IMPORTANT NOTICES

General

• This manual has been authored with simplified grammar, to meet the needs of international users.

• The operator of this equipment must read and follow the descriptions in this manual. Wrong operation or maintenance can cancel the warranty or cause injury.

• Do not copy any part of this manual without written permission from FURUNO.

• If this manual is lost or worn, contact your dealer about replacement.

• The contents of this manual and equipment specifications can change without notice.

• The example screens (or illustrations) shown in this manual can be different from the screens you see on your display. The screens you see depend on your system configuration and equipment settings.

• Save this manual for future reference.

• Any modification of the equipment (including software) by persons not authorized by FURUNO will cancel the warranty.

• All brand and product names are trademarks, registered trademarks or service marks of their respective holders.

How to discard this product

Discard this product according to local regulations for the disposal of industrial waste. For disposal in the USA, see the homepage of the Electronics Industries Alliance (http://www.eiae.org/) for the correct method of disposal.

How to discard a used battery

Some FURUNO products have a battery(ies). To see if your product has a battery, see the chapter on Maintenance. Follow the instructions below if a battery is used. Tape the + and - terminals of battery before disposal to prevent fire, heat generation caused by short circuit.

In the European Union

The crossed-out trash can symbol indicates that all types of batteries must not be discarded in standard trash, or at a trash site. Take the used batteries to a battery collection site according to your national legislation and the Batteries Directive 2006/66/EU.

In the USA

The Mobius loop symbol (three chasing arrows) indicates that Ni-Cd and lead-acid rechargeable batteries must be recycled. Take the used batteries to a battery collection site according to local laws.

In the other countries

There are no international standards for the battery recycle symbol. The number of symbols can increase when the other countries make their own recycle symbols in the future.
SAFETY INSTRUCTIONS

The user and installer must read the appropriate safety instructions before attempting to install or operate the equipment.

**WARNING**
Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

**CAUTION**
Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

Warning, Caution ☑️ Prohibitive Action ☷️ Mandatory Action

### Safety instructions for the operator

**WARNING**

*Do not open the equipment.*

Only qualified personnel should work inside the equipment.

*Do not disassemble or modify the equipment.*

Fire, electrical shock or serious injury can result.

Turn off the power immediately if the equipment is emitting smoke or fire.

Fire or electrical shock can result if the power is left on.

Turn off the power immediately if water leaks into the equipment or an object is dropped inside the equipment.

Continued use can cause fire or electrical shock.

Turn off the power immediately if you feel the equipment is acting abnormally.

If the equipment is hot to the touch or emitting strange noises, turn off the power immediately and contact your dealer for advice.

**WARNING**

*Do not operate the equipment with wet hands.*

Electrical shock can result.

*Do not place liquid-filled containers on the top of the equipment.*

Electrical shock can result.

*Do not install the equipment where it may be subjected to rain or water splash.*

Fire or electrical shock can result if water gets inside the equipment.

*Use the proper fuse.*

Use of a wrong fuse can damage the equipment and may cause fire.

A warning label is attached to the equipment. Do not remove this label. If the label is missing or illegible, contact a FURUNO agent or dealer about replacement.

---

**Name:** Warning Label (1)  
**Type:** 86-003-1011-3  
**Code No.:** 100-236-233-10

---

To avoid electrical shock, do not remove cover. No user-serviceable parts.
Safety instructions for the installer

**WARNING**

- **Do not open the equipment.**
  - Only qualified personnel should work inside the equipment.

- **Turn off the power before beginning the installation.**
  - Fire or electrical shock can result if the power is left on.

- **Be sure no water leaks at the transducer and temperature sensor.**
  - Water leakage can sink the vessel. Also, confirm that neither the transducer or sensor will loosen by vibration. The installer is solely responsible for the installation.

- **Confirm that the power supply voltage is within the rating of this equipment.**
  - Incorrect voltage will damage the equipment and may cause fire.

**CAUTION**

- **The transducer cable must be handled carefully, following the guidelines below.**
  - Keep fuels and oils away from the cable.
  - Locate the cable away from chemicals.
  - Locate the cable away from locations where it might be damaged.

- **Do not apply the power with the transducer exposed to air.**
  - Damage to the transducer may result.

- **Observe the following compass safe distances to prevent interference to a magnetic compass:**

<table>
<thead>
<tr>
<th>Standard compass</th>
<th>Steering compass</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.95 m</td>
<td>0.60 m</td>

FOREWORD

A Word to the Owner of the DFF3

Congratulations on your choice of the FURUNO DFF3 Network Sounder. We are confident you will see why the FURUNO name has become synonymous with quality and reliability.

