INTRODUCTION

Welcome to the 2011 edition of the Catalog of Training Products for the Mining Industry.

The Academy also publishes a catalog, Courses for MSHA and the Mining Industry. You can obtain copies of this catalog from the address below.

HOW TO ORDER FROM THIS CATALOG

The items listed in this catalog can be ordered from:

National Mine Health and Safety Academy
Department of Instructional Materials
Printing and Property Management Branch
1301 Airport Road
Beaver, West Virginia 25813-9426
Phone: 304-256-3257
Fax: 304-256-3368
Email: MSHADistributionCenter@dol.gov

An order form is included in the back of the catalog for your convenience. Please allow 2-3 weeks for delivery.

We will gladly provide further information on any item listed in this catalog, address any comments you may have, or send you additional catalogs.

ADDITIONAL INFORMATION

You can also obtain information on mine health and safety from the Academy’s Technical Information Center and Library (TICL). The TICL is the largest library in the United States devoted to mine safety and health. The library collection consists of books, technical documents, photographs, maps, journal articles, and other materials in various formats and features a wide selection of audiovisual materials. In addition to the primary collection of mine safety and health materials, the library maintains extensive mine accident files, an archive of historical mine disasters information in the United States and selected works on the sociology, history and cultures of mining worldwide that may be available through interlibrary loan. Check with the TICL for more information.

The TICL offers reference assistance to users by telephone, mail or email. For information call 304-256-3266 or email MSHALibrary@dol.gov

The TICL’s online catalog and information about services are available at: http://www.msha.gov/TRAINING/LIBRARY/library.HTM
Información Y Productos

INTRODUCCIÓN
Bienvenidos a la edición de 2011 del *Catálogo de Productos por Enseñanza en la Minería*.

CÓMO ENCARGAR DE ESTE CATÁLOGO
Se pueden encargar los artículos inscritos en este catálogo de:

![National Mine Health and Safety Academy
Department of Instructional Materials
Printing and Property Management Branch
1301 Airport Road
Beaver, West Virginia 25813-9426
Teléfono: 304-256-3257
Fax: 304-256-3368
Correo electrónico: MSHADistributionCenter@dol.gov](image)

Se incluye un formulario por encargar en la parte trasera del catálogo por su conveniencia. Por favor, deje usted 2-3 semanas por entrega.

Con mucho gusto, nosotros le daremos a usted información adicional sobre cualquier artículo en este catálogo, responder a cualquiera observación que usted tenga, o enviarle a usted catálogos adicionales.

INFORMACIÓN ADICIONAL
Usted también puede obtener información sobre salud y seguridad en las minas en el Centro de Información Técnica y Biblioteca de la Academia (TICL, por sus siglas en ingles). TICL es la biblioteca más grande en los Estados Unidos dedicada a la seguridad y salud en las minas. La colección de la biblioteca consiste de libros, documentos técnicos, fotografías, mapas, artículos de periódicos, y otros materiales en varios formatos y ofrece una selección amplia de materiales audiovisuales. Además de la colección primaria de materiales de seguridad y salud en las minas, la biblioteca mantiene un archivo extenso de los accidentes en las minas, y un archivo de información de desastres históricos en minas en los Estados Unidos y obras escogidas en sociología, historia y culturas de las minas en el mundo entero que pueden estar disponibles a través de préstamos interbibliotecarios. Chequeee con TICL para mayor información.

TICL ofrece la asistencia de referencia a usuarios por teléfono, correo o correo electrónico. Por información llame al 304-256-3266 o correo electrónico MSHALibrary@dol.gov

El catálogo en línea de TICL e información sobre los servicios están disponibles en:
http://www.msha.gov/TRAINING/LIBRARY/library.HTM
Other Sources of Training Materials

In addition to the Academy, several other sources produce training materials. These include the National Institute for Occupational Safety and Health (NIOSH) and several states that participate in MSHA’s State Grants Program.

To order NIOSH products or to receive other information about occupational safety and health topics, contact NIOSH at:

Pittsburgh Research Center
P. O. Box 18070
626 Cochran Mill Road
Pittsburgh, PA 15236
Phone: 1-800-232-4636
Email: cdcinfo@cdc.gov

Or visit the NIOSH Web site at www.cdc.gov/niosh

You may also download materials from this Web link:

http://www.cdc.gov/niosh/mining/products/product158.htm

For more information on the State Grants Program, you may visit MSHA’s Web site at www.msha.gov and click on the link for State Grants Program.
This section of the catalog lists all available multimedia training material. DVDs (Digital Versatile Disc) are listed alphabetically by title. They offer trainers unique opportunities to reinforce key training objectives, expand and enhance training sessions, and add variety to training programs. DVD technology means more interactivity is available to both student and instructor – may be used for self-paced study or by an instructor in classroom presentations. It is suggested you use the programs to complement training specific to your operation.

Where appropriate, coal-related items are designated (C) and metal/nonmetal items are designated (MNM). VHS format is no longer available.

**COMPUTER CDs**

The following is a list of CDs by title and number. A detailed description of each, alphabetized by title, can be found on the following pages. New products are highlighted in red.

**Coal Firing Safety**.................................IG-112-CD

**Conveyor Belt Safety**.........................IG 108-CD

Diesel Inspection of Underground Coal Mine Equipment – Wagner Model LST-5S Scoop............IG 10-CD

Fighting Miner Fatigue on Unusual Work Schedules (C/MNM)...............IG 82-CD

HazCom Information...............................OT 51-CD

Hidden Hazards – Pipeline Safety in the Mining Industry (C/MNM)...........IG 85-CD

Material Handling Safety at Surface Mines, Mills, and Plants (C/MNM) ....IG 89-CD

**MSA W-65 Self-Rescuer**.......................IG 2-CD

**Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K & the Oxy-K Plus S (C)**........IG 98-CD

Self-Contained Self-Rescuer, The Inspection, Care and Use of the OCENCO, Incorporated EBA 6.5 (C).....IG 91-CD

Self-Contained Self-Rescuer, The Inspection, Care and Use of the OCENCO, Incorporated M-20 (C)........IG 92-CD

Surface Powered Haulage Safety (C/MNM).................................IG 56-CD

Surge Pile Safety...............................IG 109-CD

Training Materials Collection for M/NM Mines.............................IG 106-CD

Training Materials Collection for Surface and Underground Coal Mines........................................IG 105-CD

**TRAP - Take Responsibility for Accident Prevention**................IG 62-CD

Training Materials Collection for Surface and Underground Coal Mines........................................IG 105-CD

Self-Contained Self-Rescuer, The Inspection, Care and Use of the CSE SR-100 (C)...............IG 27-CD
**Multimedia Training Materials**

**Coal Firing Safety (MNM)**
Explosions in coal-fired processes represent a significant injury risk to personnel, and can result in costly equipment repairs and extensive process downtime. This photo-illustrated PowerPoint presentation on CD presents an in-depth look at coal handling, pulverization and firing equipment, and the engineering, operational, maintenance and process control issues that affect safety. It explains the factors that influence coal explosivity, describes explosion prevention and protection strategies, and discusses best design and operating practices. It includes 19 case studies of coal firing accidents in the Portland cement, lime, and lightweight aggregate industries, discusses the root causes, and lists the actions recommended to prevent recurrence. It is valuable for training operations, maintenance, engineering and safety personnel, and can be used as is or customized for specific companies or facilities. Speaker notes are provided for most of the 154 slides.

**Conveyor Belt Safety**
This multimedia program reviews conveyor belt safety. Subjects reviewed include: Fatalities With Conveyors; Analysis of Conveyor Accidents; Occupations; Conveyor Guarding (video); Safety Tips; and Best Practices: Conveyor Belts.

**Diesel Inspection of Underground Coal Mine Equipment – Wagner Model LST-5S Scoop**
This computer CD contains visuals and discussion to assist students in the understanding and application of equipment safety requirements for the Wagner model LST-5S scoop. The program focuses on inspection of the machine for diesel permissibility compliance. It is primarily designed for trainers, maintenance personnel, and industry safety inspectors, and may also be beneficial for others who work in an underground coal mine where this type of equipment is used. The presentation may take from one to four hours depending on classroom discussion and inclusion of regulatory and other reference materials. The same presentation is available on MSHA’s home page (www.msha.gov); however, the CD includes additional formats for those who wish to present the material full-screen with a computer projection system, without being connected to the internet, and/or wish to tailor the material to their operations. A color booklet is also available containing the same material in an easy-to-read format.
Fighting Miner Fatigue on Unusual Work Schedules (C/MNM)

Unusual work schedules are becoming more and more usual in mining. These PowerPoint presentations and instructor guides will raise miner awareness of the potential problems and methods of coping with unusual work schedules.

MSHA 2002
Cat No:  IG 82-CD contains PowerPoint Presentations and Instructor Guides
IG 82a A Management Perspective Instructor Guide  13 pp
IG 82b A Worker Perspective Instructor Guide  13 pp
Price:  Free of charge (1 book)
$2.00 (Instructor’s Guide)
$12.00 (CD and Instructor’s Guides)

HazCom Information
This CD holds about ten (10) hours of PowerPoint presentations on virtually every major aspect of MSHA’s Hazard Communication Standard. These presentations include notes, illustrations, and photographs to help your audience better understand HazCom and chemical terminology. The presentations include: chemical injuries and illnesses in mining; basic chemical families; basic toxicology; labeling; MSDSs; exemptions; and written programs, among others.

MSHA 2002  1 CD
Cat No:  OT 51-CD
Price:  $10.00

Hidden Hazards – Pipeline Safety in the Mining Industry (C/MNM)

This CD deals with the hidden hazards associated with buried pipelines on mining property. According to the U.S. Office of Pipeline Safety, more than two-thirds of all pipeline accidents occur due to accidental contact from heavy equipment. The mining industry alone experienced two fatalities in the year 2000. Between 1986 and 2002 more than 348 fatalities occurred due to pipeline accidents in general industry.

The CD includes a PowerPoint presentation – consisting of 51 slides – which can be conducted in approximately 30 to 40 minutes; a handout of key facts to be provided to class participants; and an instructor’s guide. (The key facts and instructor’s guide may be printed from the CD.) The Hidden Hazards package is an excellent tool to be utilized as a one-hour scheduled block for surface annual retraining, surface new miner training, supervisor training, safety meetings, or as a supplement to individual task training. The program can also be utilized for mining industry contractor training.

Martin Consulting 2002  19 min
Cat No:  IG 85-CD
Price:  $10.00
Material Handling Safety at Surface Mines, Mills, and Plants (C/MNM)
This computer CD contains visuals and discussion on safety in manual and mechanical material handling and storage. Trainers, safety personnel, supervisors, and others can use the CD to conduct classes for mine workers. Anyone can also use it for self-study. The same information is available on MSHA’s Web site (www.msha.gov); however, the CD includes additional formats for those who wish to do full-screen presentations with a computer projection system and/or wish to tailor the material to their operations. An internet connection is required for use of the linked information on the CD. The CD includes:

- Microsoft PowerPoint® Version – Contains 132 slides with speaker notes. (Works best with PowerPoint® 2002 or later.)
- Booklet/Script – A Microsoft Word® file for printing easy-to-read copies of the material for self-study, pre-class review of course material, in-class instructor use, course handouts, or reference. (Works best with Word® 2002 or later.)
- HTML Version – Interactive self-paced course as it appears on MSHA’s Web site. (Requires browser software.)

MSA W-65 Self-Rescuer
Instructs underground workers and visitors in the proper use of this self-rescuer. Provides students with working knowledge of the device and the ability to use the self-rescuer in an emergency. The 8 basic steps are pictured on PowerPoint slides as well as a pocket card. A CD on which a PowerPoint presentation (with a “reader” so the user can view the presentation without the need of the PowerPoint program) of the entire manual is also available.

Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K & the Oxy-K Plus S (C)
This interactive computer CD includes proper inspection, maintenance and donning procedures of the Dräger Oxy-K Plus and the Oxy-K Plus “S” Self-Contained Self-Rescuer (SCSR). The self-paced, interactive training course contains full-motion video segments, photographs, an instructor guide and a checklist. Lessons emphasize some of the features for each model, show how to thoroughly inspect the units, cover proper donning techniques and show what it is like to wear the SCSR in an evacuation exercise.
Multimedia Training Materials

Self-Contained Self-Rescuer,
The Inspection, Care and Use of the CSE SR-100 (C)
This interactive computer CD contains full-motion video segments, photographs, an instructor guide and a checklist for inspection and use of the SR-100 Self-Contained Self-Rescuer (SCSR). Fully interactive and self-paced, this training course emphasizes features of the unit, shows how to thoroughly inspect the unit, covers proper donning techniques and shows what it is like to wear the SCSR in an evacuation exercise.

MSHA 2005 1 CD
Cat No: IG 92-CD
Price: $10.00

Self-Contained Self-Rescuer,
The Inspection, Care, and Use of the OCENCO, Incorporated M-20 (C)
This interactive computer CD includes proper inspection, maintenance and donning procedures of the Ocenco M-20 Self-Contained Self-Rescuer (SCSR). Fully interactive and self-paced, this training course emphasizes some of the M-20 features, shows how to thoroughly inspect the unit, covers proper donning techniques and shows what it is like to wear the SCSR in an evacuation exercise. The CD contains full-motion video segments, photographs, an instructor guide and a checklist.

MSHA/NIOSH 2005 1 CD
Cat No: IG 91-CD
Price: $10.00

Surface Powered Haulage Safety (C/MNM)
This computer CD contains visuals and discussion based on a classroom presentation developed by MSHA instructors. The training material is aimed at surface haulage accident prevention, and addresses several of the hazards that may arise in surface haulage operations at mines. It is primarily designed for equipment operators, supervisors, and safety personnel at surface mines, but may also benefit others who work at a surface mine. The full presentation may take about an hour and a half. The same presentation is available on MSHA’s home page (www.msha.gov); however, the CD includes additional formats for those who wish to present the material full-screen with a computer projection system, without being connected to the internet, and/or wish to tailor the material to their operations.

MSHA 2000 1 CD
Cat No: IG 56-CD
Price: $10.00
Multimedia Training Materials

Surge Pile Safety
A 75-slide PowerPoint program that covers five aspects of surge pile safety. Topics include: Surge Pile Hazards; Surge Pile Accidents; Pushing Coal on a Surge Pile; and Best Practices: Surge Pile Safety.

MSHA 2008
Cat No: IG 109-CD
Price: $10.00

Training Materials Collection for Metal/Nonmetal Mines
This CD is a collection of PowerPoint presentations and video clips intended to be used as supplementary training materials for new and/or experienced surface and underground metal/nonmetal miners. Accident prevention is stressed in each item. Topics covered include: Aging Workforce, Back Injury Prevention, Bad Weather, Brake-Related Accidents, and Bucket Maintenance.

Programs related to conveyor safety include: Conveyor Belt Safety, Conveyor Best Practice Cards, Conveyor Safety Ideas, and new and revised versions of a Conveyor Guarding video. Additional subjects: Fall Protection Outreach, Hand Tools, Haul Truck Pre-Operation Inspection, Highwall Fall Prevention, and a video about Highwall Collapse and Fall Protection.

Other material reviews: Maintenance, New Miner Fatalities, New Miner Training, Mounting and Dismounting Equipment, Slips and Falls From Equipment, Welding Safety, and Wheel Rim Compatibility. The CD includes material related to the SLAM Risk program such as Make the Right Decision. Also included is a SLAM Risk webcast and an Instructional Guide.

MSHA 2008
Cat No: IG 105-CD
Price: $10.00
Multimedia Training Materials

**TRAP — Take Responsibility for Accident Prevention**

Near-misses are incidents which indicate the presence of a hazard – a “trap,” that is waiting to catch a miner. Traps come and go in the workplace every day. Some are simple, such as a cord stretched across a walkway, while others are more complex such as a poorly designed set of controls on a mining machine. In any case, traps are dangerous. “Take Responsibility for Accident Prevention” is a proactive program. It involves miners, supervisors, managers, and MSHA in an effort to make the workplace safer for everyone. The TRAP Program includes four short courses. The entire program is available on CD.

MSHA Rev 2003

Cat No: IG 62-CD

IG 62a Take Responsibility for Accident Prevention
IG 62b Task Training
IG 62c Miners’ Rights and Responsibilities
IG 62d Supervisory Responsibilities

Price: Free of charge (1 of each book)

$2.00 IG 62a Take Responsibility for Accident Prevention
$2.00 IG 62b Task Training
$2.00 IG 62c Miners’ Rights and Responsibilities
$2.00 IG 62d Supervisory Responsibilities
$10.00 1 CD of entire set
Multimedia Training Materials

DVDs

The following is a list of DVDs by title and number. If Spanish translations are available, both the English and Spanish versions are on the same DVD. These are designated by an “S” after the DVD number. A detailed description of each, alphabetized by title, can be found on the following pages. New products are highlighted in red.

