Access to the High Needs Funding (SEMH) ..............................................................................65
Foreword

This document fulfils a DfE requirement that each Local Authority (LA) explains the special educational provision it expects to be made from within a mainstream school's or early years setting's budget. This document makes explicit the provision for learners requiring support from within the educational establishment without recourse to an Education Health and Care assessment.

This guidance is important to schools because;

- All Northamptonshire learners attending an Early Years setting or a mainstream school should have the same minimum entitlement to provision for special educational needs;
- Setting/School and LA staff need a joint understanding to support their dialogue about individual learners;
- It supports the LA in its statutory duty to monitor and evaluate effectiveness of special educational needs provision;
- It provides the threshold for access to High Needs Funding and/or eligibility for statutory assessment.

This document should be viewed as good practice guidance which settings and schools are expected to work towards. Some settings/schools may need to make adaptations to their present practice if they are to meet the LA's minimum provision expectations. Schools/settings will need to demonstrate that the learners they are putting forward for high needs funding and/or statutory assessment have needs that are significantly outside and beyond those which can be provided for using delegated schools or early years block funding. Evidence of such levels of attainment and needs will still have to be submitted to the LA. Good provision mapping (see below) and the tracking of the outcomes of any interventions offered to the learner will ensure that settings/schools have this evidence to hand.

This document should not be read as a blanket policy. There will be occasions where discretion needs to be applied to suit individual circumstances.

The descriptors within the document are not an exhaustive list. Neither is it necessary to read the document in its entirety.

Relationship to the SEN Code of Practice 2014.

Our settings/schools are advised to think of learners with additional needs in terms of two groups “underachieving and less experienced learners” and “learners with a closely defined special educational need or disability”, this document refers to these needs groups.

- Learners who are underachieving and/or are less experienced (for many reasons) but who do not have a special educational need.
- In schools learners for whom the school needs to make additional provision from the schools or early years block funding in order for them to make and maintain progress. This is support which is “additional to” or “different from” the differentiated approaches and learning arrangements normally provided as part of high quality, personalised teaching. This would be a justification for funding additional provision from schools delegated funding. This additional provision should not be just ‘more literacy’ or ‘more maths’ - these are not the learners to whom schools may be offering
Wave 2 or Wave 3 interventions (which are methods of differentiating the usual school curriculum). On the contrary, learners requiring additional funding from school’s delegated budget in addition to the AWPU are likely to be those who need individual interventions, particular to them, in order to address their underlying learning needs and enable or improve access to the curriculum. Many settings/schools, nationally and within Northamptonshire, mistake underachieving learners for those with a genuine special educational need, so schools should be vigilant about this. IEPs are no longer required for learners receiving additional funding from schools delegated budget but there needs to be evidence of intervention and progress – perhaps using provision mapping.

- In Early Years settings learners for whom the early years setting needs to make additional provision from the early years block funding in order for them to make and maintain progress. This is support which is “additional to” or “different from” the differentiated approaches and learning arrangements normally provided as part of high quality, personalised teaching. The early years setting is expected to plan interventions, appropriate support and adaptations in order to enable the learner to have improved access to the curriculum and make maximum progress using the delegated budget from the early years block funding. In Northamptonshire settings will continue to be encouraged to personalise planning and target setting for individual learners through the ‘assess, plan, do, review' method.

- Learners who require additional funding from High Needs Block with or without a statutory assessment having been undertaken. Evidence required for accessing high needs funding is outlined below but, crucially, for these learners, there needs to be a strong case that the learner’s need cannot be provided for from schools/early year’s delegated budget. It is likely that before making a request for high needs funding, while the learner’s need is still being met by schools/early years delegated budget, a referral has been made to an external agency and action has been taken in response to the support and advice which has been sought. It is likely that the threshold for early year’s setting application will be lower than for school due to the level of delegated budget.

- Learners with specialist needs which require an Education Health and Care Plan.

Crucially, settings/schools should ensure that all vulnerable learners (not just those with special educational needs) are identified and/or on a provision map, including:

In school:
- Learners who are under-achieving and needing intervention (eg Wave 2, Wave 3 learners) – but who do not have SEN;
- learners being supported through devolved additional needs funding;

In settings and schools:
- learners receiving additional funding through devolved early years/schools block funding or high needs funding
- learners with English as an additional language;
- learners who are looked after;
- any other vulnerable groups identified by the setting/school (young carers, persistent absentees etc)
- learners eligible for pupil premium;
For a provision map to be effective, it must cross-reference provision with progress (i.e. a setting/school must have some way of assessing (and recording on the provision map) where a learner was when he/she started the intervention and where he/she is at the end of it, to be able to evaluate whether the additional provision has worked or not.

**Evidence required to access High Needs Funding** (see high needs funding guidance for full information)

Definition of High Needs Pupils

High Needs Pupils are those whose learning needs are

- Significantly "additional to" or “different from” the differentiated approaches and learning arrangements normally provided as part of high quality, personalised teaching.
  AND
- When offering that support, there is irrefutable evidence that the cost to the school, per annum, is more than the Average Weighted Pupil Unit + £6,000 from the school’s devolved additional needs funding
  AND
- When having been offered that support, there is evidence from school progress data and a compelling argument that more accelerated progress could be made if additional resources were provided, and the school has a specific, costed action plan (which might be part of an Education, Health and Care Plan) which outlines how High Needs Funding is to be spent and the targeted gains and outcomes
  OR
- When offering that support, there is irrefutable evidence that the cost to the EY setting, per annum is the 15 hours free entitlement funding + £500 from the group settings notional SEN

**Use of descriptors**

Schools/settings will be expected to have referred to these SEN Descriptors when making provision from the devolved schools block of funding/notional SEN from early years block funding. Schools/settings must have evidence that the recommended provision for learners in different categories of special educational need has been made or attempted prior to application for High Needs Funding. It will not be necessary to evidence all of the recommended interventions but evidence of support from schools/settings delegated budget/notional SEN presented to the panel (see below) must be:

- educationally justified as having been likely to lead to accelerated progress
- sustained
- costed

**Accessing the High Needs Block**

Although this is not a definitive list, evidence to support an application for High Needs Funding might include:

- Pupil progress data outlining progress over last academic year (or longer) in core areas of the curriculum and, possibly, in personal and social development.
NB: this will be more usefully provided as progress evidence, not attainment evidence.

- Portage and SEN Developmental Profile (Early Years)
- Individual child centred planning which includes “assess, plan, do, review”
- One page profile which identifies the learners voice
- Provision map evidence cross referencing additional support given with outcomes
- Summary of outcomes of formal assessments – reading levels, Boxall profile etc (not the formal assessments themselves)
- Observational assessments re engagement in lessons (corroborated, if possible, by an educational psychologist)
- For KS4 students, or students transferring from primary-secondary, information about transition which indicates transition support arranged and cost.
- CAF/CIN information – which provides evidence of complicating social factors having a genuine, long term and sustained impact upon progress in school.

Also, schools/settings will be required to provide an indication of how they would use the High Needs Funding if it is granted, the outcomes this relates to and the impact this will have for the pupil.

**What is a special educational need?**

All learners learn and develop at different rates and have both areas of strength and interest and areas of weakness. A learner may have a special educational need if, despite appropriate classroom/setting activities, and differentiated planning and support, they continue to experience a greater difficulty than their peers in learning and developing skills. It is important to distinguish learners with special educational needs from learners who are underachieving but who can and will catch up.

‘Consideration of whether special educational provision is required should start with the desired outcomes, including the expected progress and attainment and the views and wishes of the pupil and their parents. This should then help determine the support that is needed and whether it can be provided by adapting the school’s core offer or whether something different or additional is required.’ (SEN Code of Practice (2014) section 6.40)

A special educational need is a barrier to learning that might take a variety of forms. The wide range of strategies that can be employed by skilled staff is usually sufficient to overcome such barriers by setting suitable learning challenges and responding to learners’ diverse learning needs. Examples are planning appropriately challenging work for those whose ability and understanding are in advance of their language skills or using positive behaviour management with a clear system of rewards and sanctions. These strategies and arrangements are often effective even when learners have more persistent or serious difficulties. (‘Inclusion: providing effective learning opportunities for all students’: National Curriculum handbooks for primary and secondary teachers QCA/00/457 and QCA/99/458.)

