Where Children Matter Most
2016

BOARD OF EDUCATION
Rose M. Widdis, President
Bill Dangler, Vice President
Mary L. George
Avery W. Grant
Michele Critelli, Ed.D.
Armand R. Zambrano, Jr.
James N. Parnell
Donald C. Covin
Caroline Bennett

ADMINISTRATION
Administration/Educational Center
540 Broadway, Long Branch NJ 07740
(732) 571-2868

Michael Salvatore, Ph.D.
Superintendent of Schools

Alvin L. Freeman
Assistant Superintendent of Schools

JanetLynn Dudick
Assistant Superintendent for Pupil & Personnel Services

Peter E. Genovese III
School Business Administrator/Board Secretary

Nancy L. Valenti
Assistant School Business Administrator/Assistant Board Secretary
Academies

The Academy structure at the Long Branch High School will allow students individualized attention and direction in their career paths. Every academy will offer the student the core curriculum requirements that they will need to receive their diploma. Part of the curriculum will include elective studies to help students develop their career pathways.

Academy of Sciences, Technology, Engineering & Mathematics

The Academy of Sciences, Technology, Engineering and Mathematics will provide opportunities of study for students whose areas of interests are mathematics, scientific and/or technologically-oriented curricula. In the science strand the students will explore and study all facets of science including physics, biology, and chemistry. In the technology strand the students will be exposed to curricula designed to familiarize them with all phases of computer applications and usage.

Academy of Leadership

The Leadership Academy provides the students the opportunity to explore the areas of civics, business and education. The Civics strand will focus on Law and Public Service. Students will learn about local and state government and participate in activities that impact the community in which they live. The Business and Law strand will help students become talented managers, leaders and future administrators with business skills and knowledge needed for the 21st century. The Education Strand will provide course offerings to students with a realistic understanding of teaching and encouraging students to think seriously about the teaching profession.

Academy of Visual and Performing Arts

The Visual and Performing Arts Academy will be the balance between artistic development and academic preparation. Students will explore multi-media careers along with the creative aspects of the tech and business world along with educational pursuits.
PROGRAM OPTIONS
Long Branch High School offers a variety of program options. Descriptions for these program offerings are listed below.

Advanced Placement Program
AP courses are college level courses, with a higher level of expectation than Honors courses. Upon completion of these courses, students should plan to take the appropriate AP Exam. A score of a 3 or more on a scale of 1-5 may result in placement and/or credit at the college level. There is summer preparation work required for many of the AP courses. AP courses are granted additional weight in the GPA calculation.

AP courses typically offered by Long Branch High School include:

<table>
<thead>
<tr>
<th>AP Literature Composition</th>
<th>AP Psychology</th>
<th>AP Chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP U.S. History II</td>
<td>AP Calculus</td>
<td>AP Physics I</td>
</tr>
<tr>
<td>AP World History</td>
<td>AP Macro-economics</td>
<td>AP Human Geography</td>
</tr>
<tr>
<td>AP American Government</td>
<td>AP Biology</td>
<td>AP Physics II</td>
</tr>
<tr>
<td>AP Art</td>
<td>AP Spanish</td>
<td>AP Language Composition</td>
</tr>
</tbody>
</table>

Honors Program
Honors courses often include an in-depth study of particular subjects accompanied by rigorous demands upon students in terms of study skills, homework, and independent projects. Honors level courses are granted additional weight in the GPA calculation. Placement in Honors level courses is based in part on students meeting appropriate prerequisites, previous grades earned in the subject area and teacher recommendation. Parental input also plays a role in the placement of students into the Honors program.

Special Education
Long Branch High School provides special education and/or related services to classified students. These programs are designed to meet individualized needs of each child as prescribed in the students Individual Education Plan (IEP). The IEP is developed with the assistance of the Child Study Team, the parent(s)/guardian(s) of the child, a special education teacher and a regular education teacher. The continuum of services offered includes departmentalized and non-departmentalized self contained classes, resource center replacement classes and in-class support in regular education classes. Related services include adaptive physical education, speech and language therapy, counseling, occupational therapy, physical therapy and transportation. Special education students are generally mainstreamed for elective and physical education courses.

Course offerings are English, mathematics, social studies, science, and reading. The curricula used will be the same for the classified and the non-classified student with modifications in instructional strategies and/or testing procedures based upon modifications in the student’s IEP. Vocational opportunities are available to special education students through the Monmouth County Vocational programs and Career Center.

Each student’s program is continually evaluated to provide consistency in his/her course of study and adequate knowledge for present and future use so that he/she can make a successful transition to life after high school.

ESL/Bilingual Education
These are intensive language acquisition courses offered to all ELL students’ grades 9-12 according to their language proficiency levels. These courses develop four basic language skill areas: listening, speaking, reading, and writing. They integrate basic proficiencies from the English Department courses adapting the English curriculum such as the study of literature, paragraph development, and job skills. Study skills and learning strategies are taught for test preparation. The courses prepare students to enter content area academic subjects and give them credit for English I, II and III.
**DROPPING/ADDING COURSES**

Please take the time to choose courses that are the best match for you. Take into account your interests, ability, and goals. Careful selections at the time of registration will result in fewer problems once the 2016-17 school year begins.

Changing courses after the academic year has started can often be very disruptive to a student's schedule. Schedule changes will ONLY be permitted up to two weeks (10 school days) from the first day of the class. In order to accommodate a change in classes, there could be a disruption in other areas of a student's schedule. Students will be responsible for making up any missed work in the new course. Any changes after the first quarter could result in a failing grade which will be considered as a complete grade in determining National Honor Society, class rank, Varsity Scholars or athletic eligibility.

**GRADUATION REQUIREMENTS**

The Board of Education of the Long Branch School District has established high school graduation requirements with state and district goals. In order to graduate from Long Branch High School and receive a state-endorsed Board of Education diploma, a pupil must:

Successfully complete a program of studies in grades nine through twelve, which shall include, but are not limited to:

<table>
<thead>
<tr>
<th>Core Curriculum Content</th>
<th>Minimum Courses and Credit Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Language Arts Literacy (LAL)</td>
<td>At least twenty (20) credits including English 9, English 10, English 11, English 12</td>
</tr>
<tr>
<td>Mathematics (MA)</td>
<td>At least fifteen (15) credits including Algebra and Geometry</td>
</tr>
<tr>
<td>History (HIS)</td>
<td>At least fifteen (15) credits including World History, United States History I and II</td>
</tr>
<tr>
<td>Science (SC)</td>
<td>At least fifteen (15) credits</td>
</tr>
<tr>
<td>World Language (WL)</td>
<td>At least five (5) credits</td>
</tr>
<tr>
<td>Visual and Performing Arts (VPA)</td>
<td>At least five (5) credits</td>
</tr>
<tr>
<td>Career Education and Consumer Science (CCS)</td>
<td>At least five (5) credits</td>
</tr>
<tr>
<td>Financial, Economic, Business &amp; Entrepreneurial literacy (FEBE)</td>
<td>At least two and a half (2.5) credits</td>
</tr>
<tr>
<td>Physical Education (PE)</td>
<td>At least five (5) credits for each year of enrollment</td>
</tr>
<tr>
<td>General Electives (GE)</td>
<td>No minimum required</td>
</tr>
</tbody>
</table>

Current graduation requirements are subject to change by the state and/or local Board of Education.
Grade Weighting (Honors Courses)

The weighting of grades shall take place for the following honor and Advanced Placement courses:

### English

<table>
<thead>
<tr>

### Visual and Performing Arts

<table>
<thead>
<tr>
<th>Course</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP Art</td>
<td></td>
</tr>
</tbody>
</table>

In order not to penalize a student who earns a lower grade in a more challenging course, a weighted value is added to the grades earned in the courses listed above.

**CLASS RANK**

Class rank is determined by placing the cumulative grade average of the students in descending order.

**GRADING**

The following numeric grades are utilized for assessing students. It is the responsibility of the students to meet all academic and attendance obligations related to grades. Grades in the ranges listed are described by the comments indicated.

<table>
<thead>
<tr>
<th>Grade Range</th>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>92-100</td>
<td>Excellent</td>
<td>1</td>

</tbody>
</table>
REQUIREMENTS FOR PROMOTION
Credits will clarify a student’s grade level status. In order for a student to move on to the next grade level, each student must acquire the following credits:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Minimum Credits Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>27.5</td>
</tr>
<tr>
<td>11</td>
<td>55</td>
</tr>
<tr>
<td>12</td>
<td>85</td>
</tr>
</tbody>
</table>

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>120 credits needed to graduate</td>
</tr>
</tbody>
</table>

HONOR ROLL CRITERIA
To be eligible for honor roll, High School students must have grades as follows:
  a. High Honors – An average of 92 or above with only one grade below 92 and that grade cannot be below an 84.
  b. Honors- An average of 84 with only one grade below an 84 and that grade cannot be below a 77.

An incomplete grade in any subject or a dropped subject will render a student ineligible for any honor roll.
ENGLISH

4120 English 9 Honors
NCAA 5.0 Credits ENG
Prerequisite: English grade gifted class and/or teacher recommendation

The primary focus of this course is placed on developing students primary English skills while studying a variety of authors and genres. Students will also be challenged to think critically and student’s analytical skills will be refined. Students will develop vocabulary as well as their compositional writing skills through the short stories, novels, dramas, and poems studied. Study skills will also be reinforced throughout the curriculum.

4111, 4121, 4131 English 9
NCAA 5.0 Credits ENG

The primary focus of this course is placed on developing students primary English skills while studying a variety of authors and genres. Students will develop vocabulary as well as their compositional writing skills through the short stories, novels, dramas, and poems studied. Study skills will also be reinforced throughout the curriculum.