Since 1948, FURUNO Electric Company has enjoyed an enviable reputation for quality marine electronics equipment. This dedication to excellence is furthered by our extensive global network of agents and dealers.

This equipment is designed and constructed to meet the rigorous demands of the marine environment. However, no machine can perform its intended function unless operated and maintained properly. Please carefully read and follow the recommended procedures for operation and maintenance.

Thank you for considering and purchasing FURUNO.

Features

The DFF3 network sounder is a dual frequency echo sounder designed for use with the FURUNO NavNet, NavNet vx2, NavNet 3D and NavNet TZtouch series. The DFF3 feeds data about underwater conditions via a LAN.

- FURUNO Free Synthesizer (FFS) transceiver design allows use of user-selectable operating frequencies (28 - 200 kHz).
- Automatic operation selects correct range and gain to show fish echoes and bottom in both shallow and deep waters.
- Improved discrimination of near-surface fish by eliminating the transmission line.
- Approximate fish length calculation available with connection of transducer 50/200-1T. (NavNet 3D and TZtouch only.)
- 1/2/3 kW output

Note: The terms “NavNet”, NavNet vx2”, “NavNet 3D” and “NavNet TZtouch” refer to the models listed below.

1. MOUNTING

The network sounder can be installed on a desktop, deck or on a bulkhead. When selecting a mounting location for the network sounder, keep the following in mind:

- The temperature and humidity at the mounting site should be moderate and stable.
- Locate the unit away from exhaust pipes and vents.
- The mounting location should be well ventilated.
- Mount the unit where shock and vibration are minimal.
- Keep the unit away from electromagnetic field-generating equipment such as motors and generators.
- Leave slack in cables for maintenance and servicing ease.

</table>
- A magnetic compass will be affected if the network sounder is placed too close to it. Observe the compass safe distances noted in the safety instructions to prevent disturbance to the magnetic compass.

Fasten the network sounder to the mounting location with four self-tapping screws (5×20), referring to the outline drawing at the back of this manual for mounting dimensions.

### 1.3 Transducer

The performance of the echo sounder largely depends upon the transducer position. Select a place least affected by air bubbles since turbulence blocks the sounding path. Further, select a place least influenced by engine noise. It is known that air bubbles are fewest at the place where the bow first falls and the next wave rises, at usual cruising speed.

**Note:** The face of the transducer must be facing the sea bottom in normal cruising trim of the boat.

### 1.4 Optional Speed/Temperature Sensors

**ST-02MSB, ST-02PSB**

#### 1.4.1 Mounting considerations

Select a suitable mounting location considering the following points:

- Select a mid-boat flat position. The sensor does not have to be installed perfectly perpendicular. However, the sensor must not be damaged in dry-docking operation.
- Select a place apart from equipment generating heat.
- Select a place in the forward direction viewing from the drain hole, to allow for circulation of cooling water.
- Select a place free from vibration.
- Do not install near the transducer of an echo sounder, to prevent interference to the echo sounder.

#### 1.4.2 Mounting procedure

1. Dry dock the boat.
2. Make a hole of approx. 51 mm in diameter in the mounting location.
3. Unfasten locknut and remove the sensor section.
4. Apply high-grade sealant to the flange of the sensor.
5. Pass the sensor casing through the hole.
6. Face the notch on the sensor toward boat's bow and tighten the flange.
7. Set the sensor section to the sensor casing and tighten the locknut.
8. Launch the boat and check for water leakage around the sensor.
1. MOUNTING

1.5 Optional Temperature Sensors

1.5.1 Transom mount temperature sensor T-02MTB

- Fix the cable at a convenient location with cable clamp.
- When the cable is led in through the transom board, make a hole of approx. 17 mm in diameter to pass the connector. After passing the cable, fill the hole with a sealing compound.

Mount sensor flush with hull bottom.
1.5.2 Thru-hull temperature sensor T-02MSB, T-03MSB

Select a suitable mounting location considering the following points:

- Select a mid-boat flat position. The sensor does not have to be installed perfectly perpendicular. However, the location should not be such that the transducer may be damaged when the boat is dry-docked.
- Locate away from equipment which gives off heat.
- Locate away from drain pipes.
- Select a location where vibration is minimal.

