Thermafiber® UltraBatt™ Residential & Light Commercial Insulation

+ Energy saving thermal insulation*
+ Provides fire protection
+ Controls sound between floors and walls
+ Mold resistant
+ Easy to install
+ Minimum 70% Recycled Content

Where can UltraBatt™ insulation be installed?

- Cathedral Ceilings
- Attics
- Interior Wall
- Floor/Ceiling
- Crawl Spaces
- Exterior Walls
- Basement Walls
- Basements
- Nichts

UltraBatt™ insulation provides exceptional R-value and fire protection in residential and light commercial buildings. UltraBatt insulation makes homes energy efficient and quiet.
Thermafiber® UltraBatt™ Insulation

THERMAFIBER UltraBatt™ mineral wool insulation is designed to provide excellent thermal insulation, fire protection and noise control in residential and light commercial building. The semi-rigid batts are more dense than traditional batts or rolls, and are quick and easy to install. UltraBatt products are noncombustible, moisture-resistant, noncorrosive, nondeteriorating, and mold resistant.

- Standard thicknesses are available with a vapor-retarding foil facing.
- Available in standard widths for both wood and steel stud framing.
- Non-standard thicknesses and sizes are available upon special request.

Description:

Notice:

THERMAFIBER UltraBatt™ insulation is easy to cut with a serrated knife for custom fitting around electrical boxes, pipes, duct-work, wiring, or between non-standard studs and joists.

1. Measure & cut

UltraBatt™ insulation is flexible and pliable; simply squeeze the sides to compress the insulation and insert into the desired wall.

3. Release & expand

Once in place, UltraBatt™ insulation naturally expands to fill in the space, creating a snug, custom fit.

2. Squeeze & insert

Testing:

Tested to ASTM E 84
