Mayors Foreward

The 2012/13 – 2016/17 IDP is a continuation of the work started by the democratic government to ensure that our people are involved in the governance of their municipalities. At the sphere of government closest to the people, municipalities have a particular responsibility in achieving delivery of free basic services, building sustainable human settlements and viable communities, improving all public services, building infrastructure, creating job opportunities and fighting poverty.

In framing this IDP, we have been guided by some of the enduring principles of the 2030 National Spatial Vision and KwaZulu Natal - Provincial Growth and Development Strategy:

- Creation of jobs;
- Improving economic infrastructure;
- Transition to a low carbon economy;
- An inclusive and integrated rural economy;
- Reversing the spatial effects of apartheid;
- Improving the quality of education;
- Quality healthcare for all;
- Social protection;
- Building safer communities;
- Fighting corruption;

To ensure that we align with strategic national and provincial planning policies, the municipality has reviewed its vision and strategic priorities. The alignment process is a never-ending process, as provincial and local needs change and we have to adapt our strategies, technologies and methodologies on a continuous basis so as to ensure excellence in service delivery and the sustainability of our environment and finances.

I would also like to take the opportunity to thank the communities that provided input into the IDP through our regional hearings. I would also like to encourage more of our citizens to be involved in the process of developing the IDP. Secondly I would like to thank Council for their political leadership in guiding and drafting of the IDP. Thirdly as the custodians of the IDP, we acknowledge the work of the Municipal Manager, senior administration, IDP manager and the IDP team, in developing a strategic integrated development plan that aligns our budget, service delivery implementation and monitoring and evaluation processes.

The development of the 2012/13 IDP will assist the municipality in ensuring that the long term vision and outcome is achieved.

“By 2030, eThekwini will be Africa’s most caring and liveable city”

His Worship Councillor James Nxumalo
Hounourable Mayor
eThekwini Municipality
Executive Summary

Introduction

The Municipal Systems Act (No.32) of 2000 (MSA) requires that local government structures prepare Integrated Development Plans (IDPs). The IDP serves as a tool for transforming local governments towards facilitation and management of development within their areas of jurisdiction. The MSA identifies the IDP as the vehicle to be used in the achievement of these goals. In conforming to the Act’s requirements the eThekwini Municipal Council has delegated the authority to the Municipal Manager to prepare the IDP.

The Municipal Finance Management Act (Act no. 56 of 2003) secures sound and sustainable management of the financial affairs of the municipality and other institutions in the local spheres of government. It does this by ensuring that its developmental programmes are aligned to its budget, and in so doing eThekwini Municipality, through its integrated development planning process, therefore delivers in accordance with the community needs and priorities, whilst committing to the budgetary programmes as enacted by the Auditor- General.

eThekwini Municipality's commitment to developing a "caring and liveable city" will be the focal point of the 2012/13 – 2016/17 IDP, with a specific emphasis on the alignment of the Municipal Vision, strategy and implementation. The focus of the 2012/13 – 2016/17 IDP is on building a more inclusive developmental local government that would translate the Municipality’s vision into action.

Situational Analysis

A detailed situational analysis of the eThekwini Municipality is tabled in Chapter One. The issues and challenges covered in the chapter are as follows;

- Population;
- Economy;
- Health;
- Natural Environment;
- Public Transport;
- Food Security;
- Climate Change;
- Infrastructure Delivery;
- Housing;
- Spatial Form (Planning);
- Safety (Disaster Management);
- Crime;
- Human Capital Development.

The IDP Strategic Approach

To ensure that the Municipality is a more responsive, efficient, effective and accountable local government we will outline, in Chapter Two, precisely how we intend to translate our Long Term Municipality Vision into an effective plan that aligns the municipal budgets, monitoring and evaluating mechanisms as well as the timeframes for delivery. The Municipality has taken the strategic direction to achieve closer alignment between the Long Term Development objectives and the IDP (in the context of International, National, Provincial and Local development policies). The development of the strategic approach for the Municipality is guided by – but not limited to – the following:
Millennium Development Goals (MDGs)

The aim of the MDGs is to encourage development by improving social and economic conditions. It provides a framework for the entire international community to work together towards a common end i.e. making sure that human development reaches everyone, everywhere.

National Development Plan (Vision 2030)

The intention of this plan is to improve service delivery for citizens of South Africa, whilst integrating national, provincial and local policies and programmes into a single, target orientated and long term based plan. In this plan a collective approach of improving the lives of the citizens is applied, and communities themselves have a role to play in this regard.

Delivery Agreement: Outcome 9

The Municipality responds to the Delivery Agreement: Outcome 9. This outcome intends to ensure a responsive, accountable, effective and efficient local government system with an intention of restoring the confidence of citizens in the local government sphere.

National Government Programme of Action 2009-2014

The government has identified 10 priority areas in its programme of action, with an intention to turn around the global economic slowdown, whilst at the same time ensuring that the needs of all its citizens are met.

National Priorities (State of the Nation Address 2012)

Highlights have been identified on relative progress made with regards to health, education, the fight against crime, human settlements, energy, water provision and rural development. Challenges are, however, still identified in unemployment, poverty and inequality and women and youth development. Cooperation between government departments and parastatals has seen the Municipality engaging strongly in an effort to improve infrastructure, corridor development, industrial development, skills, education, human settlement, access to basic services, economic development, job creation, governance, social cohesion and crime prevention.

Provincial Priorities (State of the Province Address 2012)

In response to the State of the Province Address, the Municipality has made tremendous contribution towards the provision of infrastructure (especially roads, freight and a harbour), skills enhancement, economic development, poverty alleviation, provision of housing and sustainable human settlements, improving health and healthy lifestyles, mitigation against climate change, supporting informal traders and employment creation. The municipality also responds to youth development and further ensures rural development in eThekwini.

Provincial Growth and Development Strategy

In line with the National Vision 2030, the Provincial Growth and Developmental Strategy will ensure economic growth and improved quality of life for all in KwaZulu-Natal. An integrated service delivery mechanism will be applied by various stakeholders in an effort to create employment opportunities, skills enhancement, effective and efficient governance, human and community development, improved infrastructure and adequate utilization of spatial form.
National Spatial Development Perspective (NSDP)

The NSDP represents a key instrument in the State’s drive towards ensuring greater economic growth, buoyant and sustained job creation and the eradication of poverty. It provides a framework for deliberating the future development of the national space economy and recommends mechanisms to bring about optimum alignment between infrastructure investment and development programmes within localities.

Provincial Spatial Economic Development Strategy (PSEDS)

The Provincial Spatial Economic Development Strategy has been developed in order to achieve the objectives of national and provincial policies. The PSEDS sets out to provide a spatial context for the PGDS, address spatial imbalances (curb urban sprawl and ensure sustainable interventions), identify priority areas and types of development, align to municipal SDFs, guide the budgeting process of the province and municipalities and influence investment decisions of the private sector.

Long Term Development Framework (LTDF)

Many cities around the world are competing with one another on the global open market to become economically competitive and in doing so, are inadvertently creating unsustainable environments. Against this background, it is clear that the Municipality has indeed a direct role to play in the facilitation and management of long-term planning and development processes that consider the issue of sustainability. The Municipality has reviewed its Long Term Development Framework (LTDF) to ensure that sustainability in all its facets is embedded into the Municipality and influences the IDP.

Development Challenges

Significant strides have been made to address the key development challenges in the Municipality. While significant progress has been made in all areas, there is still some distance to go towards addressing the following challenges:

- High rates of unemployment and low economic growth;
- High levels of poverty;
- Low levels of skills development and literacy;
- Limited access to basic household and community services;
- Increased incidents of HIV/AIDS and communicable diseases;
- Loss of Natural Capital;
- Unsustainable developmental practises;
- High levels of crime and risk;
- Ensuring adequate energy and water supply;
- Ensuring food security;
- Infrastructure degradation;
- Climate change;
- Ensuring financial sustainability;
- Ineffectiveness and inefficiency of inward-looking local government still prevalent in the Municipality.
Strategic Priority Areas

In order to achieve our vision and to address the development challenges, there are a number of Strategic Priority Areas which need to be taken into consideration. These strategic priorities lead to the creation of structures which support, house and associate other actions and activities. It also acts as a point of leverage for creating a sustainable city that is “caring and liveable”.

Eight Point Plan

To address the challenges listed above the Municipality’s delivery plan is organised into eight separate but related plans. The plans, programmes and projects are supportive of each other, to ensure greater impact in delivery and, its goals and outcomes are achieved.

1. Develop and Sustain our Spatial, Natural and Built Environment.

Goal
The goal of this plan is to direct and manage the use of the built and natural environment to ensure sustainable and integrated growth and development of our Municipality.

Desired Outcome
Citizens will be able to access and use resources to meet their needs without compromising the amenity for others and the resource base of the Municipality in the present and in the future.

2. Developing a Prosperous, Diverse Economy and Employment Creation.

Goal
To develop the economic wealth of the eThekwni Region for the material well-being of all its citizens.

Desired Outcome
Strong economic growth, sustainable job creation and poverty alleviation.
3. Creating a Quality Living Environment

**Goal**
Promote access to equitable, appropriate and sustainable levels of household infrastructure and community services, and facilitate access to housing.

**Desired Outcome**
 Appropriately serviced and well maintained, quality living environments.

4. Fostering a Socially Equitable Environment.

**Goal**
To promote and create a safe, healthy and secure environment.

**Desired Outcome**
All citizens living in a safe, healthy and secure environment.

5. Creating a Platform for Growth, Empowerment and Skills Development

**Goal**
To establish eThekwini as a learning city which uses knowledge management techniques and processes to enhance the skills base of the citizenry as well as share good practice with other municipalities.

**Desired Outcome**
- A skilled and capable citizenry, within the eThekwini Municipal Area, that shares in and contributes to the economic expansion and growth of the region;
- A skilled work force that delivers effective and quality services to the citizens of eThekwini Municipality;
- A learning city.

6. Embracing our cultural diversity, arts and heritage.

**Goal**
Create an enabling environment for social cohesion and economic development through arts, culture, sports, recreation and heritage.

**Desired outcome**
A municipality that embraces arts, culture, sports, recreation and heritage as a catalyst for social cohesion and economic development.

7. Good Governance and Responsive Local Government.

**Goal**
Ensure a strong, caring and democratic institution to promote and support a consultative and participatory local government.

**Desired Outcome**
- All citizens embracing, practising and benefiting from the concepts of Good Governance;
- A stronger, more efficient public service which is capable of developing and implementing policy and delivering better services to all people at all levels;
- Better and more transparent public management;
- More participative and responsive Municipality, particularly at all levels;
- A Municipality which prevents, and fights corruption and waste at all levels;
• A Municipality where all inequalities of the past are eradicated.

8. Financially Accountable and Sustainable City.

**Goal**
To maximise the Municipality’s financial resources to ensure long-term financial viability and sustainability.

**Desired Outcomes**
- Confidence of all internal and external stakeholders in municipal financial management;
- Excellence in the service delivery of municipal financial services;
- Compliance with prevailing municipal financial legislation.

The capital and operational budgets for each of the plans are tabulated below.

**Spatial and Geographic Considerations**

Given our Municipality’s unique and diverse spatial landscape, a concerted attempt has been made to interrogate programmes and projects in terms of our key development dialogues, with due regard to the particular locale of the project. This analysis will be done within the context of our overall spatial framework which divides the metropolitan area into an urban core, suburban, rural and agricultural areas.

**Implementation of the IDP**

The IDP drives the strategic development of the Municipality and these processes are tabulated in Chapter Three. The Municipality’s budget is influenced by the strategic objectives identified in the IDP. The service delivery budget implementation plan (SDBIP) ensures that the Municipality implements programmes and projects based on the IDP targets and associated budgets. The
The performance of the Municipality is tabled in its Annual report. There is a public participation and consultation process associated with each of the processes identified.

**SDBIP**

The SDBIP gives effect to the implementation of the Municipality’s IDP over the 2012/2013 financial year. The SDBIP further aligns the budget to the IDP priorities. The SDBIP provides a credible information management plan to ensure service delivery targets and other performance management indicators are achieved.

**Annual Report**

The annual report provides a collation of the year’s activities as recorded by the scorecard, the budget and the quarterly targets.

**Municipality Performance Monitoring & Evaluation System**

The Municipal scorecard sets the broad five year targets which are assessed annually. Five-year targets coincide with the term of the new office of Councillors. The performance management system is broken down into the development of the individual performance plans for senior management and the revision of the municipal scorecard. The Municipal scorecard can be read with the national KPAs and against the Eight Point Plan of the IDP.

The five National Key Performance Areas are:

1. Basic Service Delivery
2. Local Economic Development (LED)
3. Good Governance and Public Participation
4. Municipal Institutional Development and Transformation
5. Municipal Financial Viability and Management

KPIs for each of the SFAs are contained in the relevant plan.
The Municipal Infrastructure Investment Framework (MIIF)

The Municipality has embarked on a Municipal Infrastructure Investment Framework for the Municipality. It does this to ensure that all backlogs in the provision of infrastructure are removed. However, this must be done in such a way so as to ensure that the Municipality, which is at the forefront of infrastructure delivery, remain financially viable and have the capacity to operate and continuously maintain this infrastructure.

The framework also considers the monitoring systems required to assess progress with respect to infrastructure delivery as well as processes to ensure that systems and management capacity are in place in municipalities to manage the infrastructure, with the emphasis on a municipal infrastructure asset management strategy.

Social Facilities Accessibility Model

The model matches the demand for facilities based on population density and distribution, with the supply of social services based on spatial location, capacity of service and the levels of accessibility based on public transport travel time.
Chapter 1:  
Situational Analysis

eThekwini Municipality is located on the east coast of South Africa in the Province of KwaZulu-Natal (KZN). The Municipality spans an area of approximately 2297km² and is home to some 3.5 million people. It consists of a diverse society which faces various social, economic, environmental and governance challenges. As a result it strives to address these challenges which mean meeting the needs of an ever increasing population.

1.1 Population:

The people who reside within the municipal area consist of individuals from different ethnic backgrounds. The majority of the population come from the African community (71%) followed by the Indian community (19%), White community (8%) and the Coloured community (2%). Individuals within the 15-34 year age group comprise the majority of the population. In terms of gender the municipal population comprises 1,709,678 males and 1,759,146 females and the sex ratio of the municipality is the highest in the Province i.e. 97.2. The greatest population concentrations occur in the central and north regions. The central region is the Urban Core of the municipality and is home to approximately 1.30 million people (34%). It is followed by the northern region which is home to approximately 1, 15 million people (31%). The south accommodates approximately 730 000 people (18%) and the outer west region accommodates the least number of people with a total population of approximately 577 500 people (16.5) (Census 2001 & 2007).

In terms of life satisfaction there are more people who are dissatisfied (34%) than there are people who are satisfied (25%). Satisfaction with life has decreased from 32% in 2009/10 to 25% in 2010/11 while dissatisfaction has increased from 31% in 2009/10 to 34% in 2010/11. Neutrality with life has increased 37% in 2009/10 to 41% in 2010/11 (Quality of Life Survey 2010/11).

The main reasons for life satisfaction include family and friends, not having any problems, employment and business and health and fitness. Dissatisfaction with life emanates from unemployment, health problems, financial problems, family issues and personal problems, housing issues, crime and a lack of improvement in people's lives.

Issues which have been identified as the most serious day to day problems experienced by citizens include poverty, cost of living, unemployment, crime, transport, health issues, drugs, housing and the provision of electricity and water.
Key Issues relating to the Population:
- Increase in life dissatisfaction due to crime, unemployment, health and basic needs not being met.
- Increase in population within the Municipality through natural growth and migration.

1.2 ECONOMY:

Major development projects planned for the eThekwini Municipality are poised to have a positive impact on the economy during the next ten to fifteen years. Expansions at the Durban Port, the mixed-use development at Cornubia, the Dig-out Port at the old airport site, the major shopping centre development at Shongweni in the outer west, new developments at Dube Trade Port and a massive tourism boost from the Conference of the Parties (COP) 17 event at Durban ICC during November 2011 are all expected to play an effective role in placing the Municipality on a firm growth trajectory especially for the local economy and job creation.

All of these initiatives are expected to create a substantial number of temporary and permanent jobs. The development at the Cornubia project alone will create approximately 60,000 permanent jobs when complete.

Following the decline of Gross Domestic Product (GDP) growth during 2008-09 the economy bounced back positively during 2009-10. The eThekwini’s GDP (in constant prices, 2005) amounted to R196, 1 billion during 2010 and it is forecasted to grow by 3.3% to R202, 5 in 2011. Presently it comprises 65, 5% of Kwa-Zulu Natal’s GDP and 10, 7% of the country as a whole.

Economic growth in the Municipality increased by 3.1% between 2009 and 2010 and the total GDP outperformed that of the Province and country as a whole during the period 2005 to 2010. eThekwini’s economy expanded at an annual average rate of 4.1% over that period, while the economy of KZN and the country as a whole grew by 3.7% and 3.5% respectively.

The above pie chart shows the percentage contribution to GDP by the broad sectors during 2010. eThekwini’s economy was dominated by tertiary industries that included (1) finance (23%), (2) manufacturing (22%), (3) community services (17%), and (4) construction (3%). Apart from the tertiary sector fulfilling a major role within the context of eThekwini’s economy, manufacturing (which is classified within the secondary sector) constituted 22% of the total economic activity. It was
particularly the production of food and beverages, as well as fuel, petroleum, chemical and rubber products that contributed towards the magnitude of manufacturing within eThekwini.

In 2010, the total economically active population (EAP) in the Municipality amounted to 37.3% of its total population of 3,467,302 in 2010, and constituted roughly 47.3% of the provincial EAP. An estimated 1,602,319 individuals were employed in eThekwini in 2010 (including both the formal and informal sectors) down by 0.41% from 2009. Features of eThekwini’s employment base included the following in 2010:

- Employment numbers in the eThekwini Municipality amounted to 52.7% of the provincial total;
- The majority of employment opportunities were in (1) Community Service, (2) Trade and (3) Manufacturing;
- After a growth of 6.7% in total employment numbers in 2008 (2008 to 2009), a decline of 0.4% was recorded in 2010;
- The construction sector was least affected by the global economic slump recording a growth rate of 4.2% in 2010;
- The economic sectors that recorded the largest declines in employment numbers between 2009 and 2010 were (1) Manufacturing (down by 11,819) and (2) Finance (down by 3,573).

Unemployment in the eThekwini Municipality was recorded as 281,717 in 2010. This figure was significantly lower than 350,303 in 2004 and slightly lower than figures recorded in 2009 (300,214). Unemployment was highest in the African population group (236,014) followed by the Asians (32,689), Coloureds (7,312) and Whites (5,575) in 2010.

The region’s poverty number was an estimated 20.5% of the Province in its entirety - in 2009 (i.e. 1 052 452 of 5 138 948). Considering the fact that - in the same year - eThekwini’s population accounted for 33.0% of KZN, poverty on average is less pronounced in the Municipality than further afield across the Province. This is a typical phenomenon when considering urban areas relative to those more rural.

The percentage of people living in poverty - in eThekwini - as a percentage of the total population in the Municipality, compared to the same percentage for KZN, is testament to the fact that poverty in the Municipality is less pronounced than is the case in other parts of the Province. It is estimated that in 2009, 41.8% of eThekwini’s population were subject to conditions associated with poverty, in comparison to the Province’s 50.5%. It was estimated that in 2010, 30.5% of eThekwini’s African population were battling the effects of poverty, as opposed to 0.3% of the White population, 19.5% of the Coloured population, and 9.2% of the Asian population.

Income inequality in eThekwini Municipality was lower (Gini Coefficient of 0.62) in comparison to the Province (0.65) and National (0.64) in 2010. The Gini Coefficient has also decreased over the years from 0.64 in 2004 to 0.62 in 2010.

The Tress index gives an indication of the concentration or diversification in an economy. An index of zero reflects a totally diversified economy and a number closer to 100 indicates a high level of concentration. In 2010 eThekwini’s Tress index was approximately 46.2 which was higher than both the Provincial and National index. This indicates that eThekwini’s economy is less diversified in terms of its economic activity spread than KZN and South Africa. This can be attributed to the Municipality being highly dependent on its tertiary sector.

In 2010 total household expenditure amounted to R159 Billion or 54.8% of total household expenditure in KZN. The bulk of the expenditure pertained to the purchase of food, beverages and tobacco, accommodation and taxes.

The National Government’s New Growth Path 2010 aims to grow the economy by 7% and create 5 million additional jobs by 2020. The main indicators will be jobs (the number and quality of jobs
created), growth (the rate, labour intensity and composition of economic growth), equity (lower income inequality and poverty) and environmental outcomes. Accordingly, eThekwini must also target an economic growth of 7% and contribute towards the national employment target by creating approximately 36,000 jobs per annum (projection based on current trends and the fact that eThekwini's employment share of national is about 8%).

The new National Development Plan 2030 by national government is proposing to create 11 million jobs by 2030. Some of the ways they plan to achieve this is by promoting employment in labor-absorbing industries, raising exports and competitiveness, strengthening government’s capacity to give leadership to economic development and mobilizing all sectors of society around a national vision. The Plan acknowledges that the factors that drive growth are not always the factors that drive job creation – and the issues that are good for job creation are not always good for growth. The eThekwini Municipality's Economic Strategy should therefore focus on the various aspects within the Municipality that would contribute to both job creation and growth as both will be necessary in order to ensure a path of sustained economic prosperity.

Key Issues relating to the Economy:
- Increase in unemployment;
- 41.8% of population subject to conditions associated with poverty;
- Little or no diversity in the economy;
- Declining resource base and the impacts of climate change.

(Sources: Global Insight, Policy, Strategy, Information & Research Dept., Economic Development Unit)

### 1.3 Health:

The morbidity and mortality profile of the eThekwini Municipal Area (EMA) demonstrates how the challenges of the high HIV and AIDS burden, the increased maternal and child mortality, the escalating lifestyle diseases and the high number of accidents and injuries have had an impact on decreasing life expectancy of citizens within the metro. The mushrooming of informal settlements results in less than desirable living conditions exposing the inhabitants to environmental and social health risks. Associated conditions of poverty give rise to malnutrition especially in children under 5 years.

Extrapolation of the HIV sero prevalence survey results to the general population estimates HIV prevalence in the South African population aged between 15 to 45 years at between 17% and 18% with KZN higher than the national average at approximately 25%. The results of the annual survey illustrate how HIV in the pregnant population has stabilised at an alarmingly high rate of approximately 40%.

Tuberculosis is recognised as the leading opportunistic infection amongst HIV positive persons with approximately two thirds of HIV infected persons co-infected with TB. In 2009 a total of 43739 new and retreatment cases (both HIV positive and HIV negative) were registered in the EMA making eThekwini one of the districts with the highest number of TB cases.

South Africa, including the EMA, is one of the few countries where mortality rates have increased in children less than five years of age due to HIV and AIDS, sepsis, injuries, pneumonia and diarrhoea. The high number of maternal deaths also remains a problem with worrying trends which forecast that the country is unlikely to meet the millennium development targets in terms of reducing mortality amongst children and pregnant women.

In addition to infectious diseases, a high number of deaths are attributed to diseases of lifestyle with leading causes of death linked to hypertension, diabetes, cancer, epilepsy and asthma.
Although the main role of environmental health services is to prevent disease burden emanating from environmental risks, at the present levels of productivity it is unclear what impact this service has on mitigating these risks.

The aforementioned poor health outcomes can also be partly attributed to the health system challenges of poor quality of services, inadequate and inappropriate infrastructure, inadequate supply of human resources, inadequate funding of the health system, disparities of service provision between suburban areas and previously disadvantaged communities and inadequate health information systems.

Key Issues relating to Health:
- High rate of HIV/AIDS and TB;
- Financial resources limited due to the Municipality currently funding health care provision via. its own budget, whilst the function is a national and provincial mandate;
- High teenage pregnancy rate;
- High incidence of STIs.

1.4 NATURAL ENVIRONMENT:

The eThekwini Municipality (EM) is situated at the centre of the Maputaland-Pondoland-Albany Region, an area described by Conservation International as a “Biodiversity Hotspot”, one of only 34 in the world. The EMA is characterised by diverse topography, from steep escarpments in the west to a relatively flat coastal plain in the east. The landform incorporates 98 km of coastline, 18 major catchments and 16 estuaries, 4000 km of river, and nearly 75 000 hectares of land identified as part of the Durban Metropolitan Open Space System (D’MOSS) (adopted December 2010). D’MOSS supports a wide variety of terrestrial and aquatic ecosystems, thereby attempting to meet biodiversity conservation objectives, while aiming to secure the supply of the ecosystem services that are provided freely by these ecosystems to the people of Durban. Ecosystem services, and their associated biodiversity, provide probably the most significant buffering effect against the negative impacts of climate change for local communities and infrastructure.

These ecosystem services include soil formation, erosion control, water supply and regulation, climate regulation, cultural and recreational opportunities, raw materials for craft and building, food production, pollination, nutrient cycling and waste treatment. Importantly the protection of our natural environments will make a significant contribution to our ability to adapt to climate change impacts (known as ecosystem-based adaptation or EBA), which are predicted to include higher temperatures, sea level rise and more intense rainfall. The EGS supplied by the D’MOSS were valued at R3.1 billion/per annum in 2003.

Notwithstanding their value, the EMA’s natural environments have been severely impacted by landscape change, invasive alien species, over exploitation and pollution. Climate change is a significant and increasing threat. Many people have benefited over the last century from the conversion of natural ecosystems to human-dominated ecosystems and from the exploitation of biodiversity. At the same time, however, these gains have been achieved at growing cost in the form of losses in biodiversity, degradation of many ecosystem services, and the exacerbation of poverty for other groups of people (Millennium Ecosystem Assessment, 2005). The situation in Durban is no different to the global assessment and suggests that current policy, law, governance and environmental management efforts have been inadequate to prevent this degradation.

A paper published by leading scientists in 2009 (http://www.ecologyandsociety.org/vol14/iss2/art32/) introduced the concept of nine planetary boundaries and safe operating spaces for humans. According to the authors, transgressing these boundaries or thresholds may be deleterious or even catastrophic because this may trigger non-linear, abrupt environmental change at the continental- or
planetary-scale. The authors believe that we have already transgressed the planetary boundaries for climate change, biodiversity loss and changes to the nitrogen cycle. Some of the measures presented below suggest that local level thresholds may also be exceeded.

**Terrestrial ecosystems**

Virtually every terrestrial habitat in the EMA has undergone significant levels of transformation (see Table 3). The data suggest that every vegetation type requires some level of protection in light of the major losses due to transformation, and the relatively small areas that are statutorily protected. KZN Sandstone Sourveld, North and South Coast Bushland, and North and South Coast Grassland, however, are vegetation types that have been subjected to significant habitat destruction and require immediate and particular protection if they are to remain extant and continue to contribute to the well-being of our citizens. Quantitative targets set by Ezemvelo KZN Wildlife for the protection of different vegetation types (given as a % of the original extent) have already been exceeded for three vegetation types in the EMA: KZN Sandstone Sourveld, and North and South Coast Grasslands.

Table 1: Original extent (not calculated for forest, current extent given), level of transformation, and protection status of vegetation types from an EM, provincial and national perspective. Vegetation types are a key landcover mapping unit used to map areas of homogenous habitat.

Habitat destruction (or land transformation), invasive alien species, and pollution, are widely regarded as the greatest threats to biodiversity and the associated delivery of ecosystem services. At present a mere 14% of the D’MOSS area is protected (e.g. through appropriate conservation zoning, conservation servitudes, land acquisition) whilst only 9.3% of D’MOSS is managed for conservation. Increasing the total area of D’MOSS that is protected and managed for conservation is critical if the biodiversity of the EMA, and its associated EGS, are to be protected. This is a huge challenge considering the rapid urbanisation and transformation that is taking place within the Municipality in order to meet development and service delivery goals, as well as growing threats such as invasive
alien species and climate change. The EM has made some progress in reversing the loss of natural areas and improving management by using various instruments such as controlled development areas, environmental servitudes, environmental special rating areas, land acquisition and including environmental considerations in preparing the municipal valuation roll.

Invasive alien plants in South Africa now infest over 20 million hectares, as reported by the Agricultural Research Council (ARC). The report, released in July 2010, was commissioned by the Department of Water Affairs. A recent survey by the EM found that as much as 48% of selected conservation areas were infested with invasive alien plants. Many alien plant species are predicted to expand their density and distribution under climate change scenarios, thereby impacting further on local biodiversity. It is acknowledged that current indigenous biodiversity will be a critical lifeline to humans should the various predicted climate change scenarios unfold.

Aquatic ecosystems
Results from bio-monitoring programmes focussing on the rivers and estuaries of Durban have revealed that these ecosystems are in a particularly poor state. Using aquatic bio-monitoring methodologies, the EM found in 2010 that 71 of 175 (or 40%) of its monitoring sites on its rivers were considered to be in a poor condition and only six (or just over 3%) were classified as near natural. Rivers were found to be experiencing multiple impacts including spills and illegal discharges, solid waste dumping, wastewater treatment works not operating to specification or licence conditions, sand mining, realignment of watercourses, flow reduction through dams, removal of riparian flora, and infestation by alien flora and fauna. In a survey of the 16 estuaries in the EMA published in 2010, only three, together making up 10% of the total municipal estuarine area, were classified as in good condition (none were classified as excellent). Because of the condition of the larger systems such as the uMngeni and Durban Bay, a total of 50% of the municipal estuarine area must be considered highly degraded. The lack of national and provincial data prevents a direct comparison being made. Expert opinion, however, would suggest that based on the current ecological condition of Durban’s aquatic ecosystems, they are amongst the lowest ranked systems in the country. This has major implications for communities depending directly on water from these systems, and also undermines tourism opportunities on municipal beaches.

Water quality covers a broad spectrum of parameters, which are largely influenced by the activities of the EM. Eutrophication as a result of nutrient enrichment is having a detrimental impact on rivers and estuaries in the EM. Reducing nutrient loading, particularly at treatment works across the Municipality, will go a long way towards addressing this threat.

Sand mining, both legal and illegal, is also having a major impact on aquatic ecosystems and the delivery of sediment to the coast. Controlling the damage caused by sand mining represents a serious challenge for the EM. The CSIR was commissioned in 2008 to undertake a study of the sand supply from rivers and the implications for coastal sand budgets. The 18 rivers within the EM’s jurisdiction supply sediment (an ecosystem service) to the coastal zone and this sand is important in replenishing sand lost from beaches and coastal dunes through coastal erosion processes. Therefore the sand is important for *inter alia* buffering the impacts of high seas and making beaches attractive to tourists – further ecosystem services. Sediment yields have been increased through poor land management practices, but overall supply to the coastline has decreased by two-thirds of “natural” yields due to sand mining and the 12 large dams that have been constructed on Durban’s rivers which act as sediment traps. Given that discharge of sediment from rivers dominates sand supply, it is predicted that the reduction in sand supply could result in mean coastal erosion of > 1 m/yr. The report found that the combined impacts of sea level rise and increased sea storminess are likely to have severe consequences in terms of coastal erosion, initially similar to and eventually exceeding the erosion suffered in KZN during 2007.