**What should be in place in all settings/schools?**

Provision for learners with special educational needs is a matter for the setting/school as a whole. All teachers are teachers of learners with SEN. In practice the way in which this responsibility is exercised by individual staff is a matter for settings/schools, to be decided in the light of the settings/schools circumstances and size, priorities and ethos. Settings/Schools should be able to offer a minimum provision guarantee for individual learners and their families.
In this document details are given of the process of meeting special educational needs and descriptors of the appropriate minimum provision for different forms of special educational need. Listed below are several supporting elements essential for effective action with, and on behalf of, learners with special educational needs that should be common to all settings/schools.

- SEN Information Report (may be incorporated into a wider Inclusion Policy);
- A provision map for all vulnerable learners;
- Special Educational Needs Co-ordinator (SENCO);
- Nominated Governor with responsibility for Special Educational Needs;
- Whole School/Setting Behaviour Policy;
- Attendance Policy;
- Access Plan;
- Published Equality Information and Objectives
- Knowledge of the SEN Code of Practice
- Knowledge of the services provided by the LA.

Even when powerful strategies are available there will be times when something that is additional to or different from the usual range of provision will be needed if a learner with particular needs is to make progress. It is expected that all children will be monitored, their progress tracked and significantly differentiated learning opportunities will be provided and that there will be a provision map for all vulnerable learners, including those with special educational needs. For a provision map to be effective, it must cross reference provision with progress in order to be able to evaluate the effectiveness of what is being offered.

It would be reasonable to expect most learners who are underachieving, in any year group or key stage, to be able to make accelerated progress, with good teaching and appropriately targeted interventions. Those learners who, having received such provision, continue to struggle to access the curriculum or make progress, often because of some cognitive or emotional impairment, may need something additional to and different from the usual, well-differentiated, curriculum and methodology on offer in the school/setting. It is these learners who can be legitimately identified as having a special educational need in relation to the SEN Code of Practice.

Parents should always be consulted and kept informed of the action taken to help the child and of the outcome of this action.

The SENCO and the class teachers/Key person should decide on the action needed to help the child to progress in the light of their earlier assessment. There is sometimes an expectation that this help will take the form of the deployment of extra staff to enable one-to-one tuition to be given to the child. However, this may not be the most appropriate way of helping the child. A more appropriate approach might be to provide different learning materials or special equipment; to introduce some group or individual support; to devote extra adult time to devising the nature of the planned intervention and to monitoring its effectiveness; or to undertake staff development and training to introduce more effective strategies.

When special educational needs begin to present as severe and complex, so that the school feels justified in applying for high needs funding, external agencies may be involved. These might include educational psychologists, LA or external specialist services, occupational therapists and speech and language specialists. Although teaching assistants/early years practitioners may deliver some of the programmes written/advised by external agencies, it is still the responsibility of the class teacher/key person to ensure all learners are making good progress.
Schools/settings may request involvement of specialists at any point to advise them on early identification of SEN and effective support. A school/setting should always request involvement of a specialist where a child continues to make little or no progress over a sustained period or where they continue to work at levels substantially below those expected of children of a similar age despite well-founded SEN support delivered by appropriately trained staff. (P 91 SEN Code of Practice 2014)

According to the nature of a learner’s needs over time they may require less rather than more help if the interventions made are successful. Interventions using schools delegated budget/early years funding are the means to match provision to individual student needs and are therefore part of the continuous cycle of assessment, planning, action and review within schools/settings that enables all children and young people to learn and progress. Interventions using schools/settings delegated budget/early years funding will not necessarily be steps on the way to undertaking a statutory assessment, or accessing high needs funding, and must not be seen as such.

**What are the areas of special educational need?**

The Code of Practice (2014) outlines the following broad areas of need;

- **Communication and interaction** which includes speech, language and communication needs (SLCN), autistic spectrum disorder (ASD).

- **Cognition and learning** which includes moderate learning difficulties (MLD), severe learning difficulties (SLD) profound and multiple learning difficulties (PMLD), specific learning difficulties (SpLD).

- **Social, emotional and mental health difficulties** which includes attention deficit hyperactivity disorder (ADHD), attention deficit disorder (ADD), oppositional defiant disorder (ODD), attachment disorder, anxiety and depression.

- **Sensory and/or physical needs** which includes visual impairment (VI), hearing impairment (HI), multisensory impairment (MSI), physical difficulties (PD)

A learner may have needs which span two or more categories, for example a learner with a hearing loss may also experience difficulty with reading and have some emotional health problems.

Each learner should be considered “in the round”, so that all their needs can be identified. This consideration should include the context of the setting/class and school. A learner’s needs arise as a result of their interaction with their learning environment; it is not appropriate to regard all needs as being problems generated from within individual learners. Any needs identified need to be prioritised so that targets and provision can be focussed upon achieving measurable progress.

**How should success be measured?**

The Code of Practice (2014) makes reference to learners making appropriate progress and measuring progress. Identifying progress is how individual learners, families, schools/settings and the LA can measure the effectiveness of the provision made for learners.
Learners and their needs are individual. What is appropriate progress is therefore also individual and has to be defined by success in meeting appropriately challenging SMART targets over time. Learners who do not have a special educational need progress at different rates and the same is true for learners with an identified special educational need. Some learners will successfully meet highly appropriate challenging targets but the nature of their special educational need may mean that the gap between their attainments and those of their peers will widen over time. Schools are advised to refer to the SEN Progression Materials on the DfE website as a useful tool for judging the progress of students with SEN across each key stage, based upon their age and prior attainment.

**How is effectiveness to be monitored?**

The general effectiveness of provision and outcomes for vulnerable groups of students in LA maintained schools is monitored through the School Effectiveness Monitoring programme in Learning, Skills and Education.

Achievement of and provision for vulnerable groups of learners is discussed and graded annually using Ofsted criteria. Through this process settings/schools are encouraged to:

- Critically analyse the effectiveness of their own provision;
- Build improvements into school/setting planning;
- Ensure staff are adequately trained and all teachers/practitioners assume responsibility for the outcomes of learners with SEN;
- Share good practice with other schools/settings.

The LA also monitors:

- The school inspection reports from Ofsted with regard to inclusion and the achievement of all vulnerable learners.
- The use and the effectiveness of SEN delegated funding in schools/settings and funds secured from the High Needs Block.

**What is statutory assessment?**

Statutory assessments are undertaken for learners with significant special educational needs. A statutory assessment of a learner’s special educational needs can be undertaken when there is convincing evidence that, despite the school/setting, with the help of external specialists, taking relevant and purposeful action to overcome the learner’s special educational needs, the difficulties remain or have not been remedied sufficiently. A statutory assessment is a multi-agency investigation that aims to define the long-term needs of a learner. It may or may not result in an Education Health and Care Plan being drawn up. It may, or may not, be linked to High Needs Funding.
Establishing the criteria for considering whether to undertake a statutory assessment of a child or young person’s Special Educational Needs.

The Local Authority has applied the criteria for special educational needs as defined in the Introduction to the Special Educational Needs and Disability Code of Practice 0-25 (July 2014). Page 15 sections xiii and xiv of the Code of Practice indicates that:

xiii A child or young person has SEN if they have a learning difficulty or disability which calls for special educational provision to be made for him or her.

xiv A child of compulsory school age or a young person has a learning difficulty or disability if he or she:

- has a significantly greater difficulty in learning than the majority of others of the same age, or
- has a disability which prevents or hinders him or her from making use of educational facilities of a kind generally provided for others of the same age in mainstream schools or mainstream post-16 institutions.

xv. For children aged two or more, special educational provision is educational or training provision that is additional to or different from that made generally for other children or young people of the same age by mainstream schools, maintained nursery schools, mainstream post-16 institutions or by relevant early years providers. For a child under two years of age, special educational provision means educational provision of any kind.

xvi. A child under compulsory school age has special educational needs if he or she is likely to fall within the definition in paragraph xiv above when they reach compulsory school age or would do so if special educational provision was not made for them (Section 20 Children and Families Act 2014).

Criteria for assessment

When deciding to submit a request for statutory assessment to the Local Authority, cognition and learning needs, assessment of disability and how it impacts on the child’s ability to access the curriculum are to be considered. Schools/settings, other professionals and parents should consider the criteria below.