1120, 2120, 3120 English 10 Honors
NCAA 5.0 Credits ENG
Prerequisite: A grade of 92 or above in the previous English 9(Honors). A proficient score in the most recently taken standardized test and teacher recommendation.

The primary focus of this course is placed on reinforcing and refining the skills developed in English 9 through the exploration of a variety of genres. Students will also be challenged to think critically and student’s analytical skills will be refined. Students will develop progressive skills in vocabulary and compositional writing skills while exploring short stories, novels, dramas, and poems.

1121, 2121, 3121 English 10
NCAA 5.0 Credits ENG

The primary focus of this course is placed on reinforcing and refining the skills developed in English 9 through the exploration of a variety of genres. Students will develop progressive skills in critical thinking, vocabulary and compositional writing skills while exploring short stories, novels, dramas, and poems.

1130, 2130, 3130 English 11 Honors
NCAA 5.0 Credits ENG
Prerequisite: A grade of 92 or above in the previous English 10 (Honors). A proficient score in the most recently taken standardized test and teacher recommendation.

The primary focus of this course is an intensive study of American Literature coupled with advanced analytical writing. This course will further develop students’ critical thinking and analytical writing skills using various texts from early to modern American Literature. Study skills for PSAT and SAT will be emphasized.

1131, 2131, 3131 English 11
NCAA 5.0 Credits ENG

The primary focus of this course is placed on reinforcing and refining skills taught in English 10. Students will further develop their critical thinking and analytical writing skills using various texts from early to modern American Literature. Study skills for the PSAT and SAT will be emphasized.

5120 Advanced Placement English Language and Composition (Grade 11)
5.0 Credits ENG

This English course is for students who wish to pursue college-level studies while still in secondary school. A.P. students will read texts critically, analyzing rhetoric through extensive writing and discussions. This course primarily analyzes nonfiction texts (both visual and written). Students will be prepared to take the AP English Language & Composition exam in May.
5140 Advanced Placement English Literature and Composition (Grade 12)
NCAA 5.0 Credits  ENG

Prerequisite: A grade of 93 or above in the previous English 11 (Honors). A proficient score in the most recently taken standardized test and teacher recommendation.

This English course is for students who wish to pursue college level studies while still in secondary school. A.P. students will read critically and reflect on their reading through extensive discussion, writing and rewriting. Students will further develop their critical thinking and analytical writing skills in preparation for the A.P. exam in May.

5130 English 12 Honors
NCAA 5.0 Credits  ENG

The primary focus of this course is an intensive study of British Literature coupled with advanced analytical writing. This course will further develop students’ critical thinking and analytical writing skills using various texts from early to modern British Literature. College essay writing will be emphasized.

1141, 2141, 3141 English 12
NCAA 5.0 Credits  ENG

The primary focus of this course is placed on reinforcing and refining skills taught in English 11 as well as preparing students to succeed in their future years in college or in the work force. Students will further develop their critical thinking and analytical writing skills using various texts from early to modern British Literature. College essay writing will be emphasized.

1909, 4721 Creative Writing I
NCAA 5.0 Credits  VPA

This creative writing course is a course of instruction for students who have a genuine interest in the creative writing process. It will provide significant background for all four writing genres – essay, poetry, fiction and drama.

1918 Creative Writing II
NCAA 5.0 Credits  VPA

Prerequisite: Successful completing of Creative Writing I

This course is designed to provide advanced instruction for those students interested in furthering the development of their creative writing abilities. It will provide significant background in all genres – essay, poetry, fiction, drama and mythology.

1907 Journalism (Trumpet)
NCAA 5.0 Credits  CCS

This course is designed primarily for students who demonstrate proficient writing skills and who are interested in developing the school newspaper, the Trumpet. The course includes the teaching of basic news writing, editing style, symbol use, error detection, and page layout.

1905 Yearbook Journalism
5.0 Credits  CCS

This course will present the fundamentals and techniques of photo-journalism including basic photography, photo selection, identification of subjects, caption writing, theme selection, layouts, graphics, advertising and finance. Students will participate in designing and producing the yearbook.

2145 Race, Gender and Ethnicity
NCAA 5.0 Credits  GEN

This course will study the many cultures that help shape our school. Novels and short stories will be explored and examined with the literature studied from both a historical and contemporary perspective.
9660 SAT English
2.5 Credits
GEN
This course is designed to develop the reasoning skills and conceptual knowledge base needed for success on the SAT examination. Test-taking strategies and techniques will also be discussed. Practice SAT tests will be administered to prepare for the actual test.

5973 Read 180
5.0 Credits
GEN
Read 180 is a reading intervention program that uses a system of instructional software, leveled-and-modeled reading practice, and teacher-directed instruction.

5978 English 9 LAB
5.0 Credits
ENG
This course is specifically designed for those students who are enrolled in English 9 and have been identified through standardized test scores, prior academic history and teacher recommendation as needing additional reading and writing instruction. A skills based approach to the foundations of high school English that is enriched with foundational and supplemental activities designed to enhance the English 9 experience is used.

SCIENCE

5365, 5371 General Physical Science
NCAA 5.0 Credits
SCI
This course is designed to serve as a foundation for other high school science courses. It will emphasize the basic laws of chemistry and physics. Laboratory and problem solving activities will be utilized to cover the curriculum. This course will include the following units: Scientific Inquiry, Properties and Classification of Matter, Structure and Properties of Atoms, Chemical Bonding and Reactions, Forces and Motion, Nature, Conservation, and Transfer of Energy, and Nature and Properties of Mechanical and Electromagnetic.

1320, 2320, 3320, 4310, 4330 Biology Honors
NCAA 5.0 Credits
SCI
Science Prerequisite: A grade of 86 or above in previous science class and Math Prerequisite: Algebra I or be concurrently enrolled in Algebra I
This course is recommended for students who have demonstrated above average ability in math and science and plan to pursue a career in the engineering, computer, environmental and various medical related fields. Students explore biological concepts through an inquiry approach, following the Next Generation Science Standards as does regular biology, but with increased depth and breadth of content. Topics include the study of cell structure and function on a molecular level such as photosynthesis, respiration and protein synthesis. In addition, concepts include biochemistry, cell biology, taxonomy, physiology, genetics, ecology, homeostasis and disease.

1321, 2321, 3321, 4234, 4214 Biology
NCAA 5.0 Credits
SCI
Science Prerequisite: Geophysical
Math Prerequisite: Algebra I or be concurrently enrolled in Algebra I
This course is designed to introduce students to the diversity and complexity of the living world around them and the interdependence and interrelationship that exists among all living organisms. Students explore biological concepts through an inquiry approach, following the Next Generation Science Standards. Concepts studied include biochemistry, cell biology, taxonomy, physiology, evolution, genetics, ecology, homeostasis and disease. Connections are made between these biological concepts and student lives.
5350 Advanced Placement Biology
NCAA 6.0 Credits

Science Prerequisite: Biology, Chemistry, Physics or concurrently enrolled in Physics.
Math Prerequisite: Algebra II or Statistics, a student can be concurrently enrolled in Algebra II or Statistics

Advanced Placement Biology is a second year of biology, which is based upon the College Board Curriculum Guide for College Level Biology. The curricula addresses the 4 big ideas of AP biology which include evolution and diversity, energy and molecular building blocks, information transfer in life processes and biological and ecological interactions. Laboratory work will be extensive and involve student directed inquiry. Students will be required to take the Advanced Placement Exam.

1330, 2330, 3330 Chemistry Honors
NCAA 5.0 Credits

Science Prerequisite: Algebra I, Biology or Biology Honors
Math Prerequisite: Geometry or concurrently enrolled in Geometry

Chemistry is a course based on regular laboratory investigations of matter, chemical reactions, and the role of energy in those reactions. Students in Chemistry compare, contrast, and synthesize useful models of the structure and properties of matter and the mechanisms of its interactions. In addition, students enrolled in this course are expected to: gain an understanding of the history of chemistry, explore the uses of chemistry in various careers, investigate chemical equations and problems related to personal needs and societal issues, and learn and practice laboratory safety.

1331, 2331, 3331 Chemistry
NCAA 5.0 Credits

Science Prerequisite: Biology or Biology Honors
Math Prerequisite: Geometry or concurrently enrolled in Geometry

ChemCom® takes a different approach to the learning of chemistry. Each of the eight units revolves around a societal question. This question creates a need to know chemistry to find a solution. The context of each question is a community: local, workplace, national, or global. The chemistry presented to the students builds upon the same vocabulary, thinking skills, problem solving and lab techniques as most traditional introductory chemistry courses. However in ChemCom® the student is lead to integrate what they have learned to see how it addresses issues in the real world. This is accomplished through many decision making activities that are a part of the course. It is the long term goal of the curriculum to present to the students the need and the skills to acquire technical knowledge to make intelligent decisions for themselves and for the communities in which they belong.

5360 Advanced Placement Chemistry
NCAA 6.0 Credits

Science Prerequisite: Biology Honors or Biology, Chemistry Honors or Chemistry, Physics
Math Prerequisite: Algebra II or concurrently enrolled in Algebra II

Advanced Placement Chemistry is a second year of Chemistry that is based upon the College Board Curriculum Guide for College Level Chemistry. The AP Chemistry course is to provide students with a solid foundation in modern chemistry. Fundamental principles and concepts are presented with an emphasis on rigorous mathematical treatment of quantitative data taken from extensive laboratory work. Students are introduced to sophisticated equipment used in basic analytical work. The maintenance of the 84 average for the first three marking periods is an indication that the student is well prepared to take the Advanced Placement Examination that is given in May.