Academy Promo ........................................ DVD 624
Accident Reduction Program/Post Accident Remedies, Technical Support (C/MNM) ........................................... DVD 519
Arc Flash Awareness ................................ DVD 576
Another Sunrise – A Close Call on a Surge Pile(C) Otra Salida del Sol: Una Llamada Importante con una Pila de Regulación (C) ..................DVD 569-S

We Are . . . MSHA “SOMOS. . .MSHA” ..................................................DVD 535-S
What Could Happen –
Effective Risk Assessment and Inspecting Highwalls ......................... DVD 500
What Does the Term Silicosis Mean to You? (C/MNM)
¿Qué significa para usted la palabra silicosis? (C/MNM) .........................DVD 597-S
What You Can’t See Could Kill Someone! (C/MNM)
Pathway to Safety 2
¡Lo que no ve puede matar a alguien! [Sendero hacia la seguridad 2] ..........DVD 534-S
Winter Alert (C)
Alerta en los meses de invierno ........ DVD 512-S
Winter Alert: The Sonman Mine Disaster .................................................. DVD 601
Workplace Examinations (Surface and MNM) .................................. DVD 522-S
Academy Promo

Authorized by Congress in 1969, the National Mine Health and Safety Academy serves as the central training facility for MSHA mine inspectors and mine safety and health professionals from other government agencies, the mining industry, and labor. Our goal is to improve the safety and health of our miners through education.

Price: $10.00

Accident Reduction Program/Post Accident Remedies, Technical Support (C/MNM)

This series consists of videos offering ways to prevent accidents before they happen. Technical Support conducts field investigations, laboratory studies, and analyses to resolve specific problems. MSHA is developing this video series in an attempt to help us learn from past accidents. We are providing you with what we are calling “Low Tech” remedies.

The first video consists of five subject areas:

• New water spray system for continuous mining machines
• Safely changing cutting bits on a continuous miner
• Using drip pans and safely lubricating conveyor systems
• Using safety props for mobile equipment repairs
• Mechanics taking the vehicle’s keys when performing maintenance

MSHA 1999 25 min
Cat No: DVD 519
Price: $10.00

Arc Flash Awareness

This video provides information on the causes and prevention of arc flash and safety recommendations. Also included are comments from workers injured by an arc flash and discussion questions.

NIOSH 2007 25 min
Cat No: DVD 576
Price: $10.00

Another Sunrise: A Close Call on a Surge Pile (C)

This video recounts the rescue of a dozer operator from a coal surge pile accident. Emphasis is placed on reinforcing dozer cabs to withstand burial pressure, the role of advanced technologies in surge pile safety, and good safety practices and training.

MSHA 2002 9 min
Cat No: DVD 569-S
Price: $10.00

DVD includes both English and Spanish versions - see following Spanish description.

Otra Salida del Sol: Una Llamada Importante con una Pila de Regulación (C)

Este video relata el rescate de un operador de excavadora de un accidente en una pila de regulación de carbón. Se pone énfasis en reforzar las cabinas de la excavadora para resistir la presión a enterramientos, el papel de las tecnologías avanzadas en la seguridad con las pilas de regulación, y buenas practicas de seguridad y entrenamiento.

Precio: US$10.00
### Multimedia Training Materials

#### Anthracite: Pre-Shift Examinations of Underground Mines

Video shows two mine foremen conducting typical pre-shift inspections at two different underground anthracite mines.

- **MSHA 1994** 31 min
- **Cat No:** DVD 614
- **Price:** $10.00

#### Ask the Right Questions

Developed in cooperation with the United Mine Workers of America and Bituminous Coal Operator’s Association – Joint Industry Training Committee, “Ask the Right Questions” discusses what needs to be done to identify sources of accidents and determine prevention methods at your mine. Four types of physical barriers and five types of human barriers are enacted and analyzed using accident analysis and problem identification (AAPI) techniques. This video is based on the concept that asking the right questions is fundamental to finding solutions to our accident problems.

- **MSHA 1992** 31 min
- **Cat No:** DVD 556
- **Price:** $10.00

#### Automatic Emergency Parking Brakes (as required by 30 CFR 75.523-3)

This video discusses the applications of 30 CFR 75.523-3 to “all rubber-tire, self-propelled electric haulage equipment used in active workings of an underground coal mine – with the exception of personnel carriers.” Each of the specific subparagraphs of this mandatory standard is not only explained but also demonstrated to reinforce the concept.

- **MSHA 1992** 17 min
- **Cat No:** DVD 590
- **Price:** $10.00

#### Ball Mill Safety (MNM)

Developed cooperatively by MSHA and Lehigh Portland Cement Company. Outlines the various steps - precautions and procedures - that must be taken to safely and efficiently shut down a ball mill, enter, inspect, service (repair or perform routine maintenance), and restart the operation. Procedures discussed/demonstrated include: planning, crew selection and briefing, safe work permits, electrical lockout, isolating maintenance area, hatch/door removal, safe access, ventilation and respiratory protection, welding/cutting, hatch/door installation, and cleanup.

- **MSHA 1992** 17 min
- **Cat No:** DVD 573
- **Price:** $10.00

#### Best Practice Guide to the Milling of Slate, A (MNM)

This video is designed to raise awareness of the dust and noise hazards associated with the slate industry.

- **MSHA 2001** 13 min
- **Cat No:** DVD 553
- **Price:** $10.00

#### Black Lung: A History

This film chronicles the history of the West Virginia and national movement of miners, doctors, and Congressmen to pass legislation, first in the West Virginia Legislature, and then nationally in Congress, to protect miners from Black Lung.

- **MSHA 2009** 28 min
- **Cat No:** DVD 630
- **Price:** $10.00
Blast Area Security

The objective of this video and interactive DVD is to improve blast safety by providing information about blast area security to those working around blast sites.

NIOSH 2006
Cat No: DVD 568
Price: $10.00

Blaster’s Training Program for Independent Contractors (C/MNM)

Designed to train independent contractors in the safe use and application of explosives. The training package includes: Leader’s Guide, Knowledge Checklist for Supervisors, Knowledge Checklist for Trainees, an OJT Checklist, and a Student Workbook. The DVD covers the following topics: Safety in Blasting, Buckle Up on the Job, Ground Control in Surface Mining (Coal), Surface Blasting in Metal and Nonmetal Mines, Quarry Safety, Safety in Surface Coal Mining, and Hazard Recognition and Avoidance in Surface Coal Mining. The book should be used along with the DVD, since sections of the book are referenced in the DVD.

MSHA Rev 1997 194 pp
Cat No: IG 81
DVD 543
Price: Free of charge (1 book)
$5.00 (each additional copy)
$10.00 (DVD)

Blind Spots Can Kill! (C/MNM)

A haul truck driver and an electrician discuss the accident where a 240-ton haul truck drove over the electrician’s work vehicle. No one was in the vehicle, but the electrician’s one-ton truck was destroyed. This video stresses the importance of getting the driver’s attention whenever you’re near a large haul truck and avoid getting into a blind spot.

MSHA 1996 6 min
Cat No: DVD 526
Price: $10.00

Chemical Hazard Information (C/MNM)

Virtually all chemical products are labeled and have Material Safety Data Sheets (MSDSs), when they are delivered to a mine. Many products have hazardous components that can harm miners. This video is intended to train miners to understand how chemicals can enter the body (Routes of Entry). It also teaches miners the contents of chemical labels and MSDSs, as well as how to interpret the technical terms found on MSDSs. It can be shown to miners as part of your training program, explaining a critical HazCom provision.

MSHA 2002 17 min
Cat No: DVD 557-S
Price: $10.00

DVD includes both English and Spanish versions – see following Spanish description.

Información sobre riesgos químicos

Casi todos los productos químicos que llegan a las minas vienen etiquetados y tienen Hojas de Datos de Seguridad de Materiales (MSDSs), sin embargo, muchos productos tienen componentes peligrosos que pueden afectar la salud de los mineros. El primer objetivo de este video es capacitar a los mineros para que entiendan cómo los productos químicos pueden penetrar en su cuerpo (vías de entrada). El segundo, es enseñar a los mineros a leer las etiquetas de los productos químicos y a interpretar los términos técnicos de las MSDSs. Esto puede complementar su programa de capacitación para los mineros, ya que además le permite explicar una disposición esencial de comunicación de riesgos.

MSHA 2002 17 minutos
Número de Catálogo: DVD 557-S
Precio: US$ 10.00
“Choice Is Yours, The” – Reflective Clothing

Visibility from the operator’s compartment of large equipment is not always good. Numerous accidents have occurred where a miner was struck by or run over by underground mobile equipment. Statements by some of the equipment operators interviewed include: “I never saw him/her,” I didn’t know where they were,” and “By the time I saw him/her, I could not stop.” Wearing reflective clothing will make miners more visible and allow them to be seen. You must dress for work every day, so why not use reflective clothing? It takes no extra effort and there is no excuse not to do it – THE CHOICE IS YOURS!

MSHA 2005  9 min
Cat No: DVD 524
Price: $10.00

Coal Dump Point Safety – Stockpiles and Waste Piles

Using trucks to dispose of waste material and build stockpiles are important parts of many mining operations, but accidents can occur during these activities if adequate safety precautions are not taken. This video will illustrate the most common hazards at dumps and piles and will demonstrate recommended safety practices.

MSHA 1997  15 min
Cat No: DVD 615-S
Price: $10.00
DVD includes both English and Spanish versions – see following Spanish description.

Seguridad en los puntos de descarga: pilas de almacenaje y de desperdicio (carbón)

Los problemas de seguridad pueden presentarse cuando los camiones se echan en reversa para volcar material a, o, sobre la orilla de una pila. Un camión puede volcarse de una pila debido a una falla de los frenos; al mal calculo de la orilla; al mal habito de chocar con la berma, o al tratar de descargar material en partes donde no hay, o casi no hay bermas

El objetivo de este video es mostrar los riesgos más comunes que hay en las escombreras y pilas, y recomendar procedimientos de seguridad.

MSHA 1997  15 minutos
Número de Catálogo: DVD 615-S
Precio: US$ 10.00
Conducting a Chemical Hazard Determination (C/MNM)

MSHA’s HazCom requires mine operators to inventory the chemicals at their mines and determine which are hazardous. This video helps mine operators conduct that inventory by explaining HazCom and how it applies to the most common mine chemicals. The video walks the viewer through HazCom’s decision process of Chemical Hazard Determination. It can also be shown to miners as part of your training program, explaining a critical HazCom provision.

MSHA 2002 12 min
Cat No: DVD 580-S
Price: $10.00

DVD includes both English and Spanish versions – see following Spanish description.

Métodos de evaluación de riesgos químicos

La comunicación de riesgos de la MSHA requiere que los operadores mineros hagan un inventario de los productos químicos que tienen en sus minas y que determinen cuáles son peligrosos. El objetivo de este video es ayudar a los operadores mineros a llevar a cabo dicho inventario, explicándoles cuáles son las comunicaciones de riesgos y enseñándoles cómo se aplican a los productos químicos más comunes en las minas. Este video indica cómo seguir las comunicaciones de riesgos para poder evaluar los riesgos químicos. Esto puede complementar su programa de capacitación para los mineros, ya que además le permite explicar una disposición esencial de comunicación de riesgos.

Contributions of the American Miner (C/MNM)

*2004 Communicator Award Winner

Every day, materials merge from American surface and underground coal and metal/nonmetal mines. Mining provides minerals and fuels that enable our nation to work and produce items that we use every day. This video shows a wide variety of mining processes and the products that are produced from them. This is a great tribute to the hardworking men and women of our Nation’s mines.

MSHA 2004 11 min
Cat No: DVD 508
Price: $10.00

*The Communicator Award is an international awards competition that recognizes outstanding work in the communication field.
Multimedia Training Materials

Customer and Delivery Truck Drivers Hazard Training (MNM)
This video provides hazard information for truckers who frequent mine sites. Covered are safe work behaviors that will help truck drivers avoid the dangers of ground, electrical, transportation, slip and fall, and numerous other hazards that are common in and around mine sites. This video comes with an 8-page guide.

Penn State University 1997 10 min
Cat No: DVD 541-S
Price: $10.00
DVD includes both English and Spanish versions – see following Spanish description.

Capacitación de riesgos para los choferes de camiones de reparto y de los clientes
Este video familiariza a los choferes, que llevan productos a las minas, con los factores de riesgo más comunes que hay en la industria minera. Además, recomienda algunos consejos para evitar accidentes ocasionados por el terreno, la electricidad, el transporte, los resbalones y caídas o por otros riesgos inherentes a las minas. Este video viene con una guía de ocho páginas.

Universidad del Estado de Pensilvania 1997 10 minutos
Número de Catálogo: DVD 541-S

Dawn of a New Day: Continuous Haulage Safety (C)
This video addresses the hazards associated with continuous face haulage systems.

MSHA 1998 23 min
Cat No: DVD 594
Price: $10.00

D-Train
This is a story about a rural west Tennessee community where everyone knows one another and where life seemingly revolves around the community school which is pre-K through 12. This is a town where all of the local high school athletes are household names. Detris Willis, the “D-Train,” was a bigger than life heavily recruited superstar high school football player who captivated the attention of the entire county.

The summer prior to his much anticipated senior season, he tragically lost his life swimming in an abandoned quarry. This video is based upon a small town, Detris Willis, and our message, “Stay Out and Stay Alive.”

MSHA 2008
Cat. No: DVD 625
Price: $10.00

Diesel Powered Vehicles (C)
This interactive DVD covers various topics concerning Diesel Powered Vehicles. The topics include the final phase of the diesel regulations, Sections 75.1909, 75.1910, and 75.1911 of the Code of Federal Regulations, as well as adjusting and maintaining a diesel-powered engine, and defining what is an approved diesel-powered engine. We will also look at how a fire suppression system works.

- Diesel Regulations: Light Duty Vehicles 11 min
- Diesel Regulations: Heavy Duty Vehicles 16 min
- Maintaining Diesel Engines 13 min
- Fire Suppression: How It Works 15 min

MSHA 2005
Cat No: DVD 010
Price: $10.00
Diesel Regulations – Heavy Duty Vehicles (C)

This video was developed to provide assistance to mine operators, diesel equipment manufacturers, and vendors in implementing the final phase of the diesel regulations. This video covers sections 75.1909, 75.1910, and 75.1911 of the Code of Federal Regulations.

MSHA 1999  16 min
Cat No: DVD 577-S
Price: $10.00

DVD includes both English and Spanish versions – see following Spanish description.

Dilemma of the Desert – Real Life Experiences

This DVD contains two personal stories revealing the dangers of abandoned mines.

MSHA 2008
Cat. No: DVD 627
Price: $10.00

Diesel Regulations — Light Duty Vehicles (C)

This video was developed to assist mine operators, diesel equipment manufacturers, and vendors with the implementation of the final phase of the diesel regulations. This video covers sections 75.1909, 75.1910, and 75.1911 of the Code of Federal Regulations.

MSHA 1999  11 min
Cat No: DVD 578-S
Price: $10.00

**Escape From Farmington No. 9 – An Oral History (C)(DVD)**
On November 20, 1968, a massive explosion rocked the underground workings of Mountaineer Coal Company’s Farmington No. 9 Mine in West Virginia. Of the 99 miners who were working in the mine at the time of the explosion, only 21 survived and escaped the mine. This group included eight who were rescued from the Mahan’s Run air shaft. Nearly 40 years after the event, researchers from the NIOSH Pittsburgh Research Laboratory conducted oral history interviews with two of the eight survivors rescued from the shaft.

Explosives Underground – Handling Explosives in Modern Mines (MNM)
This video emphasizes safety standards for the handling and transportation of explosive materials from surface to underground magazines. It shows underground storage of explosives, inspecting vehicles required to transport explosives underground, examining work places and scaling procedures, and loading and detonating explosives. It also includes staged safety violations and a review of an underground blasting accident.

NIOSH 1999 15 min
Cat No: DVD 531
Price: $10.00

Faces of Black Lung
Every year, about 1,000 miners die from coal workers’ pneumoconiosis or ‘black lung disease’ caused by exposure to coal dust. Black lung disease continues to occur today, but that does not need to happen. Black lung disease and death are entirely preventable. You’re about to hear from two coal miners who have been diagnosed with this devastating disease.

NIOSH 2009 14 min
Cat No: DVD 629
Price: $10.00

Fall Protection: Your Lifeline to Safety (C/MNM)
This video provides an overview of the hazards associated with doing work at elevated locations and the importance of fall protection. Common types of fall protection systems are presented, including personal fall arrest and restraint devices. Special emphasis is placed on the development of site-specific policies and procedures, with regard to fall protection regulations in the mining industries.

MSHA 2000 14 min
Cat No: DVD 506-S
Price: $10.00
DVD includes both English and Spanish versions – see following Spanish description.

Protección contra caídas: Su línea de vida hacia la seguridad
Este video presenta los riesgos asociados con los trabajos que se efectúan en partes elevadas y la importancia de los equipos contra caídas. Este video muestra los sistemas de protección contra caídas más comunes tales como los dispositivos anticaídas personales y los de retención de movimientos. Así mismo, se hace hincapié en el hecho de cada mina desarrolle políticas y procedimientos específicos que cumplan con las normas de seguridad anticaídas.

**Ground Support . . . It’s Important (Miner Mike Saves the Day) (MNM)**
An older, more experienced miner “Mike” teaches two new inexperienced miners about the hazards of taking shortcuts on the job and the importance of proper ground support in metal/nonmetal mines. This video illustrates the proper techniques and procedures of drilling and bolting for adequate ground support.