Communication and interaction including SLCN and ASD:

A child with speech and language needs and no other learning needs would not normally meet the criteria for a statutory assessment as we would expect these needs to be addressed by the school or by NHS services providing advice to school and parents regarding approaches and programmes, with courses of direct therapy if required. However with regard to both speech and language difficulties and ASD diagnoses, the child’s barriers to learning i.e. anxiety, self-centred behaviours, language difficulties, emotional difficulties and the extent to which it affects access to the curriculum should be considered.
Cognition and Learning Needs:

Severe learning difficulties:

The Code states that children with severe learning needs are likely to require support in all areas of the curriculum and may have other associated difficulties, such as with mobility and communication.

Children with severe cognition and learning needs, who may require a statutory assessment, will have cognition and learning scores *below the 2nd percentile*. Scores at this level would appear to indicate that the child has a ‘significantly greater difficulty in learning than the majority of others of the same age’.

A child who is attaining below the expected range in their key stage (defined as *out of key stage*) may also have severe learning difficulties. Schools must give consideration to ‘P’ levels. A child achieving P8 or less in attainments may be out of key stage, but this approach will need to take account of child’s year group e.g. a Year 1, achieving P8, could still remain at this stage in mainstream.

The expected levels for most children to be working at in each Key Stage are as follows:

- End of KS1: NC levels 1 – 3
- End of KS2: NC levels 2 – 5
- End of KS3: NC level 3 +
- End of KS4: NC level 4 +

In early years cognition and learning evidenced delays as described in the descriptor table for access to high needs funding.

Specific Learning Difficulties (Spld):

For children with specific learning difficulties (Spld) we would expect that these needs can be identified and addressed from resources available in the Local Offer without the need for a statutory assessment, unless there are other needs which impede access to the curriculum.

Social, emotional and mental health:

Pupils with these needs are likely to require access to specialist services, but would not require a statutory assessment leading to an EHC plan unless they had low cognitive ability and/or a disability, which was hindering their access to the curriculum. For diagnoses of ADHD/ADD /ODD, consideration must be given to the extent in which these create a barrier to learning; however an expectation would be that these medical diagnoses would usually be addressed by medication and/or other interventions recommended by health professionals.

It is clearly stated in the Code (Page 98, s. 6.33) that schools and colleges should have clear processes to support children and young people with these difficulties, including how they will manage the effect of any disruptive behaviour so it does not adversely affect other pupils.
Sensory and/or physical needs:

Hearing impairment, visual impairment and multisensory impairment:

Pupils with these difficulties would normally be able to access local mainstream provision as set out in the Local Offer, which should detail the access that these pupils will have to specialist support and/or equipment to access their learning e.g. access to a Teacher of the Deaf; VI specialist teacher; MSI specialist support. An EHC Plan would usually only be needed if the pupil also had low cognitive ability or other disability that affected access to the curriculum.

Physical difficulties and medical difficulties:

These pupils would normally be able to access local mainstream provision as set out in the Local Offer. However, it is important to consider what is in the best interests of the child and some children with complex or debilitating medical conditions may require a statutory assessment which may lead to an EHC plan and placement in a setting which could address their more complex physical and medical difficulties.

Schools must have regard to the statutory guidance for governing bodies of maintained schools and proprietors of academies ‘Supporting pupils at school with medical conditions’ April 2014

Decision making by the Local Authority:

The Local Authority will consider referrals for statutory assessment in line with the criteria outlined above. Each case will always be considered on its own merits.

Information required to consider a statutory assessment

For the LA to decide that a statutory assessment is necessary, detailed advice from the school/setting will be sought about:

- The school's/setting's action through use of their delegated budget/notional SEN (Early Years).
- Evidence from the school's/setting’s provision map; Evidence from a Developmental Profile (Early years)
- Progress across the curriculum over time identified through child centred planning i.e. “Assess, Plan, Do, Review”
- Records of regular reviews and their outcomes;
- National Curriculum levels; attainment in literacy and maths;
- Education and other assessments e.g. from an advisory special support teacher/service or EP; with evidence that strategies advised by the external professional have been implemented and reviewed.
- Views and aspirations of the parent and of the child (in the form of a one page profile);
- The students health including the child's medical history where relevant;
- Involvement of other professionals e.g any involvement of social care and health services to date.
Using the Descriptor Pages

How should the descriptor pages be used?

The descriptors are set out in the tables that follow. They indicate provision that the LA expect settings/schools to make for learners with regard to:

- Early Years Foundation Stage (pre Reception)
- Cognition & Learning
  - Moderate/General Learning Difficulty
  - Specific Learning Difficulty
- Communication & Interaction
  - ASD
  - Speech, Language & Communication needs
- Medical Needs
- Physical Impairment
- Sensory Impairment
  - Hearing Impairment
  - Visual Impairment
  - Multi-sensory Impairment
- Social, Emotional and Mental Health

For each group of students detailed information is given about the LAs expectations, in terms of:

- Impact of SEN on learning
- Quality teaching strategies and specialised adaptations
- Relevant information & assessments

The descriptors are intended to be indicative; they are not an exhaustive list. A learner need not be experiencing all the needs described for consideration to be given to whether they have needs which will be appropriately supported at a given level.

Some of the needs described may not, individually, warrant intervention, but they may be significant in conjunction with other needs. Schools may find a learner has needs across a number of the headings, or a cluster of needs under one heading.

The descriptors are designed to support schools to gauge the levels of support they need to arrange for children before applying to the High Needs Block for additional funding. For children in the Early Years Foundation Stage (Reception) in schools, schools may find it useful to refer to the Descriptors for the Early Years Foundation Stage’ Early Years Block, as a tool to support their practice.

It is not intended that the Descriptors should be read as a whole document, but rather that they are a reference resource according to the area of need or age (early years).
SEN DESCRIPTORS: Early Years Foundation Stage (pre Reception)

Normal Entitlement for all children – Early Years Block Funded

Most children will be able to participate in an ordinary setting and make progress through the Early Years Outcomes and the Early Learning Goals through high quality provision, referred to as Quality First Teaching (QFT) which includes effective differentiation. ‘Quality First Teaching’ means appropriately planned, quality experiences and provision, built on observations of children’s starting points and interests in order to develop their learning. Sensitive interactions are essential to support this.

Description of child – Entitlement for All Children, funded through Early Years Block

### Arrangements

**Stories:**
- short, well-illustrated and read with enthusiasm by adult.
- use of props/story sacks etc
- story group kept as small as staffing resources allow

**Instructions:**
- repeated and accompanied by gestures or pictures.

**Adults:**
- to join in with an activity the child has selected and play alongside
- receptive and give time to children having difficulties speaking or who need time to understand and process thinking

**Group work:**
- within key worker groups
- for planned activities according to themes identified within curriculum plans

**Resources:** pictures for labels and picture/visual timetables

**Timetable:** adults to be part of imaginative play activities to support and extend play

**Support:** turn taking, possibly using group games

**Make** arrangements for drug administration in line with Health & Safety policy

**Provide** accessible changing facilities and staff available to deal with accidents

**Focussed** teaching for all children delivered in small groups throughout the day

**Ratios:** required for registration maintained throughout the day. In schools and settings where practitioners are given breaks, the head teacher or manager should make appropriate arrangements to ensure that the staffing levels are maintained.
Additional documents as required:
- Individual health care plans.
- Individual risk assessments.

Specific individual support funded from within the settings own resources

Description of child – Specific individual support expected for children with additional needs, funded from within the settings own resources although enhanced with the support of external professionals – Early Years Block funded

**Arrangements**

**As above +**

- Individual targets set and reviewed every 6 weeks
- Flexible and differentiated curriculum to support individual targets
- Assessment and monitoring by key person, supported by SENCo
- Support and advice from external agencies to inform ongoing, more intense programmes
- Staff training on specific SEN issues/needs
- Increased differentiation of activities/materials to support specific targets
- Individual visual timetables and behaviour support materials
- Increased use of visual timetables
- Specific environmental adaptations for physical and sensory needs
- Specialist ICT equipment to ensure curriculum access
- Staffing ratios in excess of minimum for parts of the day
- Some dedicated individual support time for children.
Higher Needs, Requests for Access to Individually funded arrangements from High Needs Block for those currently funded through Early Years Block

The majority of children with learning, developmental and/or other difficulties will have their special educational needs suitably addressed by arrangements in previous stages.. There will, however, be some who continue to experience a much higher level of difficulty than their peers in making progress in the Early Years Foundation Stage.

