The most advanced in its class.

- Distributor-less engine means each cylinder is individually timed, for better fuel economy, cleaner emissions and lower maintenance.
- Plastic intake manifold allows the engine to warm faster, leading to less wear and tear, lower maintenance and greater reliability.
- DVVT changes the timing of the engine valves to improve torque at low revs, leading to better pull off.
- DVVT at high revs improves the power of the engine and reduces fuel consumption.
- The Terios 1.5L Dynamic Variable Valve Timing engine.

- Intelligent catalyst technology allows the catalytic converter to regenerate the precious materials that it uses when cleaning the exhaust gases, thereby reducing the waste of these precious materials.
- Fuel economy ranges from 7L /100km to just 8.5L /100km.
- 77kW and 140Nm for M/T and 143Nm for A/T.

DVVT at high revs improves the power of the engine and reduces fuel consumption.

- DVVT changes the timing of the engine valves to improve torque at low revs, leading to better pull off.
- DVVT at high revs improves the power of the engine and reduces fuel consumption.
- The Terios 1.5L Dynamic Variable Valve Timing engine.

- Intelligent catalyst technology allows the catalytic converter to regenerate the precious materials that it uses when cleaning the exhaust gases, thereby reducing the waste of these precious materials.
- Fuel economy ranges from 7L /100km to just 8.5L /100km.
- 77kW and 140Nm for M/T and 143Nm for A/T.

Wide opening doors to allow the loading of heavier items and awkward objects.

- Doors open in 3 stages, at 40°, 60° and 80°.
- No intrusion by the wheel arch into the rear passenger entry, making a larger, easier entry space.
- Larger amounts of leg-room in the back for long trips - 77cm.
- Three rear seatbelts, including one for the centre, providing the centre rear passenger the same full body safety as all the rest of the passengers.
- “Fold forward” rear seats fold flat to allow for a completely flat loading area. Flat loading area allow for longer objects and easier loading.
- Rear seats recline in 3 positions. ISOFIX rear baby seat mounting. Rear seats fold 40/60 split allowing more loading space whilst still allowing passengers to sit comfortably, strapped in and safe.

The Terios 4x2 is rear wheel drive.

- Sound dampening material in the engine for quieter drives.

Intelligent catalyst technology allows the catalytic converter to regenerate the precious materials that it uses when cleaning the exhaust gases, thereby reducing the waste of these precious materials.

Fuel economy ranges from 7L /100km to just 8.5L /100km.

77kW and 140Nm for M/T and 143Nm for A/T.

DVVT changes the timing of the engine valves to improve torque at low revs, leading to better pull off.

DVVT at high revs improves the power of the engine and reduces fuel consumption.

The Terios 1.5L Dynamic Variable Valve Timing engine.
Power at your fingertips.

Once you get behind the wheel, The Terios puts you in complete control, and has exceptional safety features, including ABS and EBD. It’s Anti-Lock Braking System (ABS) prevents the wheels from locking when braking, keeping you and your family safe, while Electronic Brakeforce Distribution (EBD) varies the amount of braking force on each wheel. Together these allow you to steer even when braking in slippery conditions.

In addition the Terios offers:
• Central locking, keyless entry - integrated rolling code immobiliser in the remote central locking key.
• Bluetooth.
• Air conditioning and electronic control which automatically switches the air conditioning on/off, when the engine needs more power.
• Multiple storage compartments and cup holders.
• Height adjustable steering column, seatbelt and driver’s seat improve driver comfort and visibility.
• Electric windows front and rear.
• Power steering.
• Electronic centre diff lock to make 4x4 easy.
• Turning circle of 10.5 m.

Audio System
• Radio/CD player built into the dash by the factory for a better look and better after-sales back up.
• MP3 and WMA player.
• AUX port for external devices.
• Steering controls for the radio. (excluding the off-road model)

Styling, stability and strength.

Styling that blends the stability and strength of an SUV with a sophisticated look, the Terios is ideal for both the great outdoors and the city. A powerful engine and solid suspension maximises the excitement for both off- and on-road. The Terios’ compact body encloses a surprisingly spacious interior with a large luggage capacity, while its convenient features and functions make daily driving even more fun.
Designed with your needs in mind.

Maximise the interior space. The Terios boasts more interior space than any of its competitors, including leg and head room. Wheel placement, deep within all four corners of the vehicle, improves the stability of the drive due to the width of the front track.

Approach and Departure Angles

- Approach angle is the angle from the bottom of the front wheel to the edge of the front bumper.
- Departure angle is the angle from the bottom of the rear wheel to the edge of the rear bumper.
- Due to its class leading approach and departure angles the Terios is very capable off-road as well as on-road, and is able to clear large obstacles and drive onto and off steep ramps with ease.

