WARNING

READ and UNDERSTAND the Owner's Manual completely before using this sprayer.
Assemble, test, and use only in accordance with the Owner’s Manual instructions.

READ and FOLLOW chemical label instructions. Pesticides are hazardous chemicals.

KNOW emergency procedures BEFORE handling chemicals. Sprayer leaks, bodily chemical contact, poisoning, and spills require immediate response.

AVOID inhaling, ingesting, or coming into contact with any chemicals.

WEAR personal protective gear when filling, using, cleaning, and servicing the sprayer.

KEEP sprayer and spray materials away from children and pets. Pesticides are especially toxic to them.

EXERCISE CAUTION in ATV vehicle handling and do not exceed 5 MPH. ATV will be less stable and handle very differently with filled sprayer attached.

DO NOT TURN ON POWER to sprayer until ready to spray in order to avoid unintentional spray release.

ALWAYS keep a fire extinguisher rated “ABC” nearby.

Improper use of the sprayer or handling of chemicals could result in serious injury or illness to the operator or nearby persons/animals, or could cause damage to the environment.

** This sprayer is recommended for use in spraying non-flammable liquids such as pesticides, water for plants/trees or dust control, or water-based non-flammable sealants or stains for outdoor wood surfaces. However, WE RECOMMEND THAT THE SPRAYER NOT BE USED FOR OTHER PURPOSES ONCE IT HAS BEEN USED FOR SPRAYING PESTICIDES. Any chemical will leave some residual in the tank liner or sprayer components, even after the sprayer has been properly cleaned. These residual chemicals can have unexpected effects on future uses. For example, spraying water or other liquids that are contaminated with residual pesticide may result in unforeseen hazards to plant or animal life.

Intended Use

The sprayer is intended for use in spraying agricultural pesticides and other non-flammable liquids.

SPRAYING PESTICIDES:
Pesticides are hazardous chemicals that must be handled with caution as directed throughout this manual and on the pesticide label. Pesticides are regulated by the United States Environmental Protection Agency (EPA) and defined as:

Any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Though often misunderstood to refer only to insecticides, the term pesticide is a comprehensive term that applies to insecticides, herbicides, fungicides, and various other substances used to control pests.

The sprayer is intended for use in spraying pesticides in liquid form only. The sprayer is NOT intended for use in spraying pesticides in dry or aerosolized form, or for use with fumigants.

Some formulations of liquid pesticides do not remain in solution and should be agitated to maintain a uniform mix. An optional pressure regulator/agitator (Item #2681032) is available for use with this sprayer and should be used when spraying pesticides classified as "flowable" ("F" or "L"), "wettable powder" ("WP" or "W"), "emulsion" ("EC" or "E"), "microencapsulated" ("M"), or water dispersible granules ("WDG" or "DF"). (See pesticide label to determine its classification.)

This sprayer comes equipped with a spot spray gun and broadcast nozzles. Use the spot spray gun if you desire to apply pesticide only on selected plants. Use the broadcast nozzles if you wish to spray large ground areas.

SPRAYING OTHER LIQUIDS:
In addition to spraying pesticides, this sprayer may be used to spray other non-flammable liquids. Example uses include: watering plants/trees or spraying water for dust control, or applying water-based, non-flammable sealant or stain to outdoor wood surfaces. However, WE RECOMMEND THAT THE SPRAYER NOT BE USED FOR OTHER PURPOSES ONCE IT HAS ALREADY BEEN USED FOR SPRAYING PESTICIDES. Any chemical will leave some residual in the tank liner or sprayer components, even after the sprayer has been properly cleaned. These residual chemicals can have unexpected effects on future uses. For example, spraying water or other liquids that are contaminated with residual pesticide may result in unforeseen hazards to plant or animal life.

Contact NorthStar Product Support at 1-800-270-0810 for any questions about the appropriate use of the sprayer and/or optional accessories.
# Summary of Important Safety Information

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Read and understand <strong>this owner's manual</strong> completely before using the sprayer. Read each <strong>chemical label's instructions</strong> before handling the chemical.</td>
</tr>
</tbody>
</table>

*Improper use of the sprayer or handling of chemicals could result in serious injury or illness for the operator or nearby persons/animals, or cause damage to the environment.*

LISTED BELOW is a summary of safety information of particular importance. See individual sections of this owner's manual for more details.

### DURING ASSEMBLY

- **EXERCISE CAUTION** when attaching remote switch to battery terminals. Follow the steps listed in the Assembly section of this manual in *exact sequence* when connecting the sprayer's remote switch battery clamps to the battery terminals. *Caution must be exercised to avoid contact with battery acid and to prevent sparking.*
- **CHECK** and **TEST** completed assembly as directed in this manual. Serious injury could result from chemical leaks if sprayer is improperly assembled.
- **DO NOT MODIFY** sprayer design.

### DURING OPERATION

#### General Chemical Safety

- **READ** and **FOLLOW** each chemical label's instructions and warnings.
- **AVOID** inhaling, ingesting, or coming into contact with any chemicals.
- **KNOW** applicable licensing and regulatory requirements for the chemical you plan to use.
- **KNOW** emergency procedures before handling chemicals. Carefully review "Chemical Accident Procedures" listed below and later in this manual. Also see First Aid instructions on the chemical label.
- **WEAR** protective clothing, **eye protection**, and **chemical resistant gloves** when filling, using and cleaning the sprayer. Wear additional protective gear, such as facemask or apron, as recommended on the chemical label.
- **EXERCISE EXTRA CAUTION** around children and pets. Pesticides are especially toxic to them. Keep sprayer and spray materials away from them at all times.
- **DO NOT MIX OR POUR** chemicals in an enclosed, unventilated area
- **DO NOT USE** flammable or corrosive chemicals in the sprayer.
- **FLUSH** the sprayer before switching chemicals in order to prevent dangerous chemical interactions.
- **STORE** pesticides in a correctly labeled container and in a secure location.
- **MONITOR** the health of operators frequently exposed to pesticides, as recommended by the chemical label or local/federal regulations.

#### Chemical Application Safety

**Before Spraying**

- **INSPECT** and **PREPARE** sprayer before each use as directed in this manual.
- **DO NOT TURN ON POWER** to sprayer until ready to spray in order to avoid unintentional spray release.
- **MAKE SURE BROADCAST NOZZLES ARE ORIENTED** to spray **straight down** before starting the sprayer. An incorrectly positioned broadcast nozzle may spray chemicals on you or others.
- **DO NOT SPRAY** when wind speed exceeds 4 MPH in order to minimize spray drift.
- **CLEAR** work area of people/pets and **POST** warning notices to restrict access for the period recommended on chemical label.
- **KEEP** sprayer and spray materials away from children/pets. Pesticides can be especially toxic to children and animals.
- **DO NOT ALLOW** anyone younger than 16 to **operate** sprayer since pesticides are especially toxic to children.