5341 Physics
NCAA 5.0 Credits

Science Prerequisite: Chemistry or Chemistry Honors Math Prerequisite: Algebra II or Statistics, a student can be concurrently enrolled in Algebra II or Statistics

This is an introductory course with some emphasis on the historical and philosophical aspects of science. It is designed primarily for the college preparatory student who is interested in the humanities. Course materials are designed to provide a more qualitative than mathematical approach to the study of light, mechanics, magnetism, electrostatics, and electricity.
5330 Physics Honors  
NCAA 5.0 Credits  
SCI  
Science Prerequisite: Chemistry or Chemistry Honors  
Math Prerequisite: Algebra II or concurrently enrolled in Algebra II

This is a college preparatory course in physics. Physics is the study of forces and energy and their effect upon matter. The student will have an opportunity to explore the field of linear and curved motion; light and optics and electricity and magnetism. Extensive laboratory work will develop measuring techniques and the ability to interpret physical phenomena. Because the science of physics underlies and is closely related to all other branches of science, the course will prove to be of considerable value to the college bound student.

5340 Advanced Placement Physics I  
NCAA 6.0 Credits  
SCI  
Science Prerequisite: No prior coursework in Physics is necessary  
Math Prerequisite: Students should have completed Geometry and be currently taking Algebra II or an equivalent course.

This course is an algebra-based, introductory college-level physics course that explores topics such as Newtonian mechanics (including rotational motion); work, energy, and power: mechanical waves and sound; and introductory, simple circuits. Through inquiry-based learning, students will develop scientific critical thinking and reasoning skills.

5340B Advanced Placement Physics II  
NCAA 6.0 Credits  
SCI  
Science Prerequisite: AP Physics I  
Math Prerequisite: Students should have completed Geometry and be currently taking Algebra II or an equivalent course.

AP Physics II is an algebra-based, introductory college-level physics course that explores topics such as fluid statics and dynamics; thermodynamics with kinetic theory; PV diagrams and probability; electrostatics; electrical circuits with capacitors; magnetic fields; electromagnetism; physical and geometric optics; and quantum, atomic, and nuclear physics. Through inquiry-based learning, students will develop scientific critical thinking and reasoning skills. This course requires that 25 percent of the instructional time will be spent in hands-on laboratory work, with an emphasis on inquiry-based investigations that provide students with opportunities to apply the science practices.

3346 Environmental Science  
NCAA 5.0 Credits  
GEN  
Prerequisite: Must have successfully completed Biology and Chemistry

This course is designed to make maximum use of the natural resources that are in Long Branch. The emphasis will be on an aquatic environment and through a laboratory-based curricula, the class will study our local environment as a microcosm of the world in general. Students will make visits to local lakes, rivers and oceans and will do extensive experiments followed by formal write-ups and presentations.

3345 Forensic Chemistry  
NCAA 5.0 Credits  
GEN  
Prerequisite: Must have successfully completed Biology and Chemistry

This course is designed as a laboratory based career chemistry course that will involve advanced investigative techniques. Students will solve problems both real and hypothetical, and to analyze evidence. Using scientific techniques, they will explore the exciting world of the forensic chemistry. Some of the sciences that are used during a crime scene investigation may include physics, chemistry, biology, psychology, and criminal justice. Students will use scientific techniques in the above disciplines to solve laboratory case studies.

3347 Comparative Anatomy  
NCAA 5.0 Credits  
GEN  
Prerequisite: Biology and Chemistry

This course compares the anatomy of all the major phyla and classes of the animal kingdom. Students will investigate the body plans and physiology of simple invertebrates, arthropods, fish, amphibians, reptiles, birds, mammals, and humans. This is a lab based course that will reply heavily on animal dissections. Because of safety, it is important that students first successfully complete Biology and Chemistry.
MATH

4220 Algebra I Honors
NCAA 5.0 Credits  MA
Prerequisite: Algebra readiness assessment score, Score of Proficient or better on the most recently taken standardized test and teacher recommendation.

This course is an intense approach to the requirements of the Algebra I program designed for the advanced student.

4211, 4221, 4231 Algebra I
NCAA 5.0 Credits  MA

This course will build the comprehensive mathematical knowledge base that students will use as they move on to higher-level mathematics. Lessons provided will meet the Common Core State Standards for High School Algebra using an investigative approach. Appropriate technology will be used on all lessons including but not limited to a graphing calculator.

9972 Algebra I Lab
NCAA 5.0 Credits  GE

This course is specifically designed for those students who are enrolled in Algebra I and have been identified through standardized test scores, prior academic history and teacher recommendation as needing additional mathematics instruction. An inquiry based approach to the foundations of algebra that is enriched with foundational and supplemental activities designed to enhance the Algebra I experience is used.

1210, 2210, 3210, 4230 Geometry Honors
NCAA 5.0 Credits  MA

Prerequisite: A grade of 84 or above in Algebra I. A score of Proficient or better in the most recently taken standardized test and teacher recommendation.

This course is an intense approach to the requirements of the Geometry program designed for the advanced student.

1221, 2221, 3221 Geometry
NCAA 5.0 Credits  MA

This course is designed to stimulate and develop clear, logical, creative thinking through the study of the basic structure of geometry, geometric relationships, and formal deductive proofs. Through an investigative approach students will complete the course with a clear understanding of the key concepts in geometry as described by the Common Core Standards for High School Geometry. Appropriate technology will be used on all lessons including but not limited to Geometers Sketchpad.

9984 Geometry Lab
NCAA 5.0 Credits  GE

This course is specifically designed for those students who are enrolled in Geometry and have been identified through standardized test scores, prior academic history and teacher recommendation as needing additional mathematics instruction. An inquiry based approach to the foundations of high school mathematics that is enriched with foundational and supplemental activities designed to enhance the Geometry experience is used.

1220, 2220, 3220 Algebra II Honors
NCAA 5.0 Credits  MA

Prerequisite: A grade of 84 or above in Geometry. A score of proficient or better in the most recently taken standardized test and teacher recommendation.

This course is a rigorous and challenging course designed for the student of exceptional mathematical ability.

1231, 2231, 3231 Algebra II
NCAA 5.0 Credits  MA

This course extends the processes of algebra introduced in Algebra I and uses the geometric concepts of Geometry to produce a more meaningful, in-depth approach to new topics in algebra. The primary goal of this course is for students to gain an understanding of high level algebraic concepts and apply them to real life
situations through discovery and investigation. Appropriate technology will be used on all lessons including but not limited to graphing calculators.

**9985 Algebra II Lab**  
NCAA 5.0 Credits GE  
This course is specifically designed for those students who are enrolled in Algebra II and have been identified through standardized test scores, prior academic history and teacher recommendation as needing additional mathematics instruction. An inquiry based approach to the foundations of high school mathematics that is enriched with foundational and supplemental activities designed to enhance the Algebra II experience is used.

**5230 Precalculus Honors**  
NCAA 5.0 Credits MA  
*Prerequisite: A grade of an 84 or above Geometry and Algebra II.*  
This is a rigorous and challenging course designed for the student of exceptional mathematic ability and leading ultimately to the study of calculus. This course makes extensive use of the graphing calculator.

**5241 Precalculus**  
NCAA 5.0 Credits MA  
*Prerequisite: A grade of 77 or above in Geometry and Algebra II.*  
This course is designed to provide a basic course in trigonometry and a sufficient background in college algebra and analytic geometry to prepare students for the study of calculus. Students will be exposed to the use of the graphing calculator while being challenged with critical thinking.

**5240 Advanced Placement Calculus**  
NCAA 5.0 Credits MA  
*Prerequisite: A grade of 84 or above in Precalculus.*  
This is a rigorous and challenging course designed for the student of exceptional mathematic ability and needing a strong background in mathematics for future academic work at the college level. Students in this class are required to take the Advanced Placement Examination in the spring. This course makes extensive use of the graphing calculator.

**1247 Contemporary Mathematics**  
NCAA 5.0 Credits MA  
*Prerequisite: Completion of Algebra I, Algebra II, and Geometry.*  
This course includes topics in modern mathematics such as set theory, Venn Diagrams, probability, logic, statistics and voting procedures. The topics in this course will require critical thinking and analysis including information and experiences that will help students appreciate and value the role of mathematics in modern society.

**5248 Statistics**  
NCAA 5.0 Credits MA  
*Prerequisite: Completion of Algebra I, Algebra II, and Geometry*  
This is an elective course for those who have successfully completed Algebra II. It is designed for those students interested in pursuing a career in business, marketing, psychology, mathematics or any field requiring data analysis. The graphing calculator is used extensively in this course.

**5250 Honors Statistics**  
NCAA 5.0 Credits MA  
*Prerequisite: Completion of Algebra I, Geometry and Algebra II. A grade of 84 or above in Algebra II, a score of proficient or better in the most recently taken standardized test and teacher recommendation.*  
This is a rigorous and challenging elective course for those who have successfully completed Algebra II. It is designed for the student of exceptional mathematical ability that is interested in pursuing a career in business, marketing, psychology, mathematics or any field requiring data analysis. The graphing calculator is used extensively in this course.
9658 SAT Math
2.5 Credits MA
This semester course is an elective for students who desire to improve their SAT mathematics scores. Students in SAT mathematics will develop reasoning skills and a conceptual knowledge base needed for success on the SAT examination. Test-taking strategies and techniques will also be discussed. Throughout the semester simulated practice SAT tests will be administered to prepare for the actual test.

HISTORY

4430 World History Honors
NCAA 5.0 Credits HIS
Prerequisite: A grade of 87 or above in Grade 8 social studies class and teacher recommendation.
This course presents an in-depth survey of world history.

4411, 4421, 4431 World History
NCAA 5.0 Credits HIS
This course presents a survey in world history.

1420, 2420, 3420 U.S. History I Honors
NCAA 5.0 Credits HIS
Prerequisite: A grade of 84 or above in World History or World History Honors and teacher recommendation.
This course is an in-depth presentation of the United States History from Pre-Colombian North America to the beginning of the Industrial Era.