Terrain Handling Ability

- Approach angle: 38°
- Departure angle: 37°
- Breakover angle: 24°
- Overall length: 4,055mm
- Wheelbase: 2,580mm
- Interior length extended: 1,800mm
- Overhangs:
  - Front: 675mm
  - Rear: 800mm

Wheel placement, deep within all four corners of the vehicle, improves the stability of the drive due to the width of the front track.
Outstanding functionality and comfort come together in one incredible package.

Designed for maximum driver and passenger convenience and comfort, the Terios’ modern, spacious and sporty interior excels in ease of use.

The Terios is also designed to ensure the safety of all passengers in an accident with its SRS airbags, advanced crash-safety body and powerful braking performances.

High mounted rear stop light for added visibility when stopping.
- Rear window washer
- Demister
- Rear wiper

Large rear glass for better visibility when reversing and driving.

Spare wheel mounted outside the car, improving the ground clearance as well as allowing bigger boot space and protection for rear impact without affecting rear vision.

Flat luggage compartment floor flush with the rear bumper for easier loading and unloading.

Minimal intrusion into the luggage space by the rear suspension.

The Terios comes with Tonneau cover for added security.

Luggage compartment height 640mm.

Storage compartment under boot floor.

Luggage space
350L with rear seats up
930L with rear seats folded

Minimal intrusion into the luggage space by the rear suspension.

The Terios comes with Tonneau cover for added security.

Luggage compartment height 640mm.

Storage compartment under boot floor.
Once its mechanical central diff lock is engaged, the Terios 4x4 has a 50/50 split. This diff lock is not a limited slip diff; it is an electronically engaged mechanical lock which is rigid. The 50/50 split of power, which occurs when the diff lock is engaged, guarantees that 50% of the total power goes to the front and 50% to the rear driveshafts. This system cannot be engaged on paved roads (unless iced) and should only be engaged when off-road. The reason the diff lock cannot be engaged on paved roads is that when engaged, the vehicle diff lock does not allow the front and rear wheels to turn around different diameter circles. This is not an issue when offroading as the slippage of the wheels means that they correct the difference between the front and rear turned arcs.

A diff lock that won’t leave you stuck.

With an exterior combining sophisticated style with the dynamism of an SUV, the Terios fits perfectly whether you’re out in nature or in the heart of the city. Outstanding performance makes driving the Terios exciting, on- and off-road. Whether you’re driving or along for the ride, the Terios will keep you satisfied.

A limited slip differential therefore limits the difference in the speeds of the two rear wheels. This means that if one wheel has traction whilst the other does not, the wheel that has traction will spin. Without a limited slip differential or locked differential the wheel without the traction would be allowed to spin freely. *Limited slip diff available on off-road model only.
### Engine
- **Type:** 352 petrol, DVT inline-4 cylinder DOHC, 16 valve
- **Bore x stroke (mm):** 72.0 x 91.8
- **Capacity (cm³):** 1495
- **Compression ratio:** 10.0:1
- **Power kW@rpm:** 77@6000
- **Torque Nm@rpm:** 140@4400
- **Fuel supply:** Electronic Fuel Injection
- **Fuel type:** Unleaded

### Specifications

THESE HEELS WERE MADE FOR DRIVING.

Heel protecting carpets. Just one of the many fabulous features in the new Terios Diva, a car designed with features just for women.

FEATURES

STYLE
- Leather with orange stitching
- Personalised DIVA carpets
- DIVA decals
- High ride height
- 5 alloy wheels (INCLUDING SPARE)
- Luggage compartment lamp

SAFETY
- 4 Star Euro NCAP rating
- Great visibility
- Reverse camera
- Driver and passenger airbags
- Smash and grab
- Central locking
- ABS with EBD and Brake Assist
- ISOFIX baby seat mounting points

PLUS THE TERIOS COMES WITH:

COMFORT
- Bluetooth
- iPod support
- Steering-wheel controls
- In-dash GPS
- DVD/CD/MP3 playback
- USB support
- Built-in hard-drive (UP TO 60 SONGS)
- Heel protecting carpets
- Seat organiser
- Boot organiser
- Air conditioning
- Power steering
- Power windows (FRONT & REAR)
- Electric mirrors
- 6 cup holders

SAFETY
- Crash sensing fuel cut system
- Front seatbelts: 3 point ELR with pre-tensioner and force limiters
- 3 rear seatbelts: 3 point ELR
- Hi-level brake light