*Ecosystem-based adaptation (EBA) and the Green Economy*
Given the current threats to biodiversity, and the pending impacts anticipated as a result of climate change, the EM must urgently invest in protecting, restoring and managing ecosystems to enhance adaptive capacity in a cost-effective and sustainable manner. Ideally, this will be achieved by
transitioning to a “green” economy, primarily through the building of a new economy based on bio-infrastructure, which increases the supply of ecosystem services. The use of bio-infrastructure represents a strategic opportunity as it can be expanded without straining already limited natural resources. In fact, the use of bio-infrastructure can actually increase the supply of these resources. In this regard, two large, municipal-funded implementation programmes, namely the Working for Ecosystems Programme and the Working on Fire Programme have been established. Both offer not only EBA advantages (through Invasive Alien Plant control and ecosystem management) but also employment and skills development opportunities for previously unemployed members of local communities. In addition, reforestation of transformed areas, either previously cleared for agriculture (sugarcane) or, in forests damaged by fire and resource harvesting, is in progress. The Community Reforestation Programme has demonstrated an holistic approach to biodiversity conservation, climate change mitigation and adaptation, as well as rural development and poverty alleviation.

Key Issues relating to the Natural Environment:

- The natural environment (including biodiversity) is most threatened by transformation of natural areas, the uncontrolled spread of invasive alien species, climate change, and pollution. Most ecosystems are currently approaching, or have already exceeded, their thresholds in terms of minimum viable size;
- Limited funding to acquire and manage D’MOSS areas for conservation and the supply of EGS;
- Terrestrial and aquatic environment in a generally poor state with a small number of exceptions;
- Lack of instruments, political will and education and awareness campaigns to implement sustainable practices;
- Need to find affordable and sustainable solutions with contributions from all stakeholders. A radical transformation of how the Municipality does its business is needed if the natural environment, which underpins development, is to be sustained.

1.5 Public Transport:

Approximately 40% of the residents travel by public transport, that being rail (7%), bus (25%) and taxi (68%). The Municipality is fairly well serviced with commuter rail services which comprise of the following:

- North-south line following the coastal plain;
- Mainline into the hinterland;
- Circuitous line between Pinetown Central Business District (CBD) and Rossburgh Station;
- Four spur lines into Umlazi, Chatsworth, KwaMashu and Bridge City (under construction);
- Spur line to the lower Bluff;
- Section of single line adjacent to North Coast Road.

The taxi and bus route system provides extensive coverage throughout the municipal area and beyond. There are approximately 1600 unidirectional bus routes which are serviced by approximately 200 operators in a mix of subsidised contracts and unsubsidized services. There are approximately 1500 unidirectional taxi routes, serviced by 120 taxi associations in the municipal area.

Overall, the public transport system is economically inefficient with many services in direct competition with each other, resulting in unprofitable rail and bus trips.

In terms of special needs/transport for the disabled the following services have been introduced within the EMA:

- Three purpose built buses have been introduced into service. Known as the Sukuma bus, the buses are fitted with an automated wheelchair lift and six wheelchair rest points. The service
operates in three areas covering: Pinetown /Clermont to CBD; Merewent/Umlazi to CBD and Ntuzuma to CBD.

- The People Mover bus servicing the inner CBD caters for people with disabilities. Each bus has two wheelchair berths fitted with seatbelts for safety whilst passengers are in transit, is air-conditioned and equipped with an electronic ramp to enable quick and easy access.

- The Dial-A-Ride service provides a door-to-door service. Only registered members are transported by this service and there is a dedicated Call Centre where potential users can register their trips in advance.

Key Issues relating to Transport:
- Limited funding to provide adequate public transport services;
- Lack of integration of services between transport modes;
- Lack of adequate control and enforcement over public transport modes;
- Limited capacity to ensure safety at public transport pick-up and drop-off points.

However, recently there has been good progress in the re-capitalization of rolling stock with the new taxis, municipal buses and particularly with the commuter rail fleet.

1.6 Food Security:

Hunger and food insecurity are great challenges facing communities residing within the municipal area. A multi-pronged approach is necessary to improve the lives of the people. The key challenges faced include land shortages and ability to identify appropriate opportunities for local production of food. The Municipality has initiated a number of programmes to assist in the alleviation of food insecurity. These include the creation of dedicated structures to drive agriculture, aqua and poultry farming; soya bean project, 20 community support farms; 423 community gardens, mushroom vs. hydroponics project, One Home One Garden project, etc. Support in the form of seedlings and compost together with expertise is provided to communities to assist them in ensuring their food security.

Key Issues relating to Food Security:
- High levels of hunger and food insecurity;
- Shortage of land to undertake food production;
- High unemployment rates lead to low purchasing power;
- Inadequate safety net – few household income earners and high dependency ratios exacerbates the situation;
- Impact of climate change on food security.

1.7 Climate Change:

Climate change is likely to cause a number of challenges for eThekwini Municipality (EM), linked to global impacts such as increased temperatures, extreme weather events (e.g. flooding and drought), sea level rise and climate variability.

Temperatures in Durban are likely to increase by 1.5°C and 2.5°C by 2065 and by 3.0°C and 5.0°C by 2100. Projected annual rainfall changes are likely to include an increase in aggregated rainfall by 2065 with an increase of up to 500 mm by 2100. This increase is likely to be manifest as an increase in extreme rainfall events and stream flow intensity across the municipal area with prolonged dry spells between rainfall events. Sea level rise along Municipality’s coastline is already occurring at 2.7 cm per decade and may accelerate into the future.
Climate change impacts for the EM may include:

- An increase in the frequency and intensity of floods and droughts;
- A decrease in water availability due to changed rainfall patterns and increased evaporation, this will affect subsistence dryland farmers the most.
- An increase in erosional capacity of river courses, resulting in the loss of more top soil, thus decreasing the agricultural value of land and increasing siltation in dams.
- Infrastructural damage as a result of extreme weather events causing flooding, affecting human well-being and safety as well as insurance costs;
- An increase in erosion of coastal areas due to sea-level rise;
- Higher energy consumption due to increased residential cooling load;
- An increase in economic losses due to property damage and decreased tourism revenue;
- An increase in heat-related vector-borne (e.g. malaria) and water-borne (e.g. cholera) illnesses;
- An increase in heat stress, leading to dehydration, particularly for those that reside in the Municipality, as well as children and the elderly;
- Changes in the geographical distribution of plants and animals with extinction of species that are unable to move and an increase in the prevalence of alien invasive species. This will negatively affect the biodiversity of the eThekwini Municipal Area and the associated goods and services;
- Further loss of critically endangered grassland habitats as they are outcompeted by woody species able to utilize the higher concentrations of CO₂ in the atmosphere.
- A reduction in yield of staple food crops, such as maize;
- Changes in the optimal planting and harvesting dates for crops as well as land suitable for crop production;
- Heat stress increasing livestock and poultry mortality rates;
- An increase in respiratory problems in the Municipality due to a decrease in air quality (e.g. changes in the concentration and distribution of near-surface ozone) and increased dampness;
- Deterioration of foods leading to increased incidents of food-borne diseases;
- The areas particularly vulnerable to sea-level rise are coastal wetland and dune ecosystems. The majority of coastal land is currently undeveloped in Durban, however, land a few metres above the current high water mark could be lost to potential sea-level rise. Shoreline Management Plans are required to determine what adaptation interventions if any are required now or in the future.

To respond to these changes EM initiated the Municipal Climate Protection Programme (MCPP) in 2004. This is a phased programme, which has focused on climate change adaptation and enhancing the Municipality’s ability to cope with climate change impacts. The likely climate change impacts have been assessed and plans, programmes and projects developed to assist the Municipality in dealing with these impacts.

The mitigation and adaptation work streams of the MCPP are located in the Energy Office and the Environmental Planning and Climate Protection Department respectively. This latter office has advanced the adaptation agenda with the development and approval of the Durban Adaptation Charter during United Nations Framework Convention on Climate Change COP 17/CMP 7 in December 2011. This document, endorsed by 114 mayors and other elected local leaders representing over 950 local governments from around the world, promotes ten key local government adaptation interventions, and marks a milestone in the advancement of the adaptation agenda in the international climate change debate.
1.8 INFRASTRUCTURE DELIVERY

The eThekwini Municipality takes great pride in what we have achieved, whilst at the same time acknowledging that we have some way to go in eradicating the backlogs that exist. The existing backlogs can be summarized as follows:

<table>
<thead>
<tr>
<th>Basic Service</th>
<th>Existing Backlog (consumer units) as at 31 December 2011 (incl 2011 dwelling count)</th>
<th>Timeframe to address based on current funding levels *</th>
</tr>
</thead>
<tbody>
<tr>
<td>Water</td>
<td>74481</td>
<td>37 years</td>
</tr>
<tr>
<td>Sanitation</td>
<td>231387</td>
<td>14 years</td>
</tr>
<tr>
<td>Electricity</td>
<td>323000</td>
<td>32 years</td>
</tr>
<tr>
<td>Refuse removal</td>
<td>0</td>
<td>0 years¹</td>
</tr>
<tr>
<td>Roads</td>
<td>1 136 kms</td>
<td>103 years</td>
</tr>
</tbody>
</table>

* The timeframes indicated depend on the rollout of funding / subsidies.
¹ Linked to the housing delivery programme.

Table 2: Existing Backlogs
Source: eThekwini Municipality, Procurement and Infrastructure Cluster

However, vast strides have been made by the Municipality to address the service delivery backlogs and specific strategies have also been put in place to deal with the existing backlogs.

The achievements to date include:
- 15 000 new customers having access to electricity each year;
- 852 000 customers having access to water;
- Desludging of 30 000 VIP pit latrines;
- 100% refuse removal coverage;
- 33 pedestrian bridges and 320kms of sidewalks constructed.

In addition, the Municipality also assists residents by the provision of free basic services which include:
- Rates:
  o First R120 000 of property value – no rates charged (479 750 properties benefit);
  o Pensioners/child headed households – first R400 000 of property value – no rates charged (60 610 properties benefit);
  o Vacant land: first R30 000 of land value- no rates charged (43 123 properties benefit);
- Water: no charge if less than 9kI of water used per month (487 062 households benefiting);
- Electricity: first 65kWh free to poor residents using less than 150kWh per month (65 000 households benefitting);
- Sewerage: no charge if less than 9kL of water used per month;
- Refuse: stepped tariff sliding scale.

Key Issues relating to Infrastructure Delivery:
- Limited access to basic household and community services;
- Limited funding available to deal with high backlogs;
- Inability of households to pay for basic services;
- Illegal water and electricity connections.

¹ History has shown that this backlog grows every year as new needs are uncovered through modeling of the network as well as new backlogs arising due to storm events.
1.9 HOUSING

The provision of decent living infrastructure for residents is a priority of the Municipality. The table below gives an indication of the 2011 dwelling count within the municipal area:

<table>
<thead>
<tr>
<th>Type</th>
<th>Sub Type</th>
<th>Households</th>
</tr>
</thead>
<tbody>

* - The timeframes indicated depend on the rollout of funding / subsidies.

Table 4: Housing Backlog
Source: eThekwini Municipality, Procurement and Infrastructure Cluster

The Municipality has however delivered over approximately 164 000 homes to date and is currently in the process of delivering houses in the rural areas as well as 15 000 units planned for the Cornubia development. In addition, 80 Community Residential Units have been delivered as a part of the hostel upgrading project and 1600 rental units were transferred to tenants in 2010/11. The Municipality acknowledges that the backlog will take many years to eradicate. However, to make some improvement to the quality of life in the short term, interim measures such as ablation blocks, refuse removal, storm water ditching, fire breaks, etc. are being provided to people residing in informal settlements.

Key Issues relating to Housing:
- High backlogs with limited funding available/unfunded mandates;
- Lack of well located land;
- Projects stalled due to delays experienced in land acquisition, lack of well located and suitable land, environmental and developmental approvals and conflicting interests, especially with adjoining communities.
The eThekwini Municipality is currently developing a comprehensive land use management system for the entire Municipal area to give effect to the requirements of Section 26 of the Municipal Systems Act (2000). A key aspect of this system is the preparation of a “Planning and Development Management Toolbox” which will include an Integrated Suite of Plans or Hierarchy of Plans.

The Spatial Development Framework (SDF) is the primary spatial response to the development context, needs and development vision of the Municipality. It is the primary level of translation of social, economic and environmental development and management policy into spatial terms and is the primary Land Use Management tool of the Municipality.

Spatial Development Plans have also been prepared for the North, South, Central and Outer West (2nd revision) planning regions and were first adopted in November 2009. The second minor annual review was undertaken and adopted by Council in November 2011.

Spatial Development Plans provide strategic multi-sectoral planning guidance for each planning region that translates the spatial intentions of the SDF, indicates the short, medium and long term growth & development opportunities, manages & directs future development and investment over a 20 year time frame, identifies the Municipality’s development priorities & phasing and provides broad based land use, environmental, transport planning and bulk infrastructure directives to guide more detailed planning within Local Areas and Precincts and informs the Land Use Schemes.

CENTRAL SPATIAL REGION

This region is essentially the Urban Core of the EMA and is home to approximately 1.30 million people accounting for 34% of eThekwini’s total population of 3.5 million people (Stats SA). The boundaries of the Central Spatial Region (CSR) extend from the Umgeni River, in the North, along the coastline through to the Umlaas Canal in the South and extend to the escarpment in the west extending over an area of 677 km² (67772.33 ha). Three Area Based Management (ABM) areas fall within the CSR namely; Inner eThekwini Regeneration and Urban Management Programme (iTrump), Cato Manor Development Association (CMDA) and part of the South Durban Basin (SDB).

NORTHERN SPATIAL REGION

The Northern Municipal Planning Region (NMPR) boundary extends from Umgeni River in the south to Tongaat in the north with the coastline in the east and the iLembe District Municipality to the west and north. It has a population of about 1, 15 million which is 31% of the total population of 3, 5 million (Stats SA Community Survey, 2007). The population is housed in a total of 201,612 houses. The largest population concentrations are to be found at Inanda/ KwaMashu (58.6%), Phoenix (17.5%) and Durban North (7.1%).

SOUTHERN SPATIAL REGION

The study area of the SSDP is in extent of 510km². In 2001, it was estimated to accommodate in the region of 730 000 people (census 2001), The South MPR extends from the northern boundary...
consisting of the Umlazi River and the Umlaas Canal to the uFudu Escarpment and the Ezimbokodweni River in the north-west to the western and southern boundaries of the eThekwini Municipality. It abuts in the north onto both the central and western metropolitan planning regions. In the west the South MPR borders onto the uMgungundlovu and Ugu District Municipalities.

**OUTER WEST SPATIAL REGION**

The study area of the Outer West is in extent of approximately 78,438ha, representing 34% of the municipal region and accommodating 577,500 people, i.e. 16.5% of the total population of eThekwini Municipality’s 3.5 million people. A large part (50%) of the study area is covered by traditional authorities. A major portion of metropolitan open space system (50%) which requires protection is found within this region. Contribution to GDP stands at 6.6%.

**Key spatial planning issues**

- Need to unlock infrastructure capacity for new growth, address phasing & costs constraints associated with development;
- Need to protect viable agricultural land;
- Need to grow the Municipality’s rates base;
- Need to address the housing & infrastructure backlog;
- Need for strategic economic growth and investment;
- Need to protect key environmental assets and services;
- Need to manage development growth;
- Need for integrated & efficient municipal structure, need to curtail urban sprawl and decentralisation of commercial and community facilities;
- Need for alignment with Municipality strategies;
- Need for rural land use management and control.

**1.11 SAFETY (DISASTER MANAGEMENT)**

eThekwini, being a coastal municipality with a large manufacturing base, is at risk and vulnerable to a range of technological, natural, man-made and environmental disasters. These disasters pose a threat to the development objectives of the Municipality. It is therefore important that disaster management principles are taken into account during the planning processes. The Municipality has therefore implemented disaster risk management measures which aim to minimize the effects of disasters. In this regard communities are educated and trained to recognize the importance of disaster management and formal emergency services are also extended to residents.

Key Issues relating to Safety:

- Backlog in terms of disaster management centres;
- Vast rural areas make it difficult to provide an effective service;
- Concentration of industries, surrounded by residential developments, in certain areas makes these areas extremely vulnerable to disasters;
- Unpredictable and uncertain consequences of climate change;
- Provision of services to informal settlements;
- Lack of awareness and education of disaster and incident management;
- Lack of a disaster risk management strategy.
1.12 CRIME

The Municipality is committed to ensuring a safe environment for residents to reside in. The South African Police Services releases annual data of crime categories for all SAPS stations in S.A. The total crime analysis includes information relating to contact crime, contact related crime, property crime and property related crime. In the period between 2006/7 (166602) until 2010/11 (167262) there has been a marginal increase of 660 in the total crimes committed. However, a comparison of the total crimes committed from 2009/10 (166872) until 2010/11 (167262) shows that there is a gradual increase of 390 reported cases. The Municipality is however committed to continue its involvement in reducing the crime rate.

The municipality has introduced measures to reduce crime such as visible policing, use of CCTV camera technology. The city has also embarked on a crime mapping process based on data that is received from the local police stations.

The map below gives an indication of the spatial location of crime within the Municipality.
The graph below gives an indication of the weighted crime incidence score (WCIS). The WCIS provides an understanding of how crime affects residents of municipalities; specifically by measuring the levels of crime, compared per resident, between different municipalities. It is evident that the crime incidence per resident is lower in eThekwini compared to Cape Town and Johannesburg.
Key Issues relating to Crime:
- Unacceptably high levels of crime;
- Urban design is not conducive to ensuring a safe environment;
- Limited funding to address high crime levels.

1.13 HUMAN CAPITAL DEVELOPMENT

“People are our greatest asset” (Drucker 1995). It is in the same light that the Municipality has embraced this concept and views its citizenry as its greatest asset. To ensure that the municipality effectively develops human capital, it has developed a three tiered strategy i.e. internally (employees and councillors), externally (citizenry) and at a national and global level.

An analysis of literacy levels for the municipality reveals that there has been a decrease in the number of illiterate people between 2001 and 2010.

Table 5: Illiteracy Levels
Source: Global Insights

The map of people more than 20 years old with Matric or higher qualifications shows that there is spatial inequality in educational attainment – the well-developed core of the Municipality has a higher level of education while the townships and rural areas have lower levels.
Externally, a wholistic and integrated approach towards investing in citizens’ development has been adopted by the Municipality. The Municipality provides training externally via the ABET (Adult Basic Education and Training) and maths, science and technology programmes to schools. The objective of the program is mainly to improve MST teaching and learning in order to prepare young people for successful entry into the working world in general and technological careers in particular.

Internally, the Municipality seeks to empower municipal staff by enhancing their skills in order that the services they render are sustainable, effective and efficient. To achieve this, the Municipality’s annual Workplace Skills Plan (WSP) is developed through a critical assessment of the skills needed to deliver on the IDP and the existing skills within the Municipality. The importance of internal skilling is reflected in the budget; in that 1, 14% of the Human Resource budget has been allocated to Skills Development (2011/12 financial year). Of late, emphasis has also been placed on Councillor development/training.

The Municipality is also committed to enhancing the existing capacity of its staff and will over the next few years be rolling out programmes to achieve this, as outlined in the diagram below:

At a national and global level the Municipality is involved in “practitioner training practitioner” programmes through the MILE and CIFAL Durban projects. The Municipal Institute of Learning (MILE), which is being run as a five-year pilot programme, has the following strategic objectives:

1. To facilitate the enhancement of professional and technical capacity of local government professionals on the African continent;
2. To position the eThekwini Municipality as a platform for innovating, learning and sharing with other municipalities, associations and networks, both locally and internationally;
3. To leverage partnerships with tertiary institutions in order to promote collaborative research programmes that will ultimately improve the effectiveness of local government;
4. To provide a municipal technical support service to other municipalities in an empowering and innovative manner; and
5. To co-ordinate the internal knowledge management agenda within the eThekwini Municipality.

In addition, CIFAL Durban, an affiliate of the United Nations Institute of Training and Research, provides a similar service but focuses on training local authorities in Anglophone Africa.

Key Issues relating to Human Capital Development:
• Improve levels of skills development and literacy;
• Skilled individuals leaving municipal area in search of jobs in other areas;
• Municipal personnel with scarce skills in short supply.

The key issues listed for each sector above would inform and guide the strategic direction that the Municipality should take in addressing the challenges that are faced by the communities in eThekwini Municipality.
Chapter 2:
The IDP Strategic Approach

2.1 Introduction

As Local Government, eThekwini Municipality has contributed to the achievement of a number of significant social, environmental and economic development advances, since the ushering in of the new democratic municipal dispensation in December 2000. The majority of the citizens have increased access to a wide range of basic services and more opportunities have been created for their participation in the economy. Local government is a fundamental component of the reconstruction and developmental mandate of our country. The aims of democratising our society, protecting our natural assets, becoming financially sustainable and growing our economy inclusively can only be realised through a Local Government system that is accountable, responsive, effective and efficient. Therefore the focus of the 2012/2016 IDP would focus on building a more inclusive developmental local government that would further translate the Municipality’s Vision into action.

To develop a more responsive, efficient, effective and accountable local government we will outline, in Chapter Two, precisely how we intend to translate our Long Term 2020 Municipality Vision into an effective plan that aligns the municipal budgets, monitoring and evaluating mechanisms as well as timeframes for delivery, in order to achieve our five-year 2012/16 developmental targets. The Municipality has taken the strategic direction to achieve closer alignment between the Long Term Development objectives and the IDP.

Whilst the Municipality has a good track record in delivering goods and services effectively to citizens, one has to recognize that there are challenges that we face. A description of the key developmental challenges is listed to provide a context for the delivery of goods and services in eThekwini. In response to these challenges, we then outline how we have refined our Municipality’s Vision to be more robust, comprehensible and realistic, and a useful tool to help guide the actions of the Municipality, its citizens and key development.

Thereafter, we table the strategic priority areas that have been made by the Municipal leadership to ensure the developmental mandate of the Municipality is achieved. The strategic priorities identified align directly to the objectives of the Long Term Development Plan. This is followed by an explanation of how we forge a pathway to sustainable development actions in order that only those programmes and projects that are consistent with and support our Municipality’s vision and development objectives are pursued.

The Municipality’s Eight Point Plan is summarised and further builds on and embraces the key choices and sets out a clear plan of action that will deliver on the Municipality’s Vision. Following the Eight Point Plan we will then present the Strategic Projects for the 2012/13 financial year.

The Municipal Scorecard, which brings together the Municipality’s Eight Point Plan and the respective strategic focus areas, is presented in the form of a matrix. The Scorecard gives us an indication of all the measures that will be used to help us monitor our performance using the National Key Performance Areas. This chapter ends with a summary of the key focal points of the 2012/2013 IDP formulation.

Chapter Three presents the details of the Municipality’s IDP. The desired outcomes and the goals of each of the Eight Plans are tabled together with an abridged Service Delivery Budget Implementation Plan (SDBIP). The SDBIP’s are structured around Strategic Focus Areas (SFAs) with a number of programmes under each SFA. For each programme, a set of key projects are presented in tabulated form. Capital and operational budget allocation (over a three year period) per Plan are also provided.
Chapter Four outlines the relationship between the IDP and other Municipal instruments that make implementation and monitoring possible.

The strategic approach to the development of the Municipality is underpinned by strategic national and international policy. The development objectives of these policies have influenced the development of the strategic direction that the Municipality has identified. Whilst we have assessed and identified key policies, the most recent and relevant developmental policies (as depicted in the diagram below) - Millennium Development Goals, National Development Plan, Service Delivery Agreement Outcome 9, National Government Programme of Action 2009 – 2014, Provincial Growth and Development Strategy and the Provincial Government Priorities for 2011 - are expanded on below.

![Figure 8: Strategic Policies](image)

### 2.2 Millennium Development Goals

The Millennium Development Goals (MDGs) are eight international development goals that all 192 United Nations member states have agreed to achieve by the year 2015. The aim of the MDGs is to encourage development by improving social and economic conditions. It provides a framework for the entire international community to work together towards a common end i.e. making sure that human development reaches everyone, everywhere. The MDGs focus on three main areas of human development viz. bolstering human capital, improving infrastructure and increasing social, economic and political rights. If these goals are achieved, world poverty will be reduced, lives will be saved, and people will have the opportunity to benefit from the global economy. The eight MDGs which have been identified include:

1. Eradicate extreme poverty and hunger;
2. Achieve universal primary education;
3. Promote gender equality and empower women;
4. Reduce child mortality;
5. Improve maternal health;
6. Combat HIV/AIDS, malaria and other diseases;
7. Ensure environmental sustainability;
8. Develop a Global Partnership for Development.

The goals consist of quantified targets to address extreme poverty in its many dimensions viz. poverty, hunger, disease, lack of adequate shelter, and exclusion whilst promoting gender equality, education, and environmental sustainability. At the same time the goals also represent basic human rights i.e. the rights of each person on the planet to health, education, shelter, and security.

2.3 National Development Plan (NPC 2030 Vision)

Government has released a plan that takes into consideration the Provincial Growth and Development Strategy, The Industrial Policy Action Plan (IPAP) as well as other developmental initiatives. The plan tackles challenges as indicated in various policies and plans whose intention is to improve the lives of the citizens of South Africa. Within the plan the following key priority areas are taken into consideration:

- An economy that will create more jobs: 11 million jobs will be created by 2030 through sustainable employment, promotion of labour absorbing industries, inclusive economic growth and export competitiveness;
- Improving economic infrastructure, through freight and logistics, industrial and economic development infrastructure;
- Transition to a low carbon economy, through installation of 5 carbon budgeting, installing 5 million solar water heaters by 2030 and creating an energy efficient economy;
- An inclusive and integrated rural economy where South African rural communities will be provided with opportunities to participate fully in the social and political life of the country that are underpinned by quality education, health, transport and other basic services;
- Reversing the spatial effects of apartheid through the transformation of human settlements by the provision of reliable public transport, moving jobs and investment towards dense townships and improving liveability of Cities;
- Improving the quality of education, training and innovation by focusing on early childhood education, competitive secondary education, FET’s and higher education that will contribute to knowledge intense economy;
- Quality healthcare for all;
- Social protection, through social protection coverage such as retirement savings, public employment that will create work opportunities, especially youth and women and expansion of social welfare services;
- Building safer communities, through building confidence to the criminal justice system, enhancement of CPF’s, making police services professional, demilitarizing the service as well as building community participation element in community safety;
- Reforming and professionalizing the public service, by enhancing the administrative section of the public service and ensuring that the heads of department perform both their administrative and social duties diligently;
- Fighting corruption through deterrence, education as well as prevention;
- Transforming the society and uniting the country through economic inclusion, education and skills development, promotion of mutual respect, inclusiveness and cohesion by acting on constitutional standing that South Africa is for all who belong to it;
The National Development Plan provides a paradigm shift whose focus is to involve communities, youth, workers, the unemployed, and business partnerships with each other, so as to develop a more capable state, to develop capabilities of individuals and the country, as well as to create opportunities for the whole of South Africa.

2.4 Delivery Agreement: Outcome 9

The aim of Delivery Agreement: Outcome 9 is to ensure a responsive, accountable, effective and efficient local government system so as to restore the confidence of citizens in the local government sphere. As such municipalities need to ensure that the basic needs of communities are met; build clean, effective, efficient, responsive and accountable local government; improve performance and professionalism and strengthen partnerships between local government, communities and civil society. The Outcome consists of seven outputs which need to be achieved viz.:

1. Implement a differentiated approach to municipal financing, planning and support;
2. Improve access to basic services;
3. Implementation of the Community Work Programme;
4. Actions supportive of the human settlement outcome;
5. Deepen democracy through a refined Ward Committee Model;
6. Improve administrative and financial capability;
7. A single window of coordination.

The outputs consist of targets, indicators and key activities which need to be achieved. The achievement of these outputs will go a long way in improving the lives of residents whilst at the same time improving the processes within government so they are able to operate more effectively and efficiently.

2.5 National Government Programme of Action 2009-2014

The government has identified 10 priority areas in its programme of action, with an intention to turn around the global economic slowdown, whilst at the same time ensuring that the needs of all its citizens are met. The priority areas developed are intended to do the following:

1. Speed up economic growth and transform the economy to create decent work and sustainable livelihoods;
2. Introduce a massive programme to build economic and social infrastructure;
3. Develop and implement a comprehensive rural development strategy linked to land and agrarian reform and food security;
4. Strengthen the skills and human resource base;
5. Improve the health profile of all South Africans;
6. Intensify the fight against crime and corruption;
7. Build cohesive, caring and sustainable communities;
8. Pursue African advancement and enhanced international cooperation;
9. Ensure sustainable resource management and use;
10. Build a developmental state, improve public service and strengthen democratic institution.

The areas identified represent issues which have been identified by communities within eThekwini as some of their greatest needs, as well as areas which the Municipality needs to focus on so that we improve on our service delivery mandate as well as forge partnerships locally and internationally in achieving our development agenda.
2.6 Provincial Priorities (State of Province Address)

Whilst reporting on challenges as well as progress that the Province has had in 2011, eThekwini Municipality zooms in to the programmes that are highlighted by the State of the Provinces address for the year 2012, and aligns those programmes into its integrated development planning vehicle. In line with international and national priorities, the Province strives to boost it’s economic as well as investment potential by investing a lot on infrastructure. The Dube Trade Port rail and road corridor as well as the Port development and dug-out projects are some of the initiatives that the City is undertaking. This will not only open up opportunities for the Municipality’s GDP and to increase it will also enhance opportunities for massive corridor development which goes beyond the Provincial boundaries.

The Stats SA labour force survey 2011 indicates that the KwaZulu Natal economy was second compared to Gauteng in total jobs created, which was 90 000 in the formal sector and 66 000 in the informal sector. Increase in job creation has been seen in the infrastructure and the industrial sectors, where eThekwini has proven to be a powerhouse in these fields through massive infrastructure investment, sector support programmes and priority node development. Public-private partnership entered into by the Municipality has seen an increase in employment creation in the rail/ road/ port/EPWP/ tourism and SMME fields, and the Municipality has, through these initiatives, geared itself to add value with regard to pipeline investment that would unlock opportunities for sustained growth.

SMME and enterprise development has further created employment and economic opportunities for the citizens of eThekwini. Emphasis has been put on fostering linkages between small and big business, which creates an enabling environment, and also enhance competitiveness. A partnership in service delivery has enabled the Municipality to improve its human settlement delivery programme. The role that government departments and parastatals have played ensured that service delivery is not fragmented and has ensured value for money whilst delivery takes place at an acceptable speed.

Through the agrarian revolution, the Municipality has adopted the concept of one-school/ one house/one church- one garden, as another means of ensuring food security and poverty eradication. Massive agriculture is also taking place in eThekwini. Whilst that is the case the Municipality encourages sustainable agriculture practices. As part of promoting the sustainable livelihood concept, a green economy and renewable energy use enables the city to play a massive role in climate change mitigation. A dedicated unit identifies national and international best practices which will enable eThekwini to become a clean and green city.

Although education and health are not a core competency of the Municipality and they fall under the unfunded mandates of eThekwini, the Municipality has spent R190.6 million on libraries and R241 million on health in the last financial year, which will increase based on the programmes set for 2012/2013. Various awareness campaigns, educational programmes, crime prevention and social development programmes will also feature within Operation Sukuma Sakhe. All the ward profiles of eThekwini have been completed and war rooms identified. It is through implementation that service delivery will target the core of the communities, and as a result a blanket approach will be eliminated.

Government strives to ensure that it is accountable to its citizens and their finances. It should be responsive to the needs of the community through applying innovative ways of providing efficient and effective services. In response to the citizen’s needs the Municipality has ensured that its human resource is well capacitated and policies are in place to ensure that fraud, corruption and maladministration is curbed. The Municipality also ensures that through its community participation programmes citizen participation plays a pivotal role in ensuring that their needs are taken into consideration.
2.7 Provincial Growth and Development Strategy

This strategy emanates from a Vision for KwaZulu Natal (vision 2030) which says: “By 2030, the PROVINCE OF KWAZULU-NATAL should have maximized its position as a GATEWAY to South and Southern Africa, as well as its human and natural resources so creating a safe, healthy and sustainable living environment.” (PGDS 2011). This strategy feeds into the National strategy, and its highlights are economic growth and improvement of the quality of life for citizens of KwaZulu-Natal. The PGDS responds to and focuses on growth and development in particular: to create sustainable jobs that will improve the people’s lives and build on growing integration of the economies across the board. It further plans to ensure that the citizens, especially the youth, have education as well as skills to take up job opportunities created for them. It also identifies ways of addressing social ills that will ensure that the quality of life of citizens is improved. Crime, violence and corruption are amongst the causes of social ills which the strategy plans to eradicate.