Where, despite continuing intervention, this turns out to be the case, the setting may submit evidence to the Local Authority to request funding from the Higher Needs Block where any of the following apply and the child’s needs are in line with the high needs descriptors on the following pages.

The child’s current rate of progress is of constant concern, despite receiving appropriately structured early education experiences, and the gap between his/her performance and that of his/her peers continues to widen.

- Revision of the differentiated provision for the child’s education has not resulted in the expected progress towards achieving learning and/or developmental targets as determined by the review of individual targets or specific information from involved professionals.

- Evidence of the child continuing to work at levels consistently below those expected of children of the same age.

- Individually administered assessments over time by the early education practitioner and/or SEN Co-ordinator (SENCo) and external professionals, together with discussion at reviews, indicate that a request for additional resource from the Higher Needs Block is appropriate.

- Evidence of the child displaying social, emotional, and mental health difficulties which persistently and severely interfere with his/her learning or that of the group, despite the implementation of an individualised behaviour management programme and appropriate modifications to the learning environment.

- Evidence of the child experiencing sensory and/or physical difficulties to the extent that he/she continues to require specialist equipment or regular visits for very high level intervention or advice by specialist practitioners.

- Evidence of the child experiencing ongoing communication and/or interaction difficulties, impeding his/her development of social relationships and causing severe barriers to learning.

- A consensus of those who teach the child and an external professional, in partnership with his/her parents, that the gap in levels of development is continuing to widen between the child and those of a similar age and that targets have not been met.

</tbody>
</table>
Arrangements for a child at this level will be highly individualised.

When considering a delay think about a best fit model with regard to the Early Years Outcomes age/stage bands and the chronological age. A child who is identified at working eighteen months plus, below their chronological age of 3 or over is showing a severe delay.
COGNITION AND LEARNING

DESCRIPTION OF NEED

General Learning Difficulties (GLD)

The majority of students with learning difficulties will be identified early in their school career. In most cases, they will have difficulty acquiring basic numeracy and literacy skills and may have commensurate speech and language difficulties. They may well find it hard to deal with abstract ideas and to generalise from experience. Some may also have poor social skills and may show signs of emotional and behavioural difficulties.

Students subject to curriculum enhancement through targeted initiatives such as Early Literacy Support, Additional Literacy Support or Catch-Up should not be categorised as having general learning difficulties, unless there is evidence of indicators as outlined below in their profiles of attainment:

- Resources needing to be deployed which are additional to or different from those normally available to the students in the school, through the differentiated curriculum;
- Consistently evident problems with regard to memory and reasoning skills;
- Consistently evident problems with processing, organising and co-ordinating spoken and written language to aid cognition;
- Consistently evident problems with sequencing and organising the steps needed to complete tasks;
- Consistently evident problems with problem solving and developing concepts;
- Consistently evident problems with fine and gross motor competencies, which significantly impair access to the curriculum;
- Consistently evident problems with understanding ideas, concepts and experiences when information cannot be gained through first hand sensory or physical experiences.

Specific Learning Difficulty (SpLD)

Specific Learning Difficulty is the overall term used to describe a developmental condition that causes problems when using words – dyslexia and problems using symbols – dyscalculia and some other developmental problems.

Dyslexia is the commonest type of specific learning difficulty that students are likely to experience with about 10% of the population having some form of dyslexia. ‘Dyslexia is present when fluent and accurate word identification (reading) and/or spelling do not develop or do so very incompletely or with great difficulty. This focuses on literacy learning at the ‘word level’ and implies that the problem is severe and persistent despite appropriate learning opportunities. It provides the basis of a staged assessment through teaching.’ (British Psychological Society, 2000: Dyslexia, Literacy and Psychological Assessment.)

Short-term memory, mathematics, concentration, personal organisation and speaking may be affected.
The effects of dyslexia can largely be overcome by support and the use of compensatory strategies.

Students with specific learning difficulties fail to acquire levels of skills in some subjects commensurate with their performance in others, despite good attendance and health, satisfactory attitudes to learning and sound teaching. They may find difficulties particularly frustrating if they become an obstacle to the development of learning in other areas. Low self-esteem, poor concentration and behavioural difficulties can arise as a consequence.

Other aspects of the development of these students may be in line with the majority of students their age. It is, however, possible for dyslexia to be present alongside other learning disorders, thus creating different complexities of special need.

</table>
number skills, which do not fit his/her general pattern of learning and performance.

May have moderate and persistent difficulties in the acquisition and/or use of language, literacy and numeracy skills which affect progress in other areas of the curriculum.

May also have difficulties with other areas e.g. motor skills, organisation skills, behaviour, social or emotional issues and multi-agency advice may be required.

May also have difficulties with sequencing, visual and/or auditory perception, co-ordination, concentration or short-term working memory.

May have poor learning habits and concentration difficulties, be poorly motivated and resistant to learning.

- Utilisation of appropriate materials for students with SpLD;
- Access to peer supported learning through Buddy schemes;

Pre and post tutoring in subject specific vocabulary.

Effective spelling strategies which include syllabic spelling approaches. Regular provision of subject specific spelling lists and specialist dictionaries.

Strategies to support weak spatial and perceptual and memory skills.

Strategies to support problem solving, and ability to sequence learning steps to task completion.

Alternative forms of recording which enables the student to demonstrate knowledge without the requirement for extended written work.

Support for study skills and work planning, mind mapping techniques etc.

Support to develop personal organisation in response to timetabling and managing possessions/equipment.

Intervention strategies for the regular specialist delivery of social skills programme in small group settings e.g. Social Stories, role play.

Arrangements to extend student participation within the curriculum, to prevent disaffection and promote engagement with school work, independent learning and self monitoring.
**Access to the High Needs Funding (C&L)**

The majority of students with general or specific learning difficulties will have their special educational needs suitably addressed by arrangements in school. There will, however, be some who continue to experience a much higher level of difficulty than their peers in making progress in their education. Some of these students may also have difficulties with sensory, physical or medical needs and a strong co-ordinated approach between a range of professional agencies may be required.

| **GLD:** The gap between the student’s performance and that of his/her peers is significantly wider than would normally be expected for students of his/her age.  | Highly individualised learning programme developed by the SENCo with support from external professionals as required which evidences:  
- Advice from external professionals, Interventions implemented and impact on progress.  
- Planned strategies to support the individual student with expected outcomes.  | The student’s performance is amongst the lowest attaining 2% of his/her age group.  
Application to High Needs Panel by completion of on-line form.  |
| **SpLD:** The student’s difficulties in acquiring expected literacy and/or numeracy skills are significantly greater and more persistent than would normally be expected for students of his/her age. |
COMMUNICATION & INTERACTION

Autistic Spectrum Disorder

DESCRIPTION OF NEED

Students with Autistic Spectrum Disorders experience difficulties typically falling within a triad of impairments affecting social interaction and relationships, social communication, flexible thinking, behaviour and sensory challenges. The impairments within the autistic spectrum may vary widely in terms of severity and the way they manifest themselves. Autistic spectrum disorders occur across a wide range of abilities and may also be found in combination with other difficulties.

Some of the characteristic difficulties students experiences include:

- Difficulties in understanding social situations and responding to normal environmental cues;
- Difficulty in intuitively sensing other people’s feeling and intentions;
- Inappropriate or limited social initiative and problems with establishing and maintaining reciprocal relationships;
- Rigidity of thinking and a tendency to follow personal agendas which are not easily amenable to adult direction with an absence of awareness of the needs or emotions of others;
- Difficulty with open-ended or unstructured situations and with change;
- High susceptibility to anxiety and stress;
- Limitations in expressive or creative activities extending to obsessive interests or repetitive activities;
- Impaired use of language, either expressive or receptive, which may include odd intonation, literal interpretations and idiosyncratic phrases and may extend to more bizarre expressive forms and limited expression, reducing the potential for two-way communication. Good vocabulary may lead others to overestimate the true level of understanding;
- Difficulty in processing and navigating environments; eg. transitioning from activities, rooms, year groups and schools;
- High susceptibility to hyper/hypo sensitivity.