1421, 2421, 3421 U.S. History I
NCAA 5.0 Credits HIS
This course covers U.S. history from Pre-Colombian North America to the beginning of the Industrial Era.

5430 Advanced Placement U.S. History II
NCAA 5.0 Credits HIS
Prerequisite: A grade of 84 or above in U.S. History I Honors or U.S. History I and teacher recommendation.
This course is an in-depth presentation of the United States history. The culmination of the course is the advanced placement exam. Therefore, although the emphasis will be on U.S. history from the Industrial Era to the present, some review of the U.S. History I material will be necessary.

5420 U.S. History II Honors
NCAA 5.0 Credits HIS
Prerequisite: A grade of 84 or above in US History I or US History I Honors and teacher recommendation.
This course is an in-depth presentation of the United States history.

1431, 2431, 3431 U.S. History II
NCAA 5.0 Credits HIS
This course covers U.S. History from the Industrial Era to 1960.

5450 Advanced Placement American Government/Politics
NCAA 5.0 Credits HIS
Prerequisite: Successful completion of AP U.S. History II and teacher recommendation, in addition to a summer reading requirement.
This course is designed to give students an analytical perspective on government and politics in the United States. Students will become aware of the variety of theoretical perspectives and explanations for different behaviors and outcomes concerning previous historical situations. It will also provide a solid understanding of the present day-decision making process in Washington. Monmouth University will award (3) college credits acceptable at any college in the United States, if student receives a cumulative grade of 85 or higher.
5440 Advanced Placement World History
NCAA 5.0 Credits HIS
Prerequisite: A grade of 84 or above in AP U.S. History II or U.S. History II and teacher recommendation in addition to a summer reading requirement.

This course is offered as an elective to seniors. Students will analyze comparative religions and philosophical thought. It is an intensive study of World History, culminating in the advance placement exam.

5435 Advanced Placement Psychology
NCAA 5.0 Credits HIS

This course is a preparatory college course that considers the individual human mind, ranging from human thought, behaviors, and actions. This course concentrates on a wide range of individual issues including; Freudian schools of thought, dreaming, states of consciousness, abnormal psychology, and include a wide range study of the human brain. Participation in individual case studies, visits to several mental institutions, and end of the year research project are mandatory. A final research project concentrating on the internal thought processes and simulated psychological publication of material would be practiced.

2937 Law
NCAA 2.5 Credits CCS
A college preparatory course in American Law. Emphasis will be on constitutional law, especially as it relates to the Bill of Rights, tort law, property law and contract law.

2933 Economics
NCAA 2.5 Credits CCS
Students electing this course will learn of the influence of economic considerations on major historical events in U.S. History. A significant amount of time will be devoted to understanding the Securities Exchange. Students will also participate in the Stock Market Game.

2938 Criminal Justice
NCAA 5.0 Credits CCS
This course is designed to appeal to students who have indicated an interest in careers in the law enforcement field. These careers would include such areas as police, sheriff’s department, corrections officers, probation and parole officers, lawyers and paralegals. The course is an in-depth examination of the criminal justice and criminal procedures field and will be writing intensive.

2931 Sociology/2932 Psychology
NCAA 5.0 Credits CCS
This course is a college preparatory course in sociology and psychology. The sociology portion will survey the different forms and structures of societies and the reasons for the differences including patterns of behavior. An examination of the American institutions such as the family, education and religion will be part of the psychology. The theories of Freud, Skinner, Erickson and others will be studied. All of the modern schools of psychology will be investigated in an effort to understand what factors shape one’s personality. How psychology is applied in education, parenthood and social situations will be covered. A research paper and autobiography will be required of all students in this course.

2936 World Geography
NCAA 5.0 Credits GEN
This introductory course on geography is to provide students with the ability to use maps and geographical data concerning the earth’s surface, environmental, cultural aspects and physical limitations. The course will also provide students with the sufficient knowledge to recognize the impact geographical relationships have upon nations and the influence this topic has upon international affairs. Upon completion of the course students will have a solid foundation in world geography and be able to characterize and analyze the ever changing globalization taking place in the 21st century.
1933 African American Studies
NCAA 5.0 Credits GEN
This course will offer students the opportunity to learn about the African-American’s role in American history. It will deal with African roots, participation in explorations, colonization, the American Revolution, Civil War, etc. to the present. In addition, this course will cover United States history from 1960 to the present.

1935 United States History III/The Vietnam Era
NCAA 5.0 Credits GEN
This course covers the politics and cultural changes beginning with the Cold War and America’s entry into the Vietnam War. This course offers opportunity to study the current news and debate on historical issues. The course provides a chance to discuss current history topics. Projects include experiencing oral history at the Vietnam memorial and from current United States armed forces participants. This class will include an in-depth study of current events, world views, and include current war analysis.

5436 AP Macroeconomics
NCAA 5.0 Credits CCS
Prerequisite: Teacher recommendation and successful completion of the principles of economic course or AP history as well as Algebra I and Algebra II
This course is reserved for students who have demonstrated superior performance in social studies coursework and proven themselves to be proficient in algebraic concepts. This is an intensive course that provides students with a thorough understanding of the principles of economics that apply to an economic system as a whole. Emphasis is placed on the study of nation income, and current issues related to macroeconomic.

5550 AP Human Geography
NCAA 5.0 Credits GEN
The purpose of the AP Human Geography course is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth’s surface. Students employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. Emphasis is placed on case studies from around the globe which are compared to the situations at local, regional, and national scales. Internet activities, field excursions, and videos are also used to explore certain topics throughout the course.

World Language
4601, 5601 French I
4611, 5611 Italian I
4631, 5631 Spanish I
NCAA 5.0 Credits WL
The four language skills-listening, speaking, reading and writing-are introduced. Emphasis is placed upon listening and speaking through dialogues and conversations pertaining to daily life. Vocabulary and grammatical structures are taught. Communication and correct pronunciation are emphasized. Students will also be introduced to the culture of the people whose language is being studied.

5602 French II
5612 Italian II
5632 Spanish II
NCAA 5.0 Credits WL
Level II offers the student the opportunity to further develop mastery of the basic skills-listening, reading, comprehension, speaking and writing. Level I vocabulary is expanded through thematic units (e.g. travel, sports, family). The target language is primarily used in the class. Students acquire a greater flexibility in expressing themselves and improve their comprehension skills through varied activities.
5603 French III  
5613 Italian III  
5633 Spanish III  
NCAA 5.0 Credits  
WL  
These courses combine vocabulary, grammar, reading and conversation. The material acquired in Level I and II is reviewed and the study of vocabulary and grammar continued. Varied supplemental options such as newspapers, magazines and media further develop listening and speaking skills, as well as cultural awareness.

5604 French IV Honors  
5614 Italian IV Honors  
5634 Spanish IV Honors  
NCAA 5.0 Credits  
WL  
The level IV courses stress a mastery of all the language skills. A general grammar review is included in order to increase the student’s proficiency in the language. The students are encouraged to express themselves without difficulty in spoken and written forms. Selections of literature are studied and students are assigned specific projects pertaining to the culture and history.

5605 French V Honors  
5615 Italian V Honors  
5635 Spanish V Honors  
NCAA 5.0 Credits  
WL  
The level V course continues to stress a mastery of all the language skills. A review of grammar is provided as needed to increase the student’s oral and written proficiency in the language. Selections of literature and periods of history are studied. Students are assigned specific projects pertaining to the culture, literature, and history of the countries. The course is conducted in the target language.

5636 AP Spanish Language and Culture  
NCAA 5.0 Credits  
WL  
The AP Spanish Language and Culture course is intended for students who wish to develop proficiency and integrate their language skills, using authentic materials and sources. Students who enroll should already have a basic knowledge of the language and cultures of Spanish-speaking people and must have already successfully completed at least three levels of Spanish as well obtained a teacher’s recommendation. The AP Spanish Language and Culture Exam itself will assess students' proficiencies in the Interpersonal, Interpretive, and Presentational modes of communication. The exam is 3 hours long and includes both a 95 minute multiple-choice section and an 85 minute free-response section. The multiple choice section accounts for half of the student’s exam grade, and the free-response section for the other half. The AP Spanish Language course will help prepare students to demonstrate their level of Spanish proficiency across three communicative modes (Interpersonal [interactive communication]), Interpretive [receptive communication], and Presentational [productive communication]), and the five goal areas outlined in the Standards for Foreign Language Learning in the 21st Century (Communication, Cultures, Connections, Comparisons, and Communities).

5638/5639 Spanish for Heritage Speakers I/II  
NCAA 5.0 Credits  
WL  
Spanish for Heritage Speakers offers Spanish-speaking students opportunities to study formally in an academic setting in the same way the native-English-speaking students study English language arts. These may include a desire to reactivate the Spanish they have learned in the past and develop it in the future. Students are given an opportunity to learn more about their language and culture heritage, to acquire skills in Spanish, to develop or augment academic language skills in Spanish, to enhance career opportunities, or to fulfill a foreign language requirement. In this context students can learn how to critically analyze a text, write poetry, or acquire new information in different academic content areas. Activities will include review of grammar and syntax based on student need, participation in varied topical conversations, library research and presentation of written and oral reports.
BROOKDALE DUAL ENROLLMENT OPTION

Dual Enrollment courses receive AP weighting for GPA calculations purposes

5981 PORT 101 Elementary Portuguese I
4.0 Credits  WL
This course is designed for students with no previous knowledge, or very limited knowledge, of the Portuguese language. Strong emphasis will be placed on acquiring conversational and comprehension skills, using practical and interesting situational materials that will stress both language and culture. Grammatical patterns and syntax will be stressed with the aim that students read and write what they have learned to say and understand. This course is not open to native speakers.

