ProCurve Switch 2600 Series

The ProCurve Switch 2600 series is a collection of low-cost, stackable, multi-layer, managed switches with 48, 24, or 8 auto-sensing 10/100 ports and dual-personality ports for 10/100/1000 or mini-GBIC connectivity. The ProCurve Switch 2650-PWR, 2626-PWR, and 2600-8-PWR are IEEE 802.3af-compliant for Power over Ethernet and provide up to 15.4 W per port. A redundant external power supply is also available as an accessory.

Features and benefits

Connectivity

• **Dual-personality functionality:** two 10/100/1000 ports or mini-GBIC slots for optional fiber connectivity such as Gigabit-SX, -LX, or -LH

• **Power over Ethernet (IEEE 802.3af) compliant** (ProCurve 2650-PWR, ProCurve 2626-PWR, ProCurve 2600-8-PWR): provides up to 15.4 W per port to power IP phones, wireless access points, Web cameras, and more (ProCurve 2650-PWR may require an external power supply to provide full 15.4 W for all 48 PoE-ready ports)

Performance

• 13.6 Gbps (ProCurve 2650 and 2650-PWR)/9.6 Gbps (ProCurve 2626, 2626-PWR, 2600-8-PWR) backplane: wire-speed non-blocking architecture for low-latency throughput

Resiliency and high availability

• **IEEE 802.3ad Link Aggregation Control Protocol (LACP) and ProCurve trunking:** support for up to 6 trunks, each with up to 8 links (ports) per trunk; trunking across modules is supported

• **Spanning Tree Protocol (IEEE 802.1D):** provides redundant links while preventing network loops

• **IEEE 802.1w Rapid Convergence Spanning Tree Protocol:** increases network uptime through faster recovery from failed links

• **IEEE 802.1s Multiple Spanning Tree:** provides high link availability in multiple VLAN environments by allowing multiple spanning trees

• **Optional external redundant power supply** (ProCurve 2650-PWR, ProCurve 2626-PWR, ProCurve 2600-8-PWR): provides uninterrupted power; sold as an accessory

Layer 2 switching

• **VLAN support and tagging:** support complete IEEE 802.1Q (4,096 VLAN IDs) and 253 VLANs simultaneously

• **GARP VLAN Registration Protocol:** allows automatic learning and dynamic assignment of VLANs

Layer 3 routing

• **Basic IP routing:** enables automatic routing to the connected VLANs and up to 16 static routes—including one default route—in IP networks

Security

• **Port security:** allows access only to specified MAC addresses, which can be learned or specified by the administrator

• **MAC address lockout:** prevents configured particular MAC addresses from connecting to the network

• **Dynamic IP lockdown:** works with DHCP protection to block traffic from unauthorized host, preventing IP source address spoofing

• **Dynamic ARP protection:** blocks ARP broadcasts from unauthorized hosts, preventing eavesdropping or theft of network data

• **Multiple user authentication methods:**
  - **IEEE 802.1X:** industry-standard way of user authentication using an IEEE 802.1X supplicant on the client in conjunction with a RADIUS server
  - **Web-based authentication:** similar to IEEE 802.1X, provides a browser-based environment to authenticate clients that do not support the IEEE 802.1X supplicant
  - **MAC-based authentication:** client is authenticated with the RADIUS server based on client's MAC address

NEW Authentication flexibility:
- Multiple IEEE 802.1X users per port:
provides authentication of up to 8 IEEE 802.1X users per port; prevents user "piggybacking" on another user's IEEE 802.1X authentication

- **Secure FTP**: allows secure file transfer to/from the switch; protects against unwanted file downloads or unauthorized copying of switch configuration file

- **TACACS+**: eases switch management security administration by using a password authentication server

- **Source-port filtering**: allows only specified ports to communicate with each other

- **Secure Shell (SSHv2)**: encrypts all transmitted data for secure, remote command-line interface (CLI) access over IP networks

- **Secure Sockets Layer (SSL)**: encrypts all HTTP traffic, allowing secure access to the browser-based management GUI in the switch

- **Switch management logon security**: can require either RADIUS or TACACS+ authentication for secure switch CLI logon

### Convergence

- **IEEE 802.1AB Link Layer Discovery Protocol (LLDP)**: automated device discovery protocol for easy mapping by network management applications

- **LLDP-MED (Media Endpoint Discovery)**: a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones

### Quality of Service (QoS)

- **Traffic prioritization (IEEE 802.1p)**: allows real-time ProCurve Switch 2600 series traffic classification into 8 priority levels mapped to 4 queues

- **Class of Service (CoS)**: sets the IEEE 802.1p priority tag based on IP address, IP Type of Service (ToS), L3 protocol, TCP/UDP port number, source port, and DiffServ

- **Layer 4 prioritization**: enables prioritization based on TCP/UDP port numbers

### Manageability

- **RMON**: provides advanced monitoring and reporting capabilities for statistics, history, alarms, and events

- **Friendly port names**: allow assignment of descriptive names to ports

- **Auto-MDIX**: automatically adjusts for straight-through or crossover cables on all 10/100/1000 ports

- **Dual flash images**: provides independent primary and secondary OS files for backup while upgrading

- **Stacking capability**: single IP address management for a virtual stack of up to 16 switches, including the ProCurve 2500 series, 2510 series, 2600 series, 2800 series, 2810 series, 2900 series, 3400cl series, 3500yl series, 4200vl series, 6108, 6200yl-24G-mGBIC, and 6400cl series

- **Find-Fix-and-Inform**: finds and fixes common network problems automatically, then informs administrator

- **Troubleshooting**: ingress/egress port monitoring enables network problem-solving (ProCurve Switch 2626 and 2626-PWR only)

- **Software updates**: free downloads from the Web

### Industry-leading warranty

- **Lifetime warranty**: for as long as you own the product, with next-business-day advance replacement (available in most countries)