<td><img src="image2" alt="Diagram of T-03MSB mounting procedure" /></td>
</tr>
</tbody>
</table>

**Mounting procedure**

1. Drill a hole of 21 mm in diameter in the mounting location.
2. Pass the sensor cable through the hole.
3. Pass gasket, washer and locknut onto cable in that order.
4. Coat the sensor flange with high quality sealant and then fasten the sensor with the locknut. (Torque: max. 59N·m)
5. Launch the boat to check for water leakage around the sensor.

1. Drill a hole of 25 mm in diameter in the mounting location.
2. Coat holder guide with high quality sealant, and pass gasket, washer and locknut onto holder guide in that order and then tighten the locknut.
3. Set the sensor holder to the holder guide from inside the boat and then tighten the locknut.
4. Launch the boat to check for water leakage around the sensor.
2. WIRING

2.1 Wiring Outline

Connect the power cable, transducer cables, sensor cable, network cable and ground wire to their respective locations on the network sounder. See the next page for how to connect the transducer cables.

Ground

Connect a ground wire (IV-2 sq, local supply) between the ground terminal and ship’s ground to prevent interference to the sounder picture. Make the length of the wire as short as possible. For FRP vessels, install a ground plate that measures about 20 cm by 30 cm on the outside of the hull bottom and connect the ground wire there.
2.2 Transducer Cable

TD-ID transducer (Airmar make transducer)

The TD-ID type transducer can be connected to this equipment. However, note the following limitations:

- TD-ID transducer cannot be used with NavNet, NavNet vx2.
- TD-ID transducer cannot be used with non-TD-ID transducer.
- Connect single TD-ID transducer to low frequency WAGO connector, regardless of actual frequency.

Cable fabrication

Fabricate the transducer cable as shown below. Separate the transducer cable well away from other electric cables to prevent interference to the sounder. This is especially important in the case of power cables from televisions and monitors.

Cable connection

After fabricating the transducer cable, connect the transducer cables to the equipment with WAGO connectors.

1. Open the cover: Grasp the cover at two sides, spread cover slightly and lift.
2. Unfasten six screws to remove the shield cover.
3. Detach the two WAGO connectors (low and high frequency) inside the equipment.
4. Connect the transducer cable to the WAGO connector, following the instructions in the figure below and the interconnection diagram. (The opener for the WAGO connector is attached inside the equipment. See the figure above.)

5. Unfasten the two screws labeled Screw A in the figure below.
6. Loosen the two screws labeled Screw B and slide cable clamp upward.

7. Pass the transducer cables through the cable entrance and connect their WAGO connectors to respective terminals inside the equipment.
8. Slide the cable clamp downward and tighten screws B and A in that order to fasten the cable clamp.
3. INITIAL SETTINGS

3.1 Tap Setting

This equipment is preprogrammed for use with certain transducers. A jumper wire inside the equipment is set according to transducer model. Check the jumper wire setting instructions on the sticker attached to the chassis. Use the opener attached inside the unit to set the jumper wire. One end of the jumper wire is connected to COMMON; connect the other end to A - E in the jumper block as applicable.

For transducers not programmed, for example, Airmar make TD-ID transducer, consult a FURUNO agent or dealer for advice.

Note 1: For NavNet, the tap settings shown on the NETWORK SOUNDER SETUP are different from actual ones. Therefore, follow the instructions on the sticker inside the equipment.

Note 2: For transducers 50/200-1ST, 50/200-1T and 50/200-12M, use the tap settings for 50/200-1T (50: Tap B, 200: Tap C).
3. INITIAL SETTINGS

3.2 DIP Switch Setting

The DIP switch S2 sets up the system according to the equipment connected. In the default setting all switches (1-8) are OFF. The DIP switch S3 should not be adjusted; leave all switches in the OFF position.

### DIP Switch S2 description

<table>

### Transducer setting at NavNet series

After setting up the transducer at the DFF3, set transducer type at NavNet 3D/TZtouch. See respective Installation Manual for the procedure.
3. INITIAL SETTINGS

3.3 Operation Check

For NavNet, NavNet vx2 and NavNet TZtouch, the DFF3 is powered on/off from ship’s switchboard. For NavNet 3D, it is powered on/off from the display unit. The LED on the cover of the DFF3 lights or blinks according to equipment state, as described in the table below.

<table>
<thead>
<tr>
<th>LED state</th>
<th>Meaning</th>
</tr>
</thead>
</table>
| Lighting continuously            | • Standby state. (If, for NavNet series, no signal is received via LAN for more than 10 minutes, the equipment automatically goes into standby to lessen power consumption.)  
• Power on (20 seconds during initialization)  
• IP address not set |
| Blinking every two seconds       | Normal operation                                                        |
| Blinking every 0.4 seconds       | Transducer settings at NavNet series not properly set.                  |

## 4. MAINTENANCE

### 4.1 Maintenance

Regular maintenance is essential for good performance. Check the items listed in the table below at the suggested interval to help keep your equipment in good shape for years to come.