- NIOSH 2000 33 min
- Cat No: DVD 575
- Price: $10.00
Multimedia Training Materials

Harvey Roles I (MNM)
This video is a hazard recognition and first aid training video. It depicts a contractor arriving at a surface mine to do some work. The lack of proper hazard training, in addition to his preoccupation while driving, ultimately contributes to a near fatal accident. The video uses a classic contrast of a competent and incompetent response by two fellow workers to teach the proper procedures for securing an accident scene, applying first aid principles, and engaging the Emergency Medical System (EMS). This video comes with an 8-page guide.

Penn State University 1997 13 min
Cat No: DVD 542
Price: $10.00

Harvey Roles II – A Lesson in Emergency Care (C)
This video is a first aid training video featuring a review of the fundamentals of rescue techniques following an electrocution. It reviews the proper procedure for rescuing a miner who has contacted an energized circuit, and demonstrates how to administer CPR. This video comes with an 8-page guide.

Penn State University 1997 13 min
Cat No: DVD 529
Price: $10.00

Haulage and Hoisting in Underground Anthracite Coal Mining
Various haulage and hoisting systems typically found in anthracite coal mining areas are depicted and explained with reference to any hazards associated with each system as well as the measures needed for compliance with applicable 30 CFR regulations.

NOTE: This video is a taped version of the slide-tape program.

MSHA 1992 30 min
Cat No: DVD 582
Price: $10.00

Hazard Communication (C/MNM)
This interactive DVD contains 2 previously-produced Hazard Communication videotape programs, a brief interactive quiz, and a detailed in-depth look at MSHA’s HazCom Standard. The material provides a broad look at properties and potential safety and health hazards of substances to which employees may be exposed. This material may not address specific conditions or equipment at your mine, and therefore should be used as a supplement to your own mine-specific training.

MSHA 2003
Cat No: DVD 003
Price: $10.00

Haul Road and Dump Site Berms (C/MNM)
This interactive DVD contains discussion topics, photos, best practice and safety tips, standards and policy (30 CFR Parts 56 and 77), and an interactive test designed to reinforce learning. In addition, there are three complete videos:

- Good Berms Save Lives 15 min
- Dump Point Safety (MNM) 14 min
- Coal Dump Point Safety 15 min

MSHA 2002
Cat No: DVD 001
Price: $10.00

**Hazards and Safety Practices on Surge Piles (MNM)**

This video is designed to make dozer operators, miners, and others who work on or around surge piles aware of the hazards associated with surge piles and inform them of the recommended safety practices.

- **MSHA 1997** 11 min
- **Cat No:** DVD 554-S
- **Price:** $10.00
- DVD includes both English and Spanish versions – see following Spanish description.

**Riesgos y procedimientos de seguridad en pilas de regulación**

El objetivo de este video es concientizar a los operadores de topadoras, mineros y demás trabajadores que laboran cerca de las pilas de regulación acerca de los riesgos asociados a dichas pilas, además de mostrar las mejores prácticas de seguridad.

- **MSHA 1997** 11 minutos
- **Número de Catálogo:** DVD 554-S
- **Precio:** US$ 10.00

**Hazards of Coal Stockpiling Operations**

This video shows what happens when miners or equipment operators are working on a surge pile and the material unexpectedly collapses, breaks loose, or starts to flow underneath them. The disastrous result of being engulfed in loose material – suffocation – is demonstrated by a working model of a surge pile. The model shows how stockpiles with drawholes and feeders work, what takes place within the piles, the properties of flowing materials, and how hazardous conditions can develop at surge piles. Included are action scenes of heavy mobile equipment being used around stockpiles. The video emphasizes recognizing stockpile hazards and preventing stockpile accidents.

- **MSHA 1994** 26 min
- **Cat No:** DVD 501
- **Price:** $10.00

**Health and Safety Hazard Awareness, An Overview – Gypsum Mining**

This video is an overview of the basics of health and safety hazard recognition of many of the operations at a mine site. Your mine’s education and training program will cover many of these topics in much more detail and inform you of specific policies at your mine. Remember, you, the miner, are the key ingredient in safety.

- **MSHA 2003** 14 min

### Hearing Conservation, MSHA’s Part 62 (C/MNM)
Noise is a hazard that can diminish or destroy your hearing. This video shows the different hearing protectors available and the proper way to wear them.

- MSHA 2002 21 min
- Cat No: DVD 511-S
- Price: $10.00
- DVD includes both English and Spanish versions – see following Spanish description.

**Conservación de la Audición, Parte 62 de MSHA (C/MNM)**
El ruido es un riesgo que puede disminuir o puede destruir su audición. Este video muestra diferentes protectores disponibles para los oídos y la manera apropiada de llevarlos.

- MSHA 2002 21 minutos
- Número de Catálogo: DVD 511-S
- Precio: US$10.00

### Hidden Danger: Safety Improvements for Surge Piles (C)
Pushing coal on a surge pile has been called the most dangerous job at a prep plant. Nineteen miners have lost their lives in surge pile accidents since 1980 and there have been many other close calls. This video will show two ways to protect equipment operators from this danger: extra-strength cab windows or remote controlled dozers.

- MSHA 2000 9 min
- Cat No: DVD 505-S
- Price: $10.00
- DVD includes both English and Spanish versions – see following Spanish description.

**Peligro oculto: Mejoras de seguridad para las pilas de regulación**
Empujar carbón en pilas de regulación siempre ha sido considerado como la labor más peligrosa en las plantas de preparación. Desde 1980, los accidentes en las pilas de regulación han dejado un saldo de diecinueve mineros muertos sin contar a los lesionados. Este video muestra dos métodos para proteger a los operadores de éste peligro: vidrios reforzados y vehículos operados a control remoto.

Price: $10.00

Introduction to Mine Rescue Team Training and Competition, An
This video covers the basis for the safe, efficient rescue and recovery methods followed during a mine rescue competition. Trained personnel, readily available in the event of a disaster, are vital in the development of an efficient mine rescue team. Experience has shown that efficiency in mine rescue training can be promoted by having mine rescue crews compete in mine rescue contests. This video is intended to be introductory information and instruction. A viewer will gain a basic understanding of the workflow and procedures that a mine rescue team follows during a mine rescue competition.

Price: $10.00

Lock Out and Tag for Safety
Maintenance workers and electricians in the mining and milling industries are often exposed to “live” electrical circuits and electric powered machinery and equipment. They are also exposed to the unexpected and accidental energizing of equipment they can be working on – unless they correctly deenergize, lock out, and tag the main power circuit that supplies current to this equipment. This video describes the proper procedures for performing safe electrical lockout and testing, and dramatically illustrates what can happen if this isn’t done. Job safety training and following company safety policies are stressed as a means for preventing such electrical accidents.

Cat No: DVD 517
Price: $10.00

Make It Safer With Roof Screen
Using extensive underground footage, this 7-minute video shows how well screen keeps loose rock from falling in difficult roof conditions. Techniques for installing screen from both outside-controlled and walk-thru roof bolting machines are shown. The video also provides safe handling tips, best practices, and information about machine technology that can greatly improve material handling. An instructional booklet supplements the video with additional information. It presents compelling data from mines that have practically eliminated rock fall injuries with a roof screening program. Other sections of the booklet discuss in greater detail roof screen installation, tips for manual screen handling, a material handling system for roof screen, and use of the personal bolter screen, which can be easily handled by one person.

Self-Contained Self-Rescuers, A Comprehensive Guide to the Inspection, Care and Use of

The Mine Safety and Health Administration has developed a comprehensive interactive versatile disc (DVD) containing 5 videos outlining the “Inspection, Care and Use of Self-Contained Self-Rescuers” – included are CSE SR-100, Dräger Oxy-K and Oxy-K Plus S, OCENCO EBA 6.5, OCENCO M-20, and MSA Lifesaver 60. In addition, the DVD contains the video “Escape from a Mine Fire” which illustrates the importance of knowing the effective self-rescue and escape procedures in the event of a mine fire. An important feature of this interactive DVD is the video section regarding the suggested safe transfer process of switching from one SCSR to another SCSR during a mine emergency. As one navigates through the DVD, anyone can access additional computer based training of Self-Contained Self-Rescuers (SCSRs) Interactive Training Courses. This interactive DVD also contains Mine Health and Safety Simulation Exercises, which use real-world examples taken from actual mine incidents. You will walk step-by-step through an actual accident and see what actions you should take. This program is anonymous; your answers are not recorded or documented. As a learning exercise, you may even want to select some answers you know are wrong, just to see why the experts think that action is wrong. The goal of this interactive DVD is to help prepare you to make the best decisions to help save lives. And finally, this interactive DVD allows anyone interested in additional training to access Web sites such as MSHA, NIOSH, and equipment manufacturers related to the mining industry.

**SLAM for Life - MSHA Risk Assessment**
MSHA employees, as well as mining personnel, face many hazards at home, in the office, and at the mine site. When accidents occur, many of them fall into these categories: lifting; slips, trips, and falls; and mounting and dismounting equipment. This training DVD will help you to recognize these types of hazards.

- MSHA 2005 10 min
- Cat No: DVD 520
- Price: $10.00

**SLAM RISKS the SMART Way - Equipment Guarding**
SLAM is a tool that every miner should use before every task, during the task, and after the task, regardless of the size or complexity. Simply Stop to think about the task; take a few seconds to Look around the area and identify the hazards for each step; Analyze whether you have the proper knowledge, training, and tools; and Manage the hazards by removing or controlling them and using proper equipment. On the other hand, SMART is a tool that is used by mine management that involves miners at all levels of the process. The first key step is to develop a team or teams where the members are comprised of management and miners.

- MSHA 2006 17 min
- Cat No: DVD 567-S
- Price: $10.00
- DVD includes both English and Spanish versions – see following Spanish description.

**SLAM RISKS la manera inteligente - equipo De seguridad**
SLAM es una herramienta que todo minero debe saber antes durante y después de la actividad de acuerdo al grado de dificultad. Simplemente concéntrate en la tarea, tomarse algunos segundos para mirar al rededor del área e identificar los riesgos de cada paso; Analizar si se tiene el conocimiento, el entrenamiento y el equipo; y manejar los riesgos descartándolos y utilizando el equipo apropiadamente. Por el otro lado SMART es una herramienta que es usada por la Gerencia de minas que involucra a los mineros en todos los niveles del proceso. El primer paso clave es el de desarrollar un equipo o equipos cuyos miembros estén comprometidos desde manejudores y mineros.

- MSHA 2006 17 minutos
- Número de Catálogo: DVD 567-S
- Precio: US$ 10.00

**SLAM Risks Instructional Guide – including “SLAM Risks” the video**
This interactive DVD is intended to be used as introductory material for risk assessment training. The information in this DVD should help make you more aware of how risk assessment impacts the everyday tasks that are performed in the mining industry.
SLAM RISKS the SMART Way – Seat Belt Safety

This program was developed to assist the mining industry with identifying hazards and managing risks. In this video a company Safety Director will use this program to instruct other company personnel about the importance of wearing seat belts. Miners will be taught how to Stop, Look, Analyze, and Manage any hazards that may be associated with the task at hand while mine management will use the SMART tool to manage risks that may be encountered as part of a task.

MSHA 2007 15 min
Cat No: DVD 600-S
Price: $10.00
DVD includes both English and Spanish versions – see following Spanish description.

SLAM RISKS la manera inteligente - Cinturón de Seguridad

SLAM RISKS la Manera Inteligente es un programa que ha sido desarrollado para asistir a la industria minera mediante la identificación y el manejo de riesgos. En este video el Director de Seguridad de una compañía, usará este programa para instruir a al personal de otra compañía, sobre la importancia de utilizar sus cinturones de seguridad. A los mineros les será enseñado como detener, mirar, analizar y manejar cualquier riesgo que pueda ser asociado a las tareas de trabajo mientras que la gerencia de minas utilizará la herramienta SMART para manejar los riesgos que puedan ser encontrados como parte de una tarea.

MSHA 2007 15 minutos
Número de Catálogo: DVD 600-S
Precio: US$ 10.00

Slips, Trips, and Falls

Various types of slip/trip/fall accidents are depicted – at surface mines, plants, on dredges, and in offices. This video stresses the importance of workers thinking safety – and being alert, observant, and cautious. Special emphasis is placed on proper climbing procedures (ladders, stairways); good housekeeping (cleaning spills, removing tripping objects); and following company safety rules. Concluding message is that the best way to prevent slip, trip, and fall accidents is through effective safety training, combined with safe work practices.

Florida Dept. of Environmental Protection 1994 9 min
Cat No: DVD 518
Price: $10.00

Slope and Shaft Inspections

This video shows MSHA officials making an inspection of various slope and shaft operations. You will see that the equipment, underground environment, and mining and construction methods are quite different from a normal mining cycle; but through inspections, proper safety and health training, and everyone’s commitment to safety, accidents and injuries in the development of slopes and shafts can be reduced or eliminated. (Closed Captioned)

MSHA Rev 2008
Cat No: DVD 565
Price: $10.00

Smoking Safety (C)
[Pathway to Safety 3]

This dramatic video stresses the importance of not smoking in an underground coal mine.

Ziegler Coal Co. 2001 6 min
Cat No: DVD 581
Price: $10.00
Stay Out of the Danger Zone  (C)
This video describes several fatalities that occurred with the use of remote controlled continuous mining machines. You will also hear from a survivor of a continuous mining machine accident as he describes his injuries and stresses the importance of staying out of the danger zones of this type of mining equipment.

Stay Calm and Stay in the Cab!
In this video you’ll hear how a bulldozer operator felt while he was buried in a surge pile cavity, and how his company’s safety efforts, before and during the accident, contributed to his safe recovery.

Stay in the Cab and Keep It On!  
A Survivor’s Story
A serious equipment roll-over accident involving a small articulating front-end loader occurred at a New Jersey quarry in the fall of 2005. The survivor of this accident, who is a supervisor at this quarry, shares his story of the events that took place on the day of the accident. (Closed Captioned)

Supervising the Unimaginable
This DVD was produced by American Infrastructure and Martin Stone Quarries. Everyone tries to lead responsibly. Will you look at things differently after you’ve experienced a fatality on your watch? Hear it from three managers from different companies who have been there.

Multimedia Training Materials
Surface Conveyor Safety

Conveyor belts are the primary method of material haulage at many surface mines and may vary by size, tonnage capacity, and speed. This DVD shows that risks to workers can be reduced by following safe work practices during operation and maintenance, and by installing proper physical safeguards on the equipment. You will also hear three stories from miners who survived being caught in a conveyor.

MSHA 2008
Cat No: DVD 626
Price: $10.00

Surge Pile Survivor (C)

A near miss incident occurred on the surface at an underground coal mine. Mike Gilbert, a mobile equipment operator, tells his story about how he was rescued when his bulldozer became entrapped in a void.

MSHA 2003
Cat No: DVD 592
Price: $10.00

Survivor Stories of the Coal Mining Industry (C)

This interactive DVD is a collection of seven previously-produced videotape programs depicting survivor stories. It provides a broad look at various mining operations but may not address specific conditions or equipment at your mine, and therefore should be used as a supplement to your own mine-specific training.

- Inundation of Water and Ignition – Eyewitness Account 12 min
- Protective Canopy – A Survivor’s Story 6 min
- Reason for Change – Canopy Save – Danny Terry 13 min
- Stay Calm and Stay in the Cab 11 min

Price: $10.00

Timbering in Underground Anthracite Mines

Timbering is the most common roof support method used in underground anthracite mines. The system of timbering is governed by the character of the top and bottom, thickness of the coal vein, pitch of the coal vein, life of the entry, haulage system, and the operator’s approved roof control plan. This DVD demonstrates the fundamentals and characteristics used in installing typical timber sets: single prop, post and bar (two-piece sets), and “double timber” (three-piece sets).

MSHA 1994
Cat No: DVD 589
Price: $10.00

Survivor Stories of the Coal Mining Industry (C)

From miner’s daughter to MSHA mine inspector – Mary Lou George tells her inspiring story. She advises to watch out for others and yourself; never lose respect for the mine; and never forget about safety.

MSHA 1998
Cat No: DVD 530
Price: $10.00

“Today’s Technology Needs Tomorrow’s Heroes” (C)

Highly trained mine rescue teams have worked diligently in dangerous environments to rescue miners and to recover coal mines. These men and women have been aided by the newest technologies available to protect them and to respond rapidly to the dangers present in coal mines. As younger miners enter the workforce, mentors are encouraged to pass on the wisdom of their experiences. These young miners and mine companies are reminded that mine rescue teams benefit both the individual miner and the mining company.

MSHA 2005
Cat No: DVD 521
Price: $10.00
Traffic Control for Surface Mining Operations

All kinds and sizes of vehicles travel on mine roads. These vehicles are operated by drivers who travel these haulage roads on a daily basis, or sometimes for the very first time. This means that there is a need for good traffic control on mine haul roads. Setting up good traffic controls is an essential part of the overall planning of a mining operation. One of the most important elements in an effective traffic control plan is the use of signs.

MSHA 2010 16 min
Cat No: DVD 636-S
Price: $10.00

Control de tráfico para la operación de minas superficiales

Vehículos de todos tipos y tamaños transitan por los caminos de las minas. Estos vehículos son operados por conductores que recorren los caminos de transporte diariamente o, en ocasiones, por primera vez. Esto significa que existe la necesidad de un buen control de tráfico en los caminos de acarreo de las minas. Establecer buenos controles de tráfico es una parte esencial de la planeación general de la operación de una mina. Uno de los elementos más importantes en un plan de control de tráfico efectivo es la utilización de señalizaciones.