**During Spraying**

- **DO NOT OVERAPPLY** pesticide. Apply at rate recommended by chemical manufacturer. Excess pesticide can be dangerous to humans/animals, damage desirable plants, and contaminate soil and water sources.
- **DO NOT EAT, DRINK, SMOKE, RUB YOUR EYES, or TOUCH YOUR BARE SKIN** while handling chemicals and spraying.
- **NEVER POINT** THE SPRAY GUN at people or animals.
Summary of Important Safety Information (continued)

- **EXERCISE EXTRA CAUTION** when spraying near areas accessible to children and pets.
- **CLEAN up spills immediately** per instructions on the chemical label.
- **TURN OFF** vehicle and set brake or block wheels, **TURN OFF** power to sprayer, and **RELIEVE** system pressure before leaving sprayer unattended.
- **SEE Troubleshooting section of this manual before attempting any repairs.** Wear personal protective equipment and follow safety instructions.

After Spraying
- **CLEAN sprayer immediately after use** according to the directions provided in this manual.
- **DECONTAMINATE yourself after you are done spraying** and have cleaned the sprayer. Wash all exposed areas of the body with soap and water, and remove and launder clothing.
- **DISPOSE OF or STORE** remaining chemicals in secure storage with correctly marked container.

**ATV Vehicle Handling Safety**
- **DO NOT ALLOW** drivers younger than 16 to operate ATV with sprayer attached.
- **EXERCISE SPECIAL CAUTION** in ATV vehicle handling and **DO NOT exceed 5 MPH**. ATV will be less stable and perform very differently with filled sprayer attached. Exercise particular caution on sloped or rough surfaces to avoid rollover. Use a vehicle equipped with rollover protection for use on non-level terrain.
- **DO NOT RIDE or TRANSPORT** cargo on the sprayer.

**Chemical accident procedures**

Immediate response is necessary in the event of sprayer leaks, bodily chemical contact, poisoning, or spills. See instructions below:

| **Sprayer leak** | **If the sprayer develops a leak, immediately stop spraying.** Turn off power to the sprayer and follow directions below, as applicable. |
| **Bodily chemical contact** | **Personal contamination can occur when chemicals splash, spill, or spray directly onto a person.**
  1. Immediately follow First Aid instructions on chemical label.
  2. **General procedures can include:**
     a) Eyes – immediately flush with water.
     b) Skin – wash all contaminated skin surfaces with soap and water.
     c) Clothing – remove contaminated clothing. Dispose of heavily contaminated clothing per chemical label instructions.
  3. Seek medical advice if instructed on the label or the victim experiences symptoms of harmful effects. Bring the chemical label for reference. |
| **Poisoning by ingestion or inhalation** | **In case of poisoning from ingestion or inhalation:**
  **If the victim has collapsed or is not breathing, call 911.** Otherwise:
  1. If you are the victim, immediately seek assistance from nearby personnel because you may become incapacitated.
  2. Immediately follow first aid instructions on chemical label.
  3. Call a poison control center for further advice. **In the U.S., call 1-800-222-1222.** Have the chemical label available for reference. |
| **Chemical spills** | **Chemical spills must be quickly contained and properly cleaned up.** Refer to the chemical label for any specific clean-up instructions.
  **General procedures include:**
  1. **Controlling** the spill by stopping the source of the spill.
  2. **Containing** the spill so that it does not spread and get into water sources.
  3. **Cleaning up** the spill immediately.
  4. **Seeking additional advice** from:
     - **Chemical manufacturer.** See chemical label for contact information.
     - **State pesticide regulatory agency.** In the U.S., call the National Pesticide Info. Ctr. at 800-858-7378 for assistance in contacting your state’s agency. |
WARNING

READ and UNDERSTAND the Owner’s Manual completely before using this sprayer. Assemble, test, and use only in accordance with the Owner’s Manual instructions.

READ and FOLLOW chemical label instructions. Pesticides are hazardous chemicals.

KNOW emergency procedures BEFORE handling chemicals. Sprayer leaks, bodily chemical contact, poisoning, and spills require immediate response.

AVOID inhaling, ingesting, or coming into contact with any chemicals.

WEAR personal protective gear when filling, using, cleaning, and servicing the sprayer.

EXERCISE CAUTION in vehicle handling. Vehicle will be less stable and handle very differently with filled sprayer attached.

DO NOT TURN ON POWER to sprayer until ready to spray in order to avoid unintentional spray release.

Improper use of the sprayer or handling of chemicals could result in serious injury or illness to the operator or nearby persons/animals, or could cause damage to the environment.

Unpacking the Manual Bag

The following items are found in the manual bag.

- Drain Cap (Qty 1) 37680
- Rubber Washer 5232
- Hose Guide 777110
- Gun Clip (Qty 2) 52034
- 5/16" Wing Nut 777450
- Small Hose Clamp (Qty 2) 30746
- 5/16 x 3/4" Flange Bolt (Qty 2) 82015
- 5/16 x 3/4" Carriage Bolt 82088
- 5/16 x 1/2" Bolt 82014
- #10 x 1/4" Screw (Qty 2) 82057
- 5/16 Flange Nut 82019
- 5/16 Nyloc Nut (Qty 2) 82020
- Large Hose Clamp (Qty 6) 777119
- 5/16 x 2" Flange Bolt 82018
- 5/16 Fender Washer (Qty 2) 82099
- 5/16 USS Flat Washer (Qty 2) 82021
- Nozzle Hose Barb (Qty 2) 777454
- Right Broadcast Nozzle – Green 777459
- Left Broadcast Nozzle – Blue 777460
- Nozzle Adapter (Qty 2) 38545
- Nozzle Nut (Qty 2) 5230
- 1/2" MPT x 1/2" Hose Barb 777445
- Battery Clamps 778259
- Boom Valve Assembly 5232 (Qty 2) Rubber Washer 5222 (Qty 1) 3/4" GHT x 1/2" Hose Barb 5212 (Qty 2) 1/2" Flat Seat Hose Barb 777850 (Qty 2) 3/8" GHT Swivel 777849 (Qty 1) Boom Valve 777848
- Remote Switch 35206
Assembly

**Step One: Install pressure gauge**
Thread in pressure gauge. Hand tighten, then turn 1 full turn with a wrench.

**Step Two: Attach gun hose to spray gun and pump**
1. Thread in \( \frac{1}{2} \)" MPT x \( \frac{1}{2} \)" hose barb.
2. Attach one end of the gun hose to the 3/8" hose barb. (Follow hose clamp instructions).
3. Attach the other end of the gun hose to the spray gun. (Follow hose clamp instructions).

**Step Three: Attach hose guide to tank**
1. Route the gun hose through the hose guide.
2. Attach the hose guide to tank with 5/16 x 1/2" bolt.