PORT 102 Elementary Portuguese II
4.0 Credits  WL
Prerequisite: Grade if a C or better in PORT 101 or permission of the instructor
Students will build upon skills acquired in the first semester course and will be able to express themselves in a variety of more complex situations in Portuguese. This course is not open to native speakers.

Physical Education

Physical Education is a New Jersey State requirement for graduation. The state mandates all students demonstrate proficiency in a variety of skills and physical education/academic areas for the successful completion of this requirement. Every student must participate in physical education while enrolled in the high school. Comprehensive Health & Physical Education focuses on preparing the students to lead an active and productive lifestyle. Physical education is an essential and integral part of the total education program. The grades 9-12 Physical Education Units are a cohesive set of five units that will scaffold instruction from one grade level to the next. The units have been developed as building blocks of skills and concepts that will move instruction from one unit to the next. All units are made up of a blended set of standards and cumulative progress indicators that fully encapsulate the major ideas and themes of the unit. The incorporation of different standards through major, supporting and additional concepts provide a greater opportunity for comprehensive Physical Education instruction in each unit. The units progress from wellness education for life (fitness concepts and activities) to developing and applying movement education skills in isolated and applied situations in various activities such as individual skill development, team activities and strategies and cooperative activities which may lead to lifelong fitness and wellness. *All Health courses grades 9-12 include education in bullying prevention and awareness, dating violence prevention, and suicide prevention.

4511 Grade 9 Health
5.0 Credits  PE
The health component of this course includes concepts in the areas of alcohol, drugs and tobacco use and misuse, human growth and development, reproduction, human sexuality, A.I.D.S., S.T.D's and interpersonal communications. The Physical Education portion of this course includes a variety of activities selected from among the following: football, soccer, volleyball, basketball, softball, weight training, badminton, tennis, pickle ball, floor hockey, ultimate frisbee and personal fitness/nutrition. Written and performance assessments are used to determine mastery in this course.

5521 Grade 10 Health/Drivers Ed
5.0 Credits  PE
The health component of this course involves the study of the automobile in modern life and aims to develop mature attitudes, an understanding NJ Motor Vehicle laws and proper habits for safe driving. Included in this course is the continued study of dating, harassment/bullying behaviors, drugs, alcohol, and tobacco, decision-making and the safe operation of a motor vehicle. Written and performance assessments are used to determine mastery in this course. The Physical Education portion of this course includes a variety of activities selected from among the following: football, soccer, volleyball, basketball, softball, weight training, badminton, tennis, pickle ball, floor hockey, ultimate frisbee and personal fitness/nutrition. Written and performance assessments are used to determine mastery in this course.
5531 Grade 11 Wellness
5.0 Credits
PE
Safety/First Aid/Treating Specific Injuries/CPR and Rescue Breathing/Drugs, Alcohol, and Performance Enhancer Prevention. Upon completion of the eleventh grade health course the student will have a greater understanding of the human reproductive systems, diseases associated with the reproductive systems, personal relationships, and issues related to sexual harassment. Selected topics related to drug abuse, alcohol abuse, and addiction will also be studied. Additionally, students will receive instruction in the theories and techniques of First Aid and Cardiopulmonary resuscitation (CPR) as established by the American Red Cross. The Physical Education portion of this course includes a variety of activities selected from among the following: football, soccer, volleyball, basketball, softball, weight training, badminton, tennis, pickle ball, floor hockey, ultimate frisbee and personal fitness/nutrition. Written and performance assessments are used to determine mastery in this course.

5541 Grade 12 Health
5.0 Credits
PE
The focus of the senior year in Health Education is to reinforce material covered in previous years on topics including, wellness, nutrition, social and emotional health, interpersonal communication, decision making, goal setting, sexual harassment and relationships. Information pertaining to interpersonal relationships, human sexuality, pregnancy, birth, parenting, genetics and contraception will be presented. Additionally, relevant topics related to the use/abuse of alcohol, tobacco, and drugs will be studied. New Jersey content-specific mandated topics would also be discussed to include: abstinence, sexual assault prevention, bullying prevention and domestic violence education. The Physical Education portion of this course includes a variety of activities selected from among the following: football, soccer, volleyball, basketball, softball, weight training, badminton, tennis, pickle ball, floor hockey, ultimate frisbee and personal fitness/nutrition. Written and performance assessments are used to determine mastery in this course.

OPTII OPTION II
5.0 Credits
PE
Option II establishes alternate pathways for students of the Long Branch High School to satisfy graduation requirements and meet Common Core State Standards in accordance with New Jersey Administrative Code (NJAC 6A: 8-5.1(a)iii). Option II alternative experiences are voluntary. Students may fulfill the requirements for graduation by pursuing credits earned through the traditional classroom environments, alternative learning experiences availed through Option II or through a combination of both programs. Option II permits students to engage in a variety of alternative learning experiences which are stimulating and intellectually challenging, enabling them to fulfill or exceed expectations set forth by the Common Core State Standards. Students may take part in Option II alternatives for Health and Physical Education by participating in the following: independent study, and online and distance learning opportunities.

5551 Adaptive Physical Education (All levels)
5.0 Credits
PE
An adaptive program in physical education is conducted in the high school for assigned handicapped students. Instruction and activities are individualized, based on the activities incorporated in 9-12 grade physical education.

3560 Teen Pep
5.0 Credits
GE
Prerequisite: Application, interview, teacher recommendations, mandatory attendance at summer retreat. Restrictions: Grade 12 only
The Teen Prevention Education (Teen PEP) is a comprehensive, sexual health program that utilizes peer-to-peer education to increase students’ knowledge, attitudes, skills, and behaviors associated with healthy decision-making.
ELECTIVES

Dance:

1871 Dance I/II
5.0 Credits VPA
Dance I/II is an introduction to the study and development of dance. Hip hop, jazz, ballet and modern dance techniques will be introduced and reinforced. Techniques in composition will also be discussed and demonstrated. All students will be required to perform in the end of the year recital. Students who feel they are beyond this level may audition for another level of dance.

1873 Dance III
5.0 Credits VPA
Prerequisite: Dance I/II and/or Audition with Instructor
Dance III allows students to continue the specialized training given previously in Dance I/II. Students concentrate on increasing skill level, technique, flexibility, perfection of style and performance quality. All students will be required to perform in the end of the year recital.

1874 Dance IV
5.0 Credits VPA
Prerequisite: Dance I/II and/or Audition with Instructor
Dance IV allows students to continue extensive techniques and dance proficiency with more difficult dance pieces and/or projects. Special emphasis is placed on performance, style, technique and choreography. All students will be required to perform in the end of the year recital.

5875 Performance Dance
7.5 Credits VPA
Prerequisite: Audition
This course is a direct continuation of the specialized training given previously in Dance IV. The curriculum will concentrate on technique, style, performance, and choreography in jazz, ballet, tap, modern and lyrical dance. Performances during and after school are required as a means of assessment. Students will be responsible for missed assignments from other classes. Note: Performance dance will require an audition and interview by the instructor during the spring of the previous year.

Band:

5824 Marching Band/Symphonic Band
7.5 Credits VPA
Open to all students in grades 9-12 who have achieved a reasonable proficiency on a band instrument. The band performs for school and community events such as band competitions, football games, pep rallies, parades, and assembly programs, etc. (Students enrolled will participate in all activities of the band except for students participating in fall High School sports, who will be exempt from the field show and assessed on an individual basis). Marching Band will be taught during quarter 1. Symphonic Band will be taught during quarters 2, 3, and 4. Out-of-school performances are required as a means of assessment.

5829 Musical Theater
2.5 Credits VPA
Prerequisite: Field Show and Placement Audition
Membership is limited to the instrumentation of the selected musical in production by the Drama Department. Emphasis of this course will be performance of musical theater, music books and the listening/focus skills required for success. After-school and evening participation will be required of all students.
5827 Jazz Band  
1.5 Credits  VPA  
Prerequisite: Field Show and Placement Audition  
Study of the literature and rehearsal and performance techniques of the past current popular jazz and jazz rock music as it relates to the stage band, with special emphasis on performance, style and improvisation. This is a performance organization for talented and advanced students which require out-of-school performance of all members. Membership is limited to provide balanced instrumentation. This course meets after school one day per week, December through May.

5830 Chamber Ensemble  
2.5 Credits  VPA  
Prerequisite: Field Show and Audition  
Small ensembles will be formed, by audition, in November and will meet from December till June. This course will meet after school hours, December through May. Performances and recital participation are a course requirement.

1822 American Popular Music  
5.0 Credits  VPA  
Students will gain an overview of the four major areas of American contemporary music: jazz, rock, country, and musical theater. Each genre is approached chronologically with the emphasis on the socio-cultural aspects of the music. Students will come away with the fundamental skills needed to listen critically to a variety of popular music styles. The course will cover American music from the beginning of the 20th century changes in American Music in the new millennium with special attention to cross-genre music, hip-hop, technological developments and the influence of media on popular music.

1813 Music Theory  
5.0 Credits  VPA  
This course is designed to introduce the music student to scales, intervals, chords, triads, and harmonic rhythms. Students are given the opportunity to learn to harmonize a given part of music, as observed in previous musical compositions and by utilizing and understanding harmonic trends through music history. Vocal, instrumental and piano students will find this course very practical. Such musical knowledge is essential not only for those continuing music studies into college but for persons seriously interested in any aspect of music.

1816 Music Technology  
5.0 Credits  VPA  
Prerequisite: Reasonable Ability on and Instrument or Recording Experience  
This course will utilize technology to understand, create and record music. Students will be exposed to engineering and recording and will gain exposure to music software, notation programs, sequencing, marketing, and copyrighting. On-line programs will aid in the students understanding of all basic proficiencies.