MSHA 2010 16 minutos

Truck Haulage Safety Series

The following seven videos were produced as a series. This entire series is now available as an interactive DVD. Included are:

- Brakes, Grades, and Runaways – Highway Trucks
- Brakes, Grades, and Runaways – Off-Road Trucks
- Highway Haulage Truck Inspection Conducted by MSHA Inspectors
- Inspection of Off-Road Haulage Trucks by an MSHA Inspector
- Pre-Operation Inspection of Highway Haulage Trucks by the Driver
- Pre-Operation Inspection of Off-Road Haulage Trucks by the Driver
- Visibility and Communications: Off-Road and Highway Trucks (C/MNM)

MSHA Rev 2008
Cat No: DVD 004
Price: $10.00

Underground Coal Mine Conveyor Belt System Inspection

This DVD tells you about the Mine Safety and Health Administration’s inspection procedures for underground coal mine conveyor belt systems. It covers pre-inspection activities, early fire warning systems (Atmospheric Monitoring System and Point-Type Heat Sensor), belt drives and head rollers, belt take-up and super take-ups, belt structure and tail piece, and fire suppression systems (Water Sprinkler, Deluge and Dry Powder Chemical).

MSHA 2009
Cat No: DVD 014
Price: $10.00
Underground Electrical Safety (C)
This AEP (American Electric Power) video discusses some of the more common types of electrical hazards that may be found in underground mines. It will benefit certified electricians as a review, and the general underground mining population will learn about basic electrical safety.

AEP 2001 19 min
Cat No: DVD 528
Price: $10.00

What Could Happen – Effective Risk Assessment and Inspecting Highwalls
*2004 Communicator Award Winner
A shift supervisor contemplates “What Could Happen” involving real life, mine site work situations. As he assigns work duties, he mentally reviews recent fatalities that have occurred in the mining industry. The supervisor returns to each work site to review safety procedures with employees.

• What Could Happen 13 min
• Inspecting Highwalls 10 min

MSHA 2004
Cat No: DVD 500
Price: $10.00

What Does the Term Silicosis Mean to You? (C/MNM)
This video is designed to raise the awareness of silicosis in the workplace and to stimulate a discussion of the disease.

MSHA 1998 13 min
Cat No: DVD 597-S
Price: $10.00

DVD includes both English and Spanish versions – see following Spanish description.

¿Qué significa para usted la palabra silicosis?
Este video fue concebido para despertar el interés por la silicosis en los lugares de trabajo y para fomentar la discusión de esta enfermedad.

MSHA 1998 13 minutos
Número de Catálogo: DVD 597-S
Precio: US$10.00

“SOMOS... MSHA”
La explotación minera es una ocupación donde nuestros mineros hacen frente a muchas condiciones de trabajo peligrosas. Esta es la razón por la cual la Administración de la Seguridad y la Salud de la Mina (MSHA) fue formada. Este video es una descripción de nuestra misión, que es ayudar a mejorar condiciones de la seguridad y de la salud del lugar de trabajo en las minas de nuestra nación con la aplicación, educación, entrenamiento y ayuda técnica.

MSHA 2004 9 minutos
Número de Catálogo: DVD 535-S
Precio: US$10.00

“We Are . . . MSHA”
Mining is an occupation where our miners face many dangerous working conditions. This is why the Mine Safety and Health Administration (MSHA) was formed. This video is an overview of our mission, which is to help improve workplace safety and health conditions in our Nation’s mines through enforcement, education and training, and technical support.

MSHA 2004 9 min
Cat No: DVD 535-S
Price: $10.00

*The Communicator Award is an international awards competition that recognizes outstanding work in the communication field.
### What You Can’t See Could Kill Someone! (C/MNM)  
**[Pathway to Safety 2]**

Blind spots around haul trucks is a major problem for mining operations. To combat this problem, MSHA asked companies to put cameras on their trucks on an experimental basis. This video contains interviews with drivers who used cameras on their trucks and the safety benefits they received.

- **MSHA 2000** 17 min
- **Cat No:** DVD 534-S
- **Price:** $10.00

DVD includes both English and Spanish versions – see following Spanish description.

### ¡Lo que no ve puede matar a alguien! [Sendero hacia la seguridad 2]

Los ángulos muertos de los camiones de transporte son el mayor problema en la minería. Para combatirlos, la MSHA pidió a ciertas compañías que pusieran cámaras en sus camiones como parte de un trabajo experimental. En este video, varios conductores hablan de los resultados positivos obtenidos gracias a las cámaras.

- **MSHA 2000** 17 minutos
- **Número de Catálogo:** DVD 534-S
- **Precio:** US$10.00

### Winter Alert (C)

This video describes the four lines of defense to guard against mine explosions. The four interrelated lines of defense are ventilation, examinations, ignition sources, and rock dusting. Proper attention to each of these areas can greatly reduce the chances of an explosion at your mine.

- **MSHA 2000** 13 min
- **Cat No:** DVD 512-S
- **Price:** $10.00

DVD includes both English and Spanish versions – see following Spanish description.

### Alerta en los meses de invierno

Este video describe las cuatro líneas de defensa que hay para protegerse de las explosiones mineras. Las cuatro líneas de defensa son la ventilación, los monitoreos, las fuentes de ignición y el polvo de roca. El dar una atención especial a esas cuatro áreas puede reducir en gran medida las probabilidades de que haya una explosión en su mina.

- **MSHA 2000** 13 minutos
- **Número de Catálogo:** DVD 512-S
- **Precio:** US$10.00

### Winter Alert: The Sonman Mine Disaster (C)

This winter alert video gives a historical review of the Sonman Mine disaster of the 1940s by recreating underground scenes that dramatize the disaster for a lasting impression.

- **MSHA 1998** 11 min
- **Cat No:** DVD 601
- **Price:** $10.00
Workplace Examinations
(Surface MNM)

Surface metal and nonmetal mines present a variety of potential safety and health hazards. Effective, thorough, workplace examinations are one way to help you to recognize and address some of these hazards before they become more dangerous. This video will describe some of these hazards and give you ideas and tips on how to look for them.

MSHA 2004 12 min
Cat No: DVD 522-S
Price: $10.00

DVD includes both English and Spanish versions – see following Spanish description.

Inspeccion De Las Areas De Trabajo De Las Minas De Metales Y No Metales

Las superficies de las minas de metales y no metales presentan una variedad de riesgos potenciales para la seguridad y la salud. A través de revisiones efectivas del lugar de trabajo son una forma de ayudarle a reconocer y ubicar algunos de estos riesgos antes de que resulten más peligrosos. Este DVD describirá algunos de estos riesgos y le darán ideas y algunos tips de como tratarlos.

Multimedia Training Materials

**Air We Breathe in Industrial Environments, The (C/MNM)**

Discusses composition and importance of air in relation to various working environments. Describes industrial health (breathing) hazards encountered. Explains need for evaluation of working conditions, for observation of safety precautions and for protection of workers from noxious gases and oxygen deficiency by using protective equipment and proper ventilation.

- BuM 1972  16 min
- Cat No: DVD 596
- Price: $10.00

**Breathe and Live: Ventilation in Metal and Nonmetal Mines**

Focuses on why mine ventilation systems are an underground miner’s personal lifeline. Shows components of mine ventilation systems (including main and booster fans, air curtains, ventilation tubes, doors and regulators). Emphasizes importance of good maintenance. Re-creates several fatal accidents caused by contaminated air, inadequate ventilation or failure to warn workers away from unventilated “dead end” zones. Stresses importance of frequent safety checks with instruments which measure quality and quantity of ventilating air (a responsibility of mine management).

- BuM 1973  21 min
- Cat No: DVD 598
- Price: $10.00

**Coal Dust: Hazards and Controls**

Explains some of the more serious dangers of coal mine dust and its effect on the health and safety of both underground and surface miners. Uses actual mining operations, live action footage, and detailed animation to show various ways coal dust is produced, consequences of long-term exposure (black lung), and how dust can be controlled in the mining environment. Shows several methods of dust sampling. Demonstrates various ventilation techniques, water sprays, and other dust suppression devices. Emphasizes use of proper face ventilation and water sprays to effectively remove, dilute, and suppress airborne dust. Examines advantages of these control devices and systems as applicable to different mining methods and situations. Recommends ongoing dust sampling and evaluation programs be in place at all mines.

- MSHA Rev 1980  14 min
- Cat No: DVD 591
- Price: $10.00
### Multimedia Training Materials

#### Electrical Hazards in Underground Coal Mining
Points out some of the more prevalent electrical hazards which may be encountered in underground coal mining. Re-creates accidents involving operating, maintaining and repairing electrical power distribution centers, switching gear, cables and other high-voltage equipment. Stresses proper training and qualifications for miners working on electrical installations, machinery and circuits. Describes proper work procedures which should be followed at all times – if electricity is to be effectively and safely utilized in underground coal mining.

- **MESA 1975** 13 min
- **Cat No:** DVD 603
- **Price:** $10.00

#### Electrical Lock-Out Procedures (C/MNM)
Accidental starting of equipment or the energizing of electrical power circuits has caused many injuries and fatalities in the mining and milling industry. Re-creates some of these accidents and points out potential hazards connected with specific jobs. Emphasizes need for immediate and thorough training in proper lock-out procedures for all personnel who work with or around electrical installations (including personnel who operate electric-powered machinery and equipment).

- **MESA 1976** 11 min
- **Cat No:** DVD 570
- **Price:** $10.00

#### Fire Fighting in the Mineral Industry (MNM)
Concerns techniques of fire fighting in noncoal mining and related industries. Shows the classifications of fires (A, B, and C). Provides instruction on proper use of various types of extinguishers. Demonstrates how to control fires by “sealing them off” with foam, asphalt, and other chemical sealants.

- **BuM 1970** 16 min
- **Cat No:** DVD 579
- **Price:** $10.00

#### Haulage Safety in Low-Coal Mines
Depicts how accidents can be prevented (or can happen) during underground transportation of personnel, coal and supplies through tunnels in low-coal mines. Contrasts safe haulage practices with accidents. Uses staged “near misses” to show consequences of carelessness.

- **BuM 1971** 15 min
- **Cat No:** DVD 604
- **Price:** $10.00

#### Hazard Recognition and Avoidance in Surface Coal Mining
Miners who are inexperienced and unfamiliar with the working environment, equipment, and mining procedures are often exposed to potential safety hazards for which they are largely unprepared. Describes some of the more common dangers encountered (including failure of highwalls and spoil banks, slips and falls, drilling and blasting and not wearing or using proper safety clothing or equipment). Addresses machinery/vehicle, mechanical/electrical, welding/cutting and other maintenance/repair hazards. Gives examples of danger signs and warnings which usually precede a hazard. Outlines safety precautions needed to avoid the hazard. Emphasizes miners must learn how to recognize and avoid unsafe conditions and situations by staying alert, obeying company safety rules, and following safe working practices at all times.

- **MSHA 1980** 9 min
- **Cat No:** DVD 583
- **Price:** $10.00
Hazard Recognition and Avoidance in Underground Coal Mines

Underground coal mining is an inherently hazardous occupation, but one which can be made relatively safe if miners learn to recognize and avoid the associated hazards. Identifies some of the more common dangers (including unsafe acts and conditions) miners may encounter while carrying out their everyday work assignments. Demonstrates safe work practices and procedures needed to avoid such problems and pitfalls. Urges miners to stay alert, work safely, and report unsafe conditions they cannot correct.

MSHA 1981  11 min
Cat No: DVD 606
Price: $10.00

Illumination in Underground Coal Mines

Traces development of underground mine illumination from the earliest days of candles and carbide lamps to today’s more efficient and safer electric lighting equipment. Demonstrates adequate lighting which helps miners better see equipment, other workers and roof and rib conditions (and to perform their jobs more safely). Shows various types of permissible lighting (being tested and used in both underground working places and surface laboratories). Explains light-measuring techniques and methods of evaluating lighting systems. Informs viewers of requirements of Federal illumination regulations and how these apply to specific mining situations.

MSHA 1980  15 min
Cat No: DVD 611
Price: $10.00

Magic of Fire, The (C/MNM)

Deals with fire, its composition, uses and control. Tabletop displays and laboratory demonstrations illustrate how fires and explosions occur. Describes the safe use and control of commonly used gases and flammable liquids. Shows various industrial fires (and fire hazards in the home) and gives instructions on fire prevention.

BuM 1965  23 min
Cat No: DVD 610
Price: $10.00

Man and His Habits (MNM)

Depicts how careless habits may endanger safety at home and on the job. Shows workers how to acquire safe work habits by practicing safety everywhere.

BuM 1969  13 min
Cat No: DVD 586
Price: $10.00

Management’s Role in Health and Safety (C)

Presents a well-planned and well-executed mine health and safety program in action. Uses scenes at both underground and surface facilities. Outlines a safety program (in detail) and its application to on-the-job safety situations and related mining operations. Defines management’s responsibility for the health and safety of miners. Points out various environmental health problems and safety hazards. Offers possible solutions (with emphasis on effective safety training).

BuM 1972  15 min
Cat No: DVD 574
Price: $10.00
Oh! My Aching Back (C/MNM)
Back injuries from lifting objects that are too heavy and/or from using incorrect lifting techniques are a common occurrence in many industries. Shows workers the correct method of lifting (including good posture, positioning and smooth application of lifting power). Uses flexible training models (which simulate the human backbone, muscles and ligaments) to illustrate how strains occur and how discs are “pinched.” Utilizes live-action scenes in underground mines and industrial plants to emphasize the need for proper lifting and handling of working tools and materials.

BuM 1965 21 min
Cat No: DVD 584
Price: $10.00

Orientation and Indoctrination of Safe Workmen (MNM)
Follows a group of new employees through pre-employment testing, hiring and actual working situations. The industry is a gypsum products manufacturing plant, but the orientation and indoctrination policies and procedures may easily be applied to other mining or manufacturing organizations. Takes viewers on a tour of the plant and follows new employees through interviews, physical examinations, classroom instruction, and on-the-job training sessions. Stress safety as an integral part of production. Highlights the value of accident prevention training for all employees.

BuM 1966 27 min
Cat No: DVD 560
Price: $10.00

Open-Pit Mining Hazards (MNM)
Moving machinery and moving earth supply the basic ingredients for a variety of possible hazards in mining ore from open pits. Uses staged accidents (involving dump trucks, power shovels, front-end loaders, rail haulage and highwall blasting) to show what happens as the result of workers’ carelessness, overlooked safety precautions, and/or unsafe machinery and mining methods. Explains why the accidents happened and stresses the correct and safe way to perform various mining jobs to prevent future accidents.

BuM 1967 17 min
Cat No: DVD 559
Price: $10.00

Roof Bolting in Coal Mines
Stresses the importance of roof bolting to the coal mining industry. Explains principles and purposes of roof bolting. Uses working models, laboratory demonstrations, actual underground applications, and tests. Shows how mining operations and bolting methods are coordinated and emphasizes safety throughout the roof control process.

BuM 1973 19 min
Cat No: DVD 617
Price: $10.00

Safety Consciousness (MNM)
Demonstrates how various people at work and play develop safe behavior in their daily activities.

BuM 1969 10 min
Cat No: DVD 562
Price: $10.00
Multimedia Training Materials

Safety on the Move: 
Truck Haulage Safety (C/MNM)
The camera conveys atmosphere and movement around an open pit mining operation. Shows huge haulage trucks in action. Depicts how truck operators encounter difficult, dangerous, and emergency driving situations while performing assigned duties. Points out existing and potential hazards of truck haulage by reenactment of some of the most frequently-occurring accidents. Explains causes of these accidents and outlines corrective steps necessary to prevent their recurrence. Stresses on-the-job safety training and a truck driver’s personal safety responsibility throughout.

MSHA Rev 1995 13 min
Cat No: DVD 545
Price: $10.00

Safety Practices in Low-Coal Mining
Uses live-action underground photography to show special hazards workers must guard against in thin-seam mines. Illustrates how restricted work space, curtailed field of vision, and cramped body position can intensify danger when working with fast-moving, high-powered machines. Emphasizes teamwork, alertness, and “know-how.”

BuM 1971 15 min
Cat No: DVD 613
Price: $10.00

Slope Stability of Waste Dams and Embankments (C/MNM)
The disposal of mining waste and refuse is an ever increasing problem. Maintaining the stability and safety of waste storage facilities is part of that problem. Points out importance of properly designed and constructed waste dams and embankments to show the destructive aftermath of coal wastebank failures and landslides. Combines animation sequences with ground-level and aerial photography to explain various types of slope failures, describe inherent and potential hazards, and outline a constructive program of inspection, detection and correction. Demonstrates on-site monitoring methods (some methods using off-site computer analyses).

MSHA 1979 28 min
Cat No: DVD 602
Price: $10.00

Supervisor’s Responsibilities in Roof Control (C)
Helps front line underground coal mine supervisors understand what their duties are to the miners, as well as to management, concerning safety in the working place.

MSHA 1988 11 min
Cat No: DVD 609
Price: $10.00

Supervisory Training Series (MNM)
Series is designed to motivate metal mine supervisory personnel to stress safety in all facets of the mining process.
The two videotapes may be shown independently or as a series (in the following sequence).