For all students with autistic spectrum disorders, the expectations associated with change that may require contact with more people in a wider range of social settings, may compound their existing difficulties and make their special needs more complex.
Normal school entitlement for pupils with ASD: Provided from AWPU

Many students with autistic spectrum disorder will be able to participate in most aspects of an ordinary classroom and make progress within the curriculum but may need some support through effective QFT and waves of intervention.

| The students’ difficulties that may present in either the home and/or school may include:  
  • inability to interpret social cues,  
  • poor social timing,  
  • lack of social empathy,  
  • rejection of normal body contact or unawareness of other people’s personal space,  
  • sensory reactions to body contact, difficulties maintaining appropriate eye contact,  
  • lack of social conversation skills,  
  • literal use and interpretation of speech, rigidity and inflexibility of thought processes,  
  • resistance to change,  
  • solitary play and unusually focussed special interests.  
  • may have issues relating to health and personal care issues | Students may need access to:  
  • Flexible teaching arrangements;  
  • Help in acquiring, comprehending and using language;  
  • Help in articulation;  
  • Help in acquiring literacy skills;  
  • Where necessary, help in using low level alternative means of communication;  
  • Support in using different means of communication confidently for a range of purposes;  
  • Support in organising and coordinating oral and written language.  
  • Withdrawal facilities provided for times of stress.  
  • Opportunities for the development of social interaction and communication skills | Staff able to monitor and assess for access to special exam arrangements.  
  Strategies such as Social Stories may be used to promote social success/appropriate behaviour.  
  Multi-agency advice may be required through the CAF or diagnostic process.  
  Multi-agency support may be required due to overlap of educational, social or health needs.  
  Parent/carer to be involved in the formulation, monitoring and implementation of targets.  
  Use of a home-school diary to aid communication.  
  Staff have received focused training on the specific implications of the effects of Autism on the student.  
  The student may need an individual risk assessment.  
  A record will be kept of consultation with external professionals, such as the Autism Team, Educational Psychologists, CAMHS or Speech & Language Therapists if they are involved with the student. |
| The student can exhibit highly atypical behaviour, such as: obsessive, challenging and/or withdrawn behaviours, an inappropriate use of language, abnormal responses to sensory experiences and | Staff to monitor students during break times and lunchtimes and have strategies in place to reduce anxiety during unstructured times.  
  Curricular language will benefit from ‘scaffolding’ approaches.  
  Additional access to I.T. may be necessary.  
  The student may need considerable preparation for changes in routine. |
| signs of distress requiring significant adjustments. | Provision map targets will be addressed through individual, small group and class work within the curriculum framework.  
Strategies used to facilitate transfer from one school/teacher to another, may include passports, one page profiles, a familiarisation book of photos of the new environment, a file of coping strategies/equipment and social stories.  
Structured programmes of work may need to be clearly set out via a visual timetable.  
There should be consistency within the classroom in terms of organisation, structure, routines, space and place.  
Student may need access to a workstation and equipment for Augmented and Alternative Communication (AAC) e.g. Picture Exchange Communication System (PECS) (2:1 ratio may be necessary in early stages), signing or due to sensory integration difficulties.  
Consideration may need to be given to the physical environment |
Access to the High Needs Funding (ASD)

The majority of students with autistic spectrum disorders will have their special educational needs suitably addressed by arrangements in mainstream classrooms supported, if necessary, as described above, by the school’s delegated budget. There will, however, be some pupils who continue to experience a much higher level of difficulty than their peers in making progress in their education. These situations may occur when, despite carefully planned and executed interventions by the school, the student continues to have difficulties with communication, interaction and imagination which impede his or her access to the curriculum. The difficulties are more clearly evident and severe: impaired language development, rigidity and inflexibility of thought and behaviour, difficulties with social interaction and communication and sensory issues.

- High levels of anxiety are beginning to impact negatively on attendance (below 85%).
Speech, Language and Communication Difficulties (SLCN)

DESCRIPTION OF NEED

Students may exhibit a range of difficulties with speech and language, some of which will resolve as the student develops. Most students, with more significant and enduring speech and language difficulties, will have been identified through Health Services’ programmes prior to school entry.

For some students, such difficulties may be confined to problems with their production of speech. For others, it may be hard to find the right words or join them together meaningfully in expressive language. They may have problems in communicating through speech and other forms of language use and may find it hard to acquire language and express thoughts and ideas. They may experience difficulties or delays in understanding or responding to verbal cues from others, or in understanding and using appropriate language for social interaction.

In some instances, a persistent failure to communicate effectively with others may give rise to feelings of frustration or anxiety. These feelings may in turn lead to some behavioural difficulties and/or deteriorating social relationships with peers and adults alike.

The fact that the student may speak and understand English as an additional language does not in itself constitute a speech and language difficulty. It is important to note, however that different languages have different structure/phonologies which can sometimes cause initial short term difficulties.

Normal school entitlement for pupils with SLCN: Provided from AWPU

Many students with speech language and communication needs will be able to participate in most aspects of an ordinary classroom and make progress within the curriculum but may need some support through effective QFT and waves of intervention

<tr>
<td>• Speech is understood by others but has some immaturities, which at times interfere with the acquisition of literacy and/or create mild social difficulties.</td>
<td>• Needs some encouragement to take responsibility for own learning and to collaborate with peers in curriculum activities. • Needs some support to listen and respond to</td>
<td>• Effective home/school liaison • Students pastoral care needs are met • Students have regular opportunities to evaluate their performance in learning activities.</td>
</tr>
</tbody>
</table>
• Comments and questions often indicate an initial difficulty in understanding the main points of discussions, explanations, information given, in a whole class situation.

• Sometimes develops & explains own ideas clearly, but sometimes needs support:
  - To contribute successfully to discussion about imaginary and factual activities
  - To use vocabulary precisely and effectively

• Some differentiation of speaking, understanding, listening tasks to allow access to the curriculum.

• Staff are aware of the implications of mild sensory impairment, perceptual impairment, fine motor skill development and medical issues.

• Students’ self-assessment routinely used to set individual learning targets.

• A speech and language specialist may have assessed the student’s progress and the student may be attending the local health clinic to receive speech and language therapy. At this stage the speech and language therapist will be working mainly in conjunction with the parent/carer. There may be some low-level contact between speech and language therapist and the schools.

| • The student’s progress in many areas of the curriculum, notably literacy and numeracy, is significantly and specifically impeded by his/her speech and language difficulties. | Highly individualised learning programme developed by the SENCo with support from external professionals as required which evidences:  
  - Advice from external professionals, Interventions implemented and impact on progress.  
  - Planned strategies to support the individual student with expected outcomes.  
  - Highly individualised and differentiated provision is required to be made directly by external professionals who are specialists in this field. | Application to High Needs Panel by completion of online form.  
Wide multidisciplinary team involvement may be required.  
SLT may be directly involved.  
Standardised assessments and/or diagnostic tests from other external professionals including medical are required. |
| • There is a significant discrepancy between the students’ expressive language and verbal comprehension skills, or between his/her language and cognitive abilities. | | |
| • Despite implementation of relevant teaching programmes funded from the school’s delegated budget evidence from reviews shows that they have not enabled him/her to make expected progress. | | |
**MEDICAL NEEDS**

A medical diagnosis or a disability does not necessarily imply a special educational need SEN. It may not be necessary for the student with any particular diagnosis or medical condition to have any form of additional educational provision at any phase of education, high needs funding or an Education Health and Care Plan. **It is the child’s educational needs rather than a medical diagnosis that must be considered.**

Some students may have medical conditions that, if not properly managed could hinder their access to education. The Equality Act 2010 states that public bodies **must** not discriminate and **must** make reasonable adjustments for disabled children and young people. The definition of disability in the Equality Act includes children with long term health conditions.

Students with medical conditions will include those with Asthma, Diabetes, Arthritis, Epilepsy, severe allergies, Incontinence, Eczema, Cystic fibrosis, Tracheotomy, Colostomy and Ileostomy.

The SEN Code of Practice 2014 recognises that there is a significant overlap between disabled children and young people and those with SEN. Children and young people may therefore be covered by both SEN and disability legislation.

For children and young people with medical needs schools **must** have regards to the new DfE guidance: **Supporting pupils at school with medical conditions: Statutory guidance for governing bodies of maintained schools and proprietors of academies in England**.

<td></td>
</tr>
</tbody>
</table>
PHYSICAL NEEDS

For some students with physical disabilities the only resource that will be required will be minor to moderate adaptations to allow access. This should always be considered in the first instance, before resorting to other types of support.