CHORUS

5832 Concert Chorus  
5.0 Credits  VPA  
The Concert Chorus is open to all students with an interest in singing. This course is designed to assist students in the development of basic skills needed for strong vocal performance. Choral singing skills, sight singing, ear training, independence on a part and expressive ensemble performance are the focus of this class. New members are always welcome after a successful voice placement audition with the director. Out-of-school performances throughout the year are required as summative assessments. Additionally, at the end of each semester, all students are required to sing in concert as their mid-term and final exams.

5835 Advanced Vocal Performance  
5.0 Credits  VPA  
Prerequisite: Concert Chorus or Audition  
This course is for the serious vocal music student. The focus of this course will be musicianship of the student vocalist through developing a substantial and diversified solo repertoire. Vocal technique, Performance practices, Ear
Training, and Sight Singing will be essential elements that will contribute to student success. After school performances are required as part of the grade.

5833 A Cappella Singers
5.0 Credits VPA
In addition to learning and performing the concert choir repertoire, these select students will demonstrate extensive technique and vocal proficiency with more difficult choral harmonic pieces. These students meet two afternoons per week from September through May.

PIANO

1841 Piano I/II
5.0 Credits VPA
The Piano I/II class is an introduction to the piano. Prior musical experience is not necessary. During the course of the year, students will learn to read grand staff music notation and apply it while learning the rudiments of the piano keyboard. They will learn how to listen to and critique music. They will receive basic instructions in performance skills and gain poise and confidence through performance practices. The second half of the course is a continuation of the Piano I course. Students will have the opportunity to expand their technical skills and be able to play music at the second level. Students will be required to perform simple pieces, solos and duets, in a piano recital at the end of each semester as their mid term and final exams.

5843 Piano III
5844 Piano IV
5.0 Credits VPA
Prerequisite: Piano I/II; Placement Audition; and/or Approval of advisor
Piano III and IV classes are both full year courses and are designed to allow students the opportunity to further their technical skills as pianists while developing solid practice and performance skills. Students in advanced piano classes will receive both individual as well as group instruction. Students will have the opportunity to perform in various public forums during the school year and will be required to perform at the end of each semester in a piano recital as their mid term and final exams.

DRAMA

2854 Public Speaking (NCAA)/2853 Stage Technology
5.0 Credits VPA
This course prepares students for public speaking by affording practice in writing, delivering and listening to the different types of speeches. Student’s presentation will be followed by group discussion and constructive analysis. Students will explore all aspects of technical theater. Students will learn the basics of sound, lighting, and operation of a fly system. Set construction and design will assist in exposing the student to various career pathways that are possible in the theater. After school and evening performances, centered around the spring production, may be required as part of the grade for this course.

1851 Speech and Theater
5.0 Credits VPA
A survey of the theater arts such as mime, movement, stage geography, acting and technical theater will be included. This course provides a firm foundation for the advanced courses in grade 10, 11, and 12. First year students in speech and theater should enroll in this class.

1865 Advanced Performance
7.5 Credits VPA
Prerequisite: Two previous Speech/Theater Courses
This course for talented speech and drama students continues the specialized training given previously. Units include rehearsal techniques, acting, and analyzing the classics. This course will integrate music and dance with acting so that the interested students could study the Musical Theater as well. Westwood Players will find this course very practical.
ART

1801 Foundational Art
5.0 Credits
VPA
Foundational Art is a full year course required for all entry level art students. Concentrated in the realms of two dimensional fine art and pictorial illustration, this course teaches fundamental studio practices and technical skills through a structured progression. Studio based projects stress the key components of proper sketching, drawing techniques, preliminary rough drafting, finalizing, illustrative principles, mixed media and collage application, color theory, color mixing, and painting methods. From the onset, Foundational Art scaffolds essential knowledge that students will rely and build upon throughout advanced courses offered in the Visual Arts Program.

1802 High Focus Drawing and Painting
5.0 Credits
VPA
Prerequisite: Foundation Art or Teacher Approval
High Focus Drawing and Painting further involves enthusiastic art students in more advanced coursework, while providing a studio environment that fosters artistic growth, work ethic and focus. Expanding on both the media the proficiencies learned in Foundational Art, all students will develop longer-term projects while working with traditional materials. Emphasis is placed on both two dimensional fine art and illustration. Students will also begin working from numerous lighting scenarios, while honing their understanding of life sketching, drawing and observational painting. Studio approaches will scaffold from Foundational Art and further the use of drawing pencils, charcoal, pastel, drawing inks, watercolor, mixed-media, acrylic, and/or select oil paints.

AP1801 AP Studio Art
5.0 Credits
VPA
Prerequisite: High Focus Drawing and Painting, and/or teacher approval
This course operates at a college level of study. It encourages and expects both the creative and systematic study of conceptual and formal issues relating to drawing and painting. Highly motivated students will be provided with an environment that fosters artistic growth, work ethic and focus. Students are expected to strive towards mastery and develop a true understanding of the artistic creation as an ongoing process. A significant commitment of time is necessary to achieve excellence in both preliminary and final artworks. Students will be pushed to think both critically and conceptually, and make informed decisions based on learned knowledge as well as instinct. Students will perform at an intense level of production, working simultaneously inside and out of class to complete high caliber portfolios for examination. The final examination portfolio can also include independent works created outside of the AP Studio Art course, or exemplar works developed in an earlier studio course.

1805 Graphic Design
5.0 Credits
CCS
This course covers the key components of Graphic Design, including its origins, traditional hand application and the use of state-of-the-art-technology. A range of topics will be covered including hand lettering, typography, cutting, binding, construction, digital image manipulation, retouching, design layout and printing processes. Students will primarily use Adobe design programs to expand on these topics and further learn the art of presentation by creating individual design portfolios. Assignments will fuse imagery and typography into promotional material, logotypes, posters, magazine page layouts, album layouts, greeting cards, product graphics and packaging design. Furthermore, learners will be responsible for meeting deadlines in accordance with industry standard and work collaboratively within peer networks.

TV & Film Production

3781 TV Studio Production I
5.0 Credits
VPA
This is an introductory course in digital filmmaking. Students will be introduced to techniques in screenwriting/scriptwriting, and video/film production and editing. Students will learn the fundamentals of producing, directing and writing as well as basic digital filmmaking skills including, but not limited to, camera operation, lighting, sound recording, editing, and screenplay writing. At the end of the year, students will be introduced to studio production and the basics of TV Broadcasting for entry into TV & Film II. Students will work in groups and crews and collaborate on several projects throughout the year to develop and produce five to six distinct projects. In addition to chapter tests and quizzes, student’s original work will be a major part of their grade. This course will require after
3784 TV Studio Production II
2.5 Credits VPA
Prerequisite: TV Studio Production

This is an intermediate course in digital filmmaking and TV production. In this course, students will refine their skills as a producer, director, and writer and be immersed into the field of TV production. They will be introduced to the field of Broadcast journalism and write, produce and edit a weekly news show broadcasted at the High School. In this course students will get a chance to assume every role within a studio setting including but not limited to, director, producer, anchor, cameraman, technical director, audio technician and teleprompter operator. Students will work in groups and crews and collaborate on several projects throughout the year. Most projects will be geared to the field of broadcast journalism and students will spend most of their time inside the studio working with broadcasting equipment. Students will also be responsible to film and edit school events and/or video productions. It will require after school hours, which will be counted as summative grades during the marking period. This course will refine the students writing, filmmaking, and editing skills and prepare them for their entry into TV Studio Production III.

3783 TV Studio Production III
2.5 Credits VPA
Prerequisite: TV Studio Production II

This is an advanced course for students who have successfully completed TV & Film Production II. Students will master their skills in historical and archival research, interviewing, screenwriting/scriptwriting, and video/film production and editing. Students will refine producing, directing and writing as well as basic digital filmmaking skills including, but not limited to, camera operation, lighting, sound recording, and non-linear editing. Students will also be introduced to techniques in storytelling and creative decision-making. Students will also be responsible to film and edit school events and/or video productions. It will require after school hours, which will be counted as summative grades during the marking period. This course will refine the students writing, filmmaking, and editing skills and prepare them for their entry into TV Studio Production Internship.

3785 TV Studio Production Internship
2.5 Credits VPA
Prerequisite: TV Studio Production II

This is a mastery level course for students who have successfully completed TV & Film Production II or III, and have the permission of the TV & Film Instructor. Students will continue to master their skills in historical and archival research, interviewing, screenwriting/scriptwriting, and video/film production and editing. All must direct their own projects from start to finish along with mentoring students in TV & Film Production I & or II. Students will help facilitate all other level courses and their entries into the contests. Students will also be responsible to film and edit school events and/or video productions. It will require after school hours, which will be counted as summative grades during the marking period.

BUSINESS

2728 Global Logistics
5.0 Credits CCS

This course engages students in solving contextual problems related to the concepts of supply chains, warehouse location, contingency planning, insourcing and outsourcing, and expanding existing supply chains. These concepts form the basis of global logistics and supply chain management and help students understand how professionals examine options to maximize the use of resources across distribution networks.

2730 Functional Areas in Logistics
5.0 Credits CCS

This course compels students to explore deeper understandings of the concepts they discovered in the previous course as they navigate projects on warehouse design, inventory management, transportation optimization, information technology, emergency responsiveness and the supply chain for manufacturing. Students use their experiences in this course to discover ways that professionals minimize the outlay of resources while improving efficiency and ability in the global market.
2714 Marketing
5.0 Credits
CCS
This course is designed primarily for juniors and seniors. This course provides an introduction to the history of American business, economic systems, marketing, activities, the stock market and computerized business activities. This course is of interest to any student who plans to study any of the following areas: business management, marketing, sales and sales management, advertising, labor relations, transportation and finance.