- Man and His Habits (MNM)
  Depicts how careless habits may endanger safety at home and on the job. Shows workers how to acquire safe work habits by practicing safety everywhere.
  BuM 1969 13 min
  Cat No: DVD 586
  Price: $10.00

- Safety Consciousness (MNM)
  Demonstrates how various people at work and play develop safe behavior in their daily activities.
  BuM 1969 10 min
  Cat No: DVD 562
  Price: $10.00

54
Multimedia Training Materials

**Transportation and Communication in Underground Coal Mines**

Emphasizes importance of being able to recognize and avoid potential safety hazards in underground mine transportation. Reenacts different accidents involving the transporting of workers and materials. Describes various underground mine communication systems. Uses on-the-job scenes to explain the purpose of communication systems in overall mining operations. Conveys the underlying safety lesson that both transportation and communication are essential to all underground mining operations. Stresses that the health and safety of mine workers is often dependent upon the safe and proper use of these systems.

- MSHA 1981 9 min
- Cat No: DVD 605
- Price: $10.00

**Underground Coal Mine Blasting**

Begins with the safe storage of permissible explosives, detonators and blasting devices in surface and underground facilities. Progresses through the transportation and handling stages (and up to the actual blasting of the coal face itself). Shows and explains how the shot firer safely performs the complete blasting operation (preparing the primers, loading the shotholes, stemming, wiring and firing the round). Demonstrates the compressed air method of blasting coal. Illustrates (through animation) what takes place inside the shothole when an Airdox shell is “fired.” Stresses safe work practices throughout.

- MESA 1975 19 min
- Cat No: DVD 612
- Price: $10.00

**Why Roof Control Plans (C)**

Roof and rib falls are still the most dangerous hazard an underground coal miner faces. The premise of this film is that the hazard can be prevented or reduced by following an approved roof control plan. Explains basic plans, gives examples, and describes plan implementation. Demonstrates important items included in the plan (such as types of support, areas covered, and rock strata diagrams) under actual mining conditions. Shows mining equipment and materials, bolting machines, roof bolts and timbers in use. Urges miners to become familiar with their mine’s roof control plan.

- MSHA 1981 16 min
- Cat No: DVD 608
- Price: $10.00
Training Materials

This section is an alphabetical listing of the available printed programs. These programs fall into several different categories. The following is a list of the various categories used in this section, along with the letter code used. New products are highlighted in red.

Training Materials

Abandoned and Active Mines, Dangers Around (C/MNM)
This booklet highlights the dangers in and around abandoned and active mine sites. It can also be used by children as a coloring book.

MSHA Rev 2003  31 pp
Cat No:  OT 7
Price:  Free of charge (1 copy)
$3.00 (each additional copy)

Accident Analysis and Problem Identification for Coal Mines
Introduction to Accident Analysis and Problem Identification (AAPI), a method for examining and correcting accident problems in coal mines.

Books
- Instructor’s Guide  81 pp
- Student’s Text  79 pp

MSHA Rev 2002
Cat No:  IG 67 (Instructor’s Guide)
IG 67a (Student Text)
Price:  Free of charge (1 book/guide)
$4.00 (each additional copy)

Accident Analysis and Problem Identification for Metal/Nonmetal Mines
Introduction to Accident Analysis and Problem Identification (AAPI), a method for examining and correcting accident problems in metal/nonmetal mines.

Books
- Instructor’s Guide  81 pp
- Student’s Text  79 pp

MSHA Rev 2002
Cat No:  IG 68 (Instructor’s Guide)
IG 68a (Student’s Text)
Price:  Free of charge (1 book/guide)
$4.00 (each additional copy)

Accident Investigation (C/MNM)
Regulations specify that certain accidents must be investigated. This manual deals with the technical aspects of accident investigations. It includes: Accident Prevention, Investigative Procedures, Equipment and Supplies, Fact Finding, Interviews, Problem Solving Techniques, and Report of Investigation.

Note to Trainer: Although written for mine accidents, principles described may be applied in other industries.

MSHA Rev 2002  38 pp
Cat No:  SM 10
Price:  Free of charge (1 copy)
$2.00 (each additional copy)

Accident Prevention (C/MNM)
Defines and describes accidents and causes of accidents. Explains what is involved in effective accident prevention programs in mining. Includes a study of accident causes at all levels and the means of dealing with those causes.

MSHA Rev 2003  28 pp
Cat No:  SM 4
Price:  Free of charge (1 copy)
$2.00 (each additional copy)

**Training Materials**

**Alcohol and Other Drug Abuse Recognition in the Mining Industry (C/MNM)**

A course of study that includes lessons on common types of drugs and their effects on the worker, alcohol as a commonly abused substance, how to recognize the symptoms of substance abuse, and how to get assistance for abuse problems. Can be tailored to include the company’s Employee Assistance Program if available. Includes tests and answer sheets.

**Books**

- Instructor’s Guide: 26 pp
- Student’s Text: 15 pp

MSHA Rev 2007

Cat No: IG 80 (Instructor’s Guide)
IG 80a (Student’s Text)

Price: Free of charge (one book)
$3.00 (Instructor’s Guide)
$3.00 (Student’s Text)

**Analysis of Underground Powered Haulage Lost Time Accidents, January 1990 — December 1999 (C/MNM)**

This publication addresses underground powered haulage lost time accidents that occurred January 1990 through December 1999 involving shuttle cars, scoops, track-mounted equipment, mobile haulage equipment, and conveyor belts. Although mining methods and equipment vary greatly in coal and metal/nonmetal mining, the similarities of haulage equipment and the methods of operation are similar; therefore, the study includes both coal and metal/nonmetal powered haulage accidents. This report identifies the major factors that led to these accidents, and recommends accident prevention methods to reduce the frequency of these accidents.

MSHA Rev 2007

Cat No: OT 43

Price: Free of charge

**Anthracite Mining Workbook**

This workbook, in the programmed instruction format, discusses the various aspects of anthracite mining: the anthracite coal fields of Pennsylvania; mine development; the four methods of mining (full-box breast, open breast, slant breast, and longhole methods); ventilation; and roof and rib control.

MSHA Rev 1999 59 pp

Cat No: PI 13

Price: Free of charge (1 book)
$4.00 (each additional copy)

**Atmospheric Monitoring Systems Operator’s Training Guide**

This training guide is intended to assist mine operators in developing a program for task and annual training for Atmospheric Monitoring Systems (AMS) operators. The guide is divided into eight sections which correspond with the training subjects as prescribed in 30 CFR 75.351(q). Since a significant portion of the knowledge necessary for an AMS operator is mine specific, the materials in this guide must be tailored with the mine’s existing training plan to create an effective program of site-specific instruction for AMS operators.

MSHA Rev 2008 31 pp

Cat No: IG 111

Price: Free of charge (1 book)
$3.00 (each additional copy)

**Audiometric Testing Reference Guide for MSHA’s Occupational Noise Exposure Standard**

This audiometric testing guide provides mine operators with examples of validated scientific methods and/or equipment specifications for testing the hearing sensitivity of miners.

MSHA Rev 2002 16 pp

Cat No: IG 57

Price: Free of charge (1 copy)
$2.00 (each additional copy)
Training Materials

**Back Injuries in the Mining Industry**
Deals with back injuries in the coal and metal/nonmetal mining industry. It addresses back injury statistics, anatomy and common back problems, the causes and corrective actions for back injury prevention, and recommendations for developing a program for the prevention of back injuries.

- **MSHA Rev 2000**   26 pp
- **Cat No:** SM 24
- **Price:** Free of charge (1 copy) $2.00 (each additional copy)

**Bins and Hoppers Safety Awareness Program (C/MNM)**
Designed for trainers of coal and metal/nonmetal mine personnel. Covers the safe handling of materials around bins and hoppers, working safely around bins and hoppers, the prevention of entrapment, and rescue in the event of an entrapment. The program contains eight sections:

1. Bins and Hoppers Related Law
2. Entrapment of Miners
3. Development of Safe Work Methods Around Bins and Hoppers
4. General Bins and Hoppers Safety/Technical Information
5. Abstracts of Bin and Hopper Accidents
6. Bins and Hoppers Safety Awareness Factors to Utilize in a Training Session
7. Key Safety Awareness Points to Remember When Involved with Bins and Hoppers
8. Illustrations and Abstracts of Bin and Hopper Fatalities

- **MSHA Rev 2003**   50 pp
- **Cat No:** IG 66
- **Price:** Free of charge (1 book) $4.00 (each additional copy)

**Blaster’s Training Program for Independent Contractors (C/MNM)**
Designed to train independent contractors in the safe use and application of explosives. The training package includes: Leader’s Guide, Knowledge Checklist for Supervisors, Knowledge Checklist for Trainees, an OJT Checklist, and a Student Workbook. The DVD covers the following topics: Safety in Blasting, Buckle Up on the Job, Ground Control in Surface Mining (Coal), Surface Blasting in Metal and Nonmetal Mines, Quarry Safety, Safety in Surface Coal Mining, and Hazard Recognition and Avoidance in Surface Coal Mining. The book should be used along with the DVD, since sections of the book are referenced in the DVD.

- **MSHA Rev 1997**   194 pp
- **Cat No:** IG 81
- **DVD 543**
- **Price:** Free of charge (1 book) $5.00 (each additional copy) $10.00 (DVD)

**Blasting Hazard Awareness: Surface and Underground Coal Mines**
These two programs cover blasting hazard recognition and avoidance in and around underground and surface coal mines.

Please specify program(s) wanted when ordering.

- **MSHA Rev 1996**
- **Cat No:** IG 71 (Surface)   108 pp
  IG 72 (Underground)   112 pp
- **Price:** Free of charge (1 book) $5.00 (each additional copy)

**Blasting Hazard Awareness: Surface Metal and Nonmetal**
Covers blasting hazard recognition and avoidance in and around surface metal and nonmetal mines.

- **MSHA Rev 1996**   100 pp
- **Cat No:** IG 73
- **Price:** Free of Charge (1 book) $4.00 (each additional copy)
## Training Materials

### Blasting Hazard Awareness: Underground Metal and Nonmetal
Covers blasting hazard recognition and avoidance in and around underground metal and nonmetal mines.

- **MSHA Rev 1996** 139 pp
- **Cat No:** IG 74
- **Price:** Free of Charge (1 book) $5.00 (each additional copy)

### Blasting Requirements — Surface Coal
This training package of lesson plans, handouts, visuals, and student text is designed to train entry level coal mine inspectors and supervisors. It covers the characteristics, transportation, and handling and use of explosives. Course content emphasizes hazard recognition and safe work practices, and is keyed to MSHA regulations.

- **Books**
  - Instructor’s Guide 395 pp
  - Student’s Text 25 pp
  - **MSHA 1994**
- **Cat No:** CI 21 (Instructor’s Guide) CI 21a (Student’s Text)
- **Price:** $7.00 (Instructor’s Guide) $2.00 (Student’s Text)

### Carpal Tunnel Syndrome
Discusses the symptoms, causes, and treatment of carpal tunnel syndrome (CTS). Many industries claim that the incidence of carpal tunnel syndrome is increasing and is one of their most disabling and costly medical problems.

- **MSHA Rev 2003** 46 pp
- **Cat No:** SM 23
- **Price:** Free of charge (1 copy) $2.00 (each additional copy)

### Bloodborne Pathogens: A Guide for the Mining Industry
This guide contains information about the risk of occupational exposure to bloodborne pathogens and how mine operators can reduce this risk.

- **MSHA 2000** 24 pp
- **Cat No:** IG 44
- **Price:** Free of charge (1 copy) $2.00 (each additional copy)

### Coaching Skills for On-the-Job Trainers
The goal of this program is to help users to develop or manage an on-the-job training program so that information is passed on from the trainer/coach to trainee efficiently and effectively. By efficient is meant the best use of time and resources of all involved in the training process. Effective means that the trainee truly learns the skills and internalizes the knowledge needed to perform the job well.

The first part of this package discusses topics to think about when developing formal on-the-job training programs. A structure based on coaching is suggested. Then a workshop designed to prepare trainers to be coaches is described. Workshop materials include an instructor’s guide and trainee’s workbook. These materials can be used to train coaches and assist trainees as they go through the learning process. Content related to specific jobs can be added to these materials to create targeted on-the-job training materials.

- **NIOSH 2005** 270 pp
- **Cat No:** IG 94
- **Price:** Free of charge (1 book) $6.00 (each additional copy)
Coal Mining
Gives an overview of coal mining. It begins with the origin and nature of coal, progresses through underground and surface mining methods, training, and mine hazards, and ends with the uses of coal. Includes a glossary of common mining terms.

MSHA Rev 2002 29 pp
Cat No: SM 1
Price: Free of charge (1 book)
$2.00 (each additional copy)

Code of Federal Regulations, Title 30, via Computer Linkup
The mining community can gain quick access to current regulations, program information bulletins, policy memos, and other data on MSHA’s home page at www.msha.gov. Copies may be purchased from:

Superintendent of Documents
Government Printing Office
Washington, DC 20402

Coal Preparation
This instructor guide is one of a series of six books covering mining systems. It introduces the major steps in preparing coal. This guide covers preparation plant systems, delivery to the plant, crushing and breaking, sizing, washing, dewatering and drying, and storage and transportation of coal.

MSHA 2000 47 pp
Cat No: IG 54
Price: $3.00
Also available in Spanish (IG 54-S). See following description.

Preparación del carbón
Esta guía del instructor es uno de una serie de seis libros que cubre los sistemas mineros. Éste introduce los pasos mayores preparando carbón. Esta guía cubre sistemas de preparación en la planta, la entrega a la planta, aplastando y rompiendo, clasificando según tamaño, lavando, escurriendo y secando, y el almacenamiento y transporte del carbón.

Compliance Guide to MSHA’s Occupational Noise Exposure Standard
MSHA’s revised noise standard became effective on September 13, 2000. This compliance guide is in a question and answer format, and provides information to assist the mining industry in complying with the revised noise standard.

MSHA Rev 2006 24 pp
Cat No: IG 33
Price: Free of charge (1 book)
$2.00 (each additional copy)

Conveyor Belt Safety
This multimedia program reviews conveyor belt safety. Subjects reviewed include: Fatalities With Conveyors; Analysis of Conveyor Accidents; Occupations; Conveyor Guarding (video); Safety Tips; and Best Practices: Conveyor Belts.

MSHA 2008 1 CD
Cat No: IG 108-CD
Price: $10.00
Training Materials

Coping with Substance Abuse in Mining
Deals with substance abuse in the mining industry, which is a reflection of the experience of American industry in general. The manual puts forth a five-part strategy for controlling substance abuse at the workplace; establishment of a written substance abuse policy; supervisory training; employee education and awareness; an employee assistance program; and drug testing, as appropriate.

MSHA Rev 2002  33 pp
Cat No:   SM 25
Price:   Free of charge (1 book)  $2.00 (each additional copy)

Degraded Image Hazard Recognition (C)
The goal of this program is to improve the ability of miners to recognize hazards in their dangerous work environment, and thereby, to reduce accidents. The program is based on research conducted by the U.S. Bureau of Mines (now NIOSH) in conjunction with the Illinois Department of Natural Resources and Illinois Eastern Community College. A study has found that miners trained with this method have shown a greater improvement in their hazard recognition skill level as compared to traditional methods.

NIOSH 1997  8 pp
Cat No:   IG 1
Price:   $20.00 (includes 1 book, 1 CD, and 1 DVD)

Diesel Inspection of Underground Coal Mine Equipment – Wagner Model LST-5S Scoop
This computer CD contains visuals and discussion to assist students in the understanding and application of equipment safety requirements for the Wagner model LST-5S scoop. The program focuses on inspection of the machine for diesel permissibility compliance. It is primarily designed for trainers, maintenance personnel, and industry safety inspectors, and may also be beneficial for others who work in an underground coal mine where this type of equipment is used. The presentation may take from one to four hours depending on classroom discussion and inclusion of regulatory and other reference materials. The same presentation is available on MSHA’s home page (www.msha.gov); however, the CD includes additional formats for those who wish to present the material full-screen with a computer projection system, without being connected to the internet, and/or wish to tailor the material to their operations. A color booklet is also available containing the same material in an easy-to-read format.

MSHA 2001  1 CD

Price:   $10.00 (1 booklet and CD, which includes booklet and PowerPoint slides)  Free of charge (1 booklet only)  $3.00 (each additional copy of booklet)
Dump Point Inspection Handbook (C/MNM)

Dumping material from trucks is a common practice in the mining industry. No matter what type of dump point is involved, a waste pile, an overburden dump, a stockpile, or a hopper, accidents can occur if certain precautions are not taken. The intent of this handbook is to provide MSHA inspection staff with the information needed to understand the hazards at dump points, and to better recognize potentially unsafe dump point conditions and practices. In addition, the handbook can assist inspectors in sharing information on dump-point safety with miners and mine operators.

Cat No: IG 32
Price: Free of charge (1 book)
$2.00 (each additional copy)

Harry’s Hard Choices: Mine Refuge Chamber Training (C)

This paper and pencil simulation is an interactive story that presents a scenario in which a section foreman on a longwall setup section must decide what to do when he learns there is a fire in his mine. The story is taken in part from real-life incidents. The training guide is intended for miners in annual refresher classes, trainers, responsible persons, command center personnel, original equipment manufacturers, and researchers. After completing the problem booklet, participants will compare answers provided in the answer key and discuss story and answers with the instructor.