Physical impairments may arise from physical, neurological or metabolic causes that only require appropriate access to educational facilities and equipment; others may lead to more complex learning and social needs. For some students with the most complex physical needs the LA will consider a multi-disciplinary assessment to be necessary. However for many students with a lesser level of physical needs, intervention at a school level of response will be appropriate. Students with severe physical difficulties are normally identified at the pre-school stage. Exceptions to this would include students experiencing the result of serious illness or accident, leading to a long term disability (which may or may not be permanent) or a degenerative condition.

Occasionally unforeseen or unexpected situations arise. A student may have an accident, undergo emergency surgery or perhaps break a limb. If this occurs there is no pre-arranged programme in place and a plan should be put together and implemented to organise the student’s return to school. The school may need to put adult support in place for a short period.

If appropriate arrangements are not made, some medical conditions may have a significant impact on the student’s access to educational opportunities, or on his/her levels of attainment, and/or give rise to emotional, behavioural and social difficulties. The medical condition may, in itself, significantly impair the student’s ability to participate fully in the curriculum and the wider range of activities in school. Some prolonged conditions will affect the student’s progress and performance intermittently, others on a continuous basis throughout the student’s school career.

Drug therapies may compound the problem of the condition and have implications for the student’s education. Medication may similarly impair concentration and thus lead to difficulties for the student in the classroom. In some instances, students with potentially life-limiting conditions may have periods of hospitalisation or frequent attendance at out-patients, emotional and behavioural difficulties related to their condition and associated restrictions on everyday life because of the nature of the treatment required.

Nevertheless, the existence of a medical diagnosis or a disability in itself does not imply that the student in question has special educational needs. A student with a particular diagnosis or medical condition may not require any form of additional educational provision in any phase of his/her education. In the context of these criteria, it is the student’s special educational needs rather than a medical diagnosis that must be considered.

It follows, therefore, that some students may not require Education Health and Care Plans or school-based SEN provision but they have physical conditions that, if reasonable adjustments are not made by the school, could hinder their access to education. The Equality Act 2010 states that public bodies must not discriminate and must make reasonable adjustments for disabled children and young people.
However, the SEN Code of Practice 2014 recognises that there is a significant overlap between disabled children and young people and those with SEN. Children and young people may therefore be covered by both SEN and disability legislation.

SEN Descriptors September 2014 Page 45
May participate in most/all activities but at a slower pace that peers or show signs of increasing fatigues during the school day

- will have a defined physical or medical condition that may be subject to regular medical/intervention;
- will have needs that may impact on their self-esteem and social relationships;
- will have moderate difficulties in aspects of curriculum access (e.g. wheelchair user);
- will have some gross and fine motor difficulties. Minor difficulties with spatial orientation;
- will make progress within the curriculum, but at lower levels than may be expected from performance on tasks where physical difficulty has less impact;
- will be independent in most activities;
- will be working at slower pace than peers or signs of increasing fatigue during the school day.

The student may:

- use specialist aids relating to their disability e.g. wrist splint;
- utilise limited, low tech specialist equipment to enhance their curriculum access;
- require limited adult assistance with practical aspects of the curriculum or self help skills or personal care.
- utilise specialist equipment to ameliorate difficulties with either curriculum or daily living

the student’s interests and be planned above all else as an aid to his/her learning and/or health needs.

Allowing for the emphasis of the Provision Map on addressing the student’s physical difficulties, the provision overall should be informed by flexible approaches to whole curriculum planning for individual students.

Specific skill development or ameliorative activities in support of targets may be required.

Flexible support in school to include dressing, undressing and toileting. Appropriate toilet with hoist available if needed. Changing bed and shower as appropriate.

Extra time provided to address opportunities and comprehensive resources for motor skill development. offered within the school curriculum

There will be focus on the educational implications of the physical difficulty but there may also be therapy targeted at these difficulties

Additional access to IT, specialist aids and adaptations may be necessary to facilitate access to the curriculum.

Consideration should be given to exam arrangements

Specialist transport may be required

Consideration should be given to the identification of a key worker.

The school may need to make reasonable adjustments to its environment and some building adaptations may be required.

Staff are able to monitor progress and demonstrate understanding of fine and gross motor skills development within personalised learning targets

Staff able to implement and manage changes and adaptations to the learning environment

Advice from external support agencies should be sought to inform and/or guide curriculum adaptation,

Multi agency collaboration will usually be essential.

School will seek Manual Handling Training from an external provider

There will be thorough monitoring of student progress in terms of effectiveness of the interventions arising from the Provision Map.
tasks;
• require a medical plan;
• require a level of adult assistance to access the curriculum, manage their condition, or move with safety around the environment;
• exhibit fatigue, lack of concentration or motivation due to their condition that has having a marked effect on classroom performance.

Most students will require access to a base for therapy or developmental programmes and/or special arrangements for personal and hygiene needs.

Strategies incorporating specific activities to overcome physical difficulties e.g. reducing written work.

Pace of teaching takes account of possible fatigues and frustration experienced by the student.

Consideration will need to be given to timetabling and location of rooms.

Delivery of physiotherapy programmes, support with physical aids and support needed in safely moving around the school as appropriate and advised by external specialists.

SENSORY IMPAIRMENTS

Deaf and Hearing Impairments

DESCRIPTION OF NEED

Some pupils with hearing loss require minimal support in school and others will need high levels of individualised and specialist help. Hearing loss may be mild, moderate, severe or profound. It may be temporary or permanent and affect one or both ears. It could be a conductive (e.g. caused by damage or malformation to the middle and outer ear) or sensori-neural (e.g. damage to the processing system in the cochlea or inner ear) or mixed loss. Some children and young people acquire a hearing loss later on in their development. Others have degenerative hearing loss. Around 45% of children with hearing loss have an additional learning, physical or medical difficulty. Some deaf children are now also identified as having “auditory neuropathy spectrum disorder” (ANSD).

The impact of a hearing loss does not always relate to the clinical definition. For example early support and modern technology may result in positive outcomes for profoundly deaf children. However a child with a moderate hearing loss who hasn’t had support and hearing aids early in life or who has ANSD may struggle to catch and keep up with similarly abled hearing peers.

Temporary mild or moderate hearing loss caused by frequent ear infections and “glue ear” are common in young children during foundation stage and key stage 1. For most children this will not affect progress and attainment in the longer term but for others the condition may compound existing learning difficulties or if it is not resolved can even cause permanent damage to hearing.

Most children with permanent hearing loss are identified through new-born hearing screening. When an older child is diagnosed schools need to be aware that most parents will be extremely anxious even if it appears that the child is managing well. Responding sensitively at an early stage and involving support services promptly at the time of diagnosis should be apriority.

A hearing loss is significant if it:

- Requires the child or young person to listen through artificial devices e.g. hearing aids, cochlear implants, FM systems and/or requires them to sustain their visual attention for long periods of time (e.g. to watch a signer and/or lip read).

- Means they will have difficulty adapting to or functioning in unfavourable acoustic environments e.g. where there is background noise and/or high levels of reverberation.

- Causes the child or young person to miss out on incidental learning e.g. peer and pretend play and learning, group discussions

- Causes a delay in acquiring and maintaining language and communication skills in keeping with the pupil’s age and abilities.
• Requires them to undergo intensive hearing, speech and language rehabilitation following cochlear implant surgery

• Results in the child having to learn and use sign language as their primary mode of communication and to access to learning, or to supplement delayed or limited spoken language

• Prevents the child or young person from achieving and maintaining levels of attainment in keeping with their age and abilities or from making expected progress.

• Has an adverse effect on self esteem and confidence

• Has an adverse effect on social interaction especially with peers and in developing an understanding of how others think and feel.

Children with permanent or long term hearing loss are likely to experience some or all of these difficulties in schools or early year’s settings. Assessment and monitoring should be holistic and include observation of and sensitive discussions with children and young people, parents and carers as well as curriculum assessments and other standardized or specialist tests e.g. for language, communication, listening and speech discrimination.

Particular care needs to be taken in assessing children and young people who are deaf and have additional needs. Where communication and language is severely delayed the child or young person may be more able than is first assumed. Regular strategies and intervention for children with hearing loss may also be less available to a child who has other difficulties e.g. sign language for a child with physical difficulties.

Teachers of the Deaf, educational audiology services and personal FM systems will be provided free of charge at all levels of need and will be determined following consultation/assessment and on the basis of the NATSIP criteria and NDCS quality standards. Support workers will need to have access to continuous professional development in order to acquire and maintain the specialist skills and qualifications required for their role. A range of CPD opportunities including BSL courses will be made available through the specialist support services.