**Hose clamp installation instructions:**
1. Slide hose clamp over the end of the hose.
2. Push the hose onto the hose barb.
3. Slide the hose clamp over the hose barb.
4. Tighten the hose clamp.

---

![Diagram of assembly components](image-url)
Step Four: Attach gun clips to tank
Fasten the gun clips to the sprayer tank with #10 x 1/4" screws.

Step Five: Attach drain cap to tank
Press the rubber washer into the drain cap with your finger and thread the drain cap onto the tank.

Step Six: Install 48" hose and boom valve
1. Attach one end of the 48" hose to the pump 1/2" hose barb. (Follow hose clamp instructions).
2. Attach the other end of the 48" hose to the boom valve. (Follow hose clamp instructions).
Step Seven: Attach mount arm to nozzle bracket mount
1. Use (2) 5/16 x 3/4" flange bolts, (2) 5/16 USS flat washers, and (2) 5/16 nyloc nuts to fasten. Install as shown, note that the 5/16 USS flat washers go between the mount arm and nozzle bracket mount.
2. Do not tighten completely.

Step Eight: Create nozzle bracket assembly
1. The top of the nozzle bracket has no web between the flanges.
2. Secure nozzle hose barbs to nozzle bracket with nozzle nuts.
3. Thread nozzle adapters onto nozzle hose barbs.
4. Thread on left (blue) and right (green) broadcast nozzles. The nozzle is correctly positioned when the screw on the face of the each broadcast nozzle is at the top.
**Step Nine: Attach nozzle bracket assembly to nozzle bracket mount**

1. Mount the nozzle bracket assembly to the nozzle bracket mount using (1) 5/16 x 3/4" carriage bolt, (1) 5/16 fender washer, and (1) 5/16 wing nut.
2. Do not tighten completely.

**Step Ten: Attach sprayer to vehicle**

1. **NOTE**: If your vehicle battery will be inaccessible after the sprayer is attached, proceed to "Step Thirteen: Connect power cords to vehicle battery" before performing Step Ten.
2. Secure the sprayer tank to your ATV rack with the two tank straps.
3. Secure mount arm to ATV hitch with (1) 5/16 x 2" flange bolt, (1) 5/16 fender washer, and (1) 5/16 flange nut. Adjust the position of the boom mount so that it is perpendicular with the back of the ATV, or parallel to the line of travel.
4. Complete the adjustment of the nozzle bracket mount assembly by rotating the nozzle bracket mount until it is perpendicular to the ground. Tighten the 5/16-18 flange bolts to 20 ft-lbs. (The pivot is to accommodate angled hitches.)
Step Eleven: Adjust spraying height
1. Loosen the wing nut and slide the nozzle bracket up or down to set the nozzles at a height of 24" from the ground.
2. Tighten the wing nut.

Step Twelve: Connect boom valve to nozzle hose barbs
Use (2) 10" hoses and (4) large hose clamps to connect boom valve to the nozzle hose barbs.
Assembly (continued)

Step Thirteen: Connect power cords to vehicle battery

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Batteries are hazardous because they contain caustic acid, can emit explosive gases, and can cause electric shock.</td>
</tr>
<tr>
<td>Caution must be exercised when making connections to a battery to avoid shock and contact with the acid, and to prevent any sparking that could lead to an explosion.</td>
</tr>
<tr>
<td>ALWAYS follow the safety instructions and steps listed below in exact sequence when connecting the sprayer’s remote switch to the battery terminals.</td>
</tr>
</tbody>
</table>

1. Preparatory safety

Preparatory safety steps:
- ALWAYS use eye protection
- NEVER smoke or work near sparks or other sources of ignition.
- NEVER touch both battery terminals at the same time or with any non-insulated tools.
- If battery acid contacts skin or clothing, flush immediately with water and neutralize with baking soda.

2. Identify sprayer's power cords

Identify the power cords shipped with the sprayer.
There are three power cords for the sprayer that you will eventually connect end to end to power the sprayer. Locate and identify these three cords:
- a) The battery power cord and the pump power cord are shipped connected together to the sprayer.
- b) The remote switch power cord is packed separately in the Manual Bag.

![Diagram of sprayer showing battery, pump, and remote switch power cords.](attachment:image.png)
### Assembly (continued)

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.</td>
<td><strong>Separate power cords</strong>&lt;br&gt;Disconnect the battery power cord from the pump power cord.</td>
</tr>
<tr>
<td>4.</td>
<td><strong>Prepare wire ends</strong>&lt;br&gt;Prepare the wire ends of the sprayer's battery power cord for connection to the vehicle battery:&lt;br&gt;a) Determine the type of end connectors you need to connect to your vehicle's battery terminals.&lt;br&gt;b) Install battery clamps (supplied) or end connectors of your choosing on the bare ends of the sprayer's battery power cord wires.&lt;br&gt;<strong>To install battery clamps:</strong>&lt;br&gt;1. Remove red plastic handle shield from red battery clamp and slide onto red wire&lt;br&gt;2. Strip red battery cord wire 1/2”&lt;br&gt;3. Insert bare wire under raised hoop on red battery clamp handle&lt;br&gt;4. Use a pliers to press hoop down and crimp wire&lt;br&gt;5. Fold prongs over wire insulation to hold wire in place&lt;br&gt;6. Push plastic handle shield back over battery clamp handle&lt;br&gt;7. Repeat for black wire and black battery clamp.</td>
</tr>
<tr>
<td>5.</td>
<td><strong>Connect power cord to battery</strong>&lt;br&gt;Connect the sprayer's battery power cord to the vehicle battery using the following procedure:&lt;br&gt;a) Disconnect the vehicle battery ground wire.&lt;br&gt;b) Connect the remote switch's red battery clamp or red wire connector to the positive (+) terminal of the battery.&lt;br&gt;c) Connect the remote switch's black battery clamp or black wire connector to the negative (-) terminal of the battery.&lt;br&gt;d) Reconnect the vehicle battery ground wire.&lt;br&gt;<strong>WARNING:</strong> Always connect in this sequence to avoid possible shock.</td>
</tr>
<tr>
<td>6.</td>
<td><strong>Verify connection</strong>&lt;br&gt;Verify a complete connection has been made by checking with a DC voltmeter, or by briefly connecting to the pump power cord and listening for pump activation.</td>
</tr>
<tr>
<td>7.</td>
<td><strong>Attach sprayer to vehicle if haven't yet</strong>&lt;br&gt;If you have not yet mounted the sprayer to your vehicle, do so at this time following the instructions in &quot;Step Eleven: Attach Sprayer to Vehicle&quot;.</td>
</tr>
</tbody>
</table>
8. Connect all three power cords together

Connect the three sprayer power cords together.

a) Check to be sure the power switch is in the "OFF" position on the remote switch power cord.
b) Connect the one end of the remote switch power cord to the battery power cord and the other end to the pump power cord.