Haul Road Inspection Manual

The design and maintenance of haul roads play an important role in surface haulage safety. This handbook provides guidance for conducting a safety inspection of a mine’s haul roads and includes summaries of MSHA’s standards that apply to haul roads.

MSHA Rev 2000 58 pp
Cat No: IG 58
Price: Free of charge (1 book)
$4.00 (each additional copy)

This publication highlights haulage fatalities that occurred at surface coal operations from January 2003 through December 2004. The fatalities in this report involve equipment such as: haul trucks, front-end loaders, boom trucks, concrete trucks, scrapers, pickup trucks, and automobiles.

MSHA Rev 2005 11 pp
Cat No: OT 5
Price: Free of charge (1 book)
$2.00 (each additional copy)

Haulage Fatalities – Surface Metal and Nonmetal (2004-2005)

This publication highlights haulage fatalities that occurred at surface metal and nonmetal operations from January 2004 through December 2005. The fatalities in this report involve equipment such as: haulage trucks, front-end loaders, scrapers, water trucks, forklifts, and pickup trucks.

MSHA 2006 24 pp
Cat No: OT 6
Price: Free of charge (1 book)
$2.00 (each additional copy)
This publication highlights haulage fatalities that occurred at underground coal operations from January 2004 through December 2005. The fatalities included in this report involve all fatalities classified by the Mine Safety and Health Administration as “haulage/powered haulage.” These statistics do not include haulage fatalities at surface areas of underground operations.

Hidden Hazards – Pipeline Safety in the Mining Industry (C/MNM)

This CD deals with the hidden hazards associated with buried pipelines on mining property. According to the U.S. Office of Pipeline Safety, more than two-thirds of all pipeline accidents occur due to accidental contact from heavy equipment. The CD includes a PowerPoint presentation – consisting of 51 slides – which can be conducted in approximately 30 to 40 minutes; a handout of key facts to be provided to class participants; and an instructor’s guide. (The key facts and instructor’s guide may be printed from the CD.) The Hidden Hazards package is an excellent tool to be utilized as a one-hour scheduled block for surface annual retraining, surface new miner training, supervisor training, safety meetings, or as a supplement to individual task training. The program can also be utilized for mining industry contractor training.

Martin Consulting 2002  19 min
Cat No:  IG 85-CD
Price:  $10.00

Hoisting (C/MNM)

Covers various types of hoists, wire ropes, rope end attachments, hoisting system components, brakemen cars, portal shaft elevators, recordkeeping, appendices and coal and metal/nonmetal mandatory safety standards related to hoisting. Handouts, lesson plans, visuals, and tests and evaluations are included which will assist in instructing hoisting training.

MSHA Rev 2002
Cat No:  CI 16  Coal  424 pp
CI 17  MNM  428 pp

Material Handling Safety at Surface Mines, Mills, and Plants (C/MNM)

This computer CD contains visuals and discussion on safety in manual and mechanical material handling and storage. Trainers, safety personnel, supervisors, or others can use the CD to conduct classes for mine workers. Anyone can also use it for self-study. The same information is available on MSHA’s Web site (www.msha.gov); however, the CD includes additional formats for those who wish to do full-screen presentations with a computer projection system and/or wish to tailor the material to their operations. An internet connection is required for use of the linked information on the CD. The CD includes:

Microsoft PowerPoint® Version – Contains 132 slides with speaker notes. (Works best with PowerPoint® 2002 or later.)
Booklet/Script – A Microsoft Word® file for printing easy-to-read copies of the material for self-study, pre-class review of course material, in-class instructor use, course handouts, or reference. (Works best with Word® 2002 or later.)

HTML Version – Interactive self-paced course as it appears on MSHA’s Web site. (Requires browser software.)

Mine Escapeways (C/MNM)

An introduction to mine escapeways and evacuation. Stresses the importance of having clear escapeways in case of an emergency.

MSHA Rev 1997 24 pp
Cat No: SM 11
Price: Free of charge (1 book)
$2.00 (each additional copy)
Mine Gases (C/MNM)
A complete reference on the sources and properties of mine gases (including explosive and toxic effects). Discusses means of detection, identification, analysis and legal requirements for each gas found in mine air. Also includes mine gas control methods.

MSHA Rev 2007 42 pp
Cat No: SM 2
Price: Free of charge (1 book)
$2.00 (each additional copy)

Mine Illumination (C)
Describes the eye and how it works; how low and high lighting levels affect vision. Includes brief history of types of lighting used in mines from ancient times. Explains MSHA standards and policies that require illumination in mines (underground and surface); how to meet these requirements; how light levels are measured; and where to get assistance.

MSHA Rev 2003 81 pp
Cat No: IG 53
Price: Free of charge (1 book)
$4.00 (each additional copy)

Mine Maps — Underground (C)
This course is designed to train Federal coal mine inspectors to read and interpret underground coal mine maps. Included are the regulations with examples of their usage, and suggested mine map symbols.

Miners’ Health Pack, The
The Miners’ Health Pack is a manual on health hazards in mining. It reflects MSHA’s determination to protect miners from exposure to such well-known health hazards as silica, carbon monoxide, and noise, as well as injuries resulting from repetitive work occurring in cramped places and awkward positions.

Through the Health Pack, which is really a series of fact sheets and resources, MSHA hopes to make basic scientific, medical, and control technology information about health hazards in mining understandable to miners and mine operators so that they can take action to reduce exposures and protect miners. The materials are packaged in a binder so that new training materials on hazards such as lead, mercury, or diesel exhaust can be added as they are developed by MSHA to create a comprehensive manual on health hazards.

### Miners’ Rights and Responsibilities

**Under the Federal Mine Safety and Health Act of 1977, Guide to (C/MNM)**

Summarizes rights and responsibilities of miners, their representatives, and applicants for mine work under the Federal Mine Safety and Health Act of 1977. Intended as a guide only and not as an “official” statement of the law or as a source for legal interpretations of the Act.

- **MSHA Rev 2010** 45 pp
- **Cat No:** OT 2
  - OT 2a - Pocket Card
  - OT 2b - Wallet Card
- **Price:** Free of charge

### Mining Disasters

This publication includes photographs and newspaper clippings of some of the nation’s worst mining disasters. The publication also includes a listing of Historic Coal Mine Disasters in the United States from 1839-2003 and a listing of Historic Metal/Nonmetal Disasters in the United States from 1869-2003.

- **MSHA Rev 2003** 66 pp
- **Cat No:** OT 32
- **Price:** Free of charge (1 book)
  - $4.00 (each additional copy)

### MSA W-65 Self-Rescuer

Instructs underground workers and visitors in the proper use of this self-rescuer. Provides students with working knowledge of the device and the ability to use the self-rescuer in an emergency. The 8 basic steps are pictured on PowerPoint slides as well as a pocket card. A CD on which a PowerPoint presentation (with a “reader” so the user can view the presentation without the need of the PowerPoint program) of the entire manual is also available.

- **MSHA Rev 2009** 15 pp
- **Cat No:** IG 2-CD
  - IG 2 (book)
- **Cards:** 100 cards per pack
- **Price:** Free of charge (1 book, 1 card)
  - $2.00 (each additional book)
  - $10.00 (1 book, 1 CD)
  - $5.00 (per pack of cards)

### Mining Moments (C)

This publication accompanies DVD 622 - Mining Moments. It contains suggested discussion points that the trainer may follow after viewing each of the vignettes on the DVD. See Multimedia Training Materials section for Mining Moments DVD 622.

On-The-Job Training Modules — Anthracite and Bituminous Coal Preparation Plants and Shops

Sixteen-part program developed cooperatively by MSHA and members of the anthracite and bituminous coal mining industry. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Topics include:

1. Plant Operation
2. Plant Maintenance and Repair
3. Maintaining Conveyor Systems
4. Welding and Cutting
5. Electrical Procedures for Non-Electricians
6. Thermal Dryer Operation
7. Railcar Handling
8. Barge Haulage/Dredge Operations
9. Barge Loading Facilities
10. Front-End Loader Operation
11. Truck Haulage
12. Bulldozer Operation
13. Mobile Crane Operation
14. Ladders and Scaffolds
15. Manual Handling of Materials
16. Prevention of Slips and Falls

Addendum - Questions for Discussion

MSHA Rev 2008  226 pp
Cat No: IG 49
Price: Free of charge (1 book)
$6.00 (each additional copy)

On-The-Job Training Modules — Cement

Developed cooperatively by MSHA and members of the cement industry. A fifteen-module program:

1. General Plant Cleanup
2. Cleaning Belt Conveyors
3. Unplugging Clinker Breaker
4. Shooting Kiln Gun
5. Unplugging Preheater
6. Restarting After a Plantwide Power Failure
7. Manual Handling of Materials
8. Operating and Handling Railroad Equipment
9. Splicing Conveyor Belts
10. Using an Overhead Hoist to Lift or Handle Parts or Material
11. Replacing the Drive Chain or Belt on a Screw Conveyor
12. Handling Materials with Shop Overhead Crane
13. Welding and Cutting
14. Equipment Lockout Procedures
15. Electrical Procedures for Non-Electricians

Each module contains a brief job description and a generic job safety analysis (JSA) of a job common to cement operations.

MSHA Rev 2002  113 pp
Cat No: IG 42
Price: Free of charge (1 book)
$5.00 (each additional copy)
Training Materials

**On-The-Job Training Modules — Metal and Nonmetal Dredges**
Developed cooperatively by MSHA and members of the dredging industry. A five-module program:

1. Dredge Operations
2. Barge Haulage
3. Replacing Major Components of a Cutter-head Dredge
4. Equipment Lockout Procedures
5. Manual Handling of Materials

Each module contains a brief job description and a generic job safety analysis (JSA) of a job common to dredging operations.

- MSHA Rev 2005 74 pp
- Cat No: IG 41
- Price: Free of charge (1 book)
- $4.00 (each additional copy)

**On-The-Job Training Modules — Sand, Gravel, and Crushed Stone**
Developed cooperatively by MSHA and members of the sand, gravel and crushed stone industries. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Consists of nineteen modules:

1. Starting the Plant
2. Plant Clean-Up
3. Plant Shutdown
4. Plant Operation
5. Maintaining Conveyor Systems
6. Plant Repair
7. Welding and Cutting
8. Equipment Lockout Procedures
9. Electrical Procedures for Non-Electricians
10. Truck Haulage
11. Ground Control
12. Inspecting and Replacing Cables (Wire Ropes)
13. Replacing the Drive Chain or Belt on a Screw Conveyor
14. Manual Handling of Materials
15. Using an Overhead Hoist to Lift or Handle Parts or Material
16. Handling Material with Shop Overhead Traveling Crane
17. Primary Crushing Operation
18. Operating Drilling Equipment
19. Transportation, Use, and Storage of Explosives

Each module contains both a description and a generic job safety analysis (JSA) of a job common to sand, gravel and crushed stone operations.

- MSHA Rev 2009 204 pp
- Cat No: IG 40
- Price: Free of charge (1 book)
- $6.00 (each additional copy)

**On-The-Job Training — Structuring Effective Programs (C/MNM)**
How to design, conduct, and evaluate structured OJT training programs. Intended as a guide for supervisory personnel involved in OJT.

- MSHA 1983 89 pp
- Cat No: IG 12
- Price: Free of charge (1 book)
- $4.00 (each additional copy)
On-The-Job Training Modules — Surface Anthracite

Fifteen-part program developed cooperatively by MSHA and members of the anthracite mining industry. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Topics include:

1. Front-End Loader Operation
2. Dozer Operation
3. Hauler Operation
4. Pan Scraper Operation
5. Backhoe and Hydraulic Excavator Operation
6. Power Shovel Operation
7. Dragline Operation
8. Drill Operation
9. Storage, Transportation, and Use of Explosives
10. Field Maintenance of Surface Equipment
11. Welding and Cutting
12. Inspecting and Replacing Wire Ropes (Cables)
13. Ground Control
14. Manual Handling of Materials
15. Prevention of Slip and Fall Accidents

Addendum - Questions for Discussion

Each module contains an introduction and a generic job safety analysis (JSA) of a job common to surface anthracite operations.

MSHA Rev 1999 210 pp
Cat No: IG 51
Price: Free of charge (1 book)
$6.00 (each additional copy)

On-The-Job Training Modules — Surface Coal

Fifteen-part program developed cooperatively by MSHA and members of the surface coal mining industry. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Topics include:

1. Front-End Loader Operation
2. Bulldozer Operation
3. Truck Haulage
4. Pan Scraper Operation
5. Backhoe and Hydraulic Excavator Operation
6. Power Shovel Operation
7. Dragline Operation
8. Drill Operation
9. Storage, Transportation and Use of Explosives
10. Field Maintenance of Surface Equipment
11. Welding and Cutting
12. Inspecting and Replacing Wire Ropes (Cables)
13. Ground Control
14. Manual Handling of Materials
15. Prevention of Slip and Fall Accidents

Addendum - Questions for Discussion

Each module contains an introduction and a generic job safety analysis (JSA) of a job common to surface coal operations.

### On-The-Job Training Modules — Surface Metal/Nonmetal

Seventeen-part program developed cooperatively by MSHA and members of the surface metal/nonmetal industry. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Topics include:

1. Front-End Loader Operation
2. Dozer Operation
3. Hauler Operation
4. Pan Scraper Operation
5. Backhoe and Hydraulic Excavator Operation
6. Mobile Crane Operation
7. Hydraulic Shovel Operation
8. Power Shovel Operation
9. Dragline Operation
10. Drill Operation
11. Storage, Transportation and Use of Explosives
12. Field Maintenance of Surface Equipment
13. Welding and Cutting
14. Inspecting and Replacing Wire Ropes (Cables)
15. Ground Control
16. Manual Handling of Materials
17. Prevention of Slip and Fall Accidents

Addendum - Questions for Discussion

MSHA Rev 2005 262 pp
Cat No: IG 43
Price: Free of charge (1 book)
$6.00 (each additional copy)

### On-The-Job Training Modules — Underground Anthracite

Seven-part program developed cooperatively by MSHA and members of the anthracite mining industry. Designed to supplement existing training programs and assist the industry in conducting effective on-the-job training (OJT). Topics include:

1. Roof Control - General
2. Installing Permanent Supports
3. Equipment Lockout Procedures
4. Prevention of Slip and Fall Accidents
5. Manual Handling of Materials
6. Installing Ventilation Controls
7. Blasting Operations

Addendum - Questions for Discussion

MSHA Rev 1999 101 pp
Cat No: IG 50
Price: Free of charge (1 book)
$5.00 (each additional copy)

### On-The-Job Training Modules — Underground Coal

Designed cooperatively by MSHA and members of industry. Consists of thirteen modules:

1. Roof Control - General
2. Installing Temporary Supports
3. Installing Permanent Supports
4. Shuttle Car Haulage
5. Scoop Haulage
6. Operating Track Haulage Equipment
7. Belt Conveyor Haulage
8. Manual Handling of Materials
9. Prevention of Slip and Fall Accidents
10. Equipment Lockout Procedures
11. Electrical Procedures for Non-Electricians
12. Installing Ventilation Controls
13. Section Belt and Power Center Moves

MSHA 1986 191 pp
Cat No: IG 47
Price: Free of charge (1 book)
$5.00 (each additional copy)
**Part 45 – Coal and Metal/Nonmetal Entry Level Training**

This program covers 30 CFR Part 45 which pertains to the regulations covering independent contractors. Based on case studies, students will determine whether citation(s) or order(s) must be issued to the independent contractor, to the mine operator, or to both.

- **MSHA Rev 2001** 14 pp

Cat No: CI 32

Price: Free of charge (1 book) $2.00 (each additional copy)

---

**Part 46 Instructors Guide With Lesson Plans, 30 CFR**

This guide is designed to assist mine operators and independent contractors, who are covered by the part 46 regulations, to develop effective and mine-specific training programs. The target audience for this guide is the instructor who gives part 46 training and the person(s) designated by the operator as being responsible for part 46 training at the mine.

- **MSHA 1999** 21 pp

Cat No: IG 37

Price: Free of charge

Also available in Spanish (IG 37-S). See following description.

---

**Part 46 Training Packet — Introduction to the Work Environment**

This package has 10 sections that review various subjects which can be discussed with trainees in an Introduction to the Work Environment as required under the provisions of part 46. Topics covered include: Surface Machinery, Surface Machinery Safety, Dredges and Barges, Haulage, Processing (Milling and Crushing), Conveyors, Electricity in Mining, Welding, Blasting and Explosives, and Sand and Gravel.

- **MSHA 2000** 75 pp

Cat No: IG 31

Price: Free of charge

---

**Part 46 Training — Sand and Gravel Mines (MNM)**

Designed for use only at sand and gravel mines. Repeats general materials contained in IG 19 Surface Mines program but has changes and additions specific to sand and gravel operations.

- **MSHA Rev 2001** 248 pp

Cat No: IG 18

Price: $8.00
Training Materials

Part 50 — Coal and Metal/Nonmetal
Title 30 CFR Part 50 defines the accident, injury, illness, employment and production (coal) reporting obligations to MSHA of operators working on mine properties. This information also discusses the procedures followed in processing the reported data, a description of some statistical computations used in arriving at incident and severity rates, and a question and answer section.