The strategy should also find means and ways to better utilize the natural resource base and land that is still available to improve agricultural production as well as development, whilst ensuring that sustainable environmental planning principles are applied. The plan further focuses on improving the way government works so as to ensure integration as well as fighting corruption, maladministration as well as effective and efficient financial management.

Food security programmes should be efficiently managed both in urban and rural areas, and there should be a positive response to climate change including innovative ways that are driven by the needs of sustainability such as production and use of renewable energy. The strategy further encourages partnerships between the communities; government as well as relevant stakeholders so that strategies to eradicate poverty and inequality should be owned and championed by its own people, and should not merely be seen as government initiatives.

eThekwini influences and responds to the Provincial Growth and Development Strategy as follows:

- Job creation, through the automotive, tourism, agriculture, chemicals, creative industries, construction, textile, wood, pulp and paper sectors.
- Human resource management, through various skills development programmes. The Municipality’s graduate’s internship programme, as well as skills enhancement programs for councilors and the officials.
- Human and Community Development, through the provision of community halls, stadiums, swimming pools, parks, cemeteries, schools and police services (Metro). The Municipality has also provided opportunities through the expanded public works programmes in the form of pipe renewal, road maintenance, sewer upgrade and other human settlement activities as part of community development programmes.
- Strategic infrastructure, such as The Dube Trade Port, ongoing point precinct development, Cato Ridge industrial development, Bridge City development, Warwick viaduct, Moses Mabhida stadium, Port extension programme and public road networks.
- Spatial equity through the Municipality’s Spatial Development Framework.

2.8 The IDP Alignment of Programs

The development of the 5 year plan gives the new Council an opportunity to re-assess its development objectives in the context of the Millennium Development Goals, The National Development Plan, The National and Provincial Development Program, National Governments Outcome 9 Priorities and at a Local Government level – the Long Term Development Plan. The new IDP affords us the opportunity of strategically refining the process, to achieve closer alignment of budgets and our long term objectives, programmes and projects, and mechanisms for monitoring...
progress and performance. The development and production of the IDP is managed internally through a structured and co-ordinated participation process, which feeds into the 8 Point Plan. Through a variety of forums and on-going consultation with other governmental departments, many different stakeholders and civil society partners, the programs and projects identified in the IDP are further improved and enhanced.

2.9 The IDP Process

Stakeholders in the IDP process are key role players with an interest in the integrated development of the Municipality.

The Needs of the Municipality’s Citizens

What residents say they need: Quality of Life Survey Results (2010/11)

Based on information received from the Municipality’s Quality Of Life Survey, it is clear that the following aspects –highlighted by the communities – contribute to a good quality of life:

- Employment and business opportunities;
- Health and fitness;
- Family and friends;
- General happiness;
- Adequate housing.

The community services that are of greatest importance to people are:

- Education facilities;
- Health services;
- Police services;
- Community halls;

The problems that are of most concern to residents are:

- Insufficient housing;
- Unemployment and financial problems;
- Poor health;
- Family Issues.

From a spatial perspective the communities of greatest need are located in the historically under invested township areas where a great deal of informal dwelling has occurred. In addition, the communities in the rural periphery have the lowest access to services and lowest socio-economic status.

Comments raised during the Regional hearings are as follows.

Rates:
During the process of public participation the R20 per month fixed rate charge to the indigent ie homeowners whose property were valued up to R185 000 was a concern and in the context of challenging socio-economic environment, this proposal would be relooked at in the budget process.
Housing:
The reduction in the housing delivery programme from the previous annual target of 16 000 housing units to 8 500 units was a major concern with the residents. High level liaison with the MEC Provincial housing is continuing with a view to increase subsidies and accelerate the Housing Delivery Programme. Other issues raised included the poor quality of housing and requests for more housing in certain areas.

Water
The unaccounted for, water percentage is still a cause for concern

Health
Shortage of clinics was a concern in areas in the Municipality. There were many requests for this service and that existing clinics should have extended hours to cater for more of the community

General Issues
Some off the general issues raised by the communities are as follows:

- Various requests for pedestrian bridges, community halls and libraries
- Issues around youth development, learnership, job creation and skills development
- Springrove Dam should be funded by Central Government
- Road resurfacing and repairs to potholes
- Complaints relating to water and electricity outages
- Future use of the old Airport Site and relocation of market gardeners

A detailed matrix of community needs is attached in annexure 12.

2.10 Municipal Vision

“By 2030, eThekwini will enjoy the reputation of being Africa’s most caring and liveable City, where all citizens live in harmony.”

The Vision for the municipality (more so the timeframe) has been amended to ensure that there is alignment with key strategic documents namely the National Planning Vision and The Provincial Growth and Development Strategy. Both these strategic documents have a 2030 timeframe. Through a more structured participation process with all stakeholders, the Municipality may choose to review our Vision so as to realise the development plans of National and Provincial government.

To realise our existing vision, we believe there are basic elements that all citizens, the business community and visitors must enjoy:

- Ease of movement in the Municipality;
- A safe environment in all parts of the municipal area;
- Access to economic opportunities;
- Resources to afford what the Municipality offers;
- A clean and green Municipality, capable of delivering a range of ecosystem goods and services;
- Homely neighbourhoods;
- Access to services, in particular municipal, health and education services.
With the delivery of these, the people of eThekwini should be able to:

- Live in harmony;
- Be proud of their Municipality;
- Feel protected;
- Feel their basic needs are being met.

Achieving the vision means addressing the key development challenges by making key interventions.

### 2.11 Key development challenges

Considering the current economic climate and global recession, significant strides have been made to address the key development challenges in the Municipality. There is however, some distance to go towards addressing the following challenges:

- **High rates of unemployment and low economic growth**

  The Municipality faces a challenge with regard to a marketable and skilled workforce, thereby creating a gap in productivity, which in turn has a negative impact on the economic growth path. Limited efforts to encourage development of the green economy and development of infrastructure to support economic development will future stifle opportunities to reduce the high levels of unemployment.

- **High levels of poverty**

  Both the high level of unemployment and the high household dependency ratio leads to an increased number of communities living in abject poverty. Current welfare systems and packages are unsustainable and the Municipality is compelled to direct more resources towards supporting its citizens. A strategic approach by the Municipality should be encouraged to ensure that more job opportunities are made available, economic development programmes are enhanced and basic services are provided to uplift citizens out of poverty.

- **Low levels of skills development and literacy**

  There is an urgent need to improve and transfer scarce skills to the citizens of eThekwini. The Municipality has a responsibility to facilitate the improvement of literacy levels of the community and to ensure an adequate skills base to foster enterprise growth and job creation. This will assist the citizens to penetrate the competitive economic and manufacturing market.

- **Limited access to basic household and community services**

  The provision of acceptable basic services is a critical element in the national developmental agenda. Water, electricity, sanitation, waste removal and social amenities are key critical services which have been identified by communities that are required to meet their basic needs. Limited funding and exponential growth in the Municipality has increased the levels of backlogs.

- **Increased incidents of HIV/AIDS and communicable diseases**

  HIV/AIDS is an epidemic which is increasing at an alarming rate and affects communities negatively. Provision of basic health services and effective healthcare infrastructure, increased
financial and human resources in healthcare, awareness and education and poverty alleviation programmes will reduce the increased incidents of HIV/AIDS and communicable diseases.

- Loss of Natural Capital

Ecosystems and natural resources deliver essential environmental services (e.g. water supply, flood attenuation, climate control) that provide the foundation for human life and development. These resources are finite, and so their protection and efficient use is essential if irreversible degradation and loss of the Municipality's biodiversity is to be avoided and if the sustainability objectives of the IDP are to be achieved. Habitat destruction (or land transformation) and invasive alien species are widely regarded as the greatest threats to biodiversity. Other threats include over-exploitation (e.g. medicinal plants) and climate change. Existing data suggests that many of the local level thresholds have already, or soon will be exceeded, for the natural ecosystems in Durban.

- Unsustainable developmental practices

The Municipality faces a challenge of reacting to urban sprawl, which, in turn, results in increased informal settlement, overcrowded schools, ill health, marked spatial disparities, higher cost of providing infrastructure and services, disturbed ecosystems, biodiversity and environmental resources, changes in air quality, change in aesthetics and urban form, as well as loss of land for economic and agricultural services.

- High levels of crime and risk

Strategies for addressing crime including both reactive strategies to respond to crime, and proactive strategies, aimed at stopping crime before it happens, are required. The response requires an integrated, multifaceted approach that includes working closely with communities, National and Provincial Government, other stakeholders and service providers in all areas of crime prevention.

- Ensuring adequate energy and water supply

The unsustainable use of resources such as energy and water has major impacts on the environment, and will ultimately compromise the Municipality's energy security, as well as its ability to deliver water of adequate quality and quantity to its citizens. Unsustainable resource use is a direct consequence of overproduction and consumption. Demand side management is a critical part of the approach to ensuring a more sustainable use of resources. In the case of water, whole catchment management (including areas that fall outside of the municipal area) as well as efficient nature conservation programmes will help to ensure that there is an adequate supply of clean water in the eThekwini Municipality.

The most sustainable solution to the energy crisis is to reduce the demand for energy and at the same time investigate alternative renewable energy sources.

- Ensuring food security

Through initiatives such as shifting to new crops which are more resilient to climatic conditions and can meet the demands of an ever growing population, maintaining agricultural land so as to keep it arable, introducing mitigation methods to fight climate change, promotion of sustainable agricultural production, ensuring reasonable food costing as well as introducing and managing community gardens, the Municipality could play a major role in ensuring food security. The Municipality has also introduced initiatives such as soup kitchens and employment for food programmes.

- Infrastructure degradation
Degradation has become a critical social problem, with effects such as flooding in the municipal area due to unexpected heavy rain. It is therefore critical that the Municipality works towards managing its assets, work towards mitigating climate change, ensure life cycle management of infrastructure, thus ensuring value for money.

- Climate change

Escalating greenhouse gas emissions contribute towards climate change and will ultimately impact on human health, food security, natural resources, sea level rise, land loss and coastal infrastructure. As such climate change runs the risk of undoing all of the development gains of the last one and a half decades, and for a city such as Durban climate change adaptation in all sectors will have to become one of the Municipality's top development priorities.

- Ensuring financial sustainability

In order to maintain our financial health and still align with the Municipality’s sustainable development strategy, new approaches to risk and growth need to be created. Thus, the challenge for financial sustainability amid increasing alignment with the ecological, economic and social demands of the Municipality means that budget adjustments need to be made on a regular basis.

For the Municipality to be financially sustainable, the Municipality needs to ensure that it maintains a balanced revenue base, it maintains and grows its rates base, it encourages projects that are affordable and includes free basic services based on the existing budget. The Municipality should also ensure effective supply chain management through controlling costs, ensuring acceptable level of quality, increase citizen satisfaction as well as build operational resources that maximize community services.

- Ineffectiveness and inefficiency of inward-looking local government still prevalent in the Municipality.

Benchmarking eThekwini against other successful metropolitan municipalities such as the City of Johannesburg and the City of Cape Town will assist eThekwini identify the gaps within their institutional transformation performance. It is the responsibility of the Municipality to ensure that its performance management process assists the Municipality to prepare a check list by which it can assess its performance moving forward. That can be done in consultation with other spheres of government such as COGTA and local government partners.

The development challenges identified above affords the Municipality an opportunity to focus its attention to address these challenges. With both limited human and financial resources it is imperative that the Municipality makes choices in terms of its development mandate. These choices manifest itself in the Key Development Dialogues listed below.

### 2.12 Strategic Priority Areas

In order to achieve our vision and to address the development challenges, there are a number of key strategic priority areas which need to be taken into consideration. These priorities lead to the creation of structures which support, house and associate other actions and activities – the building blocks around which actions and prioritisation take place. It also acts as a point of leverage for creating a sustainable municipality that is caring and liveable.
STRATEGIC PRIORITY ONE: Creating Sustainable Livelihoods

Goal: All citizens in a prosperous eThekwini earn a decent living and support a sustainable lifestyle.

Value Statement:
Ensure that initiatives undertaken by the Municipality contributes to strong economic growth, sustainable job creation, poverty alleviation, improved skills and promotes a Green Economy.

The creation of sustainable livelihoods aims to place our citizens at the centre of a web of municipal initiatives that influences how they can create a livelihood for themselves and their households. These include improving and developing a diversity of skills so as to respond to new growth areas such as “Green technologies”, develop industrial and economic sectors which would result in the strengthening of the economy and job creation, ensuring that through our planning processes suitable land is available for economic generating opportunities and stimulate the development and support provided to SMMEs whilst at the same time also attracting and supporting larger business entities. Creating sustainable livelihoods is dependent on the provision of infrastructure that would support economic development e.g. electronic connectivity, diversifying our skills base to cater for future or emerging economic activities, but more importantly is creating economic opportunities that would take people out of poverty.

STRATEGIC PRIORITY TWO: Socially Cohesive City

Goal: eThekwini has well rounded and caring citizens who act to support the common well being of eThekwini and embrace mutual respect, tolerance and compassion for those in need.

Value Statement
Ensuring the development of a Municipality where the current and future skills’ needs of key commercial, industrial and government players are understood and can be met by our local, public and private educational and training institutions. Ensuring that adult literacy rates are impacted positively through partnerships with the public and private sectors.

There is a need for continuous development of municipal staff who understand the local government environment, their role in improving the quality of life of eThekwini citizens and who are sufficiently skilled to do their jobs competently in a changing environment.
The realization of a caring and empowering City can only be achieved through both the Municipality and its citizens working together to achieve effective local governance. Hence, citizens need to ensure that they are aware of their individual responsibilities and uphold the law whilst the Municipality needs to ensure that the citizen’s voices are heard and they are included in municipal decision making processes. This would also assist in fostering harmony between citizens so that mutual respect and tolerance as well as helping those in need become a way of life in eThekwini. In addition, the Municipality will also strive to ensure the personal empowerment and development of both internal employees as well as of our citizens. This is important so as to ensure sound physical, psychological and emotional well-being of individuals. Specific focus will be directed to people with disabilities, elderly, marginalised and the youth. This will ensure that the process of achieving equality for all is at the centre of the transformation process in the EMA, within all its structures, policies, procedures and practices. The provision of infrastructure and equitable facilities is a vital component to the development of a caring and empowering city. Whilst education is not a mandate of Local Government the Municipality would need to ensure that the provision of infrastructure creates an enabling environment that is conducive to learning in schools.

STRATEGIC PRIORITY THREE: A Financially Sustainable City

Goal: To maximise the Municipality’s financial resources to ensure long-term financial viability and sustainability, thus improving service delivery.

Value Statement
Achieve confidence of all internal and external stakeholders in the Municipality’s financial management, excellence in the service delivery of municipal financial services, and compliance with prevailing municipal financial legislation and reforms.

To achieve the above, the Municipality has to ensure it receives clean audit reports, maintain its investment-grade credit rating of AA- in the long-term and A1+ in the short-term, achieve collection rates of over 95% through strict adherence to the Municipality’s Debt Collection and Credit Control Policy, reduce debt, ensure cash on hand of around 60 days, achieve a 100% capital spend, produce a balanced and affordable budget in accordance with IDP priorities thus improving service delivery to all, ensure access to borrowings at favourable rates, ensure effective maintenance of assets, reduce costs to the Municipality, and improve productivity. This will ensure that the Municipality has sufficient funds to meet its service delivery mandate and to ensure value-for-money for all its stakeholders. Another key sustainability issue, especially for the future, is climate change and the need for alternate sources of energy, especially in light of the recent Eskom electricity tariff increases. In this regard, the Municipality has set up the first Energy Office with the aim of reducing energy consumption in the municipality and developing alternate sources of energy.

STRATEGIC PRIORITY FOUR: Creating a Safer City

Goal: All those who live, work, play and invest in eThekwini feel and are safe in private and public spaces.

Value Statement
The safety, health and security of citizens are critical to quality of life. The Constitution asserts the rights of all citizens to be safe, healthy and secure. Government, at all levels, is required to fulfil these rights. The Municipality has committed itself to creating a caring city, with all citizens, businesses and visitors feeling safe and confident that their health and security needs are being met. The Municipality is also committed to job creation that eradicates crime and enables citizens to improve their health and well-being.

The creation of a safer city would require the Municipality to focus on three areas viz. crime, disasters and citizens health. The fight against crime could be intensified through the promotion of neighbourliness and community forums thereby ensuring that citizens connect and work together in dealing with crime. An increase in the use and appropriate design and maintenance of public open
spaces also contributes to enhancing neighbourhoods and reducing risks. The creation of partnerships between government, the private sector and communities can lead to more integrated and effective interventions being implemented.

Disasters; either natural, technological or environmental; strike all communities with the most devastating impact on the vulnerable. In ensuring a safer city, an assessment of potential hazards and measures to manage and mitigate the risk need to be instituted so as to reduce the effects of disasters.

The Municipality strives to ensure that the residents within the EMA enjoy good health and as such initiatives to achieve this will be implemented, with specific reference to improving maternal and child health and combating the spread of communicable diseases such as HIV/AIDS, TB and malaria.

STRATEGIC PRIORITY FIVE: Promoting an Accessible City
Goal: All citizens of eThekwini can easily and affordably access the facilities and service that they require for a sustainable lifestyle.

Value Statement
In line with national legislation and international agreements, the Municipality is committed to a sustainable development path that strives to balance social, ecological and economic priorities. As far as possible, all development must function in harmony with the natural resource base upon which human well being and the economy depends.

Providing a quality living environment that is accessible to all citizens is a core mandate of the Municipality. Though substantial progress in the delivery of housing and basic services has been made, there is still some way to go. National key performance indicators for municipalities show that the priorities are housing provision and basic service delivery. Therefore addressing these backlogs remains a municipal priority. Once the bulk of these backlogs are dealt with, increasing emphasis will be given to social service provision in line with the vision of creating and sustaining quality living environments.

An accessible city will ensure that all our citizens have access to facilities, basic services (either interim or equitable) and public transport options. This will assist in reducing pollution levels, provide access to cost effective transport, ensuring easy access to retail and social facilities as well as providing an acceptable level of interim services to settlements. The provision of access to these services should relate to the strategic spatial planning initiatives within the Municipality, with an aim to ensuring the accessibility principle is taken into account during the various planning processes. The provision and access to infrastructure creates an enabling environment for the development of a more diverse and sustainable economic sector.

STRATEGIC PRIORITY SIX: Environmentally Sustainable City
Goal: The environment of eThekwini protects and promotes the health of its citizens and its biodiversity.

Value Statement:
A critical part of ensuring ecological integrity within the eThekwini Municipality is to ensure the protection of the municipality’s ecosystems and finite natural resources, which deliver essential environmental services (e.g. water supply, flood attenuation, climate control, building materials) and which therefore provide the foundation for human life and development. In order to achieve this, it is important that environmental sustainability principles, within a resource constrained environment that acknowledges the environmental thresholds within which we operate, are taken into account when identifying the development priorities of the Municipality and when promoting and managing economic
development, infrastructure, service delivery and municipal finances. This will help to ensure the protection of biodiversity and the maintenance of ecological integrity within eThekwini Municipality as well as helping to meet the development objectives of the Municipality.

Specific areas of focus should include the development of the Green Economy, the creation of sustainable human settlements and responding appropriately to climate change. Development which is based on the principles of a Green Economy will result in investments being made in sustainable infrastructure and cleaner technologies thereby assisting in reducing the resource intensity of the economy, as well as promoting sustainable livelihoods. In addition, spatial planning must be enhanced and better aligned with the strategic development plans of the Municipality, in order to manage development appropriately and minimise impacts on the natural environment. One of the most serious risks facing the municipality relates to climate change which is likely to have adverse effects on water and food security, economic activity, human health, physical infrastructure and natural resources. A climate change strategy that focuses on mitigation, adaptation and transformation focused on ecological integrity in the short and long term needs to be prioritised for implementation.

2.13 Forging a Pathway to Sustainable Development

Development within eThekwini is screened to ensure our commitment to a sustainable city is supported. The development dialogues listed above have associated pathways of development and can be summarised as follows.

Socially Cohesive
Within eThekwini the way of life encompasses a nurturing outlook embracing compassion, mutual respect and tolerance for fellow citizens in need. Citizens are empowered with the knowledge, expertise and skills required for maintaining an acceptable standard of living, especially the marginalised.

Strategic Development Principles
- Ensure a more responsive local government;
- Engender mutual respect and ubuntu;
- Empower and develop skills of the citizens;
- Promote sustainable development of vulnerable groups;
- Develop a culture of helping citizens in the Municipality that are in need;
- Enhance municipal learning knowledge management;
- Create a transparent and accountable local government environment.
- Sustainable Human Settlements

Creating sustainable livelihoods
The standard of living is uplifted and maintained at an acceptable level for all citizens of eThekwini. Livelihood strategies are developed for citizens to earn a decent living without compromising the needs of future generations.

Strategic Development Principles
- Create infrastructure for economic development;
- Improve and support new livelihood choices;
- Develop skills for the future economic sectors;
- Promote small and medium enterprise;
- Secure resources for future industrial development e.g. land;
• Retain businesses and promote expansion;
• Develop key economic sectors;
• Develop priority nodes and corridors.

Creating a Safer City
The private and public spaces in which citizens live, play, work and invest are safe and secure environments. Citizens feel free to pursue a healthy lifestyle in a well-maintained living environment.

**Strategic Development Principles**
- Promote development of community structures/forums;
- Minimise risk to the Municipality and citizens;
- Create a healthier city;
- Mitigate against disasters;
- Alignment with National and Provincial Health and Safety Programs;
- Promote the security of citizens;
- Promote the safety of citizens.

Promoting an Accessible City
A quality living environment is created for citizens, with easily accessible and affordable services and facilities. The lifestyle of citizens is sustainable whilst ensuring a high quality of life within eThekwini.

**Strategic Development Principles**
- Promote use of public transport;
- Promote access to basic services;
- Increase density along nodes and corridors;
- Provide equitable access to social facilities;
- Align with strategic spatial plan for the city;
- Enhance communication networks;
- Increase economic and sustainable job opportunities.

An Environmentally Sustainable City
The natural environment and resource base is preserved and utilised in a sustainable manner within eThekwini. Development is implemented sustainably to ensure the health of citizens and its biodiversity.

**Strategic Development Principles**
- Sustain our ecosystems and natural resources;
- Build a green economy and create green jobs;
- Create sustainable human settlement built form;
- Respond appropriately to climate change;
- Ensure alignment of strategic environmental plans and the Municipality’s strategic direction.

A Financially Sustainable City
Service delivery within eThekwini is improved with the maximisation of the Municipality’s financial resources. This is undertaken to ensure long-term financial viability and sustainability.

**Strategic Development principles**
- Grow and diversify our revenue base;
- Ensure sustainable budgeting;
- Enhance sound financial management and reporting;
- Focus on value for money expenditure.
- Co-ordinate, synergize and maximize public sector funding
2.14 The Eight Point Plan

The Municipality’s delivery plan is organised into eight separate but related plans. They are interrelated because:

The plans, programmes and projects are supportive of each other, to ensure greater impact in delivery. Where contradictions or overlaps are found to exist, these will duly be brought into alignment.

The Eight Point Plan is listed as:

1. Develop and Sustain our Spatial, Natural and Built Environment.
2. Developing a Prosperous, Diverse Economy and Employment Creation.
3. Creating a Quality Living Environment.
4. Fostering a Socially Equitable Environment.
5. Creating a Platform for Growth, Empowerment and Skills Development
6. Embracing our Cultural Diversity, Arts and Heritage.
7. Good Governance and Responsive Local Government.
8. Financially Accountable and Sustainable City.

Figure 10: IDP Performance Management Matrix  
Source: eThekwini Municipality

KPIs for each of the SFAs are contained in the relevant plan.

Note that the Municipality’s Annual Performance Review is included in this IDP as an Annexure.

2.15 The Municipality’s performance scorecard
The Municipal Scorecard is based on the eight point plan of the IDP, and which is incorporated into the five national key performance areas of the Department of Co-operative Governance and Traditional Affairs (previously known as Department of Provincial and Local Government).

The five National Key Performance Areas are:

1. Basic Service Delivery.
2. Local Economic Development.
3. Good Governance and Public Participation.
5. Municipal Financial Viability and Management.

National general KPAs

The broad five year targets which are assessed annually are set out in the Scorecard. These five-year targets coincide with the term of the new office of Councillors with the current baselines set as of July 2011. The Municipal Scorecard is an element of the Performance Management System which also includes the Entities Scorecards, the Service Delivery and Budget Implementation Plan, and the Individual Performance Plans for Section 57 Management and all other Senior Managers. The Municipal Scorecard is therefore dependent on the assessment of the performance of the organisation measured through its performance in the Service Delivery Budget Implementation Plan and also the individual performance of all management.

2.16 The Municipal Infrastructure Investment Framework

The Municipality has embarked on a Municipal Infrastructure Investment Framework for the municipality. The Municipality is committed to ensuring that all backlogs in the provision of infrastructure are removed. However, this must be done in such a way so as to ensure that the Municipality, which is at the forefront of infrastructure delivery, remains financially viable and has the capacity to operate and maintain this infrastructure.

The Municipal Infrastructure Investment Framework (MIIF) thus aims to establish:

- The extent of infrastructure to be provided;
- The capital expenditure required to provide this infrastructure;
- The extent to which financing is available for this capital expenditure;
- The operating expenditure required to ensure that the infrastructure provided is properly operated and maintained;
- The extent to which revenue can be raised to cover this operating expenditure, within the provisions of the Municipal Fiscal Framework.
- The extent to limit the misuse of the available finance through monitoring and management systems.

The framework also considers the monitoring systems required to assess progress with respect to infrastructure delivery as well as processes to ensure that systems and management capacity are in place in municipalities to manage the infrastructure, with the emphasis on a municipal infrastructure asset management strategy.

2.17 Social Facilities Accessibility Model
The adequate provision of social services is an important aspect in building quality living environments. It is essential that the municipality has a good grasp of current social service provision, that it understands where backlogs and areas of over-supply exist in order to formulate a plan for say the next 5-10 years during which time all residents will have adequate access to the full range of social facilities.

The Engineering Unit and all municipal social service departments have recently completed a municipal-wide assessment of social facilities. Facilities analysed include primary health care, fire stations, community halls, libraries, sportsfields, indoor sports halls and stadia, swimming pools, parks, sizakhala centres and primary and secondary schools.

A model has been developed that matches the demand for facilities based on population density and distribution, with the supply of social services based on spatial location, capacity of service and the levels of accessibility based on public transport travel time.

Taking primary health care as an example:

**Facilities analysed:**
Community health centres, clinics, mobile clinics, health posts, hospital offering primary health care

**Demand for the service:**
This is based on the assumption of 8 visits per person per year for all persons in households earning less than R38000 pa, and 50% of persons in households earning between R38 000 and R76 000.

**Supply of the service:**
This shows how many patients can be served at any specific health facility in a calendar year. It is based on the number of nurses at the facility, the number of patients that can be attended to in 1 hour, the hours of operation of the facility and the number of days per annum that the facility is operational. This provides the capacity of each facility.

**Access time:**
15 minutes on public transport.

### 2.18 Operation Sukuma Sakhe

In essence Operation Sukuma Sakhe (OSS) is a call for the people of KwaZulu-Natal to overcome the issues that have destroyed communities such as poverty, unemployment, crime, substance abuse, HIV & AIDS and TB. It was a call by the Premier of KwaZulu-Natal to ensure that all government departments, communities and stakeholders integrate their services and effort to ensure that the lives of the citizens are changed for the better. It is a continuous interaction between government and communities in an effort to achieve the 12 National Outcomes, to meet the 12 challenges as identified by the National Development Plan, to respond to the 7 Strategic goals as outlined by the Provincial Growth and Development Strategy as well as to respond to the Millennium Development Goals. This will be done on a ward level, so as to ensure that government interventions respond to the targeted audience instead of coming up with a one-size-fits all approach. It focuses on creating healthy and sustainable communities and providing an integrated program addressing empowerment of women, children and the vulnerable groups. Ignoring this will continue to pose a serious threat to the future of the citizens of KwaZulu-Natal. The target audience identified by this programme consists of youth groups, women’s groups, religious and church leaders, chaplains, traditional structures (amakhosi, izinduna and amagoso), sports bodies, business chambers, senior citizens’ clubs, luncheon clubs and cultural bodies.

Our 8 point IDP plan tackles most of the issues that are addressed through Operation Sukuma Sakhe. Through the IDP process eThekwini has been able to address 6 Provincial KPAs and 5 National KPAs, which form the crux of OSS. Plan 2 addresses the principle of creating decent work
Thekwini Municipality:
2012/2013 IDP

and economic growth as highlighted by the operation. A principle of fighting crime is addressed under plan 4 of our IDP. The third principle which is education is, although an unfunded mandate addressed under plan 5, and health under plan 4 respectively. Food security is taken care of by plan 2 and 3 respectively.

Discussions and impacts of the programme will take place at ward level in the different structures such as the War Rooms and forums in the community. Using platforms such as the Mayoral forums, ward forums and Masakhane programmes, Operation Sukuma Sakhe will be able to be rolled out at ward levels, and the targeted drivers at a ward level is the Community Participation Action Support Unit, which, through various platforms such as Mayoral blitz and Ministerial launches, has played a critical role with regard to out-reach programmes.

Currently a technical task team responsible for the OSS programme has been established in eThekwini and is lead by the DCM for Health cluster, with the support of the DCM for Governance cluster. To-date 103 war rooms have been identified of the 103 identified, 44 war rooms are fully functional and are spread geographically in the 3 Regional areas. Functional war rooms are developed in line with the ideal war room functionality model as defined by CoGTA

2.19 The focus of the 2012/13 IDP

In our 2012/13 IDP, the key areas of focus include:

- Fine-tuning of programmes and projects to align with the new demands;
- Updating of statistical information and general progress made against targets set, per IDP plan;
- Preparation of a Revised SDF;
- Adjustment in targets as backlog figures are refined against the access modelling exercise;
- Activation of Ward Committees to revise needs of the communities, as reflected through Ward Priorities;
- Inclusion of the Municipality’s Expanded Public Works Programme (EPWP) as a cross sectoral approach;
- Alignment of the IDP to the Organisational Scorecard, Service Delivery Budget and Implementation Plan (SDBIP) and Individual Performance Plans;
- Alignment of the IDP to the Millennium Development Goals, Apex priorities of national government, the National Spatial Development Perspective and the KwaZulu-Natal Provincial Development and Growth Strategy Priorities;
- Publication of both a plain language IDP and an isiZulu version of the IDP.
2.20 Strategic Projects for 2012/13 and beyond

The Municipality has identified strategic capital projects that would have the potential to deliver on the strategic objectives of the municipality. Some of the projects listed below are influenced by National and Provincial priorities eg. The Freight Corridor from Durban to Gauteng and associated infrastructure projects. The table provides a summary of the project budgets and potential employment opportunities. A more detailed schedule of the listed projects is included in Annexure 13.

Chapter Three: The Eight Point Plan

Plan One: Develop and Sustain our Spatial, Natural and Built Environment

Goal
To direct and manage the use of the built and natural environment to ensure the sustainable and integrated growth and development of our Municipality.