9. Attach remote switch to vehicle

Using supplied Velcro pads, affix remote switch to vehicle in a position that is easily reached from the driver's seat.

10. Disconnect after use

**AFTER EACH USE, disconnect power to the sprayer** by disconnecting the sprayer's remote switch power cord from the battery power cord — the battery power cord may remain connected to the battery.

**NOTE:** It is important to disconnect power to the sprayer when not in use, both for safety reasons and to prevent the pump from draining the battery. **ALWAYS** verify that the power has been disconnected before servicing the sprayer.

11. To disconnect permanently

When it is necessary to disconnect the sprayer's battery power cord from the battery, use the following procedure:

1. Disconnect sprayer's remote switch power cord from the battery power cord.
2. Disconnect the battery power cord from the vehicle battery as follows:
   a) Disconnect vehicle battery ground wire.
   b) Disconnect the battery cord's black battery clamp or black wire connector from the negative(-) terminal of the vehicle battery.
   c) Disconnect the battery cord's red battery clamp or red wire connector from the positive(+) terminal of the vehicle battery.
   d) Reconnect the vehicle battery ground wire.

**WARNING:** Always connect in this sequence to avoid possible shock.

*(Remember that on some vehicle models, you may need to remove the sprayer to access the battery)*
### Assembly (continued)

**Step Seventeen: Check and test completed assembly**

| **WARNING** | Check and test completed assembly  
Serious injury could result from chemical leaks if sprayer is improperly assembled or the design of the sprayer is modified.  
Follow the steps below to ensure the sprayer is properly assembled. Never modify the sprayer design. |
|---|---|

1. **Check assembly**
   
   **Check assembly to assure the sprayer is properly assembled and in safe working condition:**
   
   a) Check that the gun clip screws are tight, hose clamps are secure, and tank straps are properly fastened.
   
   b) While it is unlikely that factory assembled components become loose, they should also be checked to make sure they are tight.

2. **Test with water**
   
   **Test the system for leaks with water:**
   
   a) Fill the tank with water.
   
   b) Connect the remote switch to the pump power cord and turn the remote switch ON. The pump is an "on demand" pump. When turned on, the pump will prime itself, and then turn off. When the gun trigger is squeezed, the pump will automatically start.
   
   c) Operate the spray gun by squeezing the gun trigger.
   
   d) Check for leaks throughout the system. If a leak is detected, fix the leak and re-test the system with water.
1.) **Pump Power Cord.** The pump power cord connects the sprayer pump to the remote switch.
2.) **Fill Cap.** The fill cap has a ball check to allow air to enter the tank as the chemical is dispensed, but does not allow chemical to escape the tank.
3.) **Sprayer Pump.** The sprayer pump makes the chemical flow to the spray gun and the nozzle.
4.) **Gauge.** The gauge is an indicator of the pressure in the system.
5.) **Sprayer Tank.** The sprayer tank holds the chemical.
6.) **Gun Hose.** The 186" gun hose transfers chemical from the pump to the spray gun.
7.) **Spot Spray Gun.** Use the spot spray gun to apply chemical to specific areas.
8.) **Gun Clips.** Use the gun clips to store the spray gun.
9.) **Hose Wrap.** The built-in hose wrap provides a storage location for the gun hose on the tank.
10.) **Mount Arm.** The mount arm connects the broadcast bracket to the vehicle hitch.
11.) **Nozzle Bracket Mount.** The nozzle bracket mount pivots to stay perpendicular to the ground.
12.) **Left Broadcast Nozzle.** The broadcast nozzle sprays a wide pattern to broadcast spray chemical.
13.) **Right Broadcast Nozzle.** The broadcast nozzle sprays a wide pattern to broadcast spray chemical.
14.) **Boom Valve.** The boom valve shuts off chemical to the left, right, or both boom nozzles.
15.) **Remote Switch.** The remote switch allows the operator to safely turn ON/OFF the sprayer.
16.) **Battery Power Cord.** The battery power cord connects the vehicle battery to the remote switch. This cord remains connected to the battery when the sprayer is not in use.
17.) **Battery Clamps.** Use the battery clamps to connect the battery power cord to the battery.
Operation – Important Safety Information

Now that you have completed and tested your assembly, there is some important safety and health information you need to know with regard to handling and spraying chemicals, as well as vehicle handling with the sprayer attached.

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carefully read and make sure you understand the following safety information before using the sprayer.</td>
</tr>
</tbody>
</table>

**General Chemical Safety:**

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pesticides are hazardous chemicals. Heed the warnings below and follow all instructions carefully. Improper handling of chemicals can result in serious injury or illness, or cause damage to the environment.</td>
</tr>
</tbody>
</table>

- **Chemical label.** ALWAYS READ and FOLLOW all chemical label instructions.
- **Licensing/regulation.** Refer to any applicable licensing restrictions or state/federal regulations with regard to the application of the particular chemical you plan to use.
- **Emergency procedures.** Before handling chemicals, carefully review the "Chemical Accident Procedures" listed later in this section, as well as the "Statement of Practical Treatment" on the chemical label.
- **Inhalation/contact.** ALWAYS take precautions to avoid inhaling or coming into contact with the chemical.
- **Personal protective equipment.** ALWAYS wear protective clothing, eye protection, and chemical-resistant gloves when filling, using and cleaning the sprayer. Wear additional protective gear (such as facemask or apron) as recommended on the chemical label.
- **Children/pets.** Pesticides can be especially toxic to children and animals. ALWAYS exercise extra caution around children. Keep sprayer and all spray materials away from children and animals.
- **Ventilation.** ALWAYS ensure there is adequate ventilation when mixing, pouring, or spraying.
- **Flammables.** NEVER use any flammable chemicals in the sprayer.
- **Corrosives.** DO NOT use corrosive chemicals in the sprayer. They can weaken the sprayer and its parts, resulting in leaks. Check with the chemical manufacturer to ensure chemical is compatible with all components of the sprayer.
- **Chemical interaction.** ALWAYS flush the sprayer before switching chemicals. Different chemicals may interact dangerously with each other.
- **Chemical storage.** ALWAYS store pesticides in a properly labeled container and in a secure location per the manufacturer's recommendations.
- **Health monitoring.** Monitor the health of operators who are frequently exposed to pesticides, as recommended by the chemical label or local/federal regulations.
Chemical Application Safety:

**WARNING**
Caution must be used when spraying chemicals to avoid unsafe exposure to humans and the environment. 
Heed the warnings below and follow all instructions carefully.

**Before Spraying**
- **Sprayer prep.** ALWAYS inspect and prepare the sprayer before use according to the directions provided in this manual.
- **Keep sprayer off.** Do not turn on power to the sprayer until ready to spray in order to avoid unintentional spray release.
- **Broadcast nozzles down.** Make sure broadcast nozzles are oriented to spray straight down before starting the sprayer. An incorrectly positioned broadcast nozzle may spray chemicals on you or others.
- **Wind speed.** NEVER spray when wind speed exceeds 4 MPH in order to minimize spray drift.
- **Clear area/post.** ALWAYS keep the work area clear of people and pets. POST warning notices to restrict access by the public for the period recommended on chemical label.
- **Operator age.** You must be 16 years of age or older to operate this sprayer. Pesticides are especially toxic to children.

