Our Story

A developer by trade, kCura’s founder and CEO, Andrew Sieja, has always recognized the importance of great software. Beginning as a small software consulting firm in 2001, kCura has since grown to be an e-discovery software company with more than 600 team members and an expanding group of global partners and clients, with Andrew’s original focus on building great software intact. We decided to focus on e-discovery software specifically after a consulting engagement with a law firm, in which Andrew saw the need for an easy-to-use litigation review application. It was a risk to drop the consulting practice to focus on this software, joining a decade-old industry with well-established legacy products.

We did find a place in the industry with Relativity, which help corporations, law firms, and government agencies solve e-discovery challenges. Relativity was designed with the end user in mind and is offered as an in-house installation or on-demand through our partners. As an organization that is focused on technology, we are continuously finding ways to make our software more flexible, more scalable, and easier to use.
Fast Facts
As of May 15, 2016

RELATIVITY
- **135,796** active users
- Largest case to date involves more than **750 million** documents
- **105,814** active cases currently running in Relativity
- More than **66 billion** files under management in Relativity
- Used by **more than 190** of the AmLaw 200
- Installations with **47** of the AmLaw 100 and **87** of the AmLaw 200
- Used by **70** of the Fortune 100

Timeline

2001
Andrew Sieja forms kCura as a software consultancy; we purchase our unassuming green couch from a friend of a friend.

2006
The first version of Relativity is released.

2007
Andrew Sieja forms kCura as a software consultancy; we purchase our unassuming green couch from a friend of a friend.

2008
We switch our focus to e-discovery, becoming a pure software company.

2009
Relativity becomes a platform for users to create custom applications; we employ 61 smart and fun people.

2010
We launch our legal hold application; the first annual Relativity Fest is held here in Chicago; kCura Gives is launched; we employ 105 smart and fun people.

2011
Relativity Assisted Review is released to help case teams work smarter and go faster; our software has more than 50,000 active users; we employ 192 smart and fun people.

2012
Our software has more than 70,000 active users; Relativity 7.5 is released with the announcement of Processing; we employ 259 smart and fun people.

2013
Relativity 8 and 8.1 are released, adding email threading and 35 user requested enhancements; we launch an iPad app, Relativity Binders; our software has more than 85,000 active users; we employ 347 smart and fun people.

2014
Relativity 8.2 and 9 are released, adding Collection; our software has more than 100,000 active users; we employ 453 smart and fun people.

2015
Relativity 9.2 and 9.3 are released, giving more than 130,000 users more insight into their data. We take over another floor in our Chicago office space to accommodate our rapid growth; we employ 518 smart and fun people.
The Product

OVERVIEW

Relativity—kCura’s e-discovery software—has more than 130,000 active users worldwide from organizations including the U.S. Department of Justice and more than 190 of the top 200 law firms in the United States. kCura helps corporations, law firms, and government agencies meet e-discovery challenges by installing Relativity on-premises and providing hosted, on-demand solutions through a global network of partners.

LEARN MORE »

FEATURES

Legal Hold
Guides users through creating a defensible and repeatable process for managing legal holds when an organization becomes involved in litigation.

LEARN MORE »

Collection
Helps users collect select electronic documents or forensic images from a hard drive.

LEARN MORE »

Processing
Allows users to analyze data gathered during collection, filter out obvious junk, and process raw data directly into a review workspace.

LEARN MORE »

Analytics
Organizes documents based on concepts and email conversations, allowing users to speed up review and quickly identify key issues.

LEARN MORE »

Assisted Review
Learns from the decisions of expert reviewers and amplifies their efforts to the rest of a document universe, reducing the time and cost of review.

LEARN MORE »

Platform
Allows users with or without programming experience to add custom functionality on top of Relativity. Users can also install existing applications or software integrations from the Relativity Ecosystem.

LEARN MORE »
Mobile

Relativity Binders is a mobile and web application that gives attorneys fast, easy, and secure access to important case documents on any tablet or computer. It allows users to search, annotate, print, and email documents to plan for depositions or perform other case-related preparation on the go.

Binders syncs with Relativity and across devices, so users can pick up their work anywhere, anytime.