Desired Outcome
Citizens will be able to access and use resources to meet their needs without compromising the amenity for others and the resource base of the Municipality in the present and in the future.

Why this Plan?
In line with national legislation and international agreements, the Municipality is committed to a sustainable development path that strives to balance social, ecological and economic priorities. As far as possible, all development must function in harmony with the natural resource base upon which human well being and the economy depends.

Our natural systems provide ecosystem services that are often impossible, or extremely costly, to substitute. These include clean air, climate stabilization, rainfall, flood attenuation, marine resources, leisure and recreation areas, fertile and stable soils, food, building materials, amenity and heritage. These ecosystem goods and services are critical in meeting the growth and development needs of the Municipality and all its residents and visitors. In both urban and rural areas, low income people are most dependent on these free services.

By protecting the Municipality’s natural environment, we offer support to the poor. We also ensure that costly replacement interventions, such as storm water protection measures and beach sand replenishment schemes are minimized as much as possible. The economic value of goods and services supplied by eThekwini’s ecosystems was estimated at R3.1 billion per annum (2003 estimate), excluding the contribution to the leisure industry. The economic value of the eThekwini coastline (estuaries and beaches) has recently been valued at over R5 billion per annum (2008 estimate).

Beyond protecting our natural resource base, a sustainable development approach requires the spatial restructuring of our Municipality. The Municipality’s spatial structure still reflects the apartheid legacy of imbalanced and fragmented development with high social, economic and environmental costs, especially for historically disadvantaged communities. Strategic spatial planning for the Municipality is necessary to ensure that development and investment are located where it:

• maximizes economic generation potential;
• creates opportunities for economic and social upliftment in areas of urgent need;
• promotes accessibility and efficient movement of people and goods;
• ensures that people are well located with respect to employment and social and recreational services;
minimizes the cost of infrastructure expansion by optimal use of current capacities in the core area of the Municipality and in priority nodes where services currently exist;
• protects and enhances the natural resource base, including the retention of viable agricultural land, and important open space corridors; and
• minimises the negative impacts of climate change.

Critical to achieving these objectives is a single integrated land use management system (LUMS) that provides a clear direction and fosters a sense of security and confidence in the Municipality to its citizens, landowners, developers and businesses.

Strategic Focus Area: Develop, Manage and Regulate the Built and Natural Environment

Programme 1.1: Develop and implement a sustainable & integrated spatial planning system

The eThekwini Municipality is currently developing a comprehensive land use management system for the entire Municipal area to give effect to the requirements of Section 26 of the Municipal Systems Act (2000). A key aspect of this system is the preparation of a “Planning and Development Management Toolbox” which will include an Integrated Suite of Plans or Hierarchy of Plans. The establishment of the system includes a range of planning activities all running in parallel with each other with the common purpose of updating, refining and establishing appropriate mechanisms for managing land use and development in the Municipal area.

This suite of plans is a hierarchical, integrated and iterative process and shows the move from Municipality wide strategic level plans to detailed local level plans and land-use schemes, the scope and purpose of which is indicated in Figure 9 below:
Spatial Development Framework

A detailed Spatial Development Framework (SDF) report has been completed by the municipality for the 2012/13 financial year and has been included as a sector plan for digital submission as indicated in Annexure 11 of this IDP. Copies of the full SDF document can be obtained from the Framework Planning Department. The information provided below is a summary of key points taken from the main SDF document.

The eThekwini Municipality’s SDF is a critical and integral component of the IDP. It is a strategic framework that shows how the implementation of the IDP should occur in space and guides the overall spatial distribution of current and desirable land uses within a municipality in order to give effect to the vision, goals and objectives of the municipal IDP. The city’s SDF represents a long term (20+years) plan, and is revised on a regular basis in line with the IDP 5 year cycles.

The formulation of our municipal SDF is a legal requirement, and as such fulfils the requirements as set out within the Municipal Systems Act No. 32 of 2000. A synopsis of existing laws, policies and programmes that have a bearing on the SDF is summarised in section 1.2 of the SDF document. The municipality’s SDF is also informed by spatial planning principles aimed at influencing the spatial pattern of development.

Our Municipal SDF Vision and Development Principles

The SDF translates the current municipal vision, namely, “By 2030 eThekwini will be Africa’s most caring and liveable city”, to have a spatial focus. The envisaged SDF spatial vision is to have “a socially equitable, environmentally sustainable and functionally efficient municipality that bolsters its status as a gateway to Africa and the world”. This vision is expanded upon in the development principles discussed below. The SDF spatial vision and principles have been informed by the IDP, the Provincial Growth and Development Strategy (PGDS, 2011) and the National Development Plan, Vision for 2030 (National Planning Commission, 2011).

The principles in turn lay the foundation for the SDF proposals and strategies that give direction to a range of spatial outcomes relating to growth and development of the EMA. The underpinning spatial principles are as follows;

1. **Promoting Spatial Concentration / Efficiency** intended at ensuring the optimal use of existing resources and infrastructure, discouraging urban sprawl, encouraging residential & employment opportunities in close proximity, streamlining development application procedures and decision-making procedures aimed at sustainable development.

2. **Enhancing Economic Potential, Co-Ordinated Planning and Implementation** intended at improving productivity & closing economic performance gaps, promoting sustainable economic growth and ensuring the alignment of projects.

3. **Mainstreaming and Coordinating Environmental Planning** intended at promoting viable communities, the protection of vulnerable communities, the protection of environmentally sensitive area and prime agricultural land and the integration of social economic and physical aspects.

4. **Promoting Balanced and Sustainable Urban and Rural Development** intended at addressing past imbalances, poverty stricken areas, informal settlements and townships.

Our Municipal SDF’s structuring elements and spatial tools

The SDF is intended at guiding all municipal decisions relating to the use, development and planning of land. The SDF vision, principles and the municipality’s structuring elements informs the spatial development concept for the city. The Spatial Development Concept directs the conservation of both the built and natural environment and guide the direction of growth by outlining areas in which particular types of land use should be encouraged or discouraged and areas in which the intensity of land development could either be increased or reduced.
The Spatial Conceptual tools include:

- **An Urban Core**, being the urban centre, which generally has servicing capacity and thus opportunity for densification and can support thresholds for a range of services, industry and public transport;

- **An Urban Development Line (UDL)** concept used not only to demarcate the extent to which urban development will be permitted to establish within the metropolitan area in the long term, but more specifically to promote a more convenient, compact, efficient, equitable and sustainable settlement form. Whist the line indicates the outer limit to which urban development will be restricted there will be areas within the UDL that will not be permitted to be developed (i.e. environmentally sensitive areas); The following diagrams reflect the proposed UDL and the development service cost as represented by the Cost Surface Model prepared by CSIR for the eThekwini Municipality:

![Proposed Urban Development Line](image)

**Figure 12: Proposed Urban development Line**
*Source: eThekwini Municipality, Development, Planning, Environment & Management Unit*

The UDL implies that there is a rural periphery or hinterland that is different in character and which has different servicing needs and servicing constraints and which supports different lifestyles. The UDL is therefore important for enforcing density targets and managing growth patterns of the city over time but also for protecting agricultural resources beyond the UDL, ensuring food security and the city’s resilience to climate change.

Within the UDL, the development phasing line demarcates the interim spatial limit to which development will be allowed to establish in accordance with infrastructure availability and capacity and / or its planned expansion.
5.1 Spatial Development Concept

The Spatial Development Concept highlights specific areas that require targeted intervention to assist in guiding sustainable growth throughout the municipality by:

- Identifying areas that need to be protected. These include natural, heritage and environmental key assets as well as agricultural and rural assets;
- Identifying areas of need where integration and restructuring is needed;
- Identifying areas where economic growth and investment will be pursued, and those where social investment will take preference;
- Identifying opportunities areas where infill, densification and urban renewal should be pursued;
- Identifying new growth areas and areas for future development;
- Identifying hierarchy and nature of roads, development corridors and nodes; and
• Identifying areas with existing infrastructure capacity to support integration, densification, as a way of ensuring sustainable development.

The Spatial Development Framework

The following map represents the Revised Spatial Development Framework for the Municipality:
Figure 14: Revised SDF 2011
Source: eThekweni Municipality, Development, Planning, Environment & Management Unit
The strategic focus areas for our municipal SDF are:

- Identification of future landuses including areas for industrial expansion, mixed use development and residential infill;

- Future residential development outside the UDL supports different lifestyles, densities and has different servicing needs and constraints as opposed to those within the UDL which are higher density and urban in nature;

- Regeneration of existing developed areas such as Warwick Junction, the Inner City, Cato Manor and South Durban Basin, Pinetown CBD, Clermont/KwaDabeka and Umlazi;

- The Port of Durban, Dube Trade Port and Cato Ridge as economic investment areas which require major investment;

- The provision of investment opportunity areas within Hammarsdale, Bartletts, Shongweni and Cornubia as a way of encouraging private investment and partnerships within the municipality subject to servicing and phasing limitations;

- Smaller urban investment nodes which provide convenient and efficient access to commercial, community and social facilities. These nodes have a number of characteristics and may include higher residential densities, mixed use, public transport and pedestrianisation, public amenities and good infrastructure with the level of services defined by the respective role of the node within the hierarchy of nodes;

- Land use to support the Integrated Rapid Public Transport Network (IRPTN) by improving its viability with densification along key transport routes and within major mixed use nodes and corridors;

- Emphasis on accessibility and convenience in more densely populated urban areas including the provision of priority public transport routes and rail linkages;

- The promotion and preservation of upper catchment open space areas and corridors that provide free services, including the buffering of negative climate change impacts, and supports the health of the entire metropolitan area;

- The promotion of Coastal, Mixed Use and Tourism corridors that provide diverse opportunities for development and lifestyle whilst protecting against the risks of sea level rise;

- Any development in areas of sensitivity such as the coastal corridors and areas adjacent to our important environmental assets will require careful scrutiny to ensure no negative impacts notwithstanding the current zoning that may apply.

**SDF Key Development Strategies**

Development strategies have been formulated to help achieve the spatial desired outcomes of the EMA. The strategies outlined below have been developed from an understanding of the development context and are guided by the policy framework pertaining to the SDF as outlined in chapter 1 of the SDF report.

The strategies are also guided by the SDF vision, to have by 2020 a **socially equitable, environmentally sustainable and functionally efficient municipality that bolster its status as a gateway to Africa**. This vision is underlined by a set of principles as discussed above and in detail
within chapter 2 of the SDF report. The strategies discussed below are intricately linked and do not exist in isolation of each other. Integration of the strategies occur in the following way:

- At a broad strategic level through the Integrated Development Plan, and
- At an operational level through the application of spatial planning tools (such as nodes and corridors, density variation, catchment based planning and encouraging compact development through the application of the Urban Development Line (UDL)).

Underlying the strategies are two institutional pre-conditions. Firstly there needs to be a supportive land use management system to provide the strategic and operational framework for development. Secondly linkages should be established with IDP strategies.

The SDF Vision is to have by 2020 a socially equitable, environmentally sustainable and functionally efficient Municipality that bolster its status as a gateway to Africa. The SDF principles and guidelines include:

- Principle of environmental planning
- Principle of Spatial concentration (efficiency)
- Principle of economic potential, co-ordinated planning and implementation
- Principle of Balanced and Sustainable urban and rural development (equity)

The SDF structuring elements include:

- Open Space System & the Built Environment
- Activity Nodes and corridors, UDL, Infill and Densification
- Strategic Investment
- Areas of need

The SDF spatial strategies include:

<table>
<thead>
<tr>
<th>STRATEGY 3</th>
<th>STRATEGY 1</th>
<th>STRATEGY 2</th>
<th>STRATEGY 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manage urban growth, construct and maintain viable built environment and sustain natural environments and resources</td>
<td>Improve access and movement of people &amp; goods between areas of need / areas of opportunity</td>
<td>Build and protect vibrant economic areas and lay a foundation for future economic development</td>
<td>To establish better knowledge of rural and traditional settlement areas and provides policy guidelines for their future development</td>
</tr>
</tbody>
</table>

Figure 15: SDF Key Development Strategies
Source: eThekwini Municipality, Development, Planning, Environment & Management Unit

Linked to development strategies are policy statements, directives and land use guidelines that the municipality will have to undertake and implement in order to realise the spatial intentions and form as outlined within the municipal SDF.
Below is an example of the policy statements, requirements and land use management guidelines for Strategy 1, (see chapter 8 of the SDF report for details on other strategies).

<table>
<thead>
<tr>
<th>Policy Statements</th>
<th>Requirements statements</th>
<th>to achieve policy</th>
<th>Land use management guideline</th>
<th>Alignment with policies</th>
</tr>
</thead>
</table>
| 1. Improve connectivity within the Municipal area. | • Strengthen and integrate public transport networks, services and modes to ensure that passengers move optimally from origin to destination in an efficient manner and in the shortest time possible.  
• Investigate and promote public transport links between disadvantaged areas and main economic nodes of the city  
• Facilitate movement between areas of need and wider metropolitan opportunities  
• Create a safe, efficient and integrated city wide public transport system and use it as a tool to restructure the city and integrate marginalized areas.  
• Include Non Motorized Transport as essential components of land use and transport planning  
• Investigate new road and rail based network links.  
• engage with PRASA to explore potential of improving passenger rail service | • Around brown field developments, the strategy to create and introduce a vibrant mix of land uses and higher densities must be considered without impacting on existing amenity of the area while at the same time supporting a more efficient public transport system.  
• In green field developments, the opportunity to density along public transport corridors remains prime; with densities of varying intensity toward pure residential development. | • ETA Integrated Transport Plan (2010/15)  
• eThekwini Housing Sector Plan (2011)  
• eThekwini Environmental Services Management Plan |
| 2. Implement the Housing within the context of a sustainable and integrated development planning framework | • Encourage the implementation of housing as part of a broader strategy to re-structure and transform the present sprawling and inequitable urban form into a more compact, integrated and accessible environment.  
• Promote the development of well located areas and optimize the use of existing infrastructure  
• Ensure that movement system directly links with and is supported by strong high intensity nodes and higher density residential development.  
• Integrate land use with economic and transport planning  
• Encourage mixed use environments and non-residential uses in appropriate areas, namely, particularly on identified node and along transport corridors and interchanges. | When assessing new proposed housing developments the following issues must be considered:  
• Is the proposed development inside the Urban Development Line?  
• Is the proposed development in close proximity or within a walking distance to main public transport routes  
• Is the proposed development within walking distance to main nodes and corridors?  
• Does the proposal benefit from good access to economic and social opportunities?  
• Does the layout encourage a grid road structure that provides logical and accessible public transport routes? |
| 3. Develop an efficient and integrated freight transport system that will ensure regional economic sustainability | • Investigate the feasibility of dedicated freight routes.  
• Ensure the reservation and availability of land for the development of the freight route.  
• Ensure that support for the freight route is attained with neighboring municipalities and other government spheres. | • On brown field developments, the freight route should be assessed against its impact on existing developments, and  
• On greenfields the freight route should be assessed against future spatial role and intentions of the area. Land should be reserved for the development of the freight route. |
Spatial Development Plans

In the package of plans the SDF is translated into more tangible, geographically specific physical development and land use management guidelines. This can be achieved through the preparation of Spatial Development Plans.

The eThekwini Municipal Area (EMA) has been divided into four functional planning regions. The functional boundaries of these regions are defined by the Umgeni River, the Umlazi River and the Kloof Ridge. Spatial Development Plans have been prepared for the North, South, Central and Outer West planning regions and were adopted in November 2009 and revised in November 2010 and 2011.

Spatial Development Plans provide strategic multi-sectoral planning guidance for each region that translates the spatial intentions of the SDF, indicates the short, medium and long term growth & development opportunities, manages & directs future development and investment over a 20 year time frame, identifies the Municipality’s development priorities & phasing and provides broad based land use, environmental, transport planning and bulk infrastructure directives to guide more detailed planning which is undertaken at the level of a Local Area or Functional Area Plan and informs the preparation of Detailed Precinct Plans and Land Use Schemes.

SDP Process

The information used to prepare the SDP’s was sourced from various reports, studies, research processes, municipal & national policies. In addition, there has been extensive engagement with key municipal sectors (particularly transport, water and sanitation, environment, housing and economic sectors) including a series of interdepartmental workshops and bilateral meetings, as well as engagement with provincial planning authorities and neighbouring municipalities to achieve cross boundary alignment, external stakeholder engagement and extensive, community engagement throughout the metropolitan area.

Minor revisions of the SDPs will be undertaken annually between 2010-2013 while the major reviews are undertaken once every 5 years in line with the IDP review process. This provides an opportunity to re-assess the SDPs based on new information and sector studies as the information becomes available.

The second minor annual review of the SDPs was conducted for the 2011/12 financial year and adopted by Council in November 2011. The focus of the revision included:

a) Changes made to reflect the alignment with the IDP 2011/12 and SDF Review 2011/12.
b) Changes to align detailed planning and key proposals contained within Council adopted Local Area Plans (LAPs) and Precinct Plans/Functional Area Plans, namely:
   o Illovo Local Area Plan (August 2010)
   o Shongweni Local Area Plan (Nov 2010)
   o Umkhomazi Local Area Plan (Nov 2010)
Thekwini Municipality:
2012/2013 IDP

- Clermont KwaDabeka Township Regeneration Project (Feb 2011)
- North Urban Development Corridor and 3 Local Area Plans (Tongaat/ Dube Trade Port, INK/ Phoenix and Verulam/Cornubia (March 2011)
- Cornubia Framework Plan (March 2011)
- Umlazi and Malukazi LAP and Township Regeneration Plan (August 2011)

c) Revisions to Land Use Mapping, Land Use Quantums, Density mapping, Standardisation of Nodal Hierarchy, Urban Development Line and Phasing of development as per approved plans across the four SDP’s

d) Participated in numerous climate change initiatives and fora to more fully understand the implications and possible spatial responses to water supply limitations and well as agricultural and food security impacts associated with climate change. In this regard, further engagement with the Dept of Agriculture has been sought and an internal working group has been established to pursue investigations around agriculture and various regulatory and spatial planning issues.

e) Ongoing Stakeholder engagement, particularly to obtain alignment with private sector and neighbouring municipality planning initiatives

The future SDP review process will be informed by a number of studies currently underway. These include:

- Demographic Study;
- Climate Change Impacts;
- Strategic Environmental Assessment of the SDF and SDPs;
- Urban Settlement Development Grant; and
- City Wide Densification strategy.

The review allowed for the continual strategic refinement of the process. Of critical importance is the more detailed assessment of the Phase 1 Priority areas.

**Priority Areas for development**

A number of Phase 1 Priority Areas have been identified for development in the next 5 years. An initial study has revealed that these areas require various degrees of infrastructure provision to support the development that is envisaged in the SDPs and in some cases, based on resources and budgets and the cycle of planning, designing and implementing infrastructure, may even go well beyond the envisaged short term priorities (5 years).

Accordingly, more detailed assessments of the Phase 1 Priority areas are currently underway with a view to gaining an improved understanding of the cost, timing and phasing of development across the metropolitan area:
There has been significant progress with refining the SDP priorities based on the following criteria:

- Establishing current development pressures.
- Establishing which sectors of the economy will make the greatest impact on job creation and regional wealth.
- Establishing upfront the availability of excess infrastructure capacity and the areas in which development opportunities can be provided in the short term while new infrastructure is being built;
- Investigating the opportunities for spatial restructuring including how the Municipality might support public transport corridors and housing densification around these corridors;
- Establishing how to spatially align the demands for infrastructure provision for housing and the 26 priorities originally identified

In addition to the above, there has been ongoing engagement with other spheres of government to support the financing and release of Phase 1 priorities.

**eThekwini SDPs at a glance**

The following section provide for the detailed summaries of the four municipal SDPs:

Table 6: eThekwini First Phase (5-10 years) Priority and Strategic Focus Areas
Source: eThekwini Municipality, Development, Planning, Environment & Management Unit
(Subject to further detailed cost investigation, phasing and servicing limitation)
The Central Spatial Development Plan (CSDP) differs from other SDPs in that it is more focused as a highly developed and serviced area that is under constant change. The focus of this plan is to identify and propose standards at a broad level that tests impacts and sustainability. Large parts of the Central Spatial Region are already engaged in further detailed levels of planning that is (Local Area Plans (LAPs) and Precinct Plans that give more city-wide direction in terms of the needs, opportunities and challenges of an area such as the Back Of Port (BOP) Local Area Plan (LAP).

This region is essentially the Urban Core of the EMA and is home to approximately 1.3 million people accounting for 34% of eThekwini’s total population of 3.5 million people (Stats SA). The boundaries of the Central Spatial Region (CSR) extend from the Umgeni River, in the North, along the coast through to the Umlaas Canal in the South and extend to the escarpment in the west extending over an area of 677 km² (67,772.33 Ha). Three Area Based Management (ABM) areas fall within the CSR namely: Inner eThekwini Regeneration and Urban Management Programme (iTrump), Cato Manor Development Association (CMDA) and part of the South Durban Basin (SDB).

The Central Spatial Region contributes to 56% of the EMA’s GDP and is centered on the transport and logistics activities of the Port. A substantial portion of the EMA’s economic development opportunities are concentrated in the Central Spatial Region with industry, commerce and tourism being the leading sectors.

The spatial intent of the CSR is to have a mix of residential type and quality which would be characterized by high density, high amenity and ease of affordability. The “Plan” for the Central Spatial Region does not build up to a spatial concept, it was however developed through investigations of the respective functional areas and subsequent identification of regeneration projects within those areas, due to the region being already developed.

The vision for spatial development of the Central Spatial Region has been formulated in accordance with the strategic role this region serves in the wider context of eThekwini and has been underpinned...
by its inherent characteristics and capacities to support development. The identification of strategic spatial investment areas at a metropolitan level highlights the areas that can play an important role in promoting spatial principles.

While each of these opportunities presents its own set of issues and concerns, if the Spatial Development Plan is to have maximum impact, it needs to draw together these largely unrelated claims for attention so that they work to reinforce and support one another and are directed to achieving the aims of the metropolitan vision.

All of the areas listed below are currently covered by a range of projects and initiatives. Realising the opportunities that these areas present require that they are accommodated within the Spatial Development Plan and are linked to other spatial elements:

- Development of the Port as an economic, manufacturing and trading hub and promoting it as a gateway especially to the East.
- Promoting tourism and mixed use development in the inner city.
- Ensuring that Cato Manor and the Pinetown CBD still represents an opportunity for well-located mixed-use development and the promotion of higher densities.
- Maximisation of industrial and economic potential in areas such as Pinetown/New Germany and Back of Port.
- Promotion of densification within the central region especially along public transport nodes and corridors.
- Regeneration of areas within the Inner City and former R293 townships such as Cleremont/KwaDabeke, Umlazi, Inanda, Ntuzuma and KwaMashu (INK)

In terms of balancing physical, social and economic benefits, optimising the opportunities offered by the coastal area includes the need to ensure that tourism enhances the quality of the environment and is undertaken in a sustainable manner, and that other competing uses are managed. Historically advantaged areas and infrastructure that serve the metropolitan area are major assets for the city in terms of sustaining and generating economic opportunities.
The Northern Municipal Planning Region (NMPR) boundary extends from Umgeni River in the south to Tongaat in the north with the coastline in the east and the ILembe District Municipality to the west and north. It has a population of about 1.15 million which is 31% of the total population of 3.5 million (Stats SA Community Survey, 2007). The population is housed in a total of 201,612 houses. The largest population concentrations are to be found at Inanda/KwaMashu (58.6%), Phoenix (17.5%) and Durban North (7.1%).

In determining a spatial role for the NMPR it is important to note the area has environmental, social and economic linkages to the wider metropolitan area. These linkages also occur within the broader region both provincially and nationally. The following roles of the NMPR have been determined in accordance with its inherent character and capacity to support envisaged growth and development within the EMA:

- Air and landside component to logistics hub associated with new international airport.
• National and international Gateway to Metropolitan area and Coastal Destinations.
• Consolidate Provincial Development Corridor between Durban and Richards Bay and surrounding municipalities
• Protection, consolidation and establishment of new well located serviced industrial opportunity areas.
• Protect denuded environmental assets to ensure eco-service delivery and to ensure tourism and recreation opportunities are not lost.

The spatial challenges of the NMPR include protection of environmental assets; prevention uncoordinated urban sprawl; protection lifestyle options; provision new major transport infrastructure; provision employment opportunities; protection agricultural assets and provision new bulk infrastructure.

Approximately 25% of the NMPR is urban, 36% is agricultural activities of which 31% is sugar cane. Industrial and commercial land uses currently only account for 2%. Development is concentrated around Durban North/La Lucia, Inanda, Ntuzuma, KwaMashu and Phoenix and around the small towns of Verulam and Tongaat. 84% of the land is under freehold ownership. Sugar cane land is under pressure for conversion to residential and/or commercial and industrial development.

At the sub metropolitan level the NMPR consists of three discrete land use corridors i.e. rural, urban and coastal corridors, all running parallel to the coast. The roles of the corridors are directly related to their inherent landscape, settlement and infrastructure characteristics and potential which include urban, rural and coastal characters.
The north has been divided into 6 Local Areas namely; Buffelsdraai, Hazelmere, Ohlanga-Tongati, Northern Suburbs & Umhlanga, Phoenix/ INK, Tongaat & Dube Tradeport, and lastly Verulam/ Cornubia. These local areas will play a role in achieving the broader growth and development objectives of the metropolitan area but will also ensure that local level needs and lifestyles are respected and met. All the LA's will be linked to each other and into the metropolitan area as a whole through the metropolitan level access, movement and linkage system.

The Northern Region is dynamic and there is a high demand for development, particularly within the urban corridor. A number of key areas are development priorities and various projects and initiatives are taking place, including:

- **King Shaka Airport** and the surrounding **Dube Tradeport** are being promoted as a key economic node, comprising of a variety of economic and transport related activities.
- A major business, retail and mixed use urban node is the **Umhlanga Town Centre/ Gateway** area
- **Bridge City**, strategically located between KwaMashu and Phoenix, brings innovative transportation, urbanism and mixed use development to a previously marginalised part of the city and actively promotes higher densities.
- As an emerging entertainment and tourism node, the **Sibaya** area plays a key role.
- To promote town centre redevelopment, the **Verulam and Tongaat CBDs and KwaMashu Town Centre** are seen as key priorities and being revamped to increase functionality within the broader Northern Urban Development Corridor.
- The new town of **Cornubia** is central in the promotion of mixed use, **densification** and integration.
- The emerging industrial and residential components of the **Inyaninga** area, west of the Airport, are seen as top city-wide development priorities.

In addition rural nodes are to be established, consolidated and enhanced as village centres to provide support to the development of the rural and agricultural hinterland, these include; Matabetule, Senzokuhle, Buffelsdraai and lastly Cottonlands.
The South Spatial Development Plan (SSDP) identifies the capacity of the existing natural and built environment to create sustainable investment and development opportunities and establishes linkages to opportunities for the socio-economically disadvantaged communities of the south. Within this context, the SSDP identifies what development is desirable, where such development should occur and how such development should be facilitated.

The main objectives of the SSDP therefore include:

- To establish an understanding of the strategic role of the southern area within the context of the eThekwini Municipality,
- To ensure alignment of the SSDP with the development plans of the west and north as well as the South Durban Basin Framework in progress,
- To inform the broader eThekwini Spatial Development Framework as well as providing guidance for subsequent local area plans and land use schemes.

The study area of the SSDP is in extent of 510km². In 2001, it was estimated to accommodate in the region of 730 000 people (census 2001), and the projected population for 2008 was 754 356 (based on a 1.1% growth rate). The South MPR extends from the northern boundary consisting of the Umlazi River and the Umlaas Canal to the uFudu Escarpment and the Ezimhlobo River in the northwest to the western and southern boundaries of the eThekwini Municipality. It abuts in the north onto both the central and western metropolitan planning regions. In the west the South MPR borders onto the UMgungundlovu and UGu District Municipalities.
The role of the SSDP is based on achieving a balance between the following key imperatives that the Southern Region must address to achieve sustainable development for the broader Metropolitan region as well as the local region:

- Major residential role
- Industrial role with potential for limited expansion
- Coastal Tourism (existing and development of potential)
- Potential to diversify/intensify existing agricultural uses and improve food security for Metro

The conceptual approach and vision of the SSDP includes the following:

- To provide quality, variety and properly serviced residential facilities to cater for all residents of the SMPR
- To upgrade and develop existing industrial and commercial activity, while expanding and developing LED and tourism opportunities and diversifying & intensifying agriculture for the benefit of all.
- To integrate and link communities, through co-operation between traditional and non-traditional authorities, structures & communities, and the provision of social facilities for all.
- To strengthen the Metro role of the South Municipal Planning Region (SMPR), to ensure appropriate development of airport site, the creation of increased employment opportunities, and the upgrading of informal areas and market activities.
- To identify and strategize for additional appropriate industrial, business, commercial, agricultural and tourism opportunities.
- To plan for additional required residential accommodation, through infill & densification in a range of affordability levels.
- To plan for improved & appropriate accessibility throughout the SMPR.
- To ensure a protected, rehabilitated & managed natural environment.
- To ensure the improvement of living environments and the enabling of communities to take a greater part in influencing their environment.

SSDP has identified 9 Local Planning Areas (LAPs) these include Isipingo, Umlazi, Kingsburg/ Amanzimtoti, Illovu, KwaMakhutha. Umbubulu Folweni, Umgababa/Umnini and Umkomaas. The LAPs will establish Land Use Management and regulatory instruments for the area in terms of the overall Metro LUMS approach and frameworks for specific developments to guide municipal actions and private investment.

Major development components consist of the southern portion of the South Durban Basin, the existing airport (due to become a key area for redevelopment), a range of formal residential developments (including the former township of Umlazi), a large contingent of informal residential development both within the formal development and on its periphery, and large rural areas, being substantially in the ownership of the Ingonyama Trust.

The South MPR accommodates a significant part of the coastal environment of the eThekwini Municipality. While the South Coast provides some recreational and tourism activities, much of the development potential is severely underutilized.
OUTER WEST SPATIAL DEVELOPMENT PLAN (OWSDP)

The 2nd draft OWSDP adopted by Council in November 2011 builds on the need to address current challenges and unpack the long term strategic policy by translating it into a more detailed framework in terms of residential, transport, investment and environmental interventions. The purpose of the OWSDP is to promote and guide development in the Outer West that is sustainable and that responds to the various needs and challenges facing the eThekwini Municipality as a whole. The OWSDP provides the spatial expression for short, medium and long term development of the region, which will be achieved by identifying spatial structuring elements aimed at:

- Safeguarding the environment
- Establishing investment points and lines based on local opportunity
- Establishing the urban development line to guide infrastructure provision
- Consolidating local planning areas based on inherent characteristics

The study area of the Outer West is in extent of approximately 78 438ha, representing 34% of the municipal region and accommodating 577 500 people, i.e. 16.5% of the total population of eThekwini Municipality’s 3.5 million people. A large part (50%) of the study area is covered by traditional authorities. A major portion of metropolitan open space system (50%) which requires protection is found within this region. Contribution to GDP stands at 6.6%.