**During Spraying**
- **Over application.** DO NOT over apply pesticide. Apply at a rate recommended by chemical manufacturer. Excess pesticide can be dangerous to humans, damage desirable plants, and contaminate soil and water sources.
- **Never point gun.** NEVER point the spray gun at people or animals.
- **Children/pets.** ALWAYS exercise extra caution when spraying near areas accessible to children and pets.
- **Eating/smoking.** DO NOT eat, drink, smoke, rub your eyes, or touch any part of your bare skin while handling chemicals and spraying.
- **Heat/flames.** DO NOT spray near open flames or sources of heat.
- **Spills.** ALWAYS clean up spills immediately per instructions on the chemical label.
- **Unattended.** ALWAYS turn off vehicle and set brake or block wheels, turn off power to sprayer, and relieve system pressure before leaving sprayer unattended.
- **Troubleshooting.** ALWAYS refer to the safety instructions in the Troubleshooting Section before attempting any repairs.

**After Spraying**
- **Clean sprayer.** ALWAYS clean the sprayer immediately after use according to the directions provided in this manual.
- **Decontaminate.** ALWAYS decontaminate yourself immediately after you are finished spraying and handling chemicals. Wash all exposed areas of the body with soap and water and remove and launder clothing.
- **Chemical disposal/storage.** ALWAYS dispose of or store remaining chemicals properly as recommended on the chemical label.
Operation – Important Safety Information

ATV Vehicle Handling Safety:

- **Driver age.** You must be 16 years of age or older to operate the ATV with the sprayer attached.
- **Less stable.** Be aware that all vehicle handling will be affected with the filled sprayer attached. See your ATV’s warning label for the hazards associated with driving:
  - Too fast
  - On paved surfaces
  - On inclines or rough terrain.
  These hazards will be increased drastically as a result of the additional weight and location of the filled sprayer. The center of gravity will be higher and weight distribution different, causing the ATV to be less stable when braking, turning, and driving. Exercise extra caution in vehicle handling. Use particular caution on sloped or rough surfaces in order to prevent rollover. A vehicle equipped with Roll Over Protection System (ROPS) is recommended if you will be operating on non-level terrain.
- **Speed limit.** DO NOT exceed 5 mph with sprayer mounted on ATV.
- **Ride/transport.** NEVER ride or transport cargo on the sprayer.

Chemical accident procedures:

- **Sprayer leak**
  - In the event that the sprayer develops a leak while spraying chemicals, you must immediately stop spraying.
    - Turn off power to the sprayer and follow the directions below, as applicable.

- **Bodily chemical contact**
  - Personal contamination can occur when chemicals splash, spill, or spray directly onto a person.
    1. Follow the emergency first aid instructions on the chemical label listed in the "First Aid" or "Statements of Practical Treatment" section.
    - **General procedures include:**
      a) Eyes – immediately flush with water or follow other directions as specified on the chemical label.
      b) Skin – immediately wash all contaminated skin surfaces with soap and water, or follow directions as specified on the chemical label.
## Operation – Important Safety Information

<table>
<thead>
<tr>
<th>c) Clothing</th>
<th>remove contaminated clothing immediately. Dispose of heavily contaminated clothing per the instructions on the chemical label for safe chemical/container disposal.</th>
</tr>
</thead>
</table>

2. Seek medical advice if instructed on the label, or if the victim experiences symptoms of harmful effects such as burning, swelling, nausea, chest pain, difficulty breathing, dizziness or confusion. When seeking medical advice, be sure to bring the chemical product label.

### Poisoning by ingestion or inhalation

<table>
<thead>
<tr>
<th>In case of poisoning from ingestion or inhalation:</th>
</tr>
</thead>
<tbody>
<tr>
<td>IF THE VICTIM HAS COLLAPSED OR IS NOT BREATHING, <strong>CALL 911</strong>. Otherwise:</td>
</tr>
<tr>
<td>1. If you are the victim, immediately seek assistance from nearby personnel because you may become incapacitated.</td>
</tr>
<tr>
<td>2. Follow the emergency first aid instructions on the chemical label in the &quot;First Aid&quot; or &quot;Statement of Practical Treatment&quot; section.</td>
</tr>
<tr>
<td>3. Call a poison control center for further advice. <strong>In the U.S., call 1-800-222-1222 to be automatically linked to the nearest certified poison control center.</strong> Have the chemical label available for reference.</td>
</tr>
</tbody>
</table>

### Chemical spills

<table>
<thead>
<tr>
<th>Chemical spills must be quickly contained and properly cleaned up.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refer to the chemical label for any specific clean-up instructions with regard to the chemical spilled.</td>
</tr>
<tr>
<td><strong>General procedures include:</strong></td>
</tr>
<tr>
<td>1. <strong>Control</strong> the spill by stopping the source of the spill. If the source of the spill is a container leak, place the leaking container in a larger, watertight container. Keep unprotected people away from the spill site.</td>
</tr>
<tr>
<td>2. <strong>Contain</strong> the spill so that it does not spread and get into water sources. Use a shovel or other tool to make a dike around the spill with soil, sod, or absorbent material.</td>
</tr>
<tr>
<td>3. <strong>Clean up</strong> the spill immediately -- Absorbent materials like ground corncobs or pet litter should be spread on the spill area to soak up the pesticide. The contaminated material should then be shoveled into a leak proof container. Do not flush the spill area with water until you receive advice as directed below.</td>
</tr>
<tr>
<td>4. <strong>Seek additional advice</strong> from the chemical manufacturer and your state's pesticide regulatory agency regarding decontamination of the spill site:</td>
</tr>
<tr>
<td>- <strong>Chemical manufacturer.</strong> The chemical label provides contact information for the chemical manufacturer.</td>
</tr>
<tr>
<td>- <strong>State pesticide regulatory agency.</strong> In the U.S., call the National Pesticide Information Center at 1-800-858-7378 for assistance in determining how to contact your state's pesticide regulatory agency.</td>
</tr>
</tbody>
</table>
Operation – Preparing the Sprayer for Each Use

If the sprayer has been used previously, it must be prepared BEFORE EACH SUBSEQUENT USE.

WARNING

Read instructions below carefully for inspecting and preparing the sprayer. Damaged or clogged equipment could result in leaks or uncontrolled spray. Leaks could result in injury to the operator or bystanders from chemical exposure, or cause damage to the environment.