<table>
<thead>
<tr>
<th>Item</th>
<th>Check point, action</th>
<th>Check interval</th>
</tr>
</thead>
<tbody>

<td>Check for corrosion. Clean if necessary.</td>
<td>Once a month</td>
</tr>
<tr>
<td>Power supply voltage</td>
<td>Check voltage. If out of rating correct problem.</td>
<td>Once a month</td>
</tr>
<tr>
<td>Cleaning the network sounder's cabinet</td>
<td>Dust or dirt on the cabinet may be removed with a dry cloth. Do not use chemical-based cleaners to clean the cabinet; they can remove markings and damage the cabinet.</td>
<td>Once a month</td>
</tr>
<tr>
<td>Transducer</td>
<td>Marine life on the transducer face will result in a gradual decrease in sensitivity. Check the transducer face for cleanliness each time the boat is dry-docked. Carefully remove any marine life with a piece of wood or fine-grade sandpaper.</td>
<td>When vessel is dry-docked</td>
</tr>
</tbody>
</table>

**WARNING**

**ELECTRICAL SHOCK HAZARD**

Do not open the equipment.

Only qualified personnel should work inside the equipment.

**NOTICE**

Do not apply paint, anti-corrosive sealant or contact spray to coating or plastic parts of the equipment.

Those items contain organic solvents that can damage coating and plastic parts, especially plastic connectors.

---

19
4.2 Replacing the Fuse

The 5A fuse (Type: FGBO-A 125V 5A PBF, Code No. 000-155-853-10) in the snap-in fuse holder on the power cable protects the equipment from equipment fault and reverse polarity of the ship's mains. If the equipment cannot be powered, the fuse may have blown. Find out the cause for blown fuse before replacing it. If the fuse blows again after replacement, contact a FURUNO agent or dealer for advice.

**WARNING**

Use the proper fuse.
Use of a wrong fuse can damage the equipment and cause fire.

4.3 Restoring Default Settings

This procedure restores all default sounder settings on the NavNet series. You can restore all default settings or restore those other than transducer and LAN. This procedure should only be performed by a suitably qualified FURUNO technician.

1. Disconnect the power and LAN cables from the DFF3.
2. Turn on the #1 and #2 switches of the Mode switch. See section 3.2 for the location.
3. Turn on the #7 or #8 switch of the Mode switch as applicable.
   - #7: Restore default settings other than LAN and transducer.
   - #8: Restore all default settings. Use this when changing transducers.
4. Connect the power cable to the DFF3, and turn on the power at the ship’s switchboard.
5. The LED blinks (every four seconds) when default settings are completely restored.

FURUNO Worldwide Warranty for Pleasure Boats (Except North America)

This warranty is valid for products manufactured by Furuno Electric Co. (hereafter FURUNO) and installed on a pleasure boat. Any web based purchases that are imported into other countries by anyone other than a FURUNO certified dealer may not comply with local standards. FURUNO strongly recommends against importing these products from international websites as the imported product may not work correctly and may interfere with other electronic devices. The imported product may also be in breach of the local laws and mandated technical requirements. Products imported into other countries as described previously shall not be eligible for local warranty service.

For products purchased outside of your country please contact the national distributor of Furuno products in the country where purchased.

This warranty is in addition to the customer’s statutory legal rights.

1. Terms and Conditions of Warranty

FURUNO guarantees that each new FURUNO product is the result of quality materials and workmanship. The warranty is valid for a period of 2 years (24 months) from the date of the invoice, or the date of commissioning of the product by the installing certified dealer.

2. FURUNO Standard Warranty

The FURUNO standard warranty covers spare parts and labour costs associated with a warranty claim, provided that the product is returned to a FURUNO national distributor by prepaid carrier.

The FURUNO standard warranty includes:
- Repair at a FURUNO national distributor
- All spare parts for the repair
- Cost for economical shipment to customer

3. FURUNO Onboard Warranty

If the product was installed/commissioned and registered by a certified FURUNO dealer, the customer has the right to the onboard warranty.