The region shares an urban and rural landscape with a wide range of settlements types extending from formal urban to rural settlements. Rural areas as well as the Western Suburbs have shown significant residential growth in the last few years. Agriculture activities in the form of commercial and subsistence farming, is under threat from urban development. There are limited levels of economic development activities in the region in relation to the existing population resulting in people have to travel out of the region to access economic opportunities.
The role of the OWSDP is based on achieving a balance between the following key imperatives that the Western Region must address to achieve sustainable development for the broader Metropolitan region as well as the local region:

- Priority Environmental Management Area
- Strategic Industrial Expansion
- Strategic Residential & Commercial expansion
- Key Metro International and Domestic Tourism Destination
- Settlement Upgrading

The conceptual approach of the spatial development plan includes the following:

- Establishing the N3/M13 corridor as the main economic movement system linking the Outer West to other economic centres, as well as supporting key strategic economic development.
- Protecting and managing of the natural assets of the Outer West are very important and is evidenced by the fact that DMOSS covers almost 50% of the area.
- Establishing the Urban Development Line to delineate the outer limits where urban development will be permitted in accordance with infrastructure provision and capacity. The urban development line applies to the Western Suburbs and the Cato Ridge/Mpumalanga areas. Due to historical policies certain parts of the Outer West such as Hammarsdale and Mpumalanga are more developed in terms of infrastructure services than other areas. The proposed urban development line in this context therefore applies to the east and west of the region with agriculture concentrated in the centre.
- Organising the Outer West region into six local areas, namely Western Suburbs, Shongweni, Cato Ridge, Inanda Dam, Mpumalanga and Zwelimbomvu to support a range of lifestyles and develop the assets and attributes of each local area.

Corridors of development act as growth or development axes that spatially structure development. These include:

- N3 Metropolitan Movement and Development Corridor
- MR385 and Old Main Road as Urban Services Corridors supporting mixed use urban activities
- R103 as main Tourism Corridors supporting tourism activities.
- Eddie Hagen as Industrial Corridor supporting

The aim in the Outer West is to establish a movement system which not only operates in terms of improved circulation, access and linkage, but which also reinforces the social, economic and spatial importance of the movement network. Particularly as public transport routes are used for locating and structuring the provision of community facilities and economic activities.

A clear hierarchy of nodes are established, consolidated and distributed throughout the OW area including, Urban nodes, Rural nodes, Tourism and Recreation nodes and new opportunity areas. These nodes will serve as investment and access points that provide convenient and efficient access to a hierarchy of commercial, community services and facilities.

![Figure 24: Outer West SDP Proposed Nodes Map](image)

Source: eThekwini Municipality, Development, Planning, Environment & Management Unit
Local Area Plans
An SDP comprises a number of Local Areas for which Local Area Plans (LAPs) will be prepared. The Council has taken a decision to prioritise and plan for Local Areas experiencing or likely to experience change that require more detailed planning and extensive management. The LAP carries through the intent of the SDP but responds to the specific nature of the local area.

A LAP would consider issues such as the alignment of local movement systems, the identification of local economic and leisure opportunities, and the more detailed identification of areas for both development and conservation within the context of existing and new infrastructure capacity. As an example the Northern Urban Development Corridor (NUDC) LAP, which was adopted by council in March 2011, a spatial and transport planning project, comprising of 3 Local Area Plans undertaken in parallel to an intensive transportation planning exercise, is focused around the upgrading of the R102 to accommodate the new King Shaka International Airport and Dube Trade Port and associated development while the Illovo Bhekulwandle LAP responds to the need for basic services and investment opportunities.

A number of LAP’s have been commissioned for previously disadvantaged areas of the Municipality. These plans will identify programmes and projects which will assist in developing these areas. As such plans for Adams/Folweni and Greater Cato Ridge etc are in progress.

Functional Area Plans
Functional Area Plans will be undertaken for areas within the LAP that require special attention. Functional Area Plans would exhibit a high level of detail including detailed land uses, land use management guidelines, traffic assessments and road & public transport proposals, required social facilities, LED proposals, architectural theming, landscaping, and street furniture. The Hillcrest-Gillitts-Kloof activity corridor land use plan is an example where the focus is on introducing new land use management guidelines that would help an area respond appropriately to the changing development pressures experienced in that particular area.

Special Projects
Special Projects have been identified as priority Municipality projects. An example could be special projects within areas of urgent need of economic and social upliftment such as the Umlazi Regeneration Framework Plan and the Clermont KwaDabeka Regeneration Framework Plan. Other examples of Special Projects include the eThekwini Industrial Spatial Strategy which aims to unlock industrial development opportunities (both spatially and non-spatially) for the entire city. Such a project would run in parallel with and inform the Spatial Development Planning process. Still, other special projects may include feasibility assessments or scenario planning to inform an appropriate mechanism for land use management within the city.

The Municipality will only support development that aligns with the policy proposals and guidelines as contained within the Hierarchy of Plans. There are numerous aspects to a land use management system including land use schemes, functional area plans, rating policies and endowment policies that would require significant changes in order to realise a particular need and/or strategic vision indentified within an LAP or Functional Area Plan.

Cross-boundary planning and alignment with neighbouring municipalities
While Provincial Planning legislation is now applicable across the Province, cross border planning is important and the eThekwini Municipality’s SDF and SDPs are contextualized within the regional/provincial scale and is done in coordination with surrounding municipalities for the following reasons:
Thekwini Municipality:
2012/2013 IDP

• To prevent conflicting initiatives and land uses to being implemented on opposite sides of an administrative boundary,
• To ensure an aligned regional vision with regards to the region’s infrastructural development to allow governments to take advantage of comparative advantages offered within an area. This also refers to cross border provision of services such as education facilities which can be utilized by communities residing in two municipalities. This allows for cost effective provision of services and is applicable to the provision of civil services, social services and economic opportunities.
• Cross-border planning and alignment is also crucial for the preservation of bio-diversity and ensuring an appropriate response to climate change and disaster management.

A summary is given below of Municipalities bordering the eThekwini Municipality with their key planning issues as they relate to the eThekwini Municipality:

Table 7: Summary of cross boundary planning issues

</tbody>
</table>
The Municipality is located about 50 km from Durban, which makes it to have both competitive and comparative advantage with EM particularly in terms of tourism. Umdoni has an approximate coastline of 40 km and stretches inland as far as Umzinto. Umdoni has established tourism infrastructure and an existing tourism market for coastal, golf and diving adventure tourism.

• Predominantly rural in nature
• Has limited services and infrastructure
• Has high levels of unemployment

At the boundary of EM where the two municipalities abuts each other; there are disparities in densities. The EM proposes low densities with a level of services to match low density areas in order to maintain and promote rural and agricultural activities. On the other hand Umdoni is proposing high income housing developments. This creates non alignment in term of densities.

There are disparities in services in areas towards the border of EM and areas towards the boundary of Vulamehlo.

There is alignment in terms of proposed uses as both municipalities have low density rural housing developments at their boundaries.

Other current initiatives within the eThekwini Municipality that address planning alignment between adjacent municipalities include the establishment of an inter-municipal forum, chaired by the eThekwini Municipality. This forum meets on a quarterly basis and includes all local and district municipalities from eThekwini Municipality, westwards, to Howick.

An N3 Concept Plan, managed by the eThekwini Municipality, is currently underway, which will ensure that planning development along the N3 corridor will occur in a coordinated and integrated manner. A similar forum, the North Development Forum, is currently being set up to address the alignment of planning proposals and to facilitate the coordinated implementation of the integrated development vision in the northern region. The forum will include representatives from Provincial Departments, iLembe Municipality, eThekwini Municipality as well as civic and private sector stakeholders.

Land Use Schemes

Land Use Management Schemes, more commonly known as Planning Schemes, are statutory planning tools used to manage and promote development. A land use scheme is a critical component of the integrated spatial planning system and deals with zoning and built form controls. The intent embodied within the package of spatial plans must be translated into the most appropriate zones and land uses within the schemes. Schemes are the tangible tools in the package of plans as it is at this level that development rights become important proponents for development, statutory decisions are made and building plans may be considered.

Land Use Schemes are planning tools used to deliver quality environments. It allows planning professionals to consider integrated responses that result in more vibrant and robust environments; while at the same time contributing to sustainable environments. Planners over the years have grown
to realise that Planning is far more than a planning response to applications; rather the emphasis is now on environmental issues, infrastructural capacities and equally on impact of development.

Within the Councils area of jurisdiction, there are land parcels that are contained within Schemes areas; land contained outside Scheme areas and land parcels that are under the jurisdiction of the Ingonyama Trust Board. (See Map below):

![Figure 25: Town Planning Scheme extension Areas](source)

While Council in 2003 resolved to include all areas under its jurisdiction, the Department of Agriculture has yet to consent to numerous applications, identifying sustainability of agricultural land into the future as their primary concern. This is a critical issue and Municipalities in the Country have all raised the same issue. Strategic land parcels cannot be released for development and this prevents rates for the Municipality and work opportunities for people. Schemes are required by law to be reviewed on a yearly basis in line with the IDP and SDF reviews.

Schemes are the mechanisms that drive the Municipality’s income as it relates to development. It gives birth to building plans, a variety of exciting land uses such as mixed use developments such as Umhlanga Ridge and KwaMashu Town Centres; it creates quality work environments such as the La Lucia Office Park; and robust Industrial parks such as River Horse Valley and the emerging Cornubia Industrial Area; not to mention quality recreational spaces such as the Umhlanga Promenade.
**Programme 1.2:  Develop and implement coastal, riverine and estuarine management plans**

Our coastline, which is dependent on the effective management of our coastline, rivers and estuaries, is the greatest attraction for visitors to this municipality and is tremendously popular from a property development perspective. Over the last few years, the importance of the coast to South Africa's economy has been recognised by the promulgation of the new Integrated Coastal Management Act of 2008 which supercedes the old Seashores Act of 1935. For the first time this Act now requires all the levels of government to take a proactive approach in coastal management.

The Act requires that within 4 years (i.e. by Dec 2013) the municipality must prepare and adopt a Municipal Coastal Management Programme (MCMP) for managing the coastal zone. This MCMP must contain a clear policy directive for the management of the coastal zone and must include, a vision, coastal management objectives, priorities and strategies to achieve these objectives, to support the provincial and national coastal management objectives and to address coastal erosion and accretion and to address the right of access to the coast.

The draft eThekwini Municipal Coastal Management Programme contains the follows strategic objectives:-

- Development and implementation of Coastal Management Plans;
- Estuary Management Plans;
- Coastal legislation and bylaw development;
- Coastal education and awareness;
- Sustaining the supply of natural goods and services;
- Managing development in the coastal zone;
- Sustainable coastal livelihoods programme;
- Coastal structures management and coastal engineering.

The draft eThekwini Municipal Coastal Management Programme will be presented to council for adoption.

**Programme 1.3:  Ensure the long term sustainability of the natural resource base**

It is recognised that natural resources provide the platform for sustainable growth and development for all of Durban’s residents, poverty alleviation opportunities for the Municipality’s most vulnerable households, and help to buffer the negative impacts associated with climate change. The eThekwini Municipality is therefore committed to ensuring the long term sustainability of the natural resource base through concerted efforts in a number of key areas. The eThekwini Municipality seeks to protect specific natural environments, terrestrial and aquatic, within the eThekwini Municipal Area (EMA) in order to secure a sustained supply of ecosystem services (ES) services for its residents and visitors. This is in order to contribute to sustainable development in the EM’s jurisdiction and to give effect to its Constitutional obligations and the requirements of other legislation e.g., the National Environmental Management Act (NEMA) (1998) and the Municipal Systems Act (2000). The Durban Metropolitan Open Space (D’MOSS) plan identifies those environmental service assets that require protection and management. These assets include rivers, wetlands, estuaries, grasslands, forests and coastal zone resources. To ensure the sustained functioning of ecosystems that provide goods and services, it is essential that we conserve and manage the biodiversity (simply defined as plants, animals and micro-organisms) that live in and shape these ecosystems. The D’MOSS implementation strategy that has been prepared, therefore, has a specific biodiversity focus.
The total terrestrial and aquatic areas falling within the D’MOSS plan is in the order of 75,000ha of which an estimated 53% is physically undevelopable. More than 90% of this total area is in private or communal ownership, and the objective is protection of land included in the D’MOSS plan through education, awareness, incentives, targeted land acquisition, supportive valuation and rating approaches, conservation servitudes and other town planning mechanisms. In addition, eThekwini Municipality aims to assess and regulate developments that are proposed in environmentally sensitive areas, so as to ensure that developments do not impact on the sustainability of the natural resource base. Proclamations of nature reserves, and the establishment of public-private partnerships, are also promoted as part of efforts to protect Durban’s environments. There are, however, many instances where the natural resource base is overexploited and the various spheres of government and broader society must continue to work together to put an end to such threats.

Management of environmentally significant areas and open space corridors is also critical. Over and above the work of the Municipality’s Parks, Leisure and Cemeteries Department, and other role-players, a number of poverty alleviation programmes are in place with the aim of simultaneously providing training and employment and managing environmentally significant areas. These programmes also contribute to the development of a green economy in Durban. Many of these programmes target invasive alien species which pose a significant and growing threat to biodiversity and human wellbeing. An alien invasive species strategy has also been prepared and a number of large-scale implementation projects are already underway. Relevant environmental policy development and communication is also critical in furthering these efforts.

In order to gauge if we are indeed sustaining the natural resource base over time, we need to undertake appropriate research, and implement a monitoring programme of key biodiversity indicators. To this end specific research and reporting is undertaken, for example through collaboration with the University of KwaZulu-Natal and through the publication of an annual State of Biodiversity report.

Programme 1.4: Develop and implement an integrated, efficient and effective automated application and approvals system

Unnecessarily long delays in the approval of development applications can cause landowners to become frustrated and suffer a loss of income. If building improvements are undertaken without formal plan submissions, this can lead to unsafe buildings, a decline in neighbourhood amenity, a loss of confidence in property as an investment option and a loss of rates income to the Council. Therefore, it is in the municipal and public interest that an effective and efficient system that integrates town planning, environment and building control approval and compliance processes be developed and implemented.

Much effort is being put into standardising approval systems across the Municipality in the most effective way. Processes are being re-engineered to be more responsive, to improve turnaround times, to enhance the attractiveness of the Municipality from an investment perspective and at the same time to promote development that sustains our natural and amenity resource base. An electronic development application monitoring system is being set up to track all development applications through the municipal system, from the submission stage through environment, town planning assessments to completion stage and enforcement of conditions of approval.

National government has introduced changes which demand stricter compliance with certain aspects of national building regulations. These changes are aimed at ensuring that our buildings comply with requirements to minimise the impact of climate change. In pursuit of the national directive, the municipality needs to develop procedures in response to the legislative changes and ensure that all stakeholders fully comply with these procedures and requirements which may change as the
Thekwini Municipality: 2012/2013 IDP

legislation changes. It is therefore important to facilitate an education and awareness campaign to all stakeholders in the built environment.

**Programme 1.5: Develop and implement a sustainable land use, environment and building control compliance system**

It is in the Municipality’s interest to develop an effective and efficient land use, environment and building control compliance system to combat inefficiencies and ineffectiveness of the current fragmented enforcement system and growing disregard for legal development practices.

Whilst control is often seen in a negative light, an ineffective system leads to frustration, apathy and anger eventually undermining all efforts to achieve Plan One’s goal. To be effective the system must be equitable and efficient and not only deliver but be seen to deliver. In this regard by-laws and procedural reviews included in an efficient and effective electronic system is underway, where such measures are in the control of local government. In addition, staffing levels, capacity and council integration of efforts is currently being addressed to enhance the efficiency and effectiveness of the compliance system.

Outdoor advertising is a multi billion rand industry that has a significant impact on the aesthetics and safety of the built environment particularly in the urban areas. It has a potential of enhancing or destroying the aesthetics of the Municipality. eThekwini Municipality has a policy and bylaws that regulate outdoor advertising to enhance the value add of outdoor advertising within the municipal area. Therefore it strives to ensure that there is maximum compliance with policy and bylaws pertaining to advertising.

**Strategic Focus Area: Climate Protection Planning**

**Programme 1.6: Develop and implement a Municipal Climate Protection Programme**

A review of the local impacts of climate change in Durban suggests that maximum and minimum temperatures are likely to increase, as are the number of consecutive hot days with temperatures exceeding 30°C. Durban’s rainfall patterns are also likely to be affected. Although the total amount of rainfall will increase slightly, the distribution of that rainfall will change, with longer periods of no rainfall and an increased frequency in high intensity rainfall events. These changes in temperature and rainfall may lead to numerous impacts on water availability, agricultural productivity and food security particularly in subsistence farming areas. Temperature increases will also likely cause the spread of water and vector borne diseases such as malaria and cholera to previously unaffected areas in Durban.

Extrapolating from sea level measurements made since 1970, current predictions are that a number of economic and tourist areas may be affected by sea level rise; infrastructures, together with coastal vegetation, are at risk. An increase in damage can also be expected from an increase in the frequency of extreme events such as flooding and storm surges. It is therefore clear that climate change is a threat to sustainable development and could undermine poverty alleviation efforts and have severe implications for food security, clean water, energy supply and environmental health.

A further likely impact is the change in the distribution of species across latitudinal and altitudinal gradients. This is likely to impact negatively upon species whose habitat has been fragmented by development, and highlights the need for connecting habitat corridors. Climate change is also likely to promote the spread of invasive alien species which will put an increasing stress upon indigenous biodiversity. Another possible impact is linked to an increase in the carbon dioxide concentrations in the atmosphere which could favour growth in tree and woody species, to the detriment of grassland...
species. This impact will be exacerbated by the changes in grassland fire ecology already caused by
development and habitat transformation.

A notable omission in our understanding of climate change impacts in eThekwini Municipality is that
of the marine environment. A desk top study is being conducted on the likely impacts of climate
change upon the ecology of the near shore environment.

eThekwini Municipality views the issue of climate change in a serious light and is developing
appropriate mitigation and adaptation plans within the context of its Municipal Climate Protection
Programme initiated in 2004. Because of the vulnerability of Africa to the impacts of climate change,
adaptation is a critical concern for a city such as Durban. For this reason the Municipal Climate
Protection programme emphasises the need for focused and flexible adaptation options and has
explored the possibilities that exist at the municipal, community and urban management level.
COP17-CMP saw a significant emphasis placed on adaptation as a necessary climate change
response at the international level with the signing of the Durban Adaptation Charter 114 mayors
representing over 950 local governments worldwide. Ensuring the implementation of the Charter will
be a key priority over the next 5 year period.

Plans/Strategies/Policies Applicable to Plan One

Environmental Management Policy
The eThekwini Municipality’s Environment Management Policy guides the continuous improvement in the environmental management of these activities. The Policy contributes to the effectiveness of the Integrated Development Plan (IDP) in contributing to environmental sustainability, as well as economic efficiency and social equity.

eThekwini Municipality Generic EMP for Construction Activities
The policy provides standards which are to be observed construction activities are undertaken. The standards apply to the lifecycle of a project thereby ensuring minimum negative impact on the environment.

Durban Environmental Services Management Plan
The implementation of the eThekwini Environmental Services Management Plan (EESMP), or open space plan, will therefore contribute significantly to:
• achieving the aims and objectives of the Municipality’s Integrated Development Plan,
• improving the quality of life of the residents of Durban, and
• meeting national and international environmental commitments.

This ‘popular’ publication has been prepared to document the history of open space planning in Durban and facilitate and promote a wider understanding and knowledge of the value of open space and the benefits it delivers to all our people and communities.

Spatial Development Plans (SDP):
The SDPs are developed to bridge the gap between the strategic/conceptual SDF and the detailed land-use schemes. It does this by:
• Translating the policies contained within the eThekwini Municipality Spatial Development Framework (SDF) into more detailed and geographically specific land use directives.
• Guiding the preparation of more detailed local area plans, functional area plans and land use schemes; and
• Providing a more concrete spatial and land use guideline policy for use by municipal and other infrastructure service providers in planning and delivering their services.

Land Use Scheme:
Land Use Management Schemes, more commonly known as Schemes, are statutory planning tools used to manage and promote development. A land use scheme is a critical component of the integrated spatial planning system and deals with zoning and built form controls. The intent embodied within the package of spatial plans is translated into the most appropriate zones and controls within the land use schemes.

Spatial Development Framework:
The SDF provides parameters within which initiatives at a sector and local level should translate spatial objectives into tangible and attainable objectives, targets and projects. It provides a better understanding of the ability to translate spatial concepts and highlights the practical implications of meeting spatial challenges relative to current practice and capacity.

Long Term Development Framework - “Imagine Durban”:
The Long Term Development Framework focuses on planning for the future by identifying the long term trends that could have extreme impact on the Municipality and determines how the Municipality plans to respond to these trends.
eThekwni Industrial Spatial Strategy:

The aim of the strategy is to guide the spatial redevelopment of industrial activities within the Municipality. The objective of such redevelopment is to optimize the location benefits for key sectors and to enable them to maximize advantages inherent in clustering. In this manner the Municipality can facilitate a business environment where efficiency and productivity in all spheres is maintained at internationally competitive levels.
Plan Two: Developing a Prosperous, Diverse Economy and Employment Creation

Goal
To develop the economic wealth of the eThekwini region for the material well-being of all its citizens.

Desired Outcome
Strong economic growth, sustainable job creation and poverty alleviation.

Why this plan?
This plan must create jobs, reduce poverty and ensure an equitable distribution of wealth for all citizens in the eThekwini region. Ultimately, the eThekwini region should be the leading metropolis in achieving a sustainable and accelerated economic growth path that will deliver catalytic growth initiatives and quality job creation efforts that assists business and the three spheres of government positively in addressing poverty, income inequality and unemployment over the next ten years.

Since 1994, the eThekwini Municipality has faced a myriad of economic development challenges, all of which may be classified into two types - those relating to the past, and the rest as a response in adapting to the vagaries of global economic trends and their impacts. Each come with its own set of challenges and requires a different strategic plan. Presently the region is characterized by high unemployment and poverty levels, low foreign direct investment, poor partnerships with the private sector and growth rates not sufficiently adequate to address the labor constraints.

Globally, the past four years has been dominated by issues relating to high unemployment, the euro zone sovereign debt crisis and fiscal austerity measures, all of which have had negative impacts on South Africa’s job targets as set out in the New Growth Path 2010 and the recent National Development Plan 2011. The New Growth Path intends to reduce unemployment from 25% to 15% through the creation of 5 million jobs by 2020 while the National Development Plan 2011, is aiming to do the same from 2021 to 2030, by providing an additional 6 million jobs.

The President in his 2012 State of the Nation Address has unveiled several new plans that will play a major role in enhancing the region’s importance as a logistics gateway into and out of the country. The President outlined the government’s intention of increasing the emphasis on building infrastructure in the country. The new corridor between Durban and Gauteng is intended to improve export capacity through the seaports – that is from the existing Port and the planned Dig-Out Port at the old airport site. Recent announcements in 2012 by Transnet National Ports Authority (TNPA) to spend R21.3 billion over the next 7 years is a significant component of the investment programme that featured in the State of the Nation Address.

These lofty targets set by national government to 2030 require bold leadership and a new approach at a local government level in order to contribute towards this vision. This Plan sets out a new economic framework with a fresh set of programmes and projects which the eThekwini municipal region may set the foundation for over the next 5 years towards sharing in the national vision while realizing specific gains in the short term.

The need for an Economic Plan (Plan 2) within the eThekwini Integrated Development Plan 2012/13 – 2016/17 is unpacked within a Strategic Focus Areas (SFAs) as outlined below. This Plan is geared towards positioning the municipal economy as Africa’s Southern Gateway to Trade and Travel. The further development of the Port of Durban, Dube Trade Port and King Shaka International Airport, as well as infrastructure improvements such as provision of water, energy, road, freight rail and fibre...
optics networks highlight the critical linkages of the municipality to key value chains located throughout Southern Africa.

In achieving this vision, the Plan describes an economic framework that builds on past successes such as stimulating key sectors of the economy and providing business support. This plan outlines the need to include a strategic focus on economic leadership, city marketing and active monitoring of projects by national government and the private sector. In addition, the plan highlights the importance of addressing the challenge of placing stress on a smaller workforce that supports a large proportion of rural and peri-urban households.

**Strategic Focus Area: Support and grow the Economy**

The Plan 2 vision is underpinned by this significant SFA and is also endorsed by the National Growth Path (2010) that calls for local governments to play an active role in responding to job drivers such as investment into the development of energy, transport, water, communications infrastructure and housing. This SFA aims to gear up resources of local government and strategic partners to deliver on the NGP 2010 drivers. A key feature of this SFA is to package policy and specific project engagement strategies with key partners to unlock development. In order to achieve this, the municipality is required to undertake economic research and provide the necessary intelligence to these discussions.

A key project will be quarterly meetings held between the municipal leadership, national government, private sector, state-owned enterprises and provincial departments to discuss amongst other pertinent issues: unblocking developments; support for strategic projects; approvals for catalytic investments; funding for projects and more importantly progress on initiatives highlighted by key partners as strategic interventions in the local economy. Another key responsibility of the municipality will be to actively and transparently promote investment that is packaged or positioned for implementation. As part of this role, the eThekwini Municipality will actively market the municipality and its investments in order to secure partnerships for delivery and funding of projects. The critical success factor, however, is that of open and transparent decision-making, as well as common project planning for catalytic infrastructure projects. The City Investment Marketing and Promotion programme will be driven by the municipal entities, Strategic Projects Unit, Durban Tourism, the Durban Investment Promotion Agency and key partners such as the Durban Chamber of Commerce and Industry, Trade and Investment KwaZulu-Natal, as well as various sector development entities established through partnerships with the three spheres of government.

**Programme 2.1: Lobbying and providing strategic support**

In order to move from a situation of stagnating slow growth to one with a marked change in the way that the city conducts its business, requires effort from strong economic leadership. In essence, the city requires a set of influential teams of professionals whose power is derived from a variety of sources. Leadership coalitions should include senior officials, politicians, professionals and people with specific expertise. Leadership coalitions also provide greater accountability within the political caucuses to assist in unlocking these strategic executive decisions on key flagship projects such as port development; strategic land parcels that are positioned for development, sector specific projects, new economic sectors and key infrastructure platforms. It is further proposed that leadership coalitions be extended to business sector and business coalitions.

This programme is focused on a set of key project actions and decision-making support mechanisms to take the municipality from a situation of uncertainty to one where resource allocation can be confirmed and directed towards flagship investments that are able to provide a step-change in economic growth. In the last five years, several projects have reached a political and implementation impasse where there exist project limitations in moving into implementation phases. Additional
projects include: Investigating the establishment of an Economic Advisory Council with key role-players to actively monitor progress on projects and to unlock decisions; investigating and providing the appropriate systems and structures needed for better project management and facilitation of opportunities; and facilitating decisions on catalytic projects.

These decisions include: the initiation of the Environmental Impact Assessment for the Port Expansion; Sale and Use of the Durban International Airport site owned by ACSA; the redevelopment of Clairwood and the Back of Port area; an Intermodal Park to support Port Expansion; investigating the establishment of a Special Economic Zone; future of strategic land parcels such as Block AK, the Centrum Site, Natal Command; lobbying for a National Broadcasting Centre; the location and establishment of an Automotive Supplier Park. Some of these strategic economic interventions are indicated in the map below.

Key features of this programme include alignment with institutional drivers outlined by the NGP (2010) such as more constructive and collaborative relations amongst state, business, and labour. In terms of specific initiatives by the Ethekwini Municipality, this programme sets out specific attention required on key partnership projects with Transnet; PRASA; Public Works; the DTI; and ensuring ongoing dialogue with Cabinet.
Programme 2.2: Provide Economic Intelligence and a Strategic Economic Framework

The constant shifts in government policy environment calls for constant alignment of goals, strategies, plans and projects. Furthermore, the current economic and financial crisis has impacted on resources available for governments to effect change. The role of the Economic Development Unit is to align with the national policy packages and to further carve out the local interventions that can support these goals. The EDU’s Policy, Strategy, Information and Research (PSIR) division will be responsible for providing economic intelligence to the municipality and its strategic partners in implementing economic development. Some of the roles of the division include feasibility studies, application and development of decision-making tools, updating the economic plan for the city and monitoring the performance thereof. Future investigations include incentive packaging, project packaging and partnership packaging. Additional services that are proposed specifically for business and investors include property research, economic reviews, market studies, and a database of development indicators for researchers.

Programme 2.3: Stimulate key sectors that promote economic growth and create jobs through providing support for prioritized sectors

This programme aims to leverage off the current economic base comprising clothing, textiles, furniture, automotive, chemicals and maritime and logistics industries. The automotive supplier park project, previously mooted by Toyota in 2004 has been revived due to the recent announcements made through the Automotive Production and Development Programme (APDP) of South Africa, which aims to boost local production to 1,2 million vehicles per annum by 2020. Additionally some clusters may require a single intervention such as unlocking an industrial estate as the flagship intervention that stimulates local economic development; through to a LED project such as an incubator facility for SMMEs in the local area. Further to this, and linked to the opportunities for Port expansion in Durban, the local chemicals industry consolidation and increasing capacity of imported fuel and chemical products will provide pressure and demand for additional land and storage space. Recent interest expressed includes Korean-based Hyundai in order to service the African continent. Other opportunities exist in establishing dedicated clusters of textiles and furniture manufacturers in order to attract larger distributors and retailers in this sector who are servicing both national and continental markets.

This programme is in line with national industrial policy framework and incentives programmes. Sector support is afforded to all sectors prioritised by National Government’s Industrial policy including manufacturing, services, logistics, creative industries, construction, arts, craft and cultural industries, film and media. In addition to this, the programme will focus on promoting export-led growth to support the further development of the Durban Port development programme. The approach that will be followed is that of supporting co-funding initiatives by private and public sectors such as industry clusters, joint action groups and export councils that are recognized by all spheres of government and contained within the National Industrial Policy framework.
The programme aims to protect threatened sectors; harness opportunities from labour intensive growth sectors and upgrade capital intensive sectors in line with national industrial policy framework and incentives programmes. It is also aligned to Customised Sector Programmes adopted by the DTI; the KZN Industrial Strategy and Spatial Economic Development Strategy; and local sector strategies in order to derive maximum support for local sectors.

The construction sector is targeted to afford maximum support for local contractor development and learnerships with a view to benefiting from infrastructure and property development projects in the region. The main intention of this sub-programme is to ensure that contractors which are procured to provide infrastructure and services in priority regions are partners is also rolling out key skills development initiatives as part of their own re-investment into these areas. In most projects, contractors and service providers often come to these areas with their own workforce and in other cases employ very little local labour.

**Programme 2.4: Special-purpose Vehicle to support, market and promote the local film- and digital media industry**

The Durban Film Office (DFO) is a special purpose vehicle of the eThekwini Municipality tasked to promote and facilitate activities in the film industry. The core aim of the DFO is to position Durban as a globally competitive film city. Various initiatives relating to marketing and communication, outreach programmes and collaborative projects have been planned by the office.

**Programme 2.5: Investment Facilitation and Promotion**

The programme aims to leverage maximum economic benefits from municipal entities such as uShaka, the ICC and Moses Mabhida Stadium. Some of the key focus areas within this programme is also the promotion of investment in catalytic projects and infrastructure platforms including the Port of Durban Expansion (including a proposed Dig-Out Port in the South of Durban); Durban Logistics and Freight Plan; Automotive Supplier Park; the development of the currently vacant Durban International Airport Site; bulk infrastructure partnership approaches; Incentives policies and programmes offered by the municipality, provincial and national government to prospective investors; marketing and promoting new sector opportunities; identifying and promoting new business partnerships; and foreign investor support initiatives. Another key project to be further investigated is the introduction of development facilitation support throughout the physical investment services offered by the Durban Investment Promotion agency (DIPA). Specific attention and support will be provided to developers in ensuring a smooth development application process involving commenting and feedback from line functions. One of the main goals of the programme is to provide an integrated, multifaceted brand identity for the city which can be further adopted as the future vision for the City. In addition, best practice structures and optimized delivery will be revisited to ensure productivity, value for money and efficient business participation.

