark bronze anodized finish.

Fire-Rated Option Available: Yes

COSMOPOLITAN SERIES: Stainless Steel

Door and Trim Construction: No. 4 stainless steel. Flush cabinet doors with a 5/8" door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch.

Trim Style and Depth: Recessed - 3/8" flat trim or trimless. Semi-Recessed - 1 1/4", 1 1/2" Square Edge or 2 1/2", 3", 4", 4 1/2" Rolled Edge. Surface-mount has a square edge or optional rolled edge upon request. 1 3/4" face trim on frame and door.

Tub: Constructed of cold rolled steel with white powder-coat finish standard.

Unique Options: Custom Stainless Steel Finishes - #6 satin, #7 or #8 polished stainless.

Fire-Rated Option Available: Yes

Options for all Models:

Door Styles
- F: Full Glazing
- G: Full Glazing with SAF-T-LOK™
- H: horizontal duo Panel
- E: horizontal duo Panel with SAF-T-LOK™

FIRE HOSE AND VALVE CABINETS

CROWNLINE 6000-7200 SERIES: Cabinets for Fire Hoses and Extinguishers
CROWNLINE 8000 SERIES: Cabinets for Fire Department Valves

Door and Trim: #4 stainless steel, clear anodized aluminum or cold rolled steel with white powder-coat finish standard. 1 3/4” Trim on face and door. These flush cabinet doors are mounted in a 5/8” door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch for all non-break glazed doors.

Trim Style and Depth: Recessed - 3/8” flat trim or trimless. Semi-Recessed - 1 1/4” Square Edge or 2 1/2”, 3”, 4”, 4 1/2” Rolled Edge. Surface-mount has a square edge or optional rolled edge for steel or stainless steel upon request. 1 3/4” face trim on frame and door.

Tub: White powder-coated cold rolled steel. Surface-mounted models feature a galvanized back panel.

Unique Options: Knockouts for plumbing connections, 8000 series features a shelf 12” from the bottom of the tub for a fire extinguisher. 8017-8017 models accommodate fire extinguisher and fire blanket or fire department valve. See below.

Fire-Rated Option Available: Yes

Knockouts: Hose Cabinet Knockouts for All Trimless, Flat Trim or 2 1/2” Crownline Cabinets: Knockouts (K.O.s) are provided centered, one, side, top and bottom—other side offset, top and bottom. All 6” K.O.s offset both sides 2 1/2” x 4”. Offset is for semi-recessed applications (see selection chart). Trimless K.O.s centered only—no offset. For surface-mount cabinets knockouts are provided only when exact location is known.

K.O.s are not provided on FIRE-FX cabinets. Instructions for the knockouts in the field are provided and must be strictly adhered to maintain fire-rating.

THE ROYAL SERIES: Fire Blankets & Cabinet

Royal fire blanket cabinets come in two basic designs. The Royal 9519S21 is a roller type for emergency use. The enclosed blanket is attached to the vertical roller and comes with arm loops to enable a person to wrap themselves in the blanket in one continuous motion. The Royal 9613S21 is a handy “drop” type with folded blanket. Both units are surface mounted. Each comes with a nominal 62" x 84", 3 1/2 pound, processed wool fire blanket, which meets the Flammable Fabrics Act: Flammability of Clothing Textiles, Title 16, CFR1610.

COMMANDER ALARM

Easy to install cabinet alarms protect against theft or tampering. The Commander Alarm (shown here) is an economical choice.

**Note:** For surface mount cabinets, add 3/8” to width and height measurements. See product page for wall opening dimensions.
GUIDE SPECIFICATION: Division 10 44 00

1.01 Work Included
A. Fire Extinguishers
B. Cabinets
C. Accessories

1.02 Related Work
A. Section 09 06 90 - Field painting
B. Section 21 13 00 - Fire Sprinkler Systems
C. Section 21 12 00 - Standpipe and Hose Systems

1.03 References
A. NFPA10-Portable Fire Extinguishers
B. UBC 7-5 (ASTM E814-97) & UBC 7-1 (ASTM E119-97) under positive pressure fire-rated cabinets fabricated in accordance to measure, restore, perform.
C. Americans with Disabilities Act 1990 – Maximum 4" cabinet projection for corridors.

1.04 Quality Assurance
A. Conform to NFPA 10 requirements for portable fire extinguishers.
B. Provide fire extinguishers, cabinets and accessories by a single manufacturer.
C. Conform to UBC 7-5 (ASTM E814-97) & UBC 7-1 (ASTM E119-97) for fire resistive wall performance where necessary.
D. Conform to Americans with Disabilities Act 1990 on maximum cabinet projection of 4" in corridors where necessary.

1.05 Submittals
A. Submit brochure and product data in compliance with section 00 62 00.

1.06 Submittals
A. Package, handle, deliver and store at the job site in a manner that will avoid damage. Damaged equipment will be rejected.

2.01 Acceptable Manufacturers
A. Where shown on the drawings, provide fire extinguishers, cabinets, accessories manufactured by JL Industries, Inc., 4450 West 78th Street Circle, Bloomington, MN 55435, (952) 835-6850, Fax: (952) 835-2218

2.02 Fire Extinguishers
A. Water Type: JL Industries Grenadier P
B. Dry Chemical Type: JL Industries Cosmic or Galaxy Series.
C. Carbon Dioxide Type: JL Industries Sentinel Series.
D. Wet Chemical Type: JL Industries Saturn Series.
E. Halotron 1: JL Industries Mercury Series

2.03 Fire Extinguisher Cabinets
A. Where indicated on drawings, provide JL’s ______ Series, model number _____ door. Door and trim to be fabricated from (cold-rolled steel, aluminum, stainless steel). Color anodized aluminum, special painted surfaces and graphics as indicated.
B. Provide cabinets with fire-rated option, if applicable.

2.04 Accessories
A. Fire Blankets and Cabinets.
B. Extinguisher Brackets
C. Cabinet Alarms