</table>
| Students with moderate or severe hearing loss may have delayed language development. | **In addition to the basic strategies and approaches described above,** some pupils may also require daily support from an adult in school e.g. TA or SENCO:  
- For equipment management  
- To monitor and support understanding of classroom instructions and key learning points at different times in a lesson.  
- To prepare and provide visual resources to reinforce key concepts and vocabulary  
- To deliver an individual programme particularly pre and post tutoring e.g. for speech, language, literacy and listening | May benefit from the advice and support of an educational audiologist with regard to assessing and improving the acoustic environment for deaf learners.  
Regular audiological reviews and monitoring will be undertaken by the Health Authority.  
May benefit from additional or specialist ICT software and hardware.  
May require a CAF to be put in place |
| They may have difficulties with the perception of some speech sounds especially at the ends of words | The student may be slower to process and understand verbal instructions.  
The student may shows signs of increasing fatigue e.g. towards the end of the school day.  
They may have great difficulty adapting to or functioning in unfavourable acoustic environments e.g. where there is background noise and/or high levels of reverberation.  
May sometimes have issues with self-esteem, emotional wellbeing and social knowledge.  
The hearing loss may affect the student’s social | All school staff should have some basic deaf awareness training and key members of staff should attend one of the full days provided by the support service.  
Key adults (class teacher/form tutor, SENCO, teaching assistant) should have a good understanding of the individual child’s hearing loss and how it affects their understanding and access to learning and social opportunities. For example: **Moderate and severe Hearing loss:** The loss is permanent or long term and can be conductive but is likely to also have a sensori-neural element. The student usually wears two hearing aids all the time. The hearing loss may be worse if the child has a cold or |
interaction;

Where the effects of the loss are more marked and severe, and where their functioning in school is at a lower level than would be expected, there may be a greater need for supported provision, with higher levels of in-class support and greater involvement of a specialist teacher of the deaf.

develops glue ear. Some will have a condition that causes hearing to deteriorate over time. High frequency hearing loss means that there may be particular difficulties in perception of certain consonants.
The specialist teaching service may help to monitor and review progress or offer a series of visits to support specific objectives or to model/demonstrate activities and approaches to supporting adults.

**Visual Impairment**

**DESCRIPTION OF NEED**

Visual impairment can have a significant impact on a student’s educational development in some cases resulting in learning delay and reduced curricular access. This will require careful monitoring by schools and the Visual Impairment Team. It is possible for some students to acquire visual loss later in life through accident or illness.

The Code of Practice is clear that schools can consult outside agencies for advice in preventing the development of more significant needs. Schools should feel free to contact the Visual Impairment Team for advice at any time.

Visual difficulties take many forms, with widely differing implications for a student’s education. They range from relatively minor and remediable conditions to total blindness. Some students are born blind; others lose their sight, partially or completely, as a result of accident or illness. In some cases visual impairment is one aspect of a multiple disability. Whatever the nature and cause of the student’s visual impairment, the major issue in identifying and assessing his/her special needs will relate to the degree and nature of the functional vision and the student’s ability to adapt socially and psychologically, as well as to progress in an educational context.

A defect of a student’s colour vision alone may not necessarily result in any special educational needs.

**Definitions for Students & Young People with Visual Impairment**

The standard definition of normal vision is 6/6. This means a person can see at 6 metres what they are expected to see at 6 metres. The larger the number on the right the weaker the distance vision. For those with short sightedness assessment would indicate appropriate font size.

The following classification applies to corrected vision with both eyes open. Acuity criteria are for guidance purposes only. The professional judgement of a QTVI should be applied as necessary to decide on the classification. For example, a young person may have a mild reduction in visual acuity but be functioning within a different visual category due to an additional ophthalmic condition, e.g. Nystagmus, visual field reduction, cerebral (cortical) visual impairment, and/or additional learning difficulties.

**Cortical Visual Impairment (CVI):** A condition where some of the special ‘vision’ parts of the brain and its connections are damaged and the child or young person with this are unable to make sense of what they see. However, it can improve as they get older.

**Perceptual Difficulties:** Inability to perceive, integrate and recall visual stimuli.

**Mild Sensory Loss:** Visual acuity better than 6/18 with visual field loss.

**Moderate:** Visual acuity between 6/18 and 6/36.

**Severe:** Visual acuity between 6/36 and 6/60.

**Profound:** Visual acuity 6/60 or less.

| Some deterioration in certain areas of academic performance e.g.  
  • deteriorating handwriting,  
  • slowness in copying from the board,  
  • increasingly asking for written instructions to be given verbally.  
A recognisable ophthalmic condition which has the potential to affect the learning process. | The central form of action for most students experiencing visual difficulties will be that which the class or subject teacher is able to take using resources and strategies available in the ordinary classroom.  
Tasks may need to be differentiated by some variation of teaching material and time given to complete tasks.  
The school will provide easily made changes in the learning environment; provide some differentiation to meet the needs of the range of students within the ordinary classroom.  
Basic classroom management strategies should be put in place Examples include:  
  • Favourable Positioning  
  • Repetition of instructions  
  • Multi-sensory approaches to teaching and learning – practical reinforcement  
  • Management of turn taking in classroom discussions , repeating key points | Parent/carer involvement through normal school policy arrangements.  
In general expensive specialist items will be provided by NCC via the Visual Impairment team, while smaller and/or consumable items will be provided by the school.  
General whole school training, advice and support from external specialists e.g. the Visual Impairment team.  
Occasional consultation and advice from the Visual Impairment team.  
Monitoring by class/subject teachers/SENCo |

</tr>
<tr>
<td>Targets will be written with cognisance of the Visual Impairment team advice and reviewed regularly.</td>
</tr>
<tr>
<td>The Mobility Officer from the Visual impairment Team will assess and provide a report if required. This is free to the school.</td>
</tr>
<tr>
<td>The monitoring and review cycle will vary depending on the needs of the student. The class teacher will monitor progress and their visual access to the curriculum on an on-going basis. Any concerns will prompt a request for additional advice or intervention from the Visual Impairment team.</td>
</tr>
<tr>
<td>Teacher of the VI to liaise with SENCo/school examination secretary to ensure that appropriate SATS/GCSE/other examination concessions are applied for in relation to the visually impaired student.</td>
</tr>
</tbody>
</table>
- Learn particular skills to improve curriculum access e.g. touch typing or use of magnifiers and other specialist equipment;
- Learn mobility skills

Student may benefit from using specialist equipment e.g.
- Sloping reading/writing boards
- Low power magnifiers
- Dark pens/pencils
- Dark lined books/paper
- Large print materials (e.g. reference books)

Very occasionally printed material may need to be enlarged. It would be expected that the school would use their own resources for this.

Schools need to have regard to advice submitted by the Visual Impairment Team as well as parents, health professionals etc, in how they present the curriculum e.g.

- Use of Whiteboard
- Accessibility of printed materials, and how they should be adapted
- Modification of teaching methods used
- Speed of work
- Physical position of student
## Access to the High Needs Funding (VI)

</table>
| Visual impairment will have a severe impact on the learners ability to function independently in the school environment and in their everyday life. May have extreme difficulties in making and maintaining relationships resulting in frequent social isolation and vulnerability, with some disengagement requiring extensive adult support. | Will require LVAs and will need planned 1:1 support the majority of the time. Will require mobility and independence programmes. Will always need practical tasks, activities and experiments modifying. The significant modification of materials and presentation will allow access to the majority of the curriculum e.g. touch typing Will require significant 1:1 planned intervention:  
- support to manage personal access equipment and  
- specialist teaching of life skills to access age appropriate activities independently e.g  
  - money management,  
  - shopping,  
  - personal hygiene, | The Visual Impairment Team can support by providing appropriate IT equipment, modified materials and other specialist equipment e.g. talking calculators etc. |
**Multi-sensory Impairment and Deaf blindness**

“A person is regarded as deaf blind if their combined sight and hearing impairment cause difficulties with communication, access to information and mobility. This includes people with a progressive sight and hearing loss.”

(Department of Health “Think Dual Sensory” 1995)

“Deaf-blindness is not just a deaf person who cannot see, or a blind person who cannot hear. The two impairments together increase the effects of each”.

http://www.sense.org.uk/content/about-deafblindness

**Multi-sensory impairment (MSI)** is generally associated with children who are born with a sight and hearing loss. They may have a range of other disabilities that affect their ability to process information and communicate.

