DEFINING TOMORROW

T609
Kenworth’s T609 is primarily suited to on-highway applications and offers a range of engine options up to 600 horsepower, with excellent cooling capacity and all the in-cab luxuries. Well suited to multiple trailer combinations including B-Double and road trains, the T609 stands out for outright versatility, road presence and unmatched aerodynamic styling. With stunning looks and perfect road manners it’s no wonder the T609 turns heads on the highways, and looks equally impressive when it comes to performance figures.
Welcome to our Business Class interior, designed to deliver maximum driver confidence, with comfort and control in perfect harmony.

**COMFORT AND CONTROL**

Classic styling has been teamed with the highest standards of quality and safety in our cab design.

The large one-piece curved windscreen offers a commanding view of the road ahead with excellent all round visibility.

An unobstructed view of gauges and easy access to vital switches and controls are provided by the cleverly designed wrap around dash, enhancing driver comfort and minimising fatigue.

Convenient storage, contemporary trim, privacy curtain, a range of seat options and “Smart Wheel” fingertip access for engine brake and cruise functions, all deliver further driver confidence, comfort and control.
Kenworths work harder for longer, because they are purpose designed for their intended task, then manufactured to those exacting specifications with uncompromising quality, at our world-class production facility in Bayswater, Victoria.

We look carefully at your specific application and performance requirements and engineer the best possible combination of chassis, engine, transmission and drivelines from our extensive range of options.

Through Application Engineering at the design/specification phase, the features and benefits that best meet your needs can be included at the factory level as an integrated solution, delivering enhanced productivity, durability, reliability and safety.

For example, Kenworth trucks can be built to a variety of wheelbases with components mounted onto the frame to suit your needs. We optimise the strength of each frame by locating the various parts so that loads are evenly spread and fuel tank capacity can be maximised.
THE POWER OF CHOICE

Whichever road you take regarding engine emission technology rest assured you’ll make the right choice with Kenworth. Offering the best of both worlds with the option of the Cummins ISX or Cummins Signature with EGR or Cummins ISXe5 up to 600hp with SCR after-treatment.
DEFINING THE BEST DEALER NETWORK