2740 Accounting
5.0 Credits
CCS
Students will be introduced to the double entry bookkeeping system for a single proprietorship, partnership and corporate forms of business. The activities will include journalizing business transactions, posting journal entries to a ledger account and preparing various reports and statements and managing cash control systems. An accounting simulation package will be utilized to give students a realistic approach to problem-solving.

2722 Cooperative Marketing Education (CME)
15.0 Credits
CCS
This course is a cooperative learning experience that combines work experience and a related class. Students will be employed in marketing businesses such as grocery stores, retail stores, restaurants, hotels and motels. In addition, a daily class period will be devoted to instruction and consultation regarding problems experienced on the job, human relation skills and job skills such as interviewing and completing applications.

CONSUMER SCIENCE

3741 Foods for Healthier Living I
5.0 Credits
CCS
Students will learn basic principles of nutrition, safety and sanitation regulations, food preparation techniques and how to interpret a recipe. The development of measuring skills and wise consumer strategies will also be covered. Students will learn how to make healthful food choices every day. The preparation of attractive meals with attention to kitchen organization and work habits is stressed.

3743 Foods for Healthier Living II
5.0 Credits
CCS
Prerequisite: Foods for Healthier Living I
Sports nutrition, food science and careers in the food industry will be the main focus of this course. Lab experiences with recipes that are economical and nutritious will be continued from the foundation acquired in Food for Healthier Living I.

6742 International Foods
5.0 Credits
CCS
Prerequisite: Foods I and Teacher Recommendation
This course will enable the student to travel to foreign countries and visit various regions of the United States with their taste buds. Cultural food preferences, food preparation techniques, dietary needs and customs will be stressed in a laboratory setting. Through the study of various cultures and their food customs this course fosters an understanding and respect for cultural differences.

2751/2753 Early Childhood Development I/II
2.5 Credits Each
CCS
Level I- first half of the year studies the developmental stages of parenting readiness, pregnancy, fetal development, good prenatal care, labor, delivery and how to care for a newborn. Completion of level I is 2.5 credits. Level II- second half of year studies the development of a child from birth to age 6 and is explored by concentrating on their physical, intellectual, emotional and social growth. Completion of level II is 2.5 credits. Both levels are designed to educate students about children, their development, and good parenting skills to ensure the proper development of a child. The follow up and final level is a class designed for students who want to pursue careers in the field of Early Childhood Education; Tomorrow's Teachers.
2755 Tomorrow's Teacher
5.0 Credits CCS
Tomorrow's Teachers is a 1 year innovative course designed for students who possess interpersonal and leadership skills to consider a career in teaching. The program seeks to provide high school students insight into the nature of teaching, problems of schools and issues affecting the quality of education. Students who take this course will experience 4 themes over the course of one year as well as participate in hands on activities, early childhood classroom observations and field experiences. Each theme is aligned with the NJ Core Curriculum Standards. (Experiencing Learning, Experiencing the Profession, Experiencing the Classroom and Experiencing Education.)

1731 Creative Sewing
2.5 Credits CCS
Students will be responsible for maintaining a sewing portfolio which documents and reflects growth and progress while enrolled in the class. Students will learn how to use a sewing machine, a wide variety of sewing tools and equipment and create a variety of projects ranging from stuffed animals to pillowcases to scarves to tote bags.

4801, 4802, 4803 Freshman Orientation/Personal Economics
5.0 Credits FEBE
Students learn about personal economics and finance in a virtual neighborhood setting. Topics include: spending and borrowing decisions, insurance and other financial services. In addition students will learn about career choices and opportunities and character education.

9999 Peer Mentoring
5.0 Credits GE
Prerequisite: Application, interview, teacher recommendations, mandatory attendance at summer retreat.
Restrictions: Grade 11 & 12 only
Peer leaders are trained in team-building, group facilitation, problem solving, decision-making, and communication skills. In addition, peer leaders will learn about specific content areas, including time management, academic pressures, relationships with family and friends, drugs and other topics.

5101 Personal Economics
2.5 Credits FEBE
Students learn about personal economics and finance in a virtual neighborhood setting. Topics include: spending and borrowing decisions, insurance and other financial service

ELECTIVE
Project Lead the Way (Pathway to Engineering)
Project Lead the Way (PLTW) offers a dynamic high school program that provides students will real-world learning and hands-on experience. Students interested in engineering, biomechanics, aeronautics, and other applied math and science arenas will discover PLTW is an exciting portal into these industries. PLTW's premier high school program, Pathway to Engineering, is a four-year course of study integrated into the students' core curriculum. The combination of traditional math and science courses with innovative Pathway of Engineering courses prepares students for college majors in engineering and E/T fields.

3348 Principles of Engineering Design Honors
NCAA 5.0 Credits CCS
Prerequisite: STEM Academy. A grade of 75 or above in Science and Mathematic courses.
Students explore technology systems and engineering processes to find out how math, science and technology help people design software to design and document solutions for major course projects. Students communicate and present solutions to their peers and members of the professional community of engineers and architects.

3350 Civil Engineering and Architecture Honors
5.0 Credits CCS
Prerequisite: STEM Academy. A grade of 75 or above in Science and Mathematic courses.
Students will learn to explore the design and construction of residential and commercial building projects. The course includes an introduction to many of the varied factors involved in building design and construction
including building components and systems, structural design, storm water management, site design, utilities and services, cost estimation, energy efficiency and careers in the design and construction industry. CEA also places emphasis on design teams and teamwork, communication methods, engineering standards, and technical documentation. Creating a project-based environment, students will analyze, design and build physical models of residential and commercial facilities. Students will continually hone their interpersonal skills, creative abilities and understanding of the design process. Students will also have the opportunity to design a home for Habitat for Humanity and potentially assist in the construction of the same. This experiential opportunity gives students a lifetime opportunity in understanding the value of contribution as it pertains to our community.

3349 Engineering Design Honors
NCAA 5.0 Credits
Prerequisite: STEM Academy. A grade of 75 or above in Science and Mathematic courses.

Students learn about a design process, professional communication and collaboration methods, design ethics, and technical documentation. IED gives students the opportunity to develop skills in research and analysis, teamwork, technical writing, engineering graphics, and problem solving through activity, project-based learning. Used in combination with a teaming approach, IED challenges students to continually hone their interpersonal skills and creative abilities while applying math, science and technology knowledge learned in other courses to solve engineering design problems and communicate their solutions. IED also allows students to develop strategies to enable and direct their own learning, an ultimate goal of education. Students will use industry standard 3D solid modeling software to facilitate the design and documentation of their solutions. As the course progresses and the complexity of the design problems increase, students will learn more advanced computer modeling skills as they become more independent in their learning, more professional in their collaboration and communication and more experienced in problem solving.

3351 Biotechnical Engineering Honors
NCAA 5.0 Credits
Prerequisite: STEM Academy. A grade of 75 or above in Science and Mathematic courses.

The growing market for jobs in biological engineering is playing a central role in energy and agricultural sustainability solutions. The course develops students’ thinking skills and prepares them for emerging careers through topics such as genetic engineering, biofuels, and bio manufacturing.

Project Lead the Way (Biomedical Science)
The rigorous and relevant four-course PLTW Biomedical Science sequence allows students to investigate the roles of biomedical professionals as they study the concepts of forensics, human medicine, physiology, genetics, microbiology, and public health. Students engage in activities like investigating the death of a fictional person to learn content in the context of real-world cases. They examine the structures and interactions of human body systems and explore the prevention, diagnosis, and treatment of disease, all while working collaboratively to understand and design solutions to the most pressing health challenges of today and the future. Each course in the Biomedical Science sequence builds on the skills and knowledge students gain in the preceding courses. Schools offer the three PLTW Biomedical Science foundation courses within a period of three academic years from the start of implementation and may also offer the capstone course.

3390 Principles of Biomedical Science
NCAA 5.0 Credits
In the introductory course of the PLTW Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person’s life. The activities and projects introduce students to human physiology, advance biology concepts, medicine, and research processes while allowing them to design their own experiments to solve problems.

3392 Human Body Systems
5.0 Credits
Students examine the interactions of human body systems as they explore identity, power, movement, protection, and homeostasis. Exploring science in action, students build organs and tissues on a skeletal Maniken®; use data acquisition software to monitor body functions such as muscle movement, reflex and
voluntary action, and respiration; and take on the roles of biomedical professionals to solve real-world medical cases.

**3394 Medical Interventions**

5.0 Credits  GEN

Students follow the life of a fictitious family as they investigate how to prevent, diagnose, and treat disease. Students explore how to detect and fight infection; screen and evaluate the code in human DNA; evaluate cancer treatment options; and prevail when the organs of the body begin to fail. Through real-world cases, students are exposed to a range of interventions related to immunology, surgery, genetics, pharmacology, medical devices, and diagnostics.

**AFJROTC (Air Force Junior Reserve Officer Training Corps)**

The Aerospace Science (AS) curriculum consists of four levels. The course levels are identified as ROTC1, ROTC2, ROTC3, and ROTC4. The following description follows the AFJROTC four year course sequence, courses are rotated offering a different course each year. Students may enter the program at any grade level. Students are not required to enter or serve in the US arm forces by participating in AFJROTC. However, students that complete two years of the ROTC program at a satisfactory level and enter the armed forces will receive one rank promotion upon completing basic training. Students that complete three years of the AFJROTC program at a satisfactory level will receive two rank promotions upon completing basic training. Students will also be enrolled concurrently in Leadership and Wellness training each year:

**LEADERSHIP** - Leadership is defined by the Air Force as the art of influencing and directing people in a way that will win their confidence, respect, and loyal cooperation in achieving a common objective.

**WELLNESS TRAINING** - Wellness is a term used to include fitness training as well as health subjects like nutrition, hydration, sleep benefits, and proper exercises. Twenty-percent of the curriculum is devoted to wellness activities and studies. The Air Force calls this program Extreme Excellence Challenge (E2C).