Children who are born with vision and hearing impairments will need to use their other senses – touch, body awareness in space, balance, taste and smell – to access information which is more easily available to other children. This can delay development. Communication and learning are significant challenges for children born with deaf blindness, and key concepts are often achieved later than might be expected. Developing an awareness of others, self-perception, and the impact of actions on others can all be affected. This can sometimes lead to a misdiagnosis of autism or a severe learning disability, when in fact the key factor impacting on learning is the combined sight and hearing loss.

Some of the conditions associated with multi-sensory impairment/deaf blindness include

- CHARGE
- Usher Syndrome
- Downs Syndrome
- Cerebral palsy
- Congenital maternal rubella

Some children and young people acquire a second sensory impairment as they get older. For instance children with Usher syndrome may have hearing loss from birth but develop visual problems as teenagers. The diagnosis of a second sensory impairment or the confirmation that a condition is deteriorating will usually be very distressing for young people and their families. Responding sensitively at an early stage and involving support services promptly should be a priority. The provision of counselling may be as important as the provision of support to address the needs on a practical day-to-day level.

Children with deaf blindness/MSI will usually need to have ongoing involvement from both HI and VI services. They should also be assessed and monitored by a qualified specialist teacher for MSI as some of the strategies and support commonly suggested for VI and HI pupils may not be appropriate for pupils with dual sensory impairment.
Multi-sensory impairment or deaf blindness may be:
- Mild – dual impairment with a mild loss in both modalities
- Moderate – dual impairment with a moderate loss in both or the most affected modality
- Severe – dual impairment with a severe loss in both of the most affected modality
- Profound – dual impairment with a profound loss in both or the most affected modality

(NATSIP eligibility criteria, 2012)

The impact that deafblindness/MSI has on a person will vary according to the cause, age of onset, and the skills a person has in using their residual sight and hearing.

Exemplars of the impact on learning and the support that should be put in place for pupils with different degrees of MSI/deaf blindness will be developed in partnership with a newly established working group which includes parents, voluntary organisations and local services.
SOCIAL EMOTIONAL AND MENTAL HEALTH DIFFICULTIES

DESCRIPTION OF NEED

Children and young people may experience a wide range of social and emotional difficulties which manifest themselves in many ways. These may include becoming withdrawn or isolated, as well as displaying challenging, disruptive or disturbing behaviour. These behaviours may reflect underlying mental health difficulties such as anxiety or depression, self-harming, substance misuse, eating disorders or physical symptoms that are medically unexplained. Other children and young people may have disorders such as attention deficit disorder, attention deficit hyperactive disorder or attachment disorder.

Schools and colleges should have clear processes to support children and young people, including how they will manage the effect of any disruptive behaviour so it does not adversely affect other pupils. The Department for Education publishes guidance on managing pupils’ mental health and behaviour difficulties in schools – Mental Health and Behaviour Guidance: [http://tinyurl.com/MHB-2014](http://tinyurl.com/MHB-2014)

Where more specialist provision is required, schools, colleges and early years providers should have clear arrangements in place with local health partners and other organisations for making appropriate referrals to Child and Adolescent Mental Health Services (CAMHS). Information to support schools to identify and meet the needs of these students is available through the Northamptonshire Targeted Mental Health in Schools (TaMHS) Programme. [http://www.northamptonshire.gov.uk/en/councilservices/EducationandLearning/services/traded/Pages/TargetedMentalHealthinSchools.aspx](http://www.northamptonshire.gov.uk/en/councilservices/EducationandLearning/services/traded/Pages/TargetedMentalHealthinSchools.aspx)

Behavioural difficulties do not necessarily mean that a child or young person has a SEN and should not automatically lead to a pupil being registered as having SEN. However, consistent disruptive or withdrawn behaviours can be an indication of unmet SEN, and where there are concerns about behaviour, there should be an assessment to determine whether there are any causal factors such as undiagnosed learning difficulties, difficulties with communication or mental health issues. If it is thought housing, family or other domestic circumstances may be contributing to the presenting behavior, a multi-agency approach, supported by the use of the Common Assessment Framework (CAF) may be appropriate. In all cases, early identification and intervention can significantly reduce the need for more expensive interventions or sanctions at a later stage.

Use of the phrase ‘Social, Emotional and Mental Health’ is therefore meant to have a specific connotation to help determine the extent and nature of the student’s special educational needs in this area. It should not be applied as a blanket term to include in the SEN framework all those:

- Whose behaviour may more loosely be described as anti-social or disaffected
- Who are in the care of the LA

Students presenting social, emotional and mental health difficulties may act unpredictably, unusually or in an extreme fashion in a variety of social, personal or physical settings. **Severely withdrawn or passive behaviour may be as significant an indicator as aggressive or very strange or age inappropriate behaviour.**
Schools’ pastoral care arrangements should ensure that students are able to discuss any health-related and other problems with a relevant health professional, educational psychologist, education welfare officer, counsellor or other professional. A Pastoral Support Plan is a school-based intervention to help an individual student manage and modify their behaviour and should be drawn up for:

- Any student who needs extra support in managing their behaviour.
- Any student who has had a number of fixed term exclusions.
- Any student whose behaviour is deteriorating rapidly.

<tr>
<td>The students difficulties that may present in either the home and/or school may include:</td>
<td>Additional levels of pastoral support are likely to include:</td>
<td>Staff training regarding the characteristics of students with SEMHD and the impact on curriculum access. Could be provided by external agencies e.g. behaviour support specialists, educational psychologists or Education Entitlement Officer – Mental Health.</td>
</tr>
<tr>
<td>• persistent emotional or behavioural difficulties that have not been ameliorated by differentiated learning opportunities or by the behaviour management techniques usually employed by the school,</td>
<td>• Social support groups weekly;</td>
<td>PSPs <strong>may</strong> be set following consultation with external professionals such as staff from specialist settings, Behaviour Support staff, educational psychologists, and professionals from the CAMHS.</td>
</tr>
<tr>
<td>• poor concentration despite structured and time limited tasks – poor personal organisation skills,</td>
<td>• Individual support through daily mentoring by a skilled adult;</td>
<td>Connexions Service involvement if concerns re NEET.</td>
</tr>
<tr>
<td>• may be withdrawn and isolated, generally seeking too little adult attention with limited or selective communication, may not communicate feelings,</td>
<td>• Peer support strategies at key times;</td>
<td>Parent /carer involvement in programmes is particularly desirable. All agencies should work together to ensure that parental involvement is achieved wherever possible.</td>
</tr>
<tr>
<td>• difficulties with interpersonal communication or relationships, reluctant to share, reluctant to participate in social groups, distracts other students, careless with learning materials,</td>
<td>• Clear communication throughout the school management system with weekly updates;</td>
<td>Baseline recording of particularly difficult or significant behaviours should be made in order to carry out an ‘ABC analysis’ to inform interventions and evaluations (Antecedents, Behaviour and Consequences).</td>
</tr>
<tr>
<td>• being bullied,</td>
<td>• Nurture groups;</td>
<td>Success will be celebrated.</td>
</tr>
<tr>
<td>• pre-empting failure in tasks</td>
<td>• Positive support</td>
<td>The student may need an individual risk assessment.</td>
</tr>
<tr>
<td>• being reluctant to attend school</td>
<td>• Anger management</td>
<td></td>
</tr>
</tbody>
</table>

These **could include the strategies included in SEAL and TaMHS.**

There should be strategies to focus on emotional needs. These **may include** strategies such as Circle Time, circle of friends, discussion groups, mentoring/buddying.

Appropriate behaviour and expectations are taught alongside the academic curriculum. Student and parent involvement in the behavioural programmes will be clearly defined.

Staff are able to monitor students during break times and lunchtimes and have strategies in place during unstructured times.
- unwillingness to acknowledge or accept responsibility for his/her own actions.

Consideration should be given to the use of IT, audio visual support, 'time out' to support a differentiated curriculum for a student who has difficulties in engaging in traditional methods of curriculum delivery.

There should be staff training regarding the characteristics of students with social, emotional and mental health problems and the impact on curriculum access.

In some cases the facility to attend in-school behaviour centres may be appropriate.

Individual counselling from external agencies may be appropriate.