Taking its lead from the international and South African prioritisation of fixed capital investment promotion and facilitation, this programme revolves around interventions to attract new foreign direct investment, whilst retaining and expanding domestic business investment. The core outcomes will be job retention, job growth, and new revenues for government to use in accelerating core infrastructure and service delivery. In addition, the programme aims to offer new empowerment opportunities, bring in newer business technologies and processes, and contribute towards growing export-led development. This then prioritises the localised implementation of the new PGDS/PGDP, specifically
Thekwini Municipality:

2012/2013 IDP

driving elements of Provincial Plan Strategic Goals 1, 4 and 5, whilst supporting Strategic Goals 6 and 7.

The 4 main investment promotion and facilitation projects that give effect to these Strategic Goals, plus the KwaZulu-Natal Investment Strategy are namely:

- Durban Investment Promotion and marketing;
- Existing local Key Investor Aftercare plans and mechanisms, including the business retention and expansion (BR&E) program;
- Foreign investor attraction and facilitation support;
- New Investment Development.

The other aim of this programme is to institutionalise a set of pro-development responses for private sector fixed investment in the region. The main focus areas include investigating the application of various-business friendly tools such as rates holidays; the declaration of special rated zones / precincts; urban development zones; urban improvement precincts; special rated building typologies such as green buildings; access to national incentives; access to indirect incentives such as sector support and business support programmes including marketing support provided through TiSA and locally accessed through Trade Point and Trade and Investment KZN, plus eThekwini’s own investment promotion team. Other initiatives involve facilitating Joint Operations Committees (JOCs) in priority business nodes; and maintaining an ongoing dialogue with local businesses.

Programme 2.6: Facilitating Nodal Development

This programme aims to fast-track the development rights for projects that meet multiple goals for economic development and social integration. These projects are based on New Urbanism principles that aim to reverse the effects of the Apartheid city, but creating all-inclusive live, work and play environments within a racially segregated municipal area. The key tenets of this programme are that of inclusive settlements and sustainable residential densities alongside mixed-use business activities and recreational uses.

Projects include Cornubia, Bridge City, Northern Urban Development Corridor (NUDC), N3 Corridor and N2 Corridor. In terms of regional development, focus will be on the Cato Ridge-Mkambathini region through to Pietermaritzburg as well as the Umwswati-KwaXimba region. Further north, areas such as Verulam and Tongaat share regional economic linkages with Ndwedwe and the KwaDukuza municipality. The Southern Municipal region has strong linkages with the Vulamehlo and Umdoni municipalities in terms of agriculture, rural communities and coastal tourism linkages. This project seeks to promote regional collaboration with neighbouring municipalities in sharing infrastructure to support growth of these underdeveloped areas. Furthermore, these regional corridors are priority corridors of the Provincial Spatial Economic Development Strategy and dedicated attention is required to unlock these economic regions. In the Outer West, the main emphasis will be on unlocking the Durban-Pietermaritzburg N3 freight and port support corridor and in the north the effort will be around unlocking airfreight opportunities. In the South, effort will be on revitalizing coastal opportunities and identifying manufacturing synergies in both municipalities.

Areas such as KwaXimba, Molweni, Zwelibomvu in the Outer West; Hambanathi, Hazelmere, Amaoti in the North; Umkomaas, Umbumbulu in the South; will require improved economic and social infrastructure, such as public amenities and facilities and ICT infrastructure. Accordingly, rural households are generally poor or lack access to socio-economic infrastructure and services, public amenities and government services. Other issues include low literacy, skills levels and migratory labour practices; decay of the social fabric (child/woman headed households, family disputes and lack of Ubuntu [human solidarity]); and, unexploited opportunities in agriculture, tourism, mining and manufacturing. Additionally, this programme aims to package a rural development master plan based on the principles of the Comprehensive Rural Development Programme of the Department of Rural
Development and Land Reform and in the pilot phase to unlock rural nodes and opportunity corridors which may hold potential

**Programme 2.7: Support the Tourism sector**

The role of Durban Tourism is to promote the city as a premium lifestyle destination locally and internationally. The key drivers that form the strategic focus of increasing tourism to the city, beyond the traditional seasonal holidaymakers that Durban has relied on in the past, are sport, events and MICE (Meetings, Incentives, Conferences/Conventions and Exhibitions). These key drivers are essential in transforming the image of the city from that of a local beach resort destination into an all-year-round, high profile, internationally-recognized and competitive destination. In so doing, we need to project the image of Durban as a lifestyle destination that meets the requirements of modern consumers, be they international or pan-African tourists, business travellers, conference attendees or holidaymakers from within the borders of Southern Africa.

Durban Tourism will use the opportunities offered by international events, conferences, meetings and incentive programmes to market the city as a diverse and varied cosmopolitan location with a melting pot of activities from which to choose. The aim is to have firstly a sustainable schedule of sporting events, general events and publicity campaigns, and a steady flow of Meetings, Conferences/conventions and Exhibitions in the city. The programme also aims to package incentives for prolonged and value added tours that further promotes the city. Another key focus of this programme is to ensure that current and future tourism investments such as facilities, infrastructure and services are maintained at international standards of consumption. Key maintenance projects includes supporting the beaches, parks, people-mover system, the ICC, Moses Mabhida, UShaka Marine and other iconic facilities provided by the city.

Many of our key cultural and historical places of significance are in historically disadvantaged areas and will need management and tourism training to nurture a new culture of tourism through the EPWP programmes such as Working for Tourism. The quest for income circulation and flows to rural areas is of paramount importance in demonstrating the potential for physical investment in these nodes. In many cases, rural areas are bypassed by tourists and tour operators as a consequence of limited tourist amenities in these nodes.

This programme aims to establish a single rural tourism development champion that will initially focus on nature, cultural, heritage and adventure tourism products in areas such as Inanda, 1000 Hills, KwaXimba, Hazelmere, Umgababa/Umnini, and other rural areas where tourism opportunities exist. As part of the programme, the focus will be on establishing, public-private and community partnerships in operationalising tourism products, services and maintaining infrastructure and facilities. These routes need to be given priority in order to create sustainable opportunities for a wider section of society and in so doing add to the tourism interest in cultural and social history. It is essential that all people in the Municipality are made aware of the importance of tourism.

**Programme 2.8: Strategic Projects for 2012 and Beyond**

The Strategic Project Unit will identify appropriate projects that would support this programme. Some of the projects identified are the Kings Park Sports Precinct and Victoria Embankment projects. Some of the major threats to investment and upgrades in the Durban inner city include: lack of parking; unsafe pedestrian environments; unsatisfactory public realm maintenance; illegal building occupancies; general blight at the Back of beach areas; uneven public investment and high crime rates amongst other issues. This programme is aimed at packaging and unlocking strategic catalytic projects that have a ripple effect on derelict quarters of the inner city and thereby stimulating interest in investment through property (block) value appreciation. The intention is locating strategically key investments to act as multipliers on surrounding land uses and sub precincts. The main goal is to
attract high impact investors into the inner city in order to stimulate further investment in different quarters of the CBD to act as regenerators of these precincts.

**Programme 2.9: SMME Development**

Small businesses are vital contributors to the health of the economy and offer a diversity of opportunity in our Society. Small businesses boost productivity, increases competition and innovation, creates employment and prosperity, and revitalizes our communities. The Business Development Support Programme creates an enabling environment to help people to earn a living and rise out of poverty and in turn over time they create jobs as well as empower other individuals and the communities in which they live. Moreover it encompasses access to finance, entrepreneurial skill development, enabling the start-up of small businesses to providing business skills development through training, mentoring, coaching. It offers operational assistance to small, black-owned enterprises, which is also a core component of the SA Government’s BBBEE strategy and globally recognised as an effective way of reducing poverty.

Through this programme a platform is created for women-owned and youth-owned enterprises to develop into sustainable businesses. There is also a platform created for sector programme such as construction, tourism development, arts and crafts and the ICT sectors. Access to markets are facilitated through the Exhibitions and Fairs as well as a Business Linkages Programme, however, there is room for more opportunities through preferential procurement policies. Research and the development of policies and strategies are critical to the growth of small businesses and further to Governments proposed strategy of partnerships; the programme develops strategic partnerships for the purposes of engaging the private sector for both their resources and expertise in the development of SMMEs.

These programmes are directed at the informal economy and smaller enterprises to provide a way for these businesses to grow and prosper, provide a way for small traders or craftsmen to legitimise their activities and move up the ladder towards becoming a large trading enterprise, provide employment for many people, and enable businesses to compete on a global level. These programmes assist in the delivery under the third strategic pillar of the PSEDS, specifically broadening participation in the economy. This programme also provides assistance in the establishment of retail business and the financing of Local Business Service Centres (LBSCs). It also provides business support to the construction and ICT sectors. It also strives to forge links with the Durban Chamber of Commerce and Industry as an attempt to establish strategic partnerships and promote access to finance for entrepreneurs. This programme seeks to provide and maintain existing infrastructure that act as a means of support for entrepreneurs. It also ensures the enforcement of the relevant municipal market by-laws and market policy.

**Programme 2.10: Managing the Informal economy**

The management of the informal economy, especially street trading is a demanding task involving demarcation of trading areas, issuing of permits, organising traders into area committees that feed into a citywide forum, and on-going collection of rentals. Coupled with this, is the necessary enforcement of regulations and by-laws in conjunction with the Metropolitan Police, as well as negotiations and dispute resolution where the interests of residents, traders and the formal economy come into conflict.

**Programme 2.11: Support and grow the Fresh Produce Industry**

The role of the Durban Fresh Produce Market is to facilitate the distribution of Fresh Produce. Commercial farmers, small and emerging farmers are dependent on the Bulk Fresh Produce Market
in order to sell their fresh produce. This platform creates business opportunities for big, small and emerging businesses, inclusive of informal traders from where they can purchase their Fresh Produce. Businesses involved in the wholesale and retail distribution of fresh produce are also dependant on the Bulk Market. In addition, businesses other than those involved in wholesale and retail distribution (e.g. Processing, Entities, etc) are also dependant on the Bulk Market. The Bulk Market contributes extensively towards both creating and sustaining jobs in the fresh produce sector.

**Programme 2.12: Develop an Integrated Freight and Logistics Strategic Framework and Plan**

The Integrated Transport Plan (ITP): 2010-2015 documents the municipality's transport policy, strategy and implementation projects. One of the goals for transport in eThekwini, amongst others, is to develop an efficient and integrated freight transport system that will ensure regional economic stability. The region's transportation system requires the optimum integration of the different modes of transport that includes road, rail, aviation, maritime and pipeline with the appropriate modal balances.

To this end and in line with legislative provisions, the eThekwini Transport Authority (ETA) is in the process of developing an Integrated Freight and Logistics Plan for the entire eThekwini Municipal area. This plan will focus on the port-city interface, industry requirements and how each of these connect with the broader economy of South Africa and the world, while still ensuring efficiency and ease of doing business within the municipal area.

The elements of the Integrated Freight and Logistics Plan will comprise: a thorough Status Quo Analysis of freight and logistics sectors in the city; a strategic framework that would guide the future development and strategy around future freight development; and an implementation plan that will incorporate interventions that will address the following:

- Infrastructure: freight routes and roads;
- Operational: operational interventions that can ease the port-city-private sector interfaces and breaks in the logistics chain;
- Regulatory: legislative and enforcement that would promote compliance in the logistics and freight sector;
- Communication and network: IT solutions, as well as stakeholder interactions that would ensure information sharing and ongoing management.

The formulation and implementation of this plan will involve a number of stakeholders and agencies in government and the private sector. It is anticipated that much of the work will also revolve around trying to secure a commitment on the implementation of the various elements of the plan from relevant agencies.

uShaka Marine World

uShaka Marine World’s vision is:

“To create awareness of conservation, through fun, knowledge and adventure”.

This R750 million flagship project was developed with the aim of regenerating the Point Precinct and has become a major tourist destination for both the national and international visitor alike. In the process it has created a number of jobs and has opened up new learning opportunities for schools through the operations of the NPC Education Centre. There has been a considerable “multiplier effect” in terms of factors such as tourism attraction and rise in property values (and related rates income for the Municipality).

The Park consists of Sea World, Wet ‘n Wild, uShaka Kids World and the Village Walk. It is majority owned by the eThekwini Municipality with shareholding of 99,9% through a company called Durban Marine Theme Park (Pty) Ltd (DMTP), with remaining 0,1% owned by the Development Bank of Southern Africa (DBSA). High Footprint Management (Pty) Ltd is a theme park management company, with international partners, contracted by Durban Marine Theme Park (Pty) Ltd to market, manage and operate the park. The South African Association for Marine Biological Research (SAAMBR) is an independent contractor operating the Sea World component of the theme park (a Section 21 Company incorporated not for profit).

The park has entered the next phase in its life cycle, whereby footfall is expected to steadily increase from around the 750 000 pa level, whilst aging infrastructure will need to be maintained. In the short term (i.e. two years), a consolidation approach will be adopted with an emphasis on utilizing scarce funds for priority maintenance projects, as well as quick revenue enhancing opportunities. The medium term will move towards the re-capitalisation phase with more significant upgrades required to ensure the longevity of the park. It must not be forgotten that the time frame for theme parks to mature runs into decades, as evidenced by some of the more successful international parks – for example Disney.

Footfall and the related revenues is the key driver for the budget, with contributions to revenue coming from the following areas:

- Ticketing revenues of 48%;
- Food and Beverage and Merchandising revenues of 27%;
- Rental revenues from Village Walk 14%;
- Functions and Events 7%;
- Sponsorship 2%;
- Parking revenues 2%.
uShaka Marine World has always set out to entertain and delight the public – both young and old, international and local. With off-peak promotions, a wide range of food and beverage offerings, functions and events, entertainment, competitions, exhibitions and shows; uShaka Marine World continues to provide a unique and fun experience to all its guests.

**ICC Durban**

Built to serve as a catalyst for economic prosperity, the ICC Durban continues to maintain a strong balance sheet. The ICC contributed significantly to the development of the Municipality in terms of economic impact, transformation and job creation.

Although the meetings industry is becoming increasingly competitive, the ICC Durban generated a total of 1,432,866 delegate and visitor days in Durban resulting in a contribution of R454m to the KZN GDP during the last year. A total of 22 international and 532 national events were hosted by the centre in 2011.

The outlook for the ICC remains extremely positive. However, with new destinations and Convention Centres being developed throughout the world, the competition in the meetings industry is expected to get stiffer going forward. Establishment of the Durban KZN Convention Bureau will enhance the ICCD’s capabilities to market the destination globally as a viable convention destination and it is envisaged along with the aggressive marketing from the ICC sales team that substantial inroads into the conferencing and exhibition markets will be made nationally and internationally.

Taking into account the ICC’s reasons for existence, the contribution expected from operations and the intent to lessen the financial burden on the Municipality, the focus over the next 5 year period will be on the following broad goals:

1. Increasing economic impact to the City, KZN and South Africa;
2. International business growth and development;
3. Maximising brand profile and appeal globally;
4. Delivering service excellence through people;
5. Continuous improvement.

By increasing market share in some of the key market segments, increasing operating revenue and lessening operating loss over the next 5 years, the ICC hopes to significantly reduce the operating subsidy from the Municipality. A stronger focus on people training, development and management will assist the company in competing effectively in an environment where the only real source of competitive advantage lies in people. Coupled with this, will be a strong need to focus on transformation of the business in terms of corporate culture, business processes and innovative customer experience delivery.

Plans/Strategies/Policies Applicable to Plan Two

eThekwini Agricultural Status Quo:
This status quo report provides an overview of potential to undertake agricultural activities within the EMA. As such it provides an assessment of the natural resources, infrastructure, agricultural activities and products, markets and support mechanism relating to agricultural sector.

Agricultural Policy for eThekwini:
This document presents a policy for future agricultural development in the rural areas of the eThekwini Municipality. The intended purpose of the policy is to promote integrated, coordinated and sustainable agricultural development in these areas.

Economic Development Strategy:
The strategy provides a framework within which to develop partnerships with business and society to drive economic initiatives, and guidance to maintain high quality core infrastructure that serve key economic nodes in the EMA. The Economic Development Strategy (EDS) seeks to improve the business environment within key economic nodes to encourage growth and further investment, provides a framework for the identification and development of catalytic projects, encourages broad based black economic empowerment (BBBEE) and promotes small, medium and micro-enterprises (SMMEs).

INK Economic Development Profile:
The aim of this report is to produce user friendly and easily readable information on the economic character of the Inanda, Ntuzuma, and KwaMashu (INK) Integrated Sustainable Urban Development node.

Markets Policy for eThekwini Municipality
The Markets policy is an essential element of the broader Informal Economy Policy which encourages and supports opportunities for informal traders on sites that are properly managed and monitored through effective on-site management of market officials. The Markets policy is aimed at providing a guideline for the support, management and monitoring of a number of traders who trade within defined spaces called markets which includes life-style markets, retails markets, flea markets, farmers markets and craft markets. This policy recommends that trading opportunities should be developed and properly planned to deliver on the Integrated Development Plan’s strategic focus area of job creation. Markets play a significant role in addressing some of the challenges of the Integrated Development Plan such as poverty, unemployment and lack of skills. Markets can be a modern and professional distribution system bringing benefits to the local community.

Allocations Policy Governing Trading Opportunities and Permits to Informal Traders on Council Owned Properties
The aim of the Allocation’s policy is to support growth, and provide opportunities for new entrants, in an economically, sustainable, and socially useful way. It can be a powerful tool for job creation, and for the inclusion of people who were excluded from economic activity in the past. It will be implemented in a way that will create linkages between experienced and inexperienced operators.

Durban’s Informal Economy Policy
The informal economy makes an important contribution to the economic and social life of Durban. In the past, there were strict rules controlling street trading and the establishment of built markets. Home based work was largely not in the domain of local government. The rapid deregulation at the beginning of the 1990s, as well as the transition in local government, led to a changed policy environment. The Municipality committed itself to promoting economic development, but has had no comprehensive, written policy to guide the management and support of workers in the informal economy.

The policy has the following purposes:
1.1 It makes local government’s approach and principles clear.
1.2 It forms the basis for appropriate and workable legislation.
1.3 It provides the basis for common action by different government departments.
1.4 It provides the basis for making decisions about allocating resources for management and support.
1.5 It provides the basis for making agreements with other stakeholders about what the roles of local government and other groups should be.
1.6 It provides the basis for monitoring and evaluating what has been achieved.

A strategy for Development of Community Tourism organizations within the eThekwini Municipal Area
The eThekwini Municipal Council has identified Community Tourism Organisations as a key instrument for promoting the development of tourism in communities as well as broadening the tourism base in the city. Tourism is labour intensive, and it provides opportunities for those who may not have the opportunity to participate in the traditional job market. It also gives opportunities for small businesses and entrepreneurs either to participate in or to provide support to the tourism sector; which in turn stimulates community beautification and heritage restoration; building community pride; and it also ensures Sustainable community facilities such as restaurants and recreational facilities.

Business Support and Markets Unit Improvement of SMME access to Finance Strategy
The aim of the SMME Strategy for the eThekwini Municipality is to “promote SMME policies and regulations which have been established at national, provincial as well as local levels, by developing strategic interventions that will create an enabling environment and provide support to SMMEs”.

Based on the findings from reviewing Business Support and Markets Unit Improvement of SMME access to Finance strategy, recommendations have been developed and are divided into Financial Support, Education and Training, Policy/ Lobbying etc.

The Improvement of SMME Access to Finance Strategy supports the SMME strategy (and ASGISA initiatives) for the advancement of SMMEs and is developed in this context of providing an environment that not only facilitates and creates an engaging platform for all key industry stakeholders to address key and specific challenges associated with accessing finance, but also to assist in identifying and providing the necessary tools and mechanisms to improve access to finance opportunities for SMMEs.

A Strategy for the Improved Management and Development of Container and Itinerant Traders within the eThekwini Municipal Area
The purpose of this policy is to achieve a well managed Container and Itinerant trade sector that is fully integrated into the economic, spatial and social development objectives of the City. The Strategy is a key element of the Informal Economy Policy which encourages and supports opportunities for informal traders on sites as well as itinerant traders, that are properly managed and monitored through effective integration from different municipal departments. The Strategy is aimed at providing a guideline for the support, management and monitoring of the informal traders, both those who trade in roofed movable structures, that are located in leased economic sites in all district areas of the Council and those who trade while they are moving. This strategy recommends that trading opportunities should be developed and properly planned as part of the IDP’s strategic focus area of for job creation.

A Consistent Rental Policy for Informal Trading in eThekwini Unicity
The rental system that was applied was fragmented thus leading to ad hoc decisions and the application of uncoordinated principles in the management and regulation of informal traders. It therefore became necessary to urgently address the implementation of a consistent rental policy and system across eThekwini. The policy deals with the structure of rentals, the setting of the levels of rental, the methods of rental collection and issues surrounding the non-payment of rentals.
Rural Economic Development Strategy
The Rural Economic Development Strategy (REDS) aims to ensure that rural development within the Municipality is aligned to the overall package of development plans. The objective is to provide a set of approaches, projects, and interventions aimed at encouraging the development of the rural economy and improving the quality of life and the economic prospects of the communities in the rural areas.
Plan Three: Creating a Quality Living Environment

Goal
Promote access to equitable, appropriate and sustainable levels of household infrastructure and community services, and facilitate access to housing.

Desired Outcome
Appropriately serviced, well maintained, quality living environments.

Why this plan?
Providing a quality living environment for citizens is a core mandate of the Municipality. Though substantial progress in the delivery of housing and basic services has been made, there is still some way to go. The levels of satisfaction of residents relating to infrastructure provision are a key outcome for this plan and this will be gauged via the annual municipal Quality of Life Survey. National key performance indicators for municipalities show that the priorities are housing provision and basic service delivery. Therefore addressing these backlogs remains a municipal priority. At the same time, increasing emphasis must be given to social service provision in line with the vision of creating and sustaining integrated human settlements. Within communities that already exhibit basic service delivery and housing, social service provision is a priority since these services affect community health, safety, education, recreation and are integral to building healthy, well-rounded members of society.

The maintenance of infrastructure assets ensures that existing services continue to be delivered and forms the platform for expanding services. A programmed response to maintaining municipal infrastructure will serve to reduce costs in the longer term by avoiding the high costs of premature asset replacement due to inadequate proactive maintenance of the asset. Infrastructure that is in good condition serves municipal residents directly and indirectly. The infrastructure may for example serve you directly in the form of clean water from a tap or a black top road past your house and it may serve you indirectly through its contribution to a prospering economy (since investment and growth in the local economy is dependent on reliable infrastructure services). Hence, keeping the existing infrastructure networks in good working order is as important as growing the network to deliver new services.

Infrastructure demand management is a philosophy that underpins all work in this Plan. From a spatial or geographic perspective, development that is to be encouraged is located close to existing infrastructure networks that requires minimal incremental growth of the network. From a housing development perspective, spatial restructuring is emphasised so as to, wherever possible, bring housing closer to existing services and places of employment. Reducing the need to build new infrastructure networks will be achieved through the application of philosophies such as emphasising public over private transport improvements2 and by prioritising development in key nodes and along public transport corridors through the provision of infrastructure in these areas.

---

2 Public transport improvements include buying bus fleets and installing dedicated public transport lanes rather than building extra lanes to serve private low occupancy motor vehicles.
Strategic Focus Area: Meet Infrastructure & Household Service Needs and Backlogs

Programme 3.1: New Integrated Housing Development and interim servicing of informal settlements

The goal is to build 7,200 new serviced low income houses next year and totalling approximately 32,000 by 2016/17. These houses are subsidised by the KwaZulu Natal Department of Human Settlements (DHS) for low income earners who are first time home owners and meet the criteria as set down by the DHS. The Municipality provides additional funding for the delivery of associated engineering services. The Municipality currently acts as an agent of the provincial Department of Housing and full accreditation of the Municipality as a deliverer of housing is essential to enhance its ability to deliver this housing.

The upgrading and development of informal settlements is a priority within this programme. Informal settlements are, in most instances, being upgraded in-situ to avoid the social dislocation which occurs when these settlements are uprooted and relocated in more distant locales.

The priority is to upgrade informal settlements where they are currently located, and to achieve this, higher density housing options will be implemented\(^3\) to minimise disruption to communities and to improve overall urban efficiencies. Those informal settlements that are unlikely to be upgraded in the short term are provided with a package of interim services including ablution blocks that provide water and sanitation services, drainage, essential access infrastructure, refuse removal services and interventions for fire prevention.

Certain settlements, however, find themselves in hazardous areas such as flood plains and in areas of unstable geology, and in these instances relocations are necessary. This is dependant on land acquisition which has to go through a statutory process which may result in time delays.

The housing programme makes provision for associated services such as water, electricity, road access, storm water control, sanitation, social facility access and road naming to be delivered in an integrated manner. All housing projects are scrutinized at the packaging stage to assess and plan for the community infrastructure that is required.

With a view to improving the housing which is constructed under this subsidy system, Council is implementing new and innovative ways of providing housing that is better suited to the needs of inhabitants. Innovative new housing forms and urban design solutions are being implemented with the objectives of promoting densification and providing alternatives to the current rows of single dwellings on single plots. In addition, partnerships are being investigated to include private partners in delivering housing for those who can afford a modest housing loan.

In terms of the eThekwini Comprehensive Infrastructure Plan, the following reflects the public housing backlog status quo:

- The cost of addressing the backlog (currently estimated to be approximately 412,000) in housing is in the order of R55 billion;
- At current funding levels, this backlog will still not be eradicated by the year 2050;

For the 2011/12 financial year an amount of approximately R1.1 billion has been allocated for the provision of housing. This amount coupled with budget allocations for subsequent years will assist in decreasing the current backlog (A housing project composite list can be found in the electronic copy of the IDP since it is too long a list to be reproduced here).

\(^3\) Infrastructure provision occupies space, which by implication means less space for housing. If densities do not increase to offset this loss of space, then there is a need to re-locate some families to other housing projects.
Approximately a third of the Municipality’s total population of approximately 3.5 million reside in informal settlements. Whilst the Municipality can pride itself on a successful and large scale mass housing delivery programme, not all settlements can be provided with full services and low income housing in the short term due to funding and other constraints. Informal settlements face a range of basic challenges such as access to adequate sanitation, clean and safe energy, and roads. Recurrent shack fires are also an important risk. As a result, a pro-active and broad based programme aimed at providing a range of basic interim services to a number of prioritized informal settlements within the Municipality has been developed with a view to addressing these basic health and safety issues. The prioritized informal settlements are those which are in the Municipality’s Housing Plan, but which cannot be provided with full services and low income housing in the short term. Those settlements which are destined for relocation are not included.

The interim services programme will provide a mix of the basic interim services which include:

- Standpipes;
- Communal ablution blocks;
- A basic road network and footpaths with associated storm water controls;
- Electricity connections.

The intention is to deliver rapidly to as many settlements as possible instead of providing a high level of service to only a small number of selected settlements. It is hoped that the programme can be rolled out fairly rapidly over a period of approximately five years, but this is subject to the availability of sufficient funding.

The Interim Services programme also looks at broader planning issues with the intention of ensuring key social facilities such as fire and police stations, clinics, schools, sport fields and community halls are more effectively provided. In addition, a sustainable livelihoods programme has been developed where a process of participative livelihoods engagement is being planned. The sustainable livelihoods approach strives to build stronger community responsibility and ‘self-help’ as well as to facilitate a better relationship between the urban poor and the Municipality.

Council has thus far approved 8 pilot projects affecting approximately 8900 households. Three projects have been completed with the remainder currently underway. The intention is to target at least 10 000 households per annum over the next 5 years.

**Programme 3.2: Rental and GAP Housing Strategy**

There is a need for the Municipality to provide some rental accommodation to cater for low income residents who cannot afford market-related rentals.

However, the Municipality has certain rental stock which, simply stated, is too great a liability to the Municipality. In order to reduce the financial burden of administering this housing, much of it is being transferred to current occupants utilising the Enhanced Extended Discount Benefit Scheme. A further objective of this transfer of stock is to create security of tenure for long standing tenants. Prior to transfer, the units are upgraded and provided with individual water and electricity meters where necessary.

A number of hostels are undergoing substantial maintenance and rehabilitation work with a view to making them more suited to the needs of occupants. The hostels, historically, catered for single male labourers and currently need to serve the needs of families, therefore conversion to family units is taking place. With these upgrades comes the need for the introduction of market related rentals. In this regard, rentals are to be reviewed annually at all hostels.

Social Housing refers to a rental or cooperative housing option for low to moderate income persons at a scale and built-form that requires institutional management. This is provided by social housing institutions in partnership with the Municipality. Priority is given to projects in designated restructuring
zones and strategically located mixed-use areas. Medium density and social housing which are undertaken by private Social Housing Institutions (SHIs) and developers are effective in accomplishing the Municipality’s housing objectives of spatial restructuring and economic generation and will contribute to economic empowerment, non-racialism and physical and social integration.

**Programme 3.3: Address Infrastructure Backlogs**

The Municipality has as part of its Infrastructure Planning documented the nature and extent of the urban and rural backlogs in service delivery across the entire metropolitan area, using digital records held by the Municipality together with input from communities and councillors. Services that are being targeted include water, electricity, solid waste, sanitation, storm water, roads and sidewalks, pedestrian bridges, public transport infrastructure, all community facilities and the provision of street addresses to all houses within eThekwini. In order to address these backlogs, specific strategies will be developed for urban and rural areas. Emphasis is given to the eradication of rural basic service backlogs especially water and sanitation. In urban areas the primary intervention is the eradication of informal settlements through the provision of housing and a package of household services (the housing backlogs are recorded in Programme 1 above) as well as the provision of interim services to improve living conditions in these settlements.

Table 7: Statistics relating to Rural Service Delivery
Source: eThekwini Municipality, Procurement and Infrastructure Cluster

An integrated Infrastructure Plan aimed at eradicating these backlogs is currently being compiled. To cater for the indigent, the Municipality as part of its welfare package provides a basket of free basic services which include water, sanitation, electricity and refuse removal for informal and rural settlements in accordance with a defined level of service. In addition, those consumers living in formal properties having a maximum property value of R120000 are considered to fall in the indigent category and therefore also benefit from free service delivery. The statistics recorded in the municipal scorecard reflect the above. The legislated requirement to report on the % of households earning less than R1100 pm with access to free basic services is not feasible as the Municipality does not have an indigent register and it is considered that the creation of such a register is neither practical nor cost effective for a Municipality with a large population such as eThekwini.

In respect of the provision of water, sanitation and electricity to schools and clinics, the role of the Municipality is to ensure that either bulk infrastructure is available to allow connections, or that acceptable levels of service are defined to enable appropriate action to be taken by the provincial Education and Health authorities. Those properties that are at risk of being flooded due to inadequate storm water infrastructure servicing, are being addressed according to their level of risk.

The last 36 months have brought increasing uncertainties around municipal finances. The worldwide economic recession has led to massive job losses in South Africa and associated with this is a declining ‘ability to pay’ for municipal services. The electricity price hikes are another area of concern. Further, eThekwini has over the last few years dramatically increased its capital budget spend in an effort to achieve national service delivery targets. To fund this expenditure the Municipality has had to borrow substantial sums of money and therefore there has been a substantially increased burden of debt which needs to be serviced annually. As a result of the above, there is a need to determine the
overall sustainability of eThekwini finances. With a view to gaining this understanding a Municipal Services Financial Model (MSFM) has been completed for our Municipality. The MSFM provides insights into the 3 key questions as set out below:

1. How will eThekwini achieve its social objectives relating to housing and water, sanitation, electricity and road provision as well as the roll out of public or community facilities?
2. How will eThekwini achieve its asset management objectives or put slightly differently, how do we ensure that sewer and water pipes and related infrastructure continue to function to serve the health of our metropolitan area and its residents? Roads, electricity and solid waste infrastructure naturally also form part of this investigation.
3. How will eThekwini achieve its economic objectives of ensuring sufficient employment and wealth creation in the region? This is a critical area since it feeds directly the income to the Municipality from rates. If the income accruing to the Municipality is increasing then this allows for greater expenditure on social and asset management objectives.