The FURUNO onboard warranty includes
- Free shipping of the necessary parts
- Labour: Normal working hours only
- Travel time: Up to a maximum of two (2) hours
- Travel distance: Up to a maximum of one hundred and sixty (160) KM by car for the complete journey

4. Warranty Registration

For the Standard Warranty - presentation of product with serial number (8 digits serial number, 1234-5678) is sufficient. Otherwise, the invoice with serial number, name and stamp of the dealer and date of purchase is shown.

For the Onboard Warranty your FURUNO certified dealer will take care of all registrations.

5. Warranty Claims

For the Standard Warranty - simply send the defective product together with the invoice to a FURUNO national distributor. For the Onboard Warranty – contact a FURUNO national distributor or a certified dealer. Give the product’s serial number and describe the problem as accurately as possible.

Warranty repairs carried out by companies/persons other than a FURUNO national distributor or a certified dealer is not covered by this warranty.

6. Warranty Limitations

When a claim is made, FURUNO has a right to choose whether to repair the product or replace it.

The FURUNO warranty is only valid if the product was correctly installed and used. Therefore, it is necessary for the customer to comply with the instructions in the handbook. Problems which result from not complying with the instruction manual are not covered by the warranty.

FURUNO is not liable for any damage caused to the vessel by using a FURUNO product.

The following are excluded from this warranty:

a. Second-hand product
b. Underwater unit such as transducer and hull unit
c. Routine maintenance, alignment and calibration services.
d. Replacement of consumable parts such as fuses, lamps, recording papers, drive belts, cables, protective covers and batteries.
d. Magnetron and MIC with more than 1000 transmitting hours or older than 12 months, whichever comes first.
e. Costs associated with the replacement of a transducer (e.g. Crane, docking or diver etc.).
f. Sea trial, test and evaluation or other demonstrations.
g. Products repaired or altered by anyone other than the FURUNO national distributor or an authorized dealer.
h. Products on which the serial number is altered, defaced or removed.
i. Problems resulting from an accident, negligence, misuse, improper installation, vandalism or water penetration.
j. Damage resulting from a force majeure or other natural catastrophe or calamity.
k. Damage from shipping or transit.
l. Software updates, except when deemed necessary and warrantable by FURUNO.
m. Overtime, extra labour outside of normal hours such as weekend/holiday, and travel costs above the 160 KM allowance
n. Operator familiarization and orientation.

FURUNO Electric Company, March 1, 2011
FURUNO Warranty for North America

FURUNO U.S.A., Limited Warranty provides a twenty-four (24) months LABOR and twenty-four (24) months PARTS warranty on products from the date of installation or purchase by the original owner. Products or components that are represented as being waterproof are guaranteed to be waterproof only for, and within the limits, of the warranty period stated above. The warranty start date may not exceed eighteen (18) months from the original date of purchase by dealer from Furuno USA and applies to new equipment installed and operated in accordance with Furuno USA’s published instructions.

Magnetrons and Microwave devices will be warranted for a period of 12 months from date of original equipment installation.

Furuno U.S.A., Inc. warrants each new product to be of sound material and workmanship and through its authorized dealer will exchange any parts proven to be defective in material or workmanship under normal use at no charge for a period of 24 months from the date of installation or purchase.

Furuno U.S.A., Inc., through an authorized Furuno dealer will provide labor at no cost to replace defective parts, exclusive of routine maintenance or normal adjustments, for a period of 24 months from installation date provided the work is done by Furuno U.S.A., Inc. or an AUTHORIZED Furuno dealer during normal shop hours and within a radius of 50 miles of the shop location.

A suitable proof of purchase showing date of purchase, or installation certification must be available to Furuno U.S.A., Inc., or its authorized dealer at the time of request for warranty service.

This warranty is valid for installation of products manufactured by Furuno Electric Co. (hereafter FURUNO). Any purchases from brick and mortar or web-based resellers that are imported into other countries by anyone other than a FURUNO certified dealer, agent or subsidiary may not comply with local standards. FURUNO strongly recommends against importing these products from international websites or other resellers, as the imported product may not work correctly and may interfere with other electronic devices. The imported product may also be in breach of the local laws and mandated technical requirements. Products imported into other countries, as described previously, shall not be eligible for local warranty service.

For products purchased outside of your country please contact the national distributor of Furuno products in the country where purchased.

WARRANTY REGISTRATION AND INFORMATION

To register your product for warranty, as well as see the complete warranty guidelines and limitations, please visit www.furunousa.com and click on “Support”. In order to expedite repairs, warranty service on Furuno equipment is provided through its authorized dealer network. If this is not possible or practical, please contact Furuno U.S.A., Inc. to arrange warranty service.