Important safety rules:

- **Power off.** Make sure all power is OFF before cleaning, inspecting, or servicing the sprayer.
- **Guards/shields.** Make sure all guards and shields are replaced after servicing the sprayer.
- **Replacement parts.** If a part needs replacement, only use parts that meet the manufacturer’s specifications. Replacement parts that do not meet specifications may result in a safety hazard or poor operation of the sprayer.

1. **Ensure sprayer attached**
   Ensure the sprayer is securely attached to the ATV.

2. **Ensure tank empty**
   Ensure the sprayer has been thoroughly flushed and drained of all residual chemical from prior uses.

3. **Clean suction strainer**
   Clean the suction strainer of any chemical residue. It is important to clean the suction strainer before each use to ensure it is not clogged and to prevent residual chemical from contaminating sprayer contents.
   **IMPORTANT:** The strainer must be accessed by reaching into the tank, so the **tank must be empty** to avoid immersing your hand in chemicals.
   a) Open fill cap on top of tank.
   b) USING RUBBER GLOVES, reach into the tank and pull the suction strainer off the end of the suction tube. (See figure below.)
   c) Run the suction strainer under fresh water to remove debris.
   d) Replace the suction strainer onto the end of the suction tube.

4. **Inspect & repair**
   Inspect and test the sprayer thoroughly:
   a) Inspect hoses for exposed mesh and holes. Replace all worn or damaged hoses.
   b) Inspect tank and fittings for cracks and leaks. Replace all damaged fittings with original NorthStar parts.
   c) Check to be sure retaining nut on gun nozzle is tight.
   d) Check to be sure that all other nuts, bolts, and screws are tight.
   e) Partially fill tank with plain water and spray to test for leaks. Repair as needed.
   **IMPORTANT:** After any repair work has been done, **ALWAYS test for leaks with water one final time before using.**
Step One: Assess wind conditions and clear work area.

Before you decide to spray, you must determine whether wind conditions are suitable. You must also restrict access to the work area to ensure the safety of bystanders.

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not spray if wind speeds are greater than 4 MPH or if there are bystanders in the intended spray area.</td>
</tr>
</tbody>
</table>

1. Assess wind speed
   - Assess weather conditions to ensure that it is not too windy to spray.
   - DO NOT SPRAY if wind speeds are greater than 4 MPH.
   - **Visible indication of wind speed:**
     - If leaves are in constant motion or there is any branch movement, DO NOT spray because the wind is too strong.

2. Clear work area
   - Clear the work area of all bystanders and pets.
   - Restrict access by the public for the period recommended on chemical label.
### Step Two: Fill the sprayer.

#### WARNING

ALWAYS wear personal protective equipment as directed on the chemical label when handling pesticides.

Long pants and sleeves, chemical resistant gloves, and eye protection are strongly recommended. Additional protective gear may be required depending on the particular pesticide.

---

**Fill the sprayer using the following steps:**

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Review safety information</td>
</tr>
<tr>
<td>2.</td>
<td>Choose safe mixing/loading area</td>
</tr>
<tr>
<td>3.</td>
<td>Wear personal protective equipment</td>
</tr>
<tr>
<td>4.</td>
<td>Turn off sprayer and vehicle</td>
</tr>
<tr>
<td>5.</td>
<td>Remove fill cap</td>
</tr>
<tr>
<td>6.</td>
<td>Ensure tank flushed</td>
</tr>
</tbody>
</table>

---

![Fill cap](image)
<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>7. Check drain cap</td>
<td>Before filling tank, ensure drain cap is securely tightened.</td>
</tr>
</tbody>
</table>
| 8. Fill tank | **Add pesticide to tank through fill cap:**  
  a) Confirm the chemical/water dilution ratios specified on the chemical label.  
  b) Determine chemical and water volumes needed for the planned application, taking into consideration that maximum tank capacity is 26 gallons.  
     *Note: Only purchase and mix as much chemical as you need for the planned application in order to minimize chemical over application and the need for storing unused chemicals.*  
  c) Add chemical to the tank through the fill cap.  
     *If the chemical is not pre-mixed, add water and pesticide concentrate in the order prescribed on the label.* |
| 9. Ensure chemical mixed | Ensure chemical is thoroughly mixed in tank.  
  - Stirring device should be made of metal or plastic, non-chemical absorbing material, and then properly cleaned and stored after use. |
| 10. Replace fill cap | Replace fill cap and tighten securely. |
Step Three: Operate the sprayer.

**WARNING**
ALWAYS wear personal protective equipment as directed on the chemical label when spraying.
Long pants and sleeves, chemical-resistant gloves, and eye protection are strongly recommended. Additional protective gear may be required depending on the particular pesticide.

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Wear personal protective equipment</td>
<td>Wear personal protective equipment as directed on the chemical label.</td>
</tr>
<tr>
<td>3. Close boom valves</td>
<td>Close boom valves to prevent accidental spray release</td>
</tr>
</tbody>
</table>

4. Turn on power

- Turn on the power to the sprayer.
  1. Verify the remote switch is connected to the pump power cord.
  2. Turn the remote switch to the "ON" position.

  *Note:* The pump will start automatically when power is turned on. The pump will cycle on and off as needed to retain pressure in the hose.

5. Begin agitation if needed

Some formulations of liquid pesticides do not remain in solution and should be agitated to maintain a uniform mix.

An optional **pressure regulator/agitator** (Item #2681032) is available for use with this sprayer and should be used when spraying pesticides classified as "flowable" ("F" or "L"), "wettable powder" ("WP" or "W"), "emulsion" ("EC" or "E"), "microencapsulated" ("M"), or water dispersible granules ("WDG" or "DF"). (See pesticide label to determine its classification.)

Contact NorthStar Product Support at 1-800-270-0810 for any questions about the appropriate use of the sprayer and/or optional accessories.
6. Squeeze trigger & adjust nozzle

To spray, squeeze the gun trigger.
- Twist the spray nozzle to adjust from a straight stream to hollow cone spray pattern, as recommended on the chemical label for proper delivery rate.

*Note: It is not unusual for the operator to be exposed to chemical drips while adjusting the nozzle – gloves should be chemical resistant.*

![Spray nozzle and retaining nut diagram]

7. Operate broadcast nozzles

A. Open boom valves
Open the left, right, or both boom valves as desired.

![Open desired boom valves diagram]

B. Ensure correct spray pattern
Make sure both broadcast nozzles are pointed toward the ground. The screw on the face of the nozzle should be in the 12 o'clock position. If it is not, use a wrench to correctly orient the nozzle.

![Screw at 12 o'clock position diagram]
Operation - Using the Sprayer (continued)

**IMPORTANT:** Make sure broadcast nozzle is oriented to spray straight down before you start. An incorrectly positioned broadcast nozzle may spray chemicals on you or others.

Note: It is not unusual for the operator to be exposed to chemical drips while adjusting the broadcast nozzle. Chemical resistant gloves should be worn.