The model has the ability to forecast capital infrastructure investment taking into consideration the current operational expenditure together with the impact of future infrastructure investment. The model has provided valuable insights into the overall functioning of the Municipality and has identified areas of weakness. Maintaining financial viability is obviously critical to the achievement of all other objectives and hence the results of the MSFM are now being used to align our capital and operating budget spend in order to achieve this long term financial sustainability.

**Programme 3.4: Infrastructure Asset Management**

The goal of Infrastructure Asset Management is to meet a required level of service, in the most cost effective manner, through the management of assets for present and future generations. National Government has legislated the need for local government to formulate Asset Management Programmes in all sectors. An Integrated Infrastructure Asset Management Plan is being established that will, in the first instance, involve the management of the following strategic assets: Electricity, Water and Sanitation, Roads, Transport, Parks and Leisure, Storm Water, Solid Waste and Property and Buildings. What an Infrastructure Asset Management Plan does is to analyse technically the life cycle of an asset and predict when maintenance needs to be done to the asset before it deteriorates to such an extent that it no longer meets the communities’ needs or when the asset needs to be replaced. An innovative approach has, where appropriate, been taken by developing community-based maintenance teams (as part of the Expanded Public Works Programme); in order to allow infrastructure maintenance to be done in a way that supports poverty eradication and socio-economic upliftment of poorer communities.

The high value and long life of municipal infrastructure, and the fact that it is central to service delivery, points to a need for this particular group of assets to receive specific and focused management attention. The total replacement value of the infrastructure assets owned by the Municipality is more than R 180 billion (illustrated below).

Historically, in many areas of eThekwini, there has been inadequate investment in infrastructure assets and we must now confront the accumulated backlogs and deal with them methodically.

The Municipality is on a drive to introduce good asset management practices in all municipal departments. For example, ensuring that there is a greater emphasis on proactive rather than reactive maintenance of infrastructure thus ensures that we are not over-committing funds to building new infrastructure which leads to insufficient funding for the maintenance, renewal, rehabilitation/reinforcement and replacement of existing assets. Managing the demand for new infrastructure is also being promoted. One example of this is the effort being put into reducing the loss of municipal water (and thereby reducing the need for new water infrastructure to be built) through replacing water pipes and repairing leaks, reducing water theft and managing water pressures in the pipe network. Consideration is also being given to, where possible, reducing the dependence on river
water as the only potable supply through research into sea water desalination. These initiatives are referred to as ‘alternative supply’ projects. Another example of this type of project is the generation of electricity from methane gas at municipal landfill sites.

Table 9: Asset Replacement Value
Source: eThekwini Municipality, Procurement and Infrastructure Cluster

The Blue drop programme provides a holistic approach to drinking water quality management and a systematic, transparent approach to the consistent provision of safe water with a clear focus on public health. The emphasis of the Water Safety Planning Process is on water supply management and covers the entire water supply system i.e. from the source to the user. eThekwini Metro and Umgeni Water worked well to maintain the illustrious Blue Drop status for the eThekwini main system. The Municipal Blue Drop Score for 2012 is 98.77% (an increase from 95.71% in 2011). However, measures need to be put in place to ensure accurate data records and to drastically improve the performance of the Ogunjini water treatment plant.
The Green Drop Regulation Programme aims to certify the wastewater systems of all municipalities and water service providers in South Africa. The green drop rewards excellence in the management of wastewater during its journey from source, conveyance in sewer networks, its treatment at wastewater works and its final discharge to the receiving environment. The Municipality was awarded a 90.6% Municipal Green Drop Score in 2011 which made it the best performing municipality in Kwa-Zulu Natal. In addition, there was a 70.3% improvement on its 2009 Green Drop status, 100% of plants in the municipality are in low and medium risk positions and 9 wastewater systems received the green drop certifications. However, the municipality was advised to close the gaps that still prevail with regard to compliance to effluent quality discharge limits, to finalise water use licence applications and to advance current practices in terms of asset management and risk-based prioritisation.

**Strategic Focus Area: Address Community Service Backlogs**

Improved quality of life for eThekwini citizens means that they are able to enjoy equitable opportunities to participate in culture, leisure and education, such as are available through community facilities. Ensuring full service provision of community facilities needs to be closely guided by service standards, and requires the necessary operating funds to sustain these facilities on a day to day basis. The provision of community facilities and services is guided by the established municipal standards based on a combination of national and local norms and the ability to sustain these standards given municipal budget constraints.

Innovative service delivery models which meet community needs more effectively and address community service backlogs, while minimising the impact on capital and operating budgets, will be facilitated through the development of partnerships with other spheres of government and with private and community-based organisations involved in the provision of social services.

**Programme 3.5: Integrated Human Settlement Plan (Sustainable Community Facilities)**

An innovative model, termed the Social Facilities Accessibility Model, has been developed to match the demand for facilities, based on population numbers and income and age profiles, with the supply and capacity of facilities geographically. This assessment shows the nature and extent of facility backlogs across the Municipality and all requests for the construction of new facilities are currently being assessed within this context. This will help ensure that we do not generate any unnecessary and wasteful over-supply of social services in any area. Areas that currently exhibit an over-supply will be assessed with a view to bringing such areas in line with the level of service set for the entire municipal area. Those areas that suffer from a shortage of facilities have been identified and will be dealt with as and when budget allows. The clustering of facilities in accessible development nodes will be promoted to allow for shared services, such as parking and security, and to benefit residents who can make a single trip to access a range of services. Clustering a range of facilities will mean that more people will visit the social service node which in turn can promote small business opportunities. A policy on the multi-use of facilities has been drafted. This means that facilities will be designed to have multiple uses in order to improve levels of usage throughout the day. Managing the myriad of facilities is expensive, therefore where appropriate, new innovative methods of sustainable management in partnership with local communities are being investigated.

The current estimated backlogs for social facilities can be found in the table below which shows the current service coverage and how this service will improve through building new facilities in ‘optimal’ locations. The total capital budget required to build these proposed new facilities is between R4.9 and R5.2 billion.

Programme 3.6: Implement an effective public transport plan for the Municipality

The Integrated Transport Plan (ITP): 2010-2015 documents the municipality's transport policy, strategy and implementation projects. One of the goals for transport in eThekwini, amongst others, is to implement an effective, efficient, sustainable and safe public transport system.

In order to achieve the objectives, as indicated below, it is essential that public transport would enjoy priority over private transport. In other words, in order to realize the objective of creating a sustainable public transport system, it will be necessary in a number of areas to prioritize public transport upgrades and budget at the expense of car users. Similarly, in order to achieve a sustainable programme Non-Motorized Transport (NMT) needs to play a pivotal role in the system development as a whole. It is in this context of developing a truly sustainable solution that pedestrians and NMT together with public transport needs to be given priority over private transport in the very scarce and restrictive corridor and routes.

To this end and in line with legislative provisions, the eThekwini Transport Authority (ETA) has developed an Integrated Rapid Public Transport Network (IRPTN) plan for the entire eThekwini Municipal area. The IRPTN “wall to wall” plan defines the ultimate (2025) public transport network for the municipality to ensure that the incremental implementation of the IRPTN achieves the following established objectives:

• **Equity of Access to Opportunity:**
  All inhabitants of the municipality regardless of income levels, disabilities, etc. should have and enjoy quality access to various opportunities (live, work, play) within eThekwini;

• **Reduce the overall impact of transport on the environment:**
  The IRPTN should aim to have a net reduction in carbon emissions related to motorised travel;

• **Promotion of a liveable city:**
  Apart from providing a transport solution that aims to offer all travellers an escape from congested roadways, the infrastructure of the IRPTN as well as the precincts the network servers are to be designed in a manner that accommodates non motorised transport modes and achieves urbanity;

• **Spatial Structure:**
  The IRPTN is intended to be a major structuring element of the eThekwini Municipality. Integrated landuse-transportation planning ensures that the IRPTN would help rectify the imbalances created by historic apartheid type planning practices;

• **Quality of Service that is Acceptable to Car Users:**
  Apart from catering for the needs of captive public transport users, the IRPTN should be of a quality that private vehicle users would find acceptable;

• **Have a Positive Impact on the City's Economy**
  Apart from being operationally efficient to ensure sensible operational expenditure, the various secondary economic opportunities created by the system should contribute to the city's economy.

**Systems Concept:** The integrated network comprises a system of trunk, feeder and complementary routes that have been designed to respond to the resultant demand of the existing and forecasted activity patterns in accordance with the Municipality's Spatial Development Plan. This network will be complemented by connecting bus/minibus services and local services to key nodes on the trunk alignments.

This system will include, in terms of a defined programme, various forms of priority infrastructure for bus trunk services including: transfer stations; park and ride facilities; information, communication technologies; fleet; non-motorised transport facilities; and depots and control centres.

The ultimate IRPTN plan for the municipality comprises some 250km of trunk public transport corridors of which some 60km are rail based. The full IRPTN network will be within 800m (10-15min walk) of more than 85 percent of the Municipality's population.
The trunk corridors are described below and are shown in Figure 29 below:

- **Corridor C1: Bridge City to CBD via KwaMashu:**

  C1 provides capacity between two major centres of employment and other activity. This high frequency BRT service provides connections into the CBD to widen access to employment. C1 forms part of the Phase 1 network in view of its strategic importance.

- **Corridor C2: Bridge City and KwaMashu via Berea Road to Umlazi and Isipingo**

  The main rail route will be upgraded to enable a more intensive, reliable and higher capacity service to be operated. Infrastructure improvements will allow headways of up to three minutes to be operated with new trains being capable of carrying 2,000 people. A number of stations are in place, many of these stations will also be served by other IRPTN services, enabling interchange and a wide range of journey opportunities. Rail services continue further south to Isipingo and beyond.

  The branch serving Zwelethu, KwaMnyandu, Lindokuhle and Umlazi is well used and would form part of C2. In contrast, the branch to Havenside, Bayview, Westcliff, Chatsglen and Crossmoor is lightly used, it is planned to provide new services in C5 to address demand in this corridor. To the north of C2, the line continues to Phoenix, Mount Edgecombe, Tongaat and beyond but is relatively lightly used. The loop serving Avoca, Red Hill, Greenwood Park and Briardene is a single track line which supplements the main line from KwaMashu.

- **Corridor C3: Bridge City to Pinetown**

  C3 provides new connections between two major centres in a corridor that is not easily traversed at present. Interchange opportunities will be important both in the Pinetown area (with C6 and C7 or east-west movements) and at Bridge City (C1, C2, C4 and C9). C3 forms part of the Phase 1 network.

- **Corridor C4: Bridge City to Mobeni and Rossburgh**

  C4 offers new services from Bridge City via the N2 avoiding the need to transfer at Warwick Interchange with the route splitting to serve both Rossburgh and Mobeni.

- **Corridor C5: Chatsworth to CBD**

  C5 provides direct services from the CBD and Warwick to Chatsworth town centre. This will be a high frequency BRT service although there is an option to provide light rail services using former heavy rail alignments and platforms and on-street sections to access Chatsworth town centre. This would serve the area more effectively than the current heavy rail alignment.

- **Corridor C6: Hammarsdale and Pinetown to Warwick**

  C6 provides east-west services linking Pinetown to Warwick Interchange with possible variants to serve more than one route within the corridor. Some services will be extended to Hammarsdale in the west as an improved means of accessing Mpumalanga and the rural area with appropriate feeder services.

- **Corridor C7: Hillcrest to Chatsworth**

  C7 was originally conceived as part of C5 but separating this part of the network reduces the operating distance and links Hillcrest with Pinetown (connecting with C6 to Warwick) and Chatsworth town centre as.

- **Corridor C8: Tongaat and Airport to Umhlanga and Warwick**

  Rail services are available to Tongaat but an alternative route would be provided by C8. This would divert to serve the airport and Umhlanga town centre and provide direct access into Durban. This
corridor is expected to experience considerable growth as development takes place and also presents a strong public transport presence for airport users and workers.

- **Corridor C9: Bridge City to Umhlanga**

C9 links the growth areas of Umhlanga and Bridge City. C9 forms part of the Phase 1 network in that it links key employment and expanding development areas.

*Table 11: IRPTN Trunk Route Phasing*  
*Source: eThekwini Municipality, Procurement and Infrastructure Cluster*

**Phase 0:** This phase entails the restructuring of Durban Transport Service. This important phase of the IRPTN is intended to create the foundations for the implementation of subsequent IRPTN phases by:

- Movement from Net to Gross Cost Contracts
- Introduction of Electronic Fare Collection Systems
Incorporation of the minibus taxi industry

Support activities included:
   - The bus replacement program
   - Depot upgrades
   - Enhancement of structure and capacity for project delivery.

---

Phase 1: Of the 190km of road based trunk corridors, 60km are planned for the Phase 1 implementation of the network by the first quarter of the 2015 financial year. Phase 1 will comprise of 3 Bus Rapid Transit (BRT) routes and 1 rail corridor. The 3 BRT routes are: C1 Bridge City to Warwick, C3 Bridge City to Pinetown, C9 Bridge City to Umhlanga Corridor and the rail corridor: C2: Bridge City and KwaMashu via Berea Road to Umlazi and Isipingo.

The Phase 1 network will accommodate approximately 25% of the city’s total trunk public transport demand on road based IRPTN services with a further 40% being accommodated by the trunk rail network as part of Passenger Rail Association of South Africa (PRASA) implementation plans. This approach ensures recognisable benefit to the maximum number of users in the shortest period of time for the given level of investment required.

The following steps will take the public transport initiatives on a sustainable trajectory:-
   - Firstly, building on restructuring proposals to date, by developing a programme for the phased implementation of an Integrated Rapid Transit Network (IRTN) with public transport service and support system plans across the whole of the eThekwini Municipality;
   - Secondly, to develop a comprehensive business plan and corporate structure plan with documentation for pro forma public transport service contracts and related support systems, service contracts;
• Thirdly, to take the corridors adopted as part of the first phase of the implementation programme and develop the proposals in adequate detail to provide firm cost estimates for infrastructure and support systems;
• Funding for both the infrastructure and operating the system has been motivated for via National, Provincial and Municipal budgeting provisions. The Public Transport Infrastructure System Grant (PTIS) will no doubt be the key source of the majority of the funding;
• Preliminary work suggests that Phase 1 IRPTN projects can be operational by 2015 if the requisite funding is secured.

Land use strategies that support the development and performance of an effective and sustainable transport system are focused around the major IRPTN corridors and include the following:
• Protecting existing employment opportunities within these corridor areas;
• Maintaining the quality of high value investment, office, retail, residential and tourist areas within the corridors;
• Discouraging the development of major employment opportunities outside the corridor areas— at least in the short term until the corridor investment has gained momentum;
• Stimulating higher employment and residential densities within these corridors in particular, as well as the promotion of residential densification within the core urban area in general;
• Renewing areas around major stations and modal interchanges as high density residential, office and retail uses.

Programme 3.7: Expanded Public Works Programme (EPWP)

The EPWP is a National Government strategy aimed at eradicating poverty, while creating jobs and providing opportunities to the previously disadvantaged communities through the provision of temporary employment opportunities, labour training, learnerships and skills programmes, etc. The philosophy of the EPWP, with its focus on labour intensive methods will be adopted wherever possible and practical in the areas of housing and basic service delivery in order to provide a direct municipal response to the high unemployment rate in eThekwini.

At a community level, the intention is to use the infrastructure provision platform to stimulate socio-economic activities within communities, not only in terms of job opportunities, but also with the packaging of ‘appropriate’ training such as life skills, technical skills and area based livelihood skills for the communities that work on these projects. In addition, in response to growing construction industry demands, a multi-tier contractor development programme provides training and mentorship in labour based construction technologies. The focus is on the number of sustainable employment opportunities, training, contractor and cooperative development.

According to the Division of Revenue Act the EPWP target for the 2011/12 financial year is 1,937,750 person work days, which equates to 8,425 full-time equivalent jobs (FTEs) where each FTE is equal to 230 days of work. The programme aims to significantly accelerate the creation of further job opportunities during future financial years.

Plans/Strategies/Policies Applicable to Plan Three

EPWP Policy Framework:
The aim of this policy is to institute a sustainable Expanded Public Works Programme (EPWP) within the eThekwini Municipality as provided in the EPWP national framework. Its aim is to establish the EPWP as a socio-economic development and poverty alleviation program, expand the current service delivery model of goods and services to ensure shared economic growth and ensure developmental integration across all sectors.

Housing Sector Plan:
It provides guidelines as to the type of housing interventions required, the number of sites required for each intervention, the timeframes for delivering the targets and the funding to be borne by the KZN Department of Human Settlements and the EM.

Transport Plan:
This plan serves to outline the strategy in which the Municipality intends to provide and manage a world-class transport system with a public transport focus, providing high levels of mobility and accessibility for the movement of people and goods in a safe, sustainable and affordable manner. The strategy focuses on reducing overall demand for road space whilst maximizing the effective utilization and efficient operation of road infrastructure for purposes of private and public transport use. It also places an emphasis on strategies which will support and encourage use of public transport.

Waste Management Plan:
The main goal of the Integrated Waste Management Plan (IWM) is to optimize waste management in the region by maximizing efficiency and minimizing financial costs and environmental impacts. It also aims to achieve integration of the solid waste management function relating to the operational, financial, legal and institutional dimensions of the business. In addition, it outlines the process of pollution control, environmental protection and job creation.

Water Services Development Plan:
A Water Services Development Plan is a plan to progressively ensure efficient, affordable, economical, and sustainable provision of water services (i.e. Water and Sanitation services). It deals with socio economic, technical, financial, institutional and environmental issues as they pertain to water services.

Policies and Practices of the eThekwini Municipality Water and Sanitation Unit
The purpose of the policy is to ensure that the level of supply of potable water and the provision of sanitation provides a joint solution for the "domestic water cycle". The policy makes provision for:

- A solution which is affordable to the consumer and service provider
- A solution which is sustainable i.e.
  - has a limited cross subsidy
  - is capable of being maintained
  - is acceptable to the community
  - provides parity with other customers
- A solution which is environmentally satisfactory
  - prevents pollution
  - results in a healthy residential area
  - is compliant with National and Provincial legislation
- A solution which can be undertaken within the capacity of the Municipality
Guidelines and Policy for the Design of Stormwater Drainage and Stormwater Management System

These guidelines and policies are applicable to the design of minor stormwater reticulation and collection systems and for the management and control of stormwater runoff from sites by means of soakpits and attenuation tanks and runoff discharge controls. These guidelines include recommendations for the sizing and design of stormwater soakpits, attenuation structures/ponds, outlet discharge controls/overflows, kerb inlets, manholes, road edge channels, watercourses, underground pipelines and small channels. These must be designed to effectively collect, control and convey run-off from storms to larger or major drainage systems.
Plan Four: Fostering a Socially Equitable Environment

Goal
To promote and create a safe, healthy and secure environment.

Desired Outcome
All citizens living in a safe, healthy and secure environment.

Why this plan?
The safety, health and security of citizens are critical to quality of life. The Constitution asserts the rights of all citizens to be safe, healthy and secure. Government, at all levels, is required to fulfil these rights. The Municipality has committed itself to creating a caring city, with all citizens, businesses and visitors feeling safe and confident that their health and security needs are being met. The Municipality is also committed to job creation that eradicates crime and enables citizens to improve health and well-being.

Partnerships, with citizens, non-governmental organisations and other stakeholders will be critical to achieving our goal. Partnerships with other spheres of government are particularly important where service provision is constitutionally allocated to other spheres.

This Plan highlights the key challenges faced in creating a safe, healthy and secure environment, and our intentions for progressively achieving this goal. The Plan is presented in two strategic areas:

- Promoting the safety of citizens; and
- Promoting the health of citizens.

Addressing the challenges requires a multi-faceted approach, and on-going research and review into the challenges and solutions.

While crime is of primary concern, there are other important aspects of securing the safety of citizens. These include the need for citizens:

- To be safe from crime;
- To feel safe while travelling, as drivers, pedestrians, and passengers;
- To feel safe inside and outside buildings through environmental design;
- To be safe from fires and emergencies;
- To be safe from the effects of natural and un-natural disasters;
- To be assured of the security of Council assets;
- To be safe from land invasion.

The Municipality has developed programmes to address the causes and effects of these threats to a safe environment for citizens.
Strategic Focus Area: Promoting the Safety of Citizens

Local Government has a role to play in ensuring an environment less conducive to crime and, provided the required resources and capacity are available, is well placed to design and implement programmes targeting specific crime problems and groups at risk.

Programme 4.1: Safe from crime

eThekwini Municipality’s strategies for addressing crime include both reactive strategies to respond to incidents of crime, and proactive strategies, aimed at stopping crime before it happens. The response follows an integrated, multifaceted approach that works closely with communities, National and Provincial Government, other stakeholders and service providers in all areas of crime prevention and response.

Our strategies cover three broad areas: effective policing, social crime prevention and environmental design to create safer environments.

Effective policing:

"Sections of the citizenry are undoubtedly unwilling to wait for the uncertain benefits of police transition, and have made their own arrangements to protect themselves and their possessions. The result is a substantial growth in private security establishments, demands for the establishment of local authority policing agencies and possible forms of self-policing, all of which could have an important impact on how South Africa is policed in future." (Mark Shaw, Towards Safer Cities/Political Transition and Changing Forms of Policing Control in South Africa)

Effective policing addresses both preventative (proactive) and reactive policing strategies. Proactive crime prevention measures include saturated enforcement by Metro Police in support of the South African Police Services in areas experiencing high crime levels. High profile policing includes areas where high incidents of smash and grab crimes have been reported and, within the Durban CBD, incidents of bag snatching. Tourist related crime areas, especially the beachfront, back of beachfront areas and conference facilities are mapped and policed. Other proactive crime prevention measures include mapping and policing places that sell liquor, and addressing related criminal activity. Buildings that are underused and dilapidated and shelter criminal activities are also to be targeted.

Beat and rapid response officers work together in conjunction with the CCTV cameras in solving problems of crime and disorder. Partnerships built with other stakeholders assist with extra manpower.

Reactive crime prevention is undertaken by Metro Police reactive units working alongside the SAPS. Analysed crime data is used to ensure effective deployment of Metro Police to high crime areas and improved response times to reported crimes. In addition, effective prosecution is required by the Justice System and Municipal Courts.

Key to the implementation of effective policing is a close co-operative relationship between Metro Police, SAPS, other Stakeholders and communities. Ward Safety Committees have been established and they are active in promoting the effective involvement of communities in policing of communities. Effective Policing entails working very closely with SAPS and Metro Police as well as local community safety structures, contributing to an improved policing service, by co-ordinating joint activities like: joint operations, crime meetings, and crime awareness campaigns. E.g. of joint operations facilitated by the Safer Cities and ITRUMP Unit include: street beggars project, illegal scrap metal dealers, illegal second hand good dealers, and the safety signage project.
Social crime prevention:

The Municipality supports development of cohesive, well linked communities where social pressures work to limit the acceptability of criminal activity, protect vulnerable groups from crime and increase co-operation with policing. Ward safety committees are being set up by the Municipality’s Safer Cities and ITRUMP Unit’s initiative to drive social crime prevention strategies. These committees provide a forum for community education on crime prevention and partnerships with police. The aim is to improve on and expand community education regarding community safety. Ward Safety Committees have been established and will be sustained by participating in community safety initiatives and share in the responsibility to develop practical solutions to problems raised.

An important aspect of this work is the School to Work Project that aims to reduce unemployment in the category of youth at risk.

Another project is being piloted in the South Durban Basin through the Area Based Management Initiative is the Justice and Restoration Project (JARP). This initiative aims to empower young people at school, with skills to deal with conflict in a constructive manner so as to prevent violence and associated crimes and thereby moving towards a more tolerant and restorative society. The objectives include:

- To inculcate a culture of RJ principles amongst young people;
- Create a better understanding amongst youth around conflict situations, encouraging; accountability and reparation, whilst at the same time reducing feelings of victimization;
- To encourage socially responsible behaviour, with better conflict management skills;
- To impact on reducing violence and bullying; expulsions and suspensions; school drop-out rates; criminal activities within the school;
- To reduce violence at community level.

Ward Safety Profiling is another method adopted by the Safer Cities and ITRUMP Unit to assess safety issues within a community. It is used by people who want to take positive action to make public spaces safer. These ward profiles leads to an improvement in the physical environment in ways that will reduce the opportunities for crime, making public places like neighbourhoods, parks and streets a Safer City for all citizens.

A Ward Safety Profile is a tool that people can use to evaluate different features in their community with the aim of reducing crime and improving everyone’s personal safety.

It is therefore a method of identifying and addressing the daily crime threats experienced by communities.

Community members, interested parties and key officials will identify the crime related problems they encounter. These problems will be addressed once brought to the attention of government departments and making recommendations to various line departments. A ward safety profile provides an inventory or checklist of the features in a community which affects ones safety. It allows members to take action to correct these features.

The ward safety profile also allows Local Government to engage the communities in a process that will improve their involvement in safety issues. Aims of a ward safety profile include:

- Increases community awareness on safety issues;
- Provides community members a platform to voice concerns regarding safety in their area;
- Addresses the needs of a specific community;
- Communities become involved in making recommendations in improving their respective communities;
- Promotes territorial reinforcement: when communities take ownership of public spaces, they ensure that it does not become a target for criminals;
- Promotes surveillance and visibility by encouraging communities to be more alert to their surroundings;
• Identifies possible crime sites in public spaces;
• Addresses crime-related safety concerns by making recommendations to appropriate authorities and owners of space intended at reducing opportunities for crime;
• Help the communities to monitor the implementation of recommendations;
• They also provide an opportunity for the community to have a say about what contributes to their feelings of safety in their neighbourhoods, thereby encouraging better use of public space.

Establishment of Community Safety Forum – Provincial Mandate from Dept of Community Safety and Liaison – Building a United Front against Crime / “Operation Hlasela”: It is a multi agency structure that Local Government drives to ensure the co-ordination of Community Safety efforts by government and civil society, by addressing the specific needs of that community. The CSF shall be the co-ordination centre of the Community Safety Network and shall drive the production and implementation of the IDP Safety Plans.

The purpose of the CSF is:
• To address the need for a multi-agency response to crime prevention and broad based community safety;
• To prevent the duplication of efforts, and wastage of financial and other resources;
• To ensure that efforts are sustainable, learning oriented and in tune with environmental changes;
• To ensure that democracy is deepened by a heightened level of accountability to and participation by the community.

Mandates supporting the CSF:
• Pronouncement by the former Minister of Safety and Security, Mr Nqakula (March 2007);
• The White Paper on Safety and Security (1998) motivates for Local Government to play the lead role in local crime prevention, promoting crime prevention through multi-agency partnerships;
• The White Paper on Safety and Security (1998:14) defines crime prevention as: “All activities which reduce, deter or prevent the occurrence of specific crime types (i) firstly by altering the environment in which they occur, (ii) secondly by changing the conditions which are thought to cause them and (iii) thirdly by providing a strong deterrent in the form of an effective criminal justice system.”

Environmental design and maintenance of the public realm for safety:

This strategy is concerned with influencing the design and maintaining environments to discourage crime. The main aim is to increase visibility and surveillance. Closed circuit television increases surveillance to ensure that criminals can be observed and caught. Design of spaces that increase visibility and reduce access and escape routes for criminals is promoted. The principle of crime prevention through environmental design is being applied by our architects and landscape designers in our parks and public places as well as the enforcement of crime prevention in buildings that are underutilized, dilapidated or in a state of disrepair that shelter criminal activity. Use is made of improved lighting, clearing bush, overgrown verges and management of high activity areas.

The re-design of Warwick Junction will assist in separating pedestrians from motor vehicles, thus reducing accidents. The first phase (Inbound carriage way) of the project was completed by February 2010. The ABMs are embedding the principles involving crime prevention through environmental design (CPTED) and aim to capacitate staff involved in planning and development.

Another important aspect is the street beggar project facilitated by Safer Cities to eradicate the problem of mothers using children to beg on the streets. Stakeholder involvement includes: Metro Police, SAPS, Social Development, Durban Children’s Society, Children’s Court, National Prosecuting Authority, Family and Marriage Association South Africa (FAMSA), eThekwini Health Department,
School criminal activities have manifested, which has led to Safer Cities Staff to engage students themselves to find solutions.

Social Sector community safety initiatives:

This strategy is also driven by the Safer Cities and ITRUMP Unit and seeks to support police in social crime prevention by initiating developmental and job creation community safety projects in line with the principles of the Expanded Public Works Programme. The main aim is to ensure that all (streets or villages) communities have extensively trained Community Safety Volunteers who monitor and patrol streets, pension pay points, businesses and hot spot schools. The proposed Pension Pay Points Safety Services project will be linked to other community and law enforcement agencies initiatives to monitor the safety of citizens at Pension Pay Points and immediately report any incidents or suspected criminal activities to law enforcement agencies.

Programme 4.2: Safe Buildings

This strategy is concerned with influencing the design and maintaining environments to discourage crime. The principle of crime prevention through environmental design is being applied by our architects and designers in public places as well as the enforcement of crime prevention in buildings.

The Public Realm Revitalisation and Management Programme is a multi-disciplinary approach to ensure an integrated management of public spaces. The programme involves the co-ordination of monthly meetings and enforcement of bylaws as well as engagement with key stakeholders such as UIPs, Business Operators, and Durban of Chamber of Commerce.

Programme 4.3: Quantification of City-wide Risk Profile and Implementation of Risk Reduction Measures

This strategy is concerned with affording all citizens within the eThekwini area the ability or the means to be able to reach the emergency services in times where life and property are threatened during an emergency situation. The strategy is also aimed at identifying areas of high crime spots or traffic congested areas and ensuring that there is CCTV coverage deployed in these areas and in so doing assist as a partner in policing crime and managing traffic flow in the municipality. A Disaster Management Advisory Forum will be established through the Office of the City Manager and Deputy City Manager Safety and Security.

Programme 4.4: Safe while travelling – road and pedestrian safety

This strategy focuses on integrating and coordinating road safety education, enforcement and engineering measures.

The following three initiatives are underway:
- The introduction of traffic calming measures;
- The implementation of engineering improvements at high frequency accident locations;
- Hazardous locations are assessed on an annual basis and dealt with as necessary.
People should feel safe on our roads whether while travelling in vehicles or on bicycles and on foot. Pedestrian education is a particular focus as 60% of deaths and injuries affect pedestrians. The Road Safety Plan focuses on improving road infrastructure legal compliance and education.

Improving road infrastructure includes upgrading existing road sections and intersections, new road sections and intersections, maintaining roads, traffic signals and traffic signs. Legal compliance deals with unsafe pedestrian behaviour, unsafe street trading, poor driver behaviour and vehicle roadworthiness. Education of road users targets both pedestrian and motorists in order to promote the safe and considerate use of the road.

These programmes are developed and implemented primarily by Metro Police and the eThekwini Transport Authority in conjunction with the KwaZulu-Natal Department of Transport. The Municipality actively supports the National “Road to Safety”, “Arrive Alive” and Provincial “Asiphephe” road safety programmes.

Programme 4.5: Safe from fire and emergencies

Uncontrolled fire has a serious impact on the lives of all communities. Citizens, businesses and public infrastructure are all affected by incidents of fire. The impact of loss of life and the destruction of property and possessions is difficult, if not impossible, to quantify. Citizens living in densely populated informal settlements, without personal insurance, are particularly vulnerable to the effects of uncontrolled fire.