MSHA Rev 2007 51 pp
Cat No: CI 30a
Price: $4.00

Practical Guide to an Occupational Health Program for Respirable Crystalline Silica, A
This publication and DVD provides guidance to the mining industry for the prevention of silicosis. Developed in partnership with the Industrial Mineral Association of North America, the manual includes explanation of health effects of dust exposure, dust sampling, dust control methods, and recommendations for a respiratory medical surveillance program. The appendices include detailed information and example forms. The DVD contains the book, appendices, and a video “Respirable Dust Sampling.”

MSHA 2008 1 DVD
Cat No: IG 103-DVD
IG 103 (book)
Price: $10.00 (DVD)
Free of charge (1 book – 166 pp)
$5.00 (each additional book)

Permissibility – Electric Face Equipment (C/MNM)
Addresses definitions, mandatory requirements, and other information concerning electric-driven mining equipment.

Note to Trainer: Designed for use by safety and maintenance personnel, mine inspectors, and other mining personnel.

MSHA Rev 2002 38 pp
Cat No: SM 16
Price: Free of charge (1 book)
$2.00 (each additional copy)

Personal Protective Clothing and Equipment (C/MNM)
Use of personal protective clothing and equipment is necessary in mining (and in many other occupational areas including some home activities). This manual describes various devices used, why they are needed, where they are needed, and how to care for the equipment. (Typical equipment includes head, eye, face, foot and body protection devices and respiratory protection devices.)

MSHA Rev 2010 69 pp
Cat No: SM 14
Price: Free of charge (1 book)
$2.00 (each additional copy)

Principles of Mine Rescue (C/MNM)
Designed to instruct mining personnel in the principles involved in mine rescue operations and to increase miners’ awareness of the necessity of a thorough knowledge of mine rescue techniques.

MSHA Rev 2002 94 pp
Cat No: IG 16
Price: Free of charge (1 book)
$4.00 (each additional copy)
Principles of Trailer Towing

This instruction guide is designed to provide fundamental safety awareness and best practices associated with trailer towing. The materials contained in this guide will familiarize course participants with the fundamental concepts of towing safety and the practices associated with operating a motor vehicle while towing a trailer.

Specific topics covered in these training materials include types of towing hitches and related equipment, the pre-trip inspection, load securing and balancing methods, and basic defensive driving techniques.

The CD includes the instruction guide with lesson plans and a PowerPoint presentation.

MSHA 2007 1 CD
Cat No: IG 102-CD
Price: $10.00 (CD)
Free of charge (1 book – 128 pp)
$5.00 (each additional book)

Program Policy Manual

Summary of MSHA’s policies in the areas listed below:

Volume I - 1977 Mine Act
Volume II - Testing and Evaluation
Volume III - 30 CFR Parts 40-50 and Part 100
Volume IV - Metal/Nonmetal Mines
Volume V - Coal Mines

MSHA Updated each year
Cat No: OT 15 (Coal – I, II, III, V)
OT 16 (Metal/Nonmetal – I, III, IV)
OT 17 (General Interest – I-V)
Price: OT 15 $7.00
OT 16 $6.00
OT 17 $7.00

NOTE: Also available through MSHA’s Web site at www.msha.gov

Radiation Hazards in Mining

Deals with the occurrence of lung cancer from breathing radioactive dust particles. Covers radon daughter hazards, radiation control, and medical surveillance measures for mine personnel.

MSHA Rev 2003 21 pp
Cat No: SM 7
Price: Free of charge (1 book)
$2.00 (each additional copy)

Repeat Violation Reduction Program (RVRP)

This program was developed by MSHA’s coal district office in Morgantown, West Virginia, as an inspection procedure. The intent of the program is to reduce the number of repeat violations of mandatory standards by identifying the root causes of the violations. It may also be used by industry personnel to reduce repeat violations.

MSHA Rev 2001 134 pp
Cat No: IG 63
Price: Free of charge (1 book)
$5.00 (each additional copy)

Responding to a Mine Emergency: Training Responsible Persons at Underground Coal Mines

This Instructional Guide (IG) is divided into eleven sections which correspond with the training topics required by 30 CFR Part 75.1501. Responsible persons (and others who are training to become responsible persons) will need to know how to perform and delegate a variety of tasks in the event of a mine emergency. This IG is designed to be used in conjunction with the mine’s Emergency Response Plan (ERP), associated plans, and procedures required during a mine emergency.

The materials in this guide must be tailored with the mine’s existing plans to create an effective program of site-specific instruction that will provide the mine’s responsible persons with the knowledge to act quickly, effectively, and appropriately in the event of a mine emergency.

MSHA 2008 70 pp
Cat No: IG 110
Price: Free of charge (1 book)
$4.00 (each additional book)
Training Materials

**Rigging, Hoisting, and Towing Safety**
This program provides an introduction to hazard recognition and safety practices related to rigging, hoisting, and towing. Topics include: Fatalities; Accident Statistics; Chains and Slings; Hoisting and Crane Safety; Quiz and Conclusion; and a 140-frame PowerPoint Appendix of additional material.

- **MSHA 2008**
- **Cat No:** IG 107-CD
- **Price:** $10.00

**Roof and Rib Control (C)**
This training package of lesson plans, handouts, visuals, and student text is designed to train Federal mine inspectors in roof control plans and mandatory standards related to roof and rib control.

- **MSHA Rev 2003**
- **322 pp**
- **Cat No:** CI 20
- **Price:** $7.00

**Roof and Rib Control - Coal Miner’s Handbook (previously published as “PROP the Top”)**
This booklet is part of the PROP (Preventive Roof/Rib Outreach Program). It is designed to alert miners to the hazards presented in underground coal mining from falls of roof, face, and ribs. This booklet describes the sources of roof/rib hazards and provides practical information to avoid injuries from what has been historically the greatest danger to underground miners. Sources of technical assistance on roof control and other health and safety training resources are included.

- **MSHA Rev 2008**
- **26 pp**
- **Cat No:** OT 44
- **Price:** Free of charge (1 book)
  - **$3.00 (each additional copy)**

**Roof Bolting Machine Operator Skills Training for a Walk-Thru Roof Bolter**
This guide is designed as a reference manual for skills trainers and offers information and examples to assist them in structuring training for new operators of walk-thru roof bolting machines. Trainers can use this manual as a resource for helping trainees learn, understand, and apply knowledge and skills. The videos on the DVD can be shown at the beginning of training to give trainees an idea of what the job entails and related requirements, and can also be shown within the training cycle to reinforce key points or as a trigger for eliciting questions about particularly difficult parts of the job.

- **NIOSH 2006**
- **56 pages**
- **Cat No:** IG 97
- **Price:** Free of charge (1 book)
  - **$4.00 (each additional copy)**
  - **$10.00 (DVD)**

**Root Cause Process for Accident, Incident, and Violation Analysis, A**
The purpose of A Root Cause Process for Accident, Incident, and Violation Analysis is to begin action toward reducing accidents, incidents, and violations at a mining operation. The root cause process recognizes that violations, accidents, and incidents are an indicator of a breakdown which allows these occurrences. This method will result in a professional approach in accident prevention, and can act as a training mechanism for workers and mine operators.

Price:  Free of charge (1 book)
        $4.00 (each additional copy)

Safety and Health Audit for Aggregate Operators (MNM)

This safety and health audit is a short version adapted from IG-14a. It focuses on the most common violations found at aggregate operations, based on twenty conditions/practices that accounted for violations cited at sand, gravel, and crushed stone operations. Completing this self-audit package is a first step in developing a safety program that will avoid common conditions/practices at your mining operation.

MSHA Rev 2005  17 pp
Cat No:  IG 14
Price:  Free of charge (1 book)
        $2.00 (each additional copy)

Safety and Health Audit for Aggregate Operators – Long Version (MNM)

This safety and health audit is a self-audit package that will help to check safety and health conditions at your surface operation. The audit is focused on the requirements of 30 CFR Part 56. Completing this self-audit package is a first step in developing a safety program that will avoid common conditions/practices at your mining operation.

MSHA Rev 2005  164 pp

Self-Contained Self-Rescuers: A Comprehensive Training Guide
This series of booklets is designed to be used with MSHA’s comprehensive SCSR training program. Each booklet is an instructional guide for a particular Self-Contained Self-Rescuer (SCSR) used in the mining industry. Each booklet contains suggested training materials, methods, lesson plans, and handouts, which review inspection; storage, care, and maintenance; donning procedures; transfer procedures; evacuation procedures; and expectations for donning and wearing SCSRs.

Training Materials

Self-Contained Self-Rescuer, The Inspection, Care and Use of the CSE SR-100 (C)
This interactive computer CD contains full-motion video segments, photographs, an instructor guide and a checklist for inspection and use of the SR-100 Self-Contained Self-Rescuer (SCSR). Fully interactive and self-paced, this training course emphasizes features of the unit, shows how to thoroughly inspect the unit, covers proper donning techniques and shows what it is like to wear the SCSR in an evacuation exercise.

MSHA 2005 1 CD
Cat No: IG 27-CD
Price: $10.00

Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K & the Oxy-K Plus S (C)
This interactive computer CD includes proper inspection, maintenance and donning procedures of the Dräger Oxy-K Plus and the Oxy-K Plus “S” Self-Contained Self-Rescuer (SCSR). The self-paced, interactive training course contains full-motion video segments, photographs, an instructor guide and a checklist. Lessons emphasize some of the features for each model, show how to thoroughly inspect the units, cover proper donning techniques and show what it is like to wear the SCSR in an evacuation exercise.

MSHA 2007 1 CD
Cat No: IG 98-CD
Price: $10.00

Self-Contained Self-Rescuer, The Inspection, Care, and Use of the OCENCO, Incorporated EBA 6.5 (C)
This interactive computer CD includes proper inspection, maintenance and donning procedures of the Ocenco, Incorporated EBA 6.5 Self-Contained Self-Rescuer (SCSR). Fully interactive and self-paced, this training course emphasizes some of the EBA 6.5 features, shows how to thoroughly inspect the unit, covers proper donning techniques and shows what it is like to wear the SCSR in an evacuation exercise. The CD contains full-motion video segments, photographs, an instructor guide and a checklist.

MSHA/NIOSH 2005 1 CD
Cat No: IG 91-CD
Price: $10.00
Self-Contained Self-Rescuer, The Inspection, Care, and Use of the OCENCO, Incorporated M-20 (C)

This interactive computer CD includes proper inspection, maintenance and donning procedures of the Ocenco M-20 Self-Contained Self-Rescuer (SCSR). Fully interactive and self-paced, this training course emphasizes some of the M-20 features, shows how to thoroughly inspect the unit, covers proper donning techniques and shows what it is like to wear the SCSR in an evacuation exercise. The CD contains full-motion video segments, photographs, an instructor guide and a checklist.

MSHA/NIOSH 2005 1 CD
Cat No: IG 92-CD
Price: $10.00

SLAM Risks

This publication is intended to be used by trainers as introductory materials for risk assessment training. The information should help make the participant more aware of how risk assessment impacts the everyday tasks that are performed in the mining industry.

MSHA 2005 30 pp
Cat No: IG 87
Price: Free of charge (1 book)
$3.00 (each additional copy)

SLAM Risks – Coal and Metal/Nonmetal Fatalities

This fatality program is primarily intended to be used by trainers as introductory materials for risk assessment training. It can also be used when conducting safety training, tool box safety sessions, safety meetings, etc. The information in this program should help make the participant more aware of how risk assessment impacts the everyday tasks that are performed in the mining industry.

A description of the accident and a color photograph of the accident scene are included. Each page includes a SLAM Risks chart that the trainee can use to determine the hazards, risks, and preventive actions that can help to reduce or eliminate the risks of the particular accident that occurred.

MSHA 2011 42 pp
Cat No: OT 10
Price: Free of charge (1 book)
$4.00 (each additional book)

Stockpiling Safety

Deals with the safe operation of mobile equipment on and around stockpiles. Discusses the hazards associated with stockpiles and reviews the procedures that can be used to minimize the occurrence of accidents.

MSHA Rev 2001 58 pp
Cat No: SM 27
Price: Free of charge (1 copy)
$2.00 (each additional copy)
Training Materials

Strategies for Improving Miners’ Training (C/MNM)
This Information Circular from the National Institute for Occupational Safety and Health (NIOSH) documents and supplements the information presented in a series of workshops. The first three papers in this document present basic principles for teaching adults. The five remaining papers are intended to illustrate how these principles can be applied to the development and implementation of effective training for miners.

NIOSH 2002  54 pp
Cat No: IG 34
Price: Free of charge (1 book)
$4.00 (each additional copy)

Stress Awareness for Miners
This CD contains a PowerPoint presentation designed to enhance miners’ awareness and understanding of the consequences of stress in their life. It defines stress and discusses our body’s responses to stress, causes of and types of stress, and some effective ways of coping.

NIOSH 2007  1 CD
Cat No: OT 52-CD
Price: $10.00

Substance Abuse Recognition for Supervisors (C/MNM)
Designed to educate supervisors in the common types of drugs and their effects on the worker, how to recognize a troubled employee, and how to give assistance. Can be tailored to include the company’s Employee Assistance Program if available.

Books
- Instructor’s Guide  71 pp
- Student’s Text  17 pp

MSHA 1992
Cat No: CI 11  (Instructor’s Guide)
CI 11a  (Student’s Text)
Price: $4.00  (Instructor’s Guide)
$3.00  (Student’s Text)

Supervisory Training Program (Coal)
This program is designed for coal mine section supervisors, and focuses on the knowledge and skills needed to carry out supervisory responsibilities. Packaged in two volumes – one for the instructor and one for participants. Also includes a CD with PowerPoint slides. Each volume is divided into ten lessons:
1. Role of the Supervisor
2. Leadership and Supervision
3. Motivation
4. General Communications
5. Organizational Communications
6. Enforcing Rules and Regulations
7. Performance Review
8. Planning
9. Supervisors’ Training Responsibilities
10. Supervisors’ Safety Role

Books
- Instructor’s Guide  456 pp
- Participant’s Handbook  172 pp

MSHA Rev 2008
Cat No: IG 4  (Instructor’s Guide)
IG 4a  (Participant’s Handbook)
Price: $10.00  (Instructor’s Guide and 1 CD)
Free of charge  (1 Participant’s Handbook)
$5.00  (each additional Participant’s Handbook)

Surface Contractors Training Program (C/MNM)
This program will provide recommendations and instructional guidelines to help prevent accidents to surface contractors in the mining industry. It includes six fundamental accident prevention topics: Review of Pertinent Federal Laws; Review of Independent Contractor Fatalities; Review of General First Aid; Review Hazard Training Applications; Review Pertinent General Safety Guidelines; and Review Line of Authority and Responsibility.

MSHA 1999  478 pp
Cat No: OT 18
Price: $8.00
# Training Materials

## Surface Haulage and Equipment (C/MNM)

This course covers a wide variety of topics relating to surface coal and metal/nonmetal mine haulage regulations and procedures.

**Books**

- Instructor’s Guide 750 pp  
  MSHA Rev 2005

**Cat No:** CI 22  
**Price:** $11.00

## Surface Haulage Metal/Nonmetal Mine Inspector Training

This set of materials reviews 86 topics relating to surface metal/nonmetal mine haulage regulations and procedures.

**Books**

- Instructor’s Guide 800 pp  
  MSHA 1997

- Student’s Text 27 pp  
  MSHA 1997

**Cat No:** CI 45 (Instructor’s Guide)  
**CI 45a (Student’s Text)**  
**Price:** $11.00 (Instructor’s Guide)  
$3.00 (Student’s Text)

## Surface Haulage Safety (C/MNM)

Accidents involving haulage trucks and other mobile surface equipment constitute a major safety problem in the mining industry. This manual illustrates the important principles of haul road design and maintenance, braking system inspection and maintenance, and driver procedures relating to truck runaways. A section also looks at potential hazards and preventive measures associated with surface haulage, and how these hazards can be minimized to equipment operators.

- MSHA Rev 2000 50 pp

**Cat No:** SM 22  
**Price:** Free of charge (1 book)  
$2.00 (each additional copy)

## Surface Installations (C)

Designed to train Federal coal mine inspectors in the inspection of surface installations at both underground and surface mines, including coal preparation plants, in compliance with 30 CFR Part 77. A lesson on inspecting thermal dryers is included.

**Books**

- Instructor’s Guide 189 pp  
  MSHA 1992

- Student’s Text 56 pp  
  MSHA 1992

**Cat No:** CI 12 (Instructor’s Guide)  
**CI 12a (Student’s Text)**  
**Price:** $5.00 (Instructor’s Guide)  
$4.00 (Student’s Text)

## Surface Powered Haulage Safety (C/MNM)

This CD contains visuals and discussion based on a classroom presentation developed by MSHA instructors. The training material is aimed at surface haulage accident prevention, and addresses several of the hazards that may arise in surface haulage operations at mines. It is primarily designed for equipment operators, supervisors, and safety personnel at surface mines, but may also benefit others who work at a surface mine. The full presentation may take about an hour and a half. The same presentation is available on MSHA’s home page (www.msha.gov); however, the CD includes additional formats for those who wish to present the material full-screen with a computer projection system, without being connected to the internet, and/or wish to tailor the material to their operations.

**MSHA 2000 1 CD**

**Cat No:** IG 56-CD  
**Price:** $10.00
Surge Pile Safety
A 75-slide PowerPoint program that covers five aspects of surge pile safety. Topics include: Surge Pile Hazards; Surge Pile Accidents; Pushing Coal on a Surge Pile; and Best Practices: Surge Pile Safety.