**C. Ensure uniform coverage**
To ensure proper coverage, the height of the broadcast nozzles should be 24 inches from the ground. Using both broadcast nozzles, the spray pattern is 40 feet. However, the spray pattern should be overlapped 36 inches. Use the tables in Appendix A to determine what speed to drive your vehicle for the desired application rate.

**D. Begin to spray**
Turn the remote switch ON to begin spraying.

<table>
<thead>
<tr>
<th>8. Leaving unattended</th>
<th>If the sprayer must be left unattended at any time:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) Disconnect power to the sprayer.</td>
</tr>
<tr>
<td></td>
<td>b) Relieve system pressure by depressing the gun trigger.</td>
</tr>
<tr>
<td></td>
<td>c) Turn off the vehicle. Set brake or block the wheels.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>9. Discontinue use if clogged or inoperative</th>
<th>If the sprayer becomes clogged or inoperative during use, <strong>discontinue use immediately</strong>.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- DO NOT attempt to service while chemicals are in the sprayer and power is connected.</td>
</tr>
<tr>
<td></td>
<td>- Return to service area to review instructions for troubleshooting before attempting to service.</td>
</tr>
</tbody>
</table>

**Note:** A reserve, clean container capable of holding at least 26 gallons should be kept for use when the sprayer tank needs to be emptied temporarily for repairs. It is advisable to purchase a reserve tank suitable for pesticide storage from Northern Tool and Equipment for use in these circumstances. The container should be properly labeled as to its contents if it is used.
Step Four: Clean sprayer and decontaminate after use.

When done using the sprayer, it is important to clean the sprayer and decontaminate yourself. Do not store the sprayer with chemicals in the tank, as it is unsafe and could also result in damage to the equipment.

### WARNING

Clean-up and decontamination procedures must be followed after each use.

Improper equipment clean-up and disposal of chemicals can result in dangerous chemical exposure to humans and the environment, as well as equipment damage.

Personal decontamination is required after spraying to minimize unsafe exposure to chemicals and potential illness.

<table>
<thead>
<tr>
<th>1. Drain tank</th>
<th>If there is excess pesticide left in the tank, drain the tank:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) Disconnect power to the sprayer and relieve system pressure by depressing the gun trigger.</td>
</tr>
<tr>
<td></td>
<td>b) Find a suitable container in which to drain the unused pesticide. Place it under the tank drain hole.</td>
</tr>
<tr>
<td></td>
<td>c) While wearing rubber gloves, eye protection, and all other required personal protective equipment, remove the drain cap and allow pesticide to drain into container.</td>
</tr>
<tr>
<td></td>
<td>d) When tank stops draining, replace drain cap. Tighten securely.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>2. Unused chemical</th>
<th>Properly store or dispose of unused chemical:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) If the unused pesticide is to be stored for future use:</td>
</tr>
<tr>
<td></td>
<td>Store all unused pesticide in its original, or a suitably marked, container in a secure location out of the reach of children &amp; animals.</td>
</tr>
<tr>
<td></td>
<td>b) If remaining pesticide is to be disposed:</td>
</tr>
<tr>
<td></td>
<td>Properly dispose of the remaining chemical and its container per the chemical manufacturer's recommendation and according to local hazardous waste disposal regulations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>3. Flush sprayer</th>
<th>Flush the sprayer per the chemical manufacturer's recommendations. A general procedure is as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) Add fresh water to the tank.</td>
</tr>
<tr>
<td></td>
<td>b) Reconnect power to the sprayer.</td>
</tr>
<tr>
<td></td>
<td>c) Operate the spray gun and discharge all rinse water onto an area that can accept dilute pesticide application.</td>
</tr>
<tr>
<td></td>
<td>d) Add 5 gallons of the chemical manufacturer's recommended cleaning solution. Operate the spray gun, collecting the discharged solution if recommended by the manufacturer.</td>
</tr>
<tr>
<td></td>
<td>e) After flushing, disconnect power to the sprayer and be sure all system pressure is relieved by squeezing the gun trigger.</td>
</tr>
<tr>
<td></td>
<td>f) Dispose of cleaning solution discharge as recommended by the manufacturer of the solution.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>4. Decontaminate &amp; launder</th>
<th>Decontaminate yourself after you are finished handling chemicals:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a) Remove all clothing worn during spraying and chemical handling.</td>
</tr>
<tr>
<td></td>
<td>b) Wash all exposed parts of the body with soap and water.</td>
</tr>
<tr>
<td></td>
<td>c) Launder clothing separately from other wash.</td>
</tr>
</tbody>
</table>
Prepare the sprayer for end-of-season storage by running RV antifreeze through the system. This will keep internal parts lubricated, protect against corrosion, and keep the unit from freezing.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>The sprayer will be damaged if it freezes.</td>
</tr>
<tr>
<td>Protect the sprayer from freezing during storage by following the instructions below.</td>
</tr>
</tbody>
</table>

### Preparing for storage:

1. **Add antifreeze**
   - Pour 1 gallon of RV antifreeze into the tank.
   - *Note:* RV antifreeze is non-toxic and biodegradable and generally safer for the environment than automotive antifreeze.

2. **Spray briefly**
   - Turn on the pump motor and squeeze the gun trigger briefly until fluid sprays.

### Removing from storage:

1. **Drain**
   - Drain the antifreeze left in the tank through the tank drain hole into a suitable container.

2. **Flush with water**
   - Fill the tank with fresh water and run through the system. Operate the spray gun until the system is completely flushed. Be sure to set up containers to capture the antifreeze flush water.

3. **Disposal**
   - Dispose of the antifreeze and flush water properly.
## Troubleshooting

### WARNING

Before troubleshooting or attempting to service, read the following safety rules to avoid accidental exposure to chemical and also risk of electric shock.

**Note:** A reserve, clean container capable of holding at least 26 gallons should be kept for use when the sprayer tank needs to be emptied temporarily for repairs. It is advisable to purchase a reserve tank suitable for pesticide storage from Northern Tool and Equipment for use in these circumstances. The container should be properly labeled as to its contents if it is used. In addition, it may be advisable to empty the tank contents using a transfer pump if the tank drain hole is inaccessible while the sprayer is mounted on the vehicle.

### Before attempting to service the sprayer:

| 1. Personal protective equipment | Wear personal protective equipment as directed on the chemical label while servicing your sprayer. |
| 2. Review troubleshooting table | Review the Troubleshooting Table below for the type of problem you are experiencing. However, DO NOT attempt to repair until the steps listed below are followed. |
| 3. Empty and flush | If the cause listed for your problem is Clogged intake tube, Clogged suction strainer, or Worn spray gun nozzle: empty the tank and flush the sprayer with water as directed in the section, "Operation – Step Four".  
- In order to avoid accidental exposure to chemicals, never attempt to unclog the intake tube or suction strainer, or service the spray gun nozzle, until the tank has been emptied and the sprayer flushed with water. |
| 4. Disconnect power/relieve pressure | Disconnect power to the sprayer and be sure all system pressure is relieved by squeezing the gun trigger. |
| 5. Perform repairs | Follow the directions provided in the troubleshooting table to repair the sprayer. NOTE: Never try to unclog the sprayer nozzle by blowing through it. |
| 6. Test after servicing | After servicing, ALWAYS test the sprayer for leaks with plain water before using. |

Specifications

Electrical System Requirements
Electrical connection .................. 12 VDC
Amp draw from pump ................. 17.0 Amps max.