**ROTC1**

5.0 Credits  CCS

*Prerequisite: Wellness permission slip signed by parent*

The first level of the AFJROTC instructional program is an introductory course for those entering AFJROTC. Academic material focuses on the development of airpower throughout military history. Cadets will understand the organization of the Department of Defense. Each student receives extensive instruction in Air Force tradition, drill and ceremonies, military customs and courtesies, and leadership principles and techniques. Citizenship principles are reinforced through community service projects. The concepts of good “followership” are fostered as a foundation for leadership. Students will be required to abide by the dress and grooming standards as mandated by the cadet handbook/ROTC regulations.

**ROTC2**

5.0 Credits  CCS

*Prerequisite: Wellness permission slip signed by parent*

The second year of Aerospace Science is a general study of aeronautics and components of aerospace power. Academic material covers basic Air Force information and more advanced leadership principles. These principles are practiced through leadership positions within the Cadet Group. Students become instructors in drill and ceremonies and freshman cadet leadership training. Others may assume staff and leadership positions as required within the cadet organizational structure. Organizational planning, time management, and acceptance of responsibility are stressed as cadets assume leadership positions. Students will be required to abide by the dress and grooming standards as mandated by the cadet handbook/ROTC regulations.

**ROTC3**

5.0 Credits  CCS

*Prerequisite: Wellness permission slip signed by parent*

The third level explores aerospace issues and the role of military forces in a contemporary world. The scientific aspects of aerospace, with a focus on space or astronomy, are examined. Special attention is given
to leadership education such as communicative skills, problem solving, and resource management. Third year cadets assume management and leadership positions in the cadet corps, and their performance is graded. Cadet leaders maintain a management notebook. Students will be required to abide by the dress and grooming standards as mandated by the cadet handbook/ROTC regulations.

**ROTC4**
5.0 Credits
CCS
Prerequisite: Wellness permission slip signed by parent
Selected upper class cadets are enrolled in AS-400: Management of the Cadet Corps. The fourth year emphasizes career opportunities in civilian life and the military. A comprehensive organization and management project is part of this course. Leadership education covers the principles of job search, the interview process, and job survival skills. Cadets learn how to seek funding for college. Special emphasis is placed on cadet corps management.

Students will require to abide by the dress and grooming standards as mandated by the cadet handbook/ROTC regulations.

**ESL/Bilingual**

**5156 English 12/ELL**
5.0 Credits
ENG
This English course consists of the study of British literary movements and masterpieces. Writing skill development will emphasize composition practice and grammar review related to academic and career goals. This course provides for the language needs of non-English and English Language Learners.

**5154 English 11-12/ELL**
5.0 Credits
ENG
The English course consists of detailed study of great American literature and extension of writing skill development with emphasis on exposition. A test preparation unit is taught to students who will take college entrance examinations. This course provides for the language needs of non-English and English Language Learners.

**5152 English 10/ELL**
5.0 Credits
ENG
This English course consists of literary types, namely the short story, novel, poetry, drama, essay, and biography. Writing skill development emphasizes general grammar, good sentence and unified paragraphs. A job entry basic skills unit is taught in each instructional level. This course provides for the language needs of non-English and English Language Learners.

**5150 English 9/ELL**
5.0 Credits
ENG
This English course consists of literature, composition, and grammar. Students complete brief units in mythology, Shakespeare, and various literary forms. Literary studies are related to writing development by the practical application of grammar to effective written expression. This course provides for the language needs of non-English and English Language Learners.

**5190 ESL I**
5.0 Credits
ENG
This course focuses on mastering listening, speaking, reading, and writing both vocabulary and sentence forms at the Entering and Emerging levels of the WIDA English Language Proficiency Standards. This course emphasizes guided language practice and gradual release of responsibility (I do it, we do it, you do it) based on functions (a purpose for communication).

**5191 ESL II**
5.0 Credits
ENG
This course focuses on mastering listening, speaking, reading, and writing both vocabulary and sentence forms at the Advanced Emerging and Developing levels of the WIDA English Language Proficiency Standards.
This course emphasizes guided language practice and gradual release of responsibility (I do it, we do it, you
do it) based on functions (a purpose for communication).

5192 ESL III
5.0 Credits          ENG
This course focuses on mastering listening, speaking, reading, and writing both vocabulary and sentence
forms at the Advanced Developing and Expanding levels of the WIDA English Language Proficiency
Standards. This course emphasizes guided language practice and gradual release of responsibility (I do it, we
do it, you do it) based on functions (a purpose for communication).

5193 ESL IV
5.0 Credits          ENG
This course focuses on mastering listening, speaking, reading, and writing both vocabulary and sentence
forms at the Advanced Expanding and Bridging levels of the WIDA English Language Proficiency Standards.
This course emphasizes guided language practice and gradual release of responsibility (I do it, we do it, you
do it) based on functions.

5955 ESL Tutorial/Independent Study
5.0 Credits          ENG
This course provides for the individualized needs for the ELL students incorporating all skills necessary for
transition into the mainstream. Students may work on special projects individually and in small groups. This
course provides an opportunity to sort, synthesize, analyze and interpret information, concepts, and ideas
received during the school day.

5188 Beginners Math
5.0 Credits          MA
This course is offered to English language learners with limited or no formal schooling in their native language
and no experience with English. The course provides students with the basic essential math skills needed to
successfully begin grade level math course.

5189 Port of Entry/New Comer ESL
5.0 Credits          ENG
This course is offered to English language learners with limited or no formal schooling in their native language
and no experience with English. The course provides students with the fundamentals of the English language.

5872 Communication Speech/101
5.0 Credits          VPA
This course prepares students for public speaking by affording practice in writing, delivering and listening
to the different types of speeches. Student's presentation will be followed by group discussion and
constructive analysis. Students will explore all aspects of technical theater. Students will learn the basics
of sound, lighting, and operation of a fly system. Set construction and design will assist in exposing the
student to various career pathways that are possible in the theater. After school and evening
performances, centered around the spring production, may be required as part of the grade for this
course.

5253 Algebra I, 5251 Algebra II, 5252 Geometry
5.0 Credits          MA
These comprehensive developmental math courses are intended for English Language Learners (ELL)
students of all high school grade levels. Math instructions cover the same curriculum content of the
department courses, such as Algebra I, Algebra II, and Geometry. The type of individual and/or group
instruction depends on the student's ability levels. An adapted form of math curriculum for each course
mentioned the above is used for the courses. These courses provide for the language needs of ELL
students.
5851 Speech for ESL I
5852 Speech for ESL II
5.0 Credits GE
This speech course is designed for students whose native language is not English. It provides oral experience and speech activities designed to facilitate the correct use of the English language in everyday situations. The second half of this course prepares students for public speaking by affording practice in writing, delivering, and listening to the different types of speeches. Student presentation will be followed by group discussion and constructive analysis.

5199 Creative Writing
5.0 Credits VPA
This creative writing course is designed for students whose native language is not English. It provides written experience and writing skills activities designed to facilitate the correct use of the English language in everyday situations. It will provide significant background in all four writing genres—essay, fiction, poetry, and drama.

5880 Technology Applications
5.0 Credits  CCS
This course is an introduction to the latest techniques to acquire basic keyboarding skills. Students will be given the opportunity to learn the following computer applications: how to log in to the High School’s network, how to key school-related documents (reports, outlines and lab reports), how to use the computer network to search for sources or information for research projects (library software, Internet and online encyclopedias), history of computers, introduction of all Internet terminology (netspeak), effective ways to search for various types of information, history of the Internet, the basics of e-mail and its use in business and assist other students and staff in searching for useful information for various classes.

5451 ESL World History/Cultures
5.0 Credits  HIS
World History/Cultures is the study of the interrelationships of individuals, societies, and cultures which help students understand the issues and problems in our world. This course parallels the district World History/Cultures course and provides for the language needs of non-English and English Language Learners.
Elective Options for Grades 10, 11, 12 – 2016-17
Electives are chosen by student, parent/guardian and counselor

BUSINESS – Fulfills CCS requirement
2740 Accounting (5 Credits)
2728 Global Logistics (5 Credits)
2730 Functional Areas in Logistics (5 Credits)
2722 Cooperative Marketing Ed (15 Credits)
2714 Marketing (5 Credits)

Fulfills FEBE requirement
5101 Personal Finance (2.5 Credits)

CONSUMER SCIENCE
Fulfills CCS requirement
1731 Creative Sewing (2.5 Credits)
2751 Early Childhood Development I (2.5 Credits)
2753 Early Childhood Development II (2.5 Credits)
3741 Foods for Healthy Living I (5 Credits)
3743 Foods for Healthy Living II (5 Credits)
6742 International Foods (5 Credits)
2755 Tomorrow’s Teachers (5 Credits)

MUSIC EDUCATION – Fulfills VPA requirement
5824 Marching/Symphonic Band (7.5 Credits)
1813 Music Theory (5 Credits)
1822 American Popular Music (5 Credits)
1816 Music Technology (5 Credits)
5832 Concert Chorus (5 Credits)
5835 Advanced Vocal Performance (5 Credits)
1841 Piano I-II (5 Credits)
5843 Piano III (5 Credits)
5844 Piano IV (5 Credits)

PLTW – Fulfills CCS requirement
3348 Engineering Design Honors (5 Credits) NCAA
3348A Principles of Engineering Design Honors (5 Credits) NCAA
3350 Civil Engineering and Architecture Honors (5 Credits) NCAA
3351 Biotechnical Engineering Honors (5 Credits) NCAA
3390 Principals of Biomedical Science (5 Credits) NCAA
3392 Human Body Systems
3394 Medical Interventions (5 Credits)

TECHNOLOGY
Fulfills CCS requirement