MSHA 2008
Cat No: IG 109-CD
Price: $10.00

Tire and Rim Safety Awareness Program (C/MNM)
Designed for trainers of coal and metal/nonmetal mine personnel. Covers the handling and servicing of multi- and single-piece rim wheels.

MSHA Rev 2010 42 pp
Cat No: IG 60
Price: Free of charge (1 book) $4.00 (each additional copy)

Toolbox — Practical Ways to Reduce Exposure to Diesel Exhaust in Mining
This toolbox contains practical ideas for reducing miners’ exposures to diesel particulate matter in the mining environment.

MSHA Rev 2003 93 pp
Cat No: OT 45
Price: $4.00

Toolbox Training for Construction Aggregate Miners
This NIOSH Toolbox Training program contains 52 different modules designed to stimulate safety discussions among miners. The modules are designed to be kept in a standard three-ring binder and easily photocopied. This way, the same set of modules can be used for years to come. A blank form is included that can be used to create more Toolbox Training modules.

NIOSH 2005 106 pp
Cat No: IG 93-CD
IG 93 (book)
Price: Free of charge (1 book, 1 CD) $10.00 (each additional set)

Traffic Control at Surface Mines and Installations, Guidelines for (C/MNM)
All kinds and sizes of vehicles travel roads at surface operations. These vehicles are operated by drivers who travel the mine haul roads on a daily basis or very infrequently or even for the first time. This means that there is a need for good traffic control on mine haul roads. This full-color spiral-bound booklet reviews what mine operators and drivers need to know about traffic control.

MSHA Rev 2002 15 pp
Cat No: OT 26
Price: $5.00
**Train-the-Trainer/Instructor Training Workshop: Compliance Guide (C/MNM)**

These publications are primarily used for Train-the-Trainer and Instructor Training Workshops. However, it is a great resource for any mining instructor.

IG 113a presents Parts 46 and 48 training regulations, program policy, and compliance guide questions and answers. It also contains new additional Part 48 frequently asked questions and answers.

**MSHA 2009**

**Training Materials Collection for Surface and Underground Coal Mines**

This CD is a collection of PowerPoint presentations intended to be used as supplementary training materials for new and/or experienced surface and underground coal miners.

Topics covered include: Electrical Hazards and Controls, Electrical and Powered Haulage Safety, Electrical Safety, Evaluating Ground Control Hazards in Underground Coal Mines, and Roof Control.

Other subjects are: Continuous Miner Hazards, Pre-Operational Inspections, Brakes, and Surface Haulage. The last group of materials reviews Maintenance, Hand Tools, and Material Handling. Accident prevention is stressed in each item.

Training Materials

**TRAP — Take Responsibility for Accident Prevention**

Near-misses are incidents which indicate the presence of a hazard—a “trap,” that is waiting to catch a miner. Traps come and go in the workplace every day. Some are simple, such as a cord stretched across a walkway, while others are more complex such as a poorly designed set of controls on a mining machine. In any case, traps are dangerous. “Take Responsibility for Accident Prevention” is a proactive program. It involves miners, supervisors, managers, and MSHA in an effort to make the workplace safer for everyone. The TRAP Program includes four short courses. The entire program is available on CD.

MSHA Rev 2003

Cat No: IG 62-CD
- IG 62a Take Responsibility for Accident Prevention
- IG 62b Task Training
- IG 62c Miners’ Rights and Responsibilities
- IG 62d Supervisory Responsibilities

Price: Free of charge (1 of each book)
- $2.00 IG 62a Take Responsibility for Accident Prevention
- $2.00 IG 62b Task Training
- $2.00 IG 62c Miners’ Rights and Responsibilities
- $2.00 IG 62d Supervisory Responsibilities
- $10.00 1 CD of entire set

**Underground Haulage, Transportation, and Machinery (C)**

Designed to train Federal coal mine inspectors in the inspection of haulage and transportation systems and machinery in underground coal mines, in compliance with 30 CFR Part 75.

**Books**
- Instructor’s Guide 213 pp
- Student’s Text 144 pp

MSHA 1992

Cat No: CI 13 (Instructor’s Guide)
- CI 13a (Student’s Text)

Price: $6.00 (Instructor’s Guide)

**Understanding MSHA’s HazCom**

This booklet explains HazCom’s basic compliance responsibilities by using easily understood language and mine-related examples. It’s intended to familiarize mine operators with each of HazCom’s requirements, what they mean, and what an operator must do to comply with the standard.

MSHA 2002 38 pp

Cat No: OT 50

Price: Free of charge (1 book)
- $3.00 (each additional copy)

**Winter Alert (C/MNM)**

This manual surveys potentially dangerous conditions encountered in underground coal operations during the winter months, and covers winter related surface mining hazards. Although primarily intended for coal, much of the information in this manual can be applied to metal/nonmetal mines.

MSHA Rev 2002 64 pp

Cat No: SM 19

Price: Free of charge (1 book)
- $2.00 (each additional copy)
Training Materials

HISTORICAL TRAINING MATERIALS

The training materials in this section have become dated due to their age, changes in technology, or changes in mining regulations. The materials are still available because they may represent the sole source of some of the information. Portions of the materials may be used as is; however, the dated portions should be pointed out when presenting them in a training or informational situation. Training materials marked with an asterisk (*) are currently being revised. These will be advertised in a future catalog or supplement. A detailed description of each, alphabetized by title, can be found on the following pages.

Chemistry, Analysis and Interpretation of Mine Atmospheres (C/MNM) ............... IG 69
Coal Dust.................................................PI 9
How to Tailor Off-The-Shelf Training Materials* (C/MNM) ................................. IG 8
Industrial Hygiene for the Mining Industry* (C/MNM) ................................. PI 12

Coal Dust

MESA 1976 130 pp
Cat No: PI 9 (Work Book)
PI 9a (Answer Book)
Price: Free of charge (1 set)
$4.00 (each additional set)

How to Tailor Off-The-Shelf Training Materials* (C/MNM)
Designed to assist trainers. Offers suggestions on personalizing off-the-shelf training materials.

WV University Mining Extension Service 1981 47 pp
BuM Contract JO188069
MSHA Reprint 1983
Cat No: IG 8
Price: Free of charge (1 book)
$3.00 (each additional copy)

Industrial Hygiene for the Mining Industry* (C/MNM)
Describes basic concepts of industrial hygiene and human physiology and how they are affected by mining conditions. Also includes material on measuring instruments and devices used in industrial hygiene.

MSHA 1986 243 pp
Cat No: PI 12
Price: Free of charge (1 book)
$6.00 (each additional copy)

Milling and Crushing* (MNM)
Reviews health and safety hazards associated with milling and crushing operations.

MESA 1978 200 pp
Cat No: PI 4
Price: Free of charge (1 book)
$5.00 (each additional copy)

Mine Gases (C)
Examines the various atmospheric components found in underground mines and describes the hazards of methane, carbon monoxide, sulfur dioxide, hydrogen sulfide, etc.

MESA 1977 207 pp
Cat No: PI 2
Price: Free of charge (1 book)
$6.00 (each additional copy)
Part 48 Training — Coal

Surface
General training materials designed for use at all surface coal mining operations, including surface work areas of underground mines and coal preparation plants. The complete program consists of 23 separate training modules which support four Part 48 training categories:

1. New Miners Training
2. Newly Employed Experienced Miners Training
3. Annual Refresher Training
4. Hazard Training

An outline is also furnished to show trainers how the program is put together.

WV University Mining Extension
Service 1980
BuM Contract JO188069
Cat No: IG 22
Price: $16.00 (23 modules, 1 outline)

Part 48 Training — Coal (continued)

Underground
General training materials designed for use at all underground coal mining operations. The complete program consists of 27 separate training modules which support four Part 48 training categories:

1. New Miners Training
2. Newly Employed Experienced Miners Training
3. Annual Refresher Training
4. Hazard Training

An outline is also furnished to show trainers how the program is put together.

WV University Mining Extension
Service 1980
BuM Contract JO188069
Cat No: IG 23
Price: $19.00 (27 modules, 1 outline)

Part 48 Training — Metal/Nonmetal

Deep Mines
General materials designed for use at all deep metal/nonmetal mines — except underground salt mines. Packaged in three volumes:

1. New Miners Training 519 pp
2. Newly Employed Experienced Miners Training 123 pp
3. Annual Refresher Training 139 pp

Bendix Corp 1981
BuM Contract JO308011
Cat No: IG 17
Price: $12.00 (3 books)

Part 48 Training — Metal/Nonmetal (continued)

Surface Mines
General materials designed for use at all surface metal/nonmetal mines — except sand and gravel operations and surface uranium mines. Packaged in three volumes:

1. New Miners Training 218 pp
2. Newly Employed Experienced Miners Training 119 pp
3. Annual Refresher Training 142 pp

Bendix Corp 1981
BuM Contract JO308011
Cat No: IG 19
Price: $9.00 (3 books)
Part 48 Training — Metal/Nonmetal (continued)

**Underground Salt Mines**

Designed for use only at underground salt mines. Repeats general materials contained in IG 19 Surface Mines program but has changes and additions specific to underground salt mining operations. Packaged in three volumes:

1. New Miners Training 235 pp
2. Newly Employed Experienced Miners Training 118 pp
3. Annual Refresher Training 139 pp

Bendix Corp 1981
BuM Contract JO308011

Cat No: IG 20
Price: $10.00 (3 books)

**Roof and Rib Control (C)**

Examines the nature of a mine roof and describes measures that can be taken to minimize the danger of roof and rib falls in underground mines.

MSHA 1982 113 pp

Cat No: PI 3
Price: Free of charge (1 book)
$5.00 (each additional copy)

**Small Mines Training* (C)**

General information designed to improve the effectiveness of supervisory personnel. Intended for all levels of coal mine management. Complete set of materials contains:

**Books**

- Managing Maintenance 52 pp
- Human Relations Skills at Work 39 pp
- Managing a Section 37 pp
- Complying With Part 48 55 pp
- Conducting Your Own Training 35 pp
- Elements of Management Planning 41 pp
- Developing a Comprehensive Safety Program 46 pp

WV University Mining Extension Service (subcontractor to HUMRRO) 1982
BuM Contract JO188053 HUMRRO E81-0303 WVU 1982

Cat No: IG 11
Price: $7.00 (7 books)

**Underground Coal Haulage and Transportation**

Focuses on safety hazards of the various haulage systems used in underground mines to transport miners, coal, equipment, and supplies.

MSHA 1983 203 pp

Cat No: PI 7
Price: Free of charge (1 book)
$6.00 (each additional copy)
# Pocket Cards

This section is an alphabetical listing of the available printed pocket cards. Cards available in Spanish are indicated with an “S” after the Card No. MSHA has developed a series of pocket cards covering a variety of topics as part of the Agency’s continuing effort to protect the health and safety of our Nation’s miners. Each pack contains 100 cards. One pack is free of charge. Additional packs cost $5.00 each. Be sure to include the Card No. and quantity when ordering.

Pocket Cards

The following cards may be of special interest to Independent Contractors.

BP-1  Brake Systems
BP-1S  Sistema de Frenos
BP-2  Cab Inspection
BP-2S  Inspección de Cabina
BP-3  Haulage Equipment Operators
BP-3S  Operadores de Equipo de Transporte
BP-4  Haulage Safety Attitude
BP-4S  Actitud Sobre la Seguridad en Equipo de Acarreos
BP-5  Highway Truck Pre-Operation Inspection
BP-5S  Inspecciones Pre-Operativas para Camiones de carretera
BP-6  100-Ton or Greater Truck Pre-Operation Inspection
BP-6S  Inspecciones Pre-Operativas para Camiones de 100 o más Toneladas
BP-7  100-Ton or Less Truck Pre-Operation Inspection
BP-7S  Inspecciones Pre-Operativas para Camiones de 100 o menos Toneladas
BP-8  Pre- & Post- Operation Inspection of Surface Haulage Equipment
BP-8S  Inspecciones pre-operativas y post-operativas a los equipos de carga de superficie
BP-9  ROPS (Rollover Protective Structure) and FOPS (Falling Object Protective Structure)
BP-9S  ROPS (Estructura Protectora de Rodillos y FOPS (Estructura Protectora Contra Caídas de Objectos)
BP-10  Steering
BP-10S  La Dirección
BP-11  Surface Mine, Powered Truck Haulage Dumping Procedures
BP-11S  Camión Volquete Procedimientos de Vertido Exploración de Minas al aire libre
BP-12  Truckers’ Training Checklist
BP-12S  Lista de Verificación de Entrenamiento
BP-15  Contractors Machinery
BP-15S  Maquinaria para Contratistas
BP-16  Contractors’ Powered Haulage
BP-16S  Recomendaciones de Seguridad Para Contratistas Conductores de Camiones
BP-19  Mechanics (MNM Contractors)
BP-19S  Reparación y Mantenimiento Seguridad Para Contratista
BP-20  Electrical Safety
BP-20S  Seguridad Eléctrica Para Contratistas
BP-21  Cranes (MNM Contractors)
BP-21S  Grúas Para Contratistas
BP-22  Welding/Cutting (MNM Contractors)
BP-22S  Soldadura y Corte Para Contratistas
BP-23  Haulage (MNM Contractors)
BP-23S  Carga Para Contratistas
BP-31  Drilling - Contractors (MNM)
BP-31S  Perforando Metal/No-Metal Para Contratistas
BP-32  Blasting - Contractors (MNM)
BP-32S  Detonaciones y Explosivos Para Metal/No-Metal Para Contratistas
BP-36  MSHA Notice for Contractors
BP-36S  Anuncio de la MSHA para Contratistas
BP-66  Responsibility of Independent Contractors Working on Mine Property
BP-67S  Responsabilidades de los Contratistas Independientes Trabajando en Propiedades Mineras
BP-68  Repair and Maintenance of Surface Equipment
BP-68S  Reparación y Mantenimiento de Equipo de Superficie
BP-69  Falling/Sliding Material, Highwalls and Banks
BP-69S  Material Deslizándose/Cayéndose de Barrancos y Paredes Altas
BP-70  Slips and Falls on Mobile Equipment

## ANTHRACITE MINING
- Anthracite Mining Workbook (PI) ..............................63
- Anthracite: Pre-Shift Examinations of Underground Mines (DVD) .....................16
- Best Practice Card Series ........................................101
- Haulage and Hoisting in Underground Anthracite Coal Mining (DVD) ..................26
- On-The-Job Training Modules – Anthracite and Bituminous Coal Preparation Plants and Shops (IG) ..................80
- On-The-Job Training Modules – Surface Anthracite (IG) ..................................82
- On-The-Job Training Modules – Underground Anthracite (IG) ..........................83

## BACK INJURIES
- Back Injuries in the Mining Industry (SM) .............64
- Health Hazard Card Series ......................................104
- Oh! My Aching Back (C/MNM) (DVD) .......................53
- Scientific Look at Back Belts (DVD) .......................37

## BINS AND HOPPERS
- Bins and Hoppers Safety Awareness Program (C/MNM) (IG) ..........................64
- Fatal Alert: Entry Into Storage Silos (DVD) .................24

## BLASTING AND EXPLOSIVES
- Blast Area Security (DVD) ........................................17
- Blaster’s Training Program for Independent Contractors (C/MNM) (IG) (DVD) ..........17, 64
- Blasting Hazard Awareness: Surface and Underground Coal Mines (IG) ..........................64
- Blasting Hazard Awareness: Surface Metal and Nonmetal (IG) ............................64
- Blasting Hazard Awareness: Underground Metal and Nonmetal (IG) .....................65
- Blasting Requirements - Surface Coal (CI) ...................65
- Coal Firing Safety (IG-CO) .................................4
- Underground Coal Mine Blasting (DVD) ....................55

## BREATHING APPARATUS
- Dräger SCBA Escape System: Care, Use, and Operation (DVD) .........................22
- MSA W-65 Self-Rescuer (IG-CO) .........................6, 79
- Respirators – Your Last Defense (DVD) .....................35
- Self-Contained Self-Rescuers, A Comprehensive Guide to the Inspection Care and Use of (DVD) ..........................38
- Self-Contained Self-Rescuers, A Comprehensive Training Guide (IG) ..................89
- Self-Contained Self-Rescuer, The Inspection, Care, and Use of the OCENCO, Incorporated M-20 (C) (DVD) ..........39
- Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K & the Oxy-K Plus S (C) (IG-CO) ..........................6, 90
- Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K & the Oxy-K Plus S (C) (DVD) .........................39
- Self-Contained Self-Rescuer (SCSR), The Inspection, Care and Use of the CSE SR-100 (C) (DVD) ..........................39

## CABS AND CANOPIES
- Protective Canopy (DVD) ........................................34
- Reducing Dust Inside Enclosed Cabs (C/MNM) (DVD) .................................34
- Stay Calm and Stay in the Cab! (DVD) ..........42
- Stay in the Cab and Keep It On! A Survivor’s Story (DVD) .................................42

## CARPAL TUNNEL SYNDROME
- Carpal Tunnel Syndrome (SM) .........................65

## COAL MINING – GENERAL
- Academy Promo (DVD) .................................15
- Atmospheric Monitoring Systems Operator’s Training Guide (IG) .......................63