Sprayer Specifications
Maximum GPM ......................... 5.5 GPM
Maximum Pressure ................. 60 PSI
Tank Maximum Capacity ............. 26 Gallons
Overall Dimensions ................. 34.0"L x 14.5"W x 20.5"H
Dry Weight / Weight full of water ... 40 lb. / 250 lb.

Broadcast Nozzle Specifications
Overall Spray Width .................. 40 ft. (480 in.)
Recommended Overlap ............... 3 ft. (36 in.)

Component Materials*
Tank .................................. Polyethylene, EPDM
Suction Tube ....................... Polypropylene, PVC, Stainless Steel
Hose ................................. PVC
Pump .................................. Polypropylene, Viton®, Santoprene®
Valves ............................... PVC, Buna-N
Gun and Nozzle ................. Nylon, Polyacetal
Broadcast nozzles ............. Stainless Steel, Polypropylene

*Before using any chemical, check to ensure the chemical is compatible with all materials in the system.

Note: The sprayer is not compatible with bleach, chlorine and ice control chemicals. Also, pumping any petroleum based fluid (gasoline, diesel, kerosene, oil) will severely damage the pump.

The manufacturer reserves the right to make improvements in design and/or changes in specifications at any time without incurring any obligation to install them on units previously sold.

Appendix A – Broadcast Spray Calibration Tables

Below are some guidelines to help you calibrate your broadcast sprayer. This is a very important step in operating the broadcast sprayer such that too much or too little chemical may be applied.

1. Using Table 1, find a table that corresponds with the chemical manufacturer’s suggested application rate (gallons per acre, gallons per 1000 sq. ft., or gallons per 100 sq. ft.).
2. Find the application rate that is closest to the chemical manufacturer’s recommendations.
3. The speed to drive your ATV is listed below the application rates.

**TABLE 1**

<table>
<thead>
<tr>
<th>Spray Pressure (PSI)</th>
<th>Flow (GPM)</th>
<th>GALLONS PER ACRE – based on 40 foot spray pattern</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>1 MPH</td>
</tr>
<tr>
<td>24&quot; 20</td>
<td>1.7*</td>
<td>50</td>
</tr>
<tr>
<td>24&quot; 30</td>
<td>2.0*</td>
<td>58</td>
</tr>
<tr>
<td>24&quot; 40</td>
<td>2.5*</td>
<td>73</td>
</tr>
</tbody>
</table>

**TABLE 1**

<table>
<thead>
<tr>
<th>Spray Pressure (PSI)</th>
<th>Flow (GPM)</th>
<th>GALLONS PER 1000 SQUARE FEET – based on 40 foot spray pattern</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>1 MPH</td>
</tr>
<tr>
<td>24&quot; 20</td>
<td>1.7*</td>
<td>.115</td>
</tr>
<tr>
<td>24&quot; 30</td>
<td>2.0*</td>
<td>.133</td>
</tr>
<tr>
<td>24&quot; 40</td>
<td>2.5*</td>
<td>.168</td>
</tr>
</tbody>
</table>

*Approximate flow from one nozzle

4. Use Table 2 to choose the throttle setting on your ATV.

**TABLE 2**

<table>
<thead>
<tr>
<th>Speed (MPH)</th>
<th>Time required in seconds to travel a distance of:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>100 ft.</td>
</tr>
<tr>
<td>1</td>
<td>68</td>
</tr>
<tr>
<td>2</td>
<td>34</td>
</tr>
<tr>
<td>3</td>
<td>23</td>
</tr>
<tr>
<td>4</td>
<td>17</td>
</tr>
<tr>
<td>5</td>
<td>14</td>
</tr>
<tr>
<td>6</td>
<td>11</td>
</tr>
<tr>
<td>7</td>
<td>9.5</td>
</tr>
</tbody>
</table>

5. The coverage area can be found by dividing tank size by the application rate.

Example: 26 gallons divided by 12 gallons/acre = 2.16 acre of coverage per tank.
Dear Valued Customer:

The NorthStar Product you just purchased is built with the finest material and craftsmanship. Use this product properly and enjoy the benefits from its high performance. By purchasing a NorthStar product, you show a desire for quality and durability. Like all mechanical equipment this unit requires a due amount of care. Treat this unit like the high quality piece of machinery it is. Neglect and improper handling may impair its performance. Please thoroughly read the instructions and understand the operation before using your product.

**Limited Warranty**

NorthStar shall warranty any piece of equipment manufactured, or parts of equipment manufactured, to be free from defects in material or workmanship for a period of 2 years for noncommercial/nonrental use and a period of 90 days for commercial/rental use from the date of purchase by user.

NorthStar shall warranty any wear item, including, but not limited to, valves, seals, pump diaphragms, hoses, and filter elements to be free from defects in material or workmanship for a period of 90 days from the date of purchase by user. This warranty applies to the original purchaser of the equipment and is non-transferable. Verification of purchase is the responsibility of the buyer. Parts will be replaced or repaired at no charge, except when the equipment has failed due to lack of proper maintenance. Any misuse, abuse, alteration or improper installation or operations will void warranty. Determining whether a part is to be replaced or repaired is the sole decision of NorthStar.

**NOTE:** Some services performed by parties other than NorthStar may void warranty.

This warranty covers parts only. It will not provide for replacement of complete products due to defective parts. Components not manufactured by NorthStar are guaranteed by their manufacturer and can be serviced at factory-authorized locations near you. Any costs incurred due to replacement or repair of items outside of a NorthStar approved facility is the responsibility of the buyer and not covered under warranty. NorthStar can supply you with the service center location in your area.

This warranty specifically excludes the following: failure of parts due to damage caused by accident, fire, flood, windstorm, acts of God, applications not approved by NorthStar in writing, corrosion caused by chemicals, use of replacement parts which do not conform to manufacturer's specifications, and damage caused by vandalism. Additional exclusions: loss of running time, inconvenience, loss of income, or loss of use, including any implied warranty of merchantability of fitness for a specific use.

Warranty does not cover items subject to normal wear such as tires, receptacles or any part subject to direct physical contact by the public. This warranty does not cover any personal injury or damage to surrounding property caused by failure of any part.

This warranty is in lieu of any other warranty expressed or implied and NorthStar assumes no other responsibility or liability outside that expressed within this warranty.

Please fill in the following information and have it on hand when you call in on a warranty claim.