Through effective fire and emergency services, we aim to ensure that all communities have a level of confidence that the Municipality recognises its duty of care, and is able to provide an acceptable level of safety. Our plans to achieve this cover both prevention and response.

The incidence of fire can be reduced through a variety of programmes including public safety education, fire safety inspections and ensuring code compliance, evaluating of building plans from a fire safety perspective, promoting the department and its role in society, and contributing to the development of codes, standards and legislation aimed at managing fire risk. The department is active in training municipal staff and staff from commerce and industry to prevent fire and where this breaks down, to respond quickly and effectively to fire, thus limiting the damage resulting from uncontrolled fires. We work closely with other agencies whose work helps to prevent fires and improve response times, for example, rapid road access, road naming, house numbering, providing fire-fighting water in hydrants, street lighting, and telecommunications.

The unit is moving toward a risk managed approach to its responsibilities rather than merely maintaining a response capacity to fires and emergencies. Greater emphasis needs to be given to fire safety initiatives and their integration with the fire suppression and emergency response functions. Ideally fires should be dealt with proactively rather than reactively. To this end the department intends extending its inspection activities as this area has proved to be effective in reducing losses from fire – both in terms of life and property.

There is still a significant proportion of the Municipality’s population that is beyond the reach of fire services when measured against prevailing risk-based response times. The Unit plans to address this through the establishment of additional operating bases. Priority is to be given to establishing fire stations in Verulam, Umkomaas and the Mpumalanga areas which have been scientifically shown to make the greatest impact in reducing the percentage of the population currently beyond the reach of the fire and emergency service.

The demand placed on the Unit to ensure presence at special events and functions throughout the Municipality is intended to be augmented by an alternate staffing initiative, also intended to provide for
a reserve pool of trained personnel available for immediate deployment and future whole time employment.

A precondition to deliver effective emergency response services is a well-trained and committed workforce. The current facilities available to the department to skills its staff are not suitable to satisfy the current demands placed on a modern emergency service. This area will be attended to in the medium to long term by the construction of a training facility that will enable staff to experience many of the conditions they will be exposed to in the course of their work, in a controlled environment, under the supervision of qualified instructors. The completion of this project will not only have a direct impact on service efficiency but will also contribute to the safety of crews called upon to operate under extreme conditions by providing them with the confidence of having experienced many of these situations under training. Private industry shall also have access to the Fire Training facility and its personnel, which is expected to enhance fire education and help mitigate emergency incidents as they arise.

Fire appliances and equipment are essential to the fire department for providing emergency services. Without the proper tools and the knowledge of how to use those tools correctly a fire department cannot do its job effectively. The department maintains a fleet of emergency vehicles and has in the past been successful in minimising the cost impact to the Municipality of vehicle and equipment purchases through well-constructed replacement and maintenance programmes and has sought the best value for the available funding.

The department does not discriminate on the basis of gender when appointing staff. The challenge to incorporate the needs of female fire-fighters at fire stations built many years back when fire fighting was not considered an occupation for females remains a challenge. To this end a programme is in place to systematically provide such facilities at all its fire stations. This programme will take between 7 and 10 years to fully implement and until this has been achieved, procedural arrangements are in place to accommodate female fire-fighters at “gender-friendly” fire stations.

Programme 4.6: Reduction in the number of contraventions in terms of the Security Management Framework or Reduction of the Deficiency Ratio

The core function of Security Management is to provide a security and intelligence service to the eThekwini Municipality and to perform the following strategies, namely Land Invasion Control; Security Services and City Hall; Contracts and Surveys; Escorts and Rapid Response; Profiling and VIP Protection.

The program will also look at developing the human resource capacity and capability to meet the needs of the programme as listed above.

Strategic Focus Area: Promoting the Health of Citizens

The government of South Africa is striving to ensure long and qualitatively healthy lives for all South Africans as expressed in Outcome 2 of the government wide performance monitoring and evaluation system. In line with this Outcome and the municipal vision of caring for its citizens and providing basic services of the highest quality, the health unit has aligned its strategies to impact on reducing mortality and increasing life expectancy; reducing HIV incidence; decreasing TB caseload and improving TB outcomes, improving health system effectiveness, mitigating for environmental health risks and mobilising communities for improved individual health in this five year plan.

The current strategic functional pillars in the unit include primary level clinical care, environmental health services and social health services. Currently, the bias of resourcing is more towards the biomedical approach of health service provision. Taking into account that disease management does
The following strategic objectives have been identified to achieve the goal of providing Comprehensive Primary Health Care to the communities of the EMA:

- **Accountable, efficient and effective administration**
  - Adherence to SCM processes.
  - Strengthen internal controls and administrative systems.
  - Adequate health human resource financing.
- **Mass mobilisation for better health**
  - Social Interventions
  - Behavioural Interventions
- **Provide services of high quality throughout the unit with a focus on total quality management**
- **Reduce burden of HIV and AIDS and TB**
- **Improve maternal, child and women’s health**
- **Infrastructure upgrading and development**
- **Institute results based management with a focus of monitoring, evaluation, recording and reporting.**
  - Strengthen Health Management Information System
  - Introduce individual patient information system
  - Strengthen performance management system
- **Improve Environmental Health Service Delivery**

**Programme 4.7: Accountable, efficient and effective administration**

The health unit has introduced specific measures to ensure that the relevant managers are held accountable for budget under their control, that expenditure is kept within the budget limits and that a more effective financial control mechanism would be in operation for the Unit. In addition, this system is intended to utilise control measures that ensure efficiency for public fund expenditure. Administration systems remain a challenge. Interventions will revolve around the implementation of uniform approaches and initial recentralisation of the function, with a view to devolving the function to the sub-districts once systems and capacity have been established. The human capacity levels especially with regards to management skills require further development, mentoring and coaching. Although managers have acquired academic qualification, the less than desirable performance can be attributed to the lack of conceptualisation and internalisation to appropriately apply these practically into the working environment for effectiveness and improved results.

**Programme 4.8: Mass mobilisation for better health**

In this five year period the unit will focus on social interventions aimed at addressing practices that put populations at risk of acquiring ill-health. It is also important to reinforce norms that prevent ill health. This includes improving attendance of preventive clinical services by the general population to allow for early detection of diseases. In addition, structural changes to enhance outreach services for improved individual care in association with Operation Sukuma Sakhe will be implemented.

The high mortality rates especially with regards to children and pregnant women is clearly indicative of the need to renew efforts to improve access to high quality sexual and reproductive health services, and maternal and child health services that takes into account the complete cycle of services from the cradle to the grave. The ingredient to successfully implement this strategy is to
ensure a reciprocal demand is created for this service by the intended recipients. The unit will endeavor to increase ward-based personnel to bring services closer to the people and to strengthen health seeking behaviours.

**Programme 4.9: Provide services of high quality in line with set norms and standards**

In November 2011 to January 2012, a baseline audit to ascertain compliance with national core standards was conducted in the health care facilities across the EMA. Although 40% of the municipal facilities had a score of 70% and above, all facilities across the metro (provincial and municipal) were found to be non-compliant as they had one or more vital standards found to be below expected performance.

The next process entails addressing the challenges of infection control, risk management, improving adherence to policies and processes, management of pharmaceuticals, improving infrastructure, data management, and adequate management of patient records. The achievement of attaining compliance and accreditation of health facilities with the national core standards body will be in line with available human and material resources. At the current resource availability this process is envisaged to take a period of two years. The quality of environmental health services in relation to stakeholder perspective is currently under review. Preliminary findings indicate the need to improve internal administrative systems for effective and efficient services that will result in a reduction of environmental risks. This will also include a focus on human resource development and improving accountability of environmental health staff. The quality of social health services needs attention to ensure that communities benefit from correct messaging and strategies.

**Programme 4.10: Enhance Environmental Health Service Delivery**

The programme aims to expand the air quality monitoring networks within the municipal area.

**Programme 4.11: Reduce Burden of HIV/Aids and TB**

HIV and AIDS is a major challenge contributing to reduced life expectancy, high TB rates, collapse of socio-economic conditions for individuals, households and communities and increase in orphaned and vulnerable children.

The population aged 15 to 49 years is estimated to have an incidence of close to 2% per year bringing that close to 35,000 new infections annually. The enormous efforts directed at preventing infections have not yet achieved the desired outcome of behavioural change as evidenced by the high epidemic levels in the population based indicators.

Although the municipality, together with its partners, has seen the recent successes of reduced transmission rates at 6 months and increased access to treatment at clinic level, it is very clear that increased efforts at the dual methods of prevention and treatment are required, both to prevent risky behaviours and to utilise treatment to prevent further transmissions.

Tuberculosis is recognised as the leading opportunistic infection amongst HIV positive persons with approximately two thirds of HIV infected persons co-infected with TB. In 2006 the metropole was declared a TB crisis district and following the implementation of the TB crisis plan, the metropole has improved TB cure rate amongst new smear positive patients from below 50% to 65%. Whilst building on these successes the focus will be on reduction of treatment defaulters and reducing the infectious pool, especially in terms of multidrug resistant TB.
Programme 4.12: Improve Maternal, Women and Child health

Communicable diseases together with poor quality of antenatal services are associated with approximately 60% of child and maternal mortality. The municipality will therefore focus on the correct management of pregnant women through application of appropriate standards of basic antenatal care (BANC) and the provision of timely treatment for HIV and TB.

The other area of focus is early screening for cancers of the cervix and breast as these have been found to be highest causes of death in terms of malignancies.

Immunisation for preventable childhood illnesses remains important. Although successes have been noted in the EPI programme in children, attendance for immunisation services beyond one year of age remains a challenge and consequently remains a key area for intervention.

Programme 4.13: Infrastructure Upgrade

The upgrading of clinics is in keeping with the National Health Department’s 10 Point Plan, which includes the need for health infrastructure upgrade in order to improve the quality of care that is being offered. A decision was taken to prioritize the upgrading of clinics in order to comply with legislation including Health and Safety requirements. The upgrading will include ventilation improvement and additional consulting rooms. Additional consulting rooms will enable clinics to offer a comprehensive package of care every day in contrast to the past where different services were provided on dedicated days for different services. Ventilation improvement will assist with the reduction of the incidence of nosocomial infections.

Programme 4.14: Institute results based management with a focus of monitoring, evaluation, recording and reporting.

The unit has made some progress in identifying determinants of ill health and identifying appropriate interventions and resources required to address these. Whilst this work is in progress the results in terms of effectiveness and efficiency need to be measured. This will incorporate building capacity to understand the highest level of reasonable expectation that each level of worker will be held accountable for programme implementation. A results based management system will be instituted to build towards a high performance institution.

Plans/Strategies/Policies Applicable to Plan Four

Vulnerable Groups Policy:
The policy aims to create a framework for social integration that serves to develop a society and workplace that addresses human diversity and participation for everyone. This document addresses two main components, first, the internal employment policies and practices of the Municipality and, second, its external service rendering to the community with specific focus on people with disabilities and the elderly. This policy attempts to ensure that the process of achieving equality for all is at the very centre of the transformation process in the EMA, within all its structures, policies, procedures and practices.

eThekwini Disaster Management Framework:
In compliance with the Disaster Management Act No. 57 of 2002, the eThekwini Municipality has compiled a Disaster Management Framework. The Framework is based on the nationally accepted four key performance areas (KPAs) and three Performance Enablers (PEs) viz.:

KPAs
- Integrated institutional capacity for disaster risk management;
- Disaster risk assessment;
- Disaster risk reduction;
- Response and recovery.

PEs
- Funding;
- Information Management and communication;
- Education, training, public awareness and research.

Crime Prevention through Environmental Design (CPTED)
This initiative has been introduced to ensure that the goals of a safer city and crime prevention are met. The CPTED Programme focusses on four areas, namely capacity building, legislation (policy), procedures (strategy) and public awareness (including a website). Since the environment can play a role in providing or reducing opportunities for crime, it follows that certain crimes can be prevented by altering the environment in which they might occur. Changes to the physical environment could make it more difficult (risky or strenuous) to commit a crime. The environment can be manipulated in such a way that it requires greater efforts from potential offenders to carry out their criminal activities.

Safe Drums Policy
In eThekwini Municipality a large number people are affected by the practice of using chemically contaminated drums for storing consumables such as water, juices, traditional medicines, sorghum beers, etc. The need to protect our citizens from the risks associated with exposure to the use of contaminated drums/containers is the fundamental element of this policy. The aim of the policy is to:
- To protect citizens from risks associated with exposure to various toxic chemicals through the use of contaminated drums/containers for domestic purposes.
- To educate citizens on the risks associated with exposure to various toxic chemicals through the use of contaminated drums/containers for domestic purposes.
- To ensure safe drums trade.

“TOWARDS AN HIV FREE GENERATION” – Response 2012/2016 and Beyond
The metropole area is home to approximately 3.5 million citizens and is characterized by a high disease burden of HIV and AIDS and TB. The plan gives an indication of the interventions, with performance targets, that are to be implemented to provide care to the infected and those affected by the epidemic. It also provides an outline of the planned activities towards achieving the long term goal of zero new HIV infections. These interventions and targets are all encompassing i.e. of all government departments within provincial government and the municipality, civil society and the private sector.
Plan Five: Creating a Platform for Growth, Empowerment and Skills Development

The National Skills Development Strategy (NSDS III) outlines the strategy for all sectors in the economy to address the challenges of providing the required skills for the economy to grow and address the issues of high unemployment.

Goal

To establish eThekwini as a learning city which uses knowledge management techniques and processes to enhance the skills base of the citizenry as well as share good practice with other municipalities.

Desired Outcomes

- A skilled and capable citizenry, within the eThekwini Municipal Area, that shares in and contributes to the economic expansion and growth of the region.
- A skilled work force that delivers effective and quality services to the citizens of eThekwini Municipality.
- A learning city

Background

The Municipality’s greatest asset is its people.

The latest statistics show that:

- 16% of adults are functionally illiterate
- 38% of adults have Matric certificate
- 8% have tertiary qualifications (Census, 2001).

The map below highlights the uneven distribution of education attainment within the Municipal area where those who are more educated are located in the urban areas and those with less education attainment found in the peri-urban areas.
eThekwini is positioning itself as a Smart and Learning Municipality in order to cope with current and future challenges.

- The Smart City concept aims to bridge the digital divide in eThekwini and to make the Municipality a hub of information diffusion, as well as a centre for economic growth and integration.
- The Learning City approach has two aspects:
  o Firstly, by the Municipality earning recognition as a competent, efficient and learning institution; and
  o secondly, by the Municipality becoming recognised as a learning centre where local government players from throughout South Africa and Anglophone Africa can be brought together to learn from each other by exchanging their experiences on sustainable development issues.
Strategic Focus Area: Human Capital Development

The Municipality has committed itself to enhancing skills development and overcoming the existing skills gap in accordance with the NSDS III. The goals of the NSDS III are used to co-ordinate efforts and partnership initiatives with service providers to ensure that community outreach, information and development programmes contribute to the education and skills development of citizens and ultimately their social, political and economic wellbeing.

Programme 5.1: Establishing a credible institutional mechanism for skills planning

eThekwini plays an important role in gathering statistics and other relevant information on labour market skills needs and training provision. Close contact with industry places us in a good position to document and communicate recent and emerging trends, as well as to develop solid baseline indicators. Such information is essential in planning to meet the eThekwini Municipal Area’s skills needs and guiding investment in education and training provision.

Through the establishment of a multi-stakeholder forum, this programme seeks to address the issues of unemployment, particularly in respect of the youth within the eThekwini Municipal Area and to respond to identified skills needs within specific economic areas.

Partnerships

This is an on-going programme that demands partnerships between government bodies such as the LGSETA, tertiary institutions, commerce and industry and public and private specialist service providers and public bodies.

Programme 5.2: Increasing occupationally-directed learning opportunities in the workplace

eThekwini Municipality has identified the need to ensure the continuous upgrade of skills in the workforce, to help ensure a measurable increase in the intermediate skills pool, especially in artisan, technician and related occupations, attributable to increased capacity at education and training institutions and increased workplace experiential learning opportunities.

Work-experience initiatives like learnerships, volunteer work experience, in-service training programmes and internship opportunities have been established to provide young people with exposure to the world of work to assist them in securing jobs in their respective careers. In addition, this programme intends to improve the basic adult education profile of the Municipality.

Partnerships

This is an on-going programme that demands partnerships between government bodies such as the LGSETA, tertiary institutions, commerce and industry and public and private specialist service providers, National / Provincial Departments and public bodies, as well professional institutes, other municipal Units, and various Sector Education Training Authorities (SETAs).
Programme 5.3: Addressing access to occupationally-directed programmes through the Co-operative Education Policy

The objective of this programme is to assist students who require experiential learning to complete their practical requirements by providing workplace learning opportunities.

Partnerships
This is an on-going programme that demands partnerships between government bodies such as the LGSETA, tertiary institutions, commerce and industry and public and private organisations.

Programme 5.4: Addressing the low level of youth and adult language and numeracy skills

This programme seeks to develop, integrate and implement language, literacy and numeracy skills to respond to economic, social and political participation, and productivity.

The aim is to raise the education base of young and adult people to enable them to take on further learning and/or employment.

Partnerships
This is an on-going programme that demands partnerships between government bodies such as the LGSETA, tertiary institutions, commerce and industry and public and private organisations.

Programme 5.5: Encouraging better use of workplace-based skills development

The programme endeavours to support and promote training of employed workers to improve productivity, growth and development, as well as to address skill imbalances in the EMA.

Partnerships
The LGSETA is a key partner in this programme as are the local tertiary institutions, other Sector Education Training Authorities and specialist private service providers.

Programme 5.6: Encouraging and supporting cooperatives, small enterprises, worker initiated, NGO and community training initiatives

This programme is designed to promote co-operative organisations to empower and create opportunities for the under and unemployed.

The objective of this programme is to support NGO, community and worker-initiated skills development and training programmes. It will similarly aim to support credible and quality worker skills development, education and training programmes. It will enhance the workplace, our economy as well as the developmental objectives of the Municipality.

It will also enhance the decision making and participatory processes within the Municipality by providing short, medium and long term skills development interventions.
Partnerships
This is an on-going programme that demands partnerships between government bodies such as SALGA, KWANALOGA, LGSETA and COGTA.

**Programme 5.7: Increasing public sector capacity for improved service delivery and supporting the building of a developmental state**

Grow and develop skills levels within the public realm ensuring that the Municipality has capable political representatives to address the priorities of the citizenry such as health, education and high crime rate, etc.

**Programme 5.8 Building career and vocational guidance**

The youth are the Municipality's hidden wealth and they require assistance and guidance in making career choices that will ensure that they participate fully in the labour market. The Municipality will dedicate the necessary resources to support career and vocational guidance, as this has proved to be a critical component in successful skills development initiatives world-wide. Through initiatives that bring the private sector, the NGO’s and other relevant stakeholders the Municipality seeks to give guidance to the youth through career expos and cooperative education initiatives.

**Strategic Focus Area: Develop the City as a Learning City**

Research on other 'learning cities' such as Dublin, Ireland and Jaipur, India has been completed and is informing a two-pronged model of a learning city which sees programmes running concurrently towards realising eThekwini as a Learning Organisation, whilst at the same time introducing programmes which will see the Municipality advancing towards a Centre of Learning where technology is used to optimize access to information. Through various skills programmes, as well as its network of libraries and museums, the Municipality is committed to maximising learning opportunities for its citizens in its efforts to enhance economic and social development.

**Programme 5.9: Develop the City as a Smart City**

In order to cope with current and future challenges, the Municipality is committed to Durban becoming a Smart City in which the Municipality is a competent, efficient and learning institution which supports the provision of learning opportunities for external stakeholders. The Smart City concept aims to bridge the digital divide in eThekwini and to become a hub of information diffusion, as well as a centre for economic growth and integration. It supports the deep links between formal schooling and the many other learning institutions available to students — libraries, science centres and history museums, after school clubs, online activities that can be accessed from home, and even collaborations between students and working professionals.

Bridging the digital divide will reduce the gap between those who have access to Information and Communication Technology, and those who do not for socio-economic or infrastructure reasons. Bridging the divide is important as it can reduce existing inequalities, which are often based on geographic location, age, gender, culture and economic status.

**Partnerships**

Partnerships with DOE, USAASA, TIA (technology innovation agency), Smartexchange and private sector (including SMMEs) have been forged to achieve the objectives of the programme.
Programme 5.10: Improve knowledge management in the Municipality

Over the last year, great strides have been made in setting up a dedicated institutional vehicle to champion the knowledge management agenda for the municipality. In pursuance of this, the Municipal Institute of Learning (MILE) has as its mandate the following five key areas:

1. **Enhancing local government practitioner capacity** through a series of learning interventions including the facilitation of Master Classes (in areas like solid waste management, water and sanitation, strategic planning, revenue management) and the hosting of learning exchanges for professionals from all over Sub-Saharan Africa.
2. Positioning the eThekwini Municipality as a platform for innovating, learning and sharing with other municipalities, associations and networks, both locally and internationally:
3. **Leveraging partnerships with tertiary institutions** in order to optimise effectiveness of local government, its practitioners and in particular the research agenda.
4. **Providing a high level technical support service to other municipalities** in an empowering and sustained way.
5. **Promoting the better management of municipal knowledge within eThekwini** through creative projects such as establishing communities of practices, documenting innovations and good practice, sharing learning through web-based portals, etc.

 Plans/Strategies/Policies Applicable to Plan Five

Youth Development Policy:
The purpose of the policy is to address the major concerns and issues that are critical to young men and women, implement youth programmes and provide services that are relevant and beneficial to the youth and provide a framework with common goals for development and promoting a spirit of cooperation and co-ordination among departments, non-government organisations, community based organisations, youth organisations and the business sector.

Employment Equity Plan:
The plan aims to achieve equity in the workplace by promoting equal opportunity and air treatment in employment. The Municipality aims to eliminate all unfair discrimination and implement affirmative action measures to redress the disadvantages in employment experienced by designated groups and to ensure their equitable representation in all occupational categories and levels in the workforce.

Workplace Skill Plan:
The plan has been developed so as to ensure that education and training is closely aligned with the needs of the Municipality. As such education and training needs are integrated with the broader municipal objectives.

Employee Practices Policy:
The policy aims to ensure that Council pursues non-discriminatory employment practices and promotes an affirmative action policy. This entails pursuing employment practices designed to produce an employment profile reflective of the population demographics within which the Council operates. To ensure that employment practices are jointly monitored and regulated by the Council and the signatory Unions on a regular basis.

Scarce Skills Policy:
The Municipality recognizes that its most valuable asset is its Human Resources. A great deal of time and money is invested in the recruitment, training and development of employees and as such every effort should be made to retain those employees who have scarce skills. The application of the policy for scarce skills will contribute to a more competent and stable workforce to meet the objectives of the IDP and the operations, maintenance and service delivery plans of individual units and the Municipality.

Talent Management Strategy:
The strategy aims to manage the talent within eThekwini in order to ensure the right people with the right skills are in the right roles at the right time to deliver the eThekwini 2020 vision and IDP. The talent framework, processes and tools are explained to ensure effective talent identification, succession planning, attraction and sourcing, development, retention and release.

City Stars Recognition and Rewards Policy
It is important to recognise excellence in performance and achievement through the use of rewards that are creative, meaningful and flexible. When administered and communicated effectively, recognition and rewards are an important part of a total compensation program.
It is evident that a reward and recognition system can contribute to employees satisfaction and their willingness and desire to learn and improve their skills and can lead to greater retention. The types of rewards and recognition that employees receive are a major contributing factor to their level of satisfaction. The more highly rewarded and recognised employees are, the more satisfied they tend to be with their job and with their life. This implies that satisfied employees are less likely to quit, change jobs, or be absent.
**Assisted Education Policy**

The policy serves to promote the principle of lifelong learning, by encouraging employees to take responsibility for their own education and skills development where this will add value to their performance towards the achievement of eThekwini Municipality’s integrated development Plan.

To ensure this the policy outlines certain objectives so that the training and education being undertaken are:

- Identified by the employee as being able to assist his/her performance in his/her existing post, or career prospects, within the Municipality.
- Predominantly provided by institutions of higher or further education
- Generally of twelve months, or more, in duration
- Predominantly conducted, or require self-study, in the employee’s own time.
Plan Six: Embracing our cultural diversity, arts and heritage

Goal
Create an enabling environment for social cohesion and economic development through arts, culture, sports, recreation and heritage.

Desired Outcome
A municipality that embraces arts, culture, sports, recreation and heritage as a catalyst for social cohesion and economic development.

Why this Plan?
Arts, culture, sports, recreation and heritage, as fields of human engagement endeavour, are mutually reinforcing. It is through involvement and engagement with all of these fields that holistic human development can be realised. The creative human abilities are realised through exposure to and engagement with arts. It is through exposure to and involvement in culture and heritage that the intellectual capacity of individuals and communities is honed and enhanced. Sports and recreation has both emotional and physical benefits at an individual level while it facilitates unity and healthy coexistence at a community level. All these benefits conspire to contribute to socially healthy and economically productive individuals and communities. From a developmental perspective, it can be argued that it would be through meaningful intervention in the fields of arts, culture, sports, recreation and heritage that the goal of a socially cohesive and economically developed society can be achieved. The fulfilment of spiritual, emotional, intellectual and physical human needs hinges on maximised investment and targeted investment in arts, culture, sport, recreation and heritage.

The system of apartheid left South Africa with an unfortunate legacy of a divided, unequal and underdeveloped society. This was a consequence of many years of social engineering which produced extreme socio-cultural and economic inequalities based on racial intolerance and economic exploitation of the majority of the population. The majority of South Africans were denied cultural rights and access to economic opportunities. Socio-cultural rights denied to the majority ranged from language rights, social practices and indigenous knowledge and games which were undermined and their development suppressed. Apartheid institutionalized and entrenched inequality in a manner which permeated all sectors of South African society. Cultural intolerance was at the heart of systematic socio-economic disempowerment resulting in a social and economic set-up characterized by gross inequalities. The system of apartheid invented and promoted myths aimed at undermining cultural and traditional practices such as clothing, food, religious beliefs and customs of certain race groups, presenting them as inferior and of no value. Some of these practices have disappeared and most continue to disappear due to urbanization, industrialization and neglect.

South Africa’s lack of social cohesion is a direct result of this legacy of apartheid; this manifests itself in cultural intolerance which has led to incidents of racism, xenophobia, crime, corruption, and in some cases, lack of ethics and care; particularly in the public service. The existing socio-economic disparities which continue to grow are also a direct result of our culturally and economically unequal, oppressive and exploitative past. This is because cultural and economic sectors were key centres of apartheid social engineering. While the historical legacy of socio-economic imbalances is being addressed through government programmes, there is a need to cultivate a culture of coexistence and equal enjoyment of this country’s cultural and economic resources.
Cultural well-being is at the heart of a healthy society and vibrant communities. It is fundamental to socio-economic empowerment and development. The vitality that communities enjoy through participation in recreation; creative and cultural activities and the freedom to retain, interpret and express their arts, history, heritage and traditions are the lifeblood of a productive and stable society. Cultural well-being should ultimately be predicated on an active recognition that cultural participation is central to realising the potential for eThekwini residents to lead fully rewarding, expressive and creative lives. Culture, arts, sport, recreation and heritage straddle both social and economic development and are central to the holistic development of human, and by extension, a nation's potential. The pivotal role which arts, culture, sports, recreation and heritage can play in the social and economic development is aptly captured in the 1995 assertion of the Commonwealth Heads of Government Working Group in Harare that:

“It is time that the integral role which sport plays in the process of nation-building is fully recognised. Sport is an investment. It is firstly an investment in the health vitality and productivity of one’s people. It is secondly an investment in their future. The social benefits include an overall improvement in the quality of life and physical, mental and moral well-being of population. Furthermore, successful athletes serve as role models for the youth of the country, as achievers as unofficial ambassadors, and as individuals committed to equality and fairness in competition. Because of its visibility, sport can play an enormous part in redressing gender and race inequalities as well as discrimination against people with disabilities and marginalised groups”.

Sport and Culture is big business; this has been borne out by the increasing interest in the potential contribution of sports to inward investment and economic regeneration in communities, cities and regions following the successful hosting of the 2010 FIFA Soccer World Cup. World leaders are increasingly acknowledging that sport and recreation touches virtually every aspect of a nation’s ethos. Furthermore, our hosting of the Soccer World Cup proved the important contribution of sport as a unifier.

The socio-economic benefits derived from arts, culture, sports, recreation and heritage cannot be overemphasised. Promotion of appreciation and respect of other people’s cultures, embracing of our common human heritage and inclusive participation in arts, culture and sports contribute in breaking social and cultural barriers and bringing people from different backgrounds together. Furthermore, participation in arts, culture, and sport and heritage activities is critical to the acquisition of a variety of skills ranging from management and administrative, problem-solving, communication, coaching and mentoring and leadership skills. Sports programmes, for example, can empower and promote the inclusion of marginalised groups, especially women, the youth, rural communities and people with disabilities.

The potential of arts, culture, sport, recreation and heritage to unite people needs to be harnessed and developed and its concomitant social and economic value optimally taken advantage of/exploited. Investment in arts, culture, sport, recreation and heritage constitutes an investment in the socio-cultural and economic well being of individuals and communities. For example, every rand invested in sport yields multiple benefits such as long-term health benefits for individuals, stronger and more secure communities, reduction in incidence of crime, psychological well-being and social cohesion - all of which are prerequisites for an economically productive and stable society resulting in improved quality of life.

This plan is intended to grow, stimulate and harness the enthusiasm and talents of eThekwini’s citizens. Amongst our approximately three million citizens, there is enormous potential: potential for success in the fields of sport, recreation, arts and culture, potential for individual growth as well as for experiencing and embracing cultural diversity.

By stimulating sport, recreation, arts, culture and heritage of the Municipality and its citizens, there is growth both for individuals and communities. There is also major potential for income opportunities in
these fields. An enriched municipality and community of people, as envisaged in our Vision, will inspire others and attract visitors.

**Strategic Focus Area: Ensure inclusive access to arts, culture, sports, recreation and heritage resources**

The apartheid era in South Africa, which ended in 1994 when the country held its first ever democratic election, was characterised by numerous discriminatory laws and practices based on race.

The sport and culture sectors did not escape this scourge of legalized, institutionalized and non-institutionalized racial practices. The vast majority of blacks did not have equal access to recreational sport and culture opportunities be at schools or at community levels. There was little or no investment into sport and culture infrastructure, equipment, development, talent identification and or activities for previously disadvantaged population groups. At the same time the apartheid South Africa was subjected to international sport and culture sanctions which isolated the country from international exposure.

Irrespective of the racial practices various sport and culture organisations tirelessly fought for the establishment of a sport and culture system free of discrimination and that which would provide equal participation opportunities for all.

Every individual should have an equal opportunity to make for him or herself the life that he or she is able or wishes to have, consistent with his or her duties as a member of society without being hindered in or prevented from doing by discriminatory practices. Equitable treatment is a fundamental value for participating in sport and culture.

Art, sport, recreation, culture and heritage must be made available and accessible to all. Geographical location, economic status, age, gender, ability, disability, language and other elements of society’s diversity should not infringe on the opportunity to participate in sport and culture.

**Programme 6.1: Exposing ICT and Heritage to new audiences**

The future of the arts and cultural expression lies in the development of new audiences and markets. Current audiences are largely determined by the location of infrastructure, the availability of disposable income, and the nature of the artistic forms on offer, all of which generally reflect the legacies of our apartheid past. Strategies within this programme are aimed at ensuring that existing infrastructure is used for the benefit of all; developing arts infrastructure close to where people live; raising public awareness of the arts, especially through supporting the growth and sustainability of a range of arts festivals, which will both provide more work opportunities for artists and create greater audiences and markets for the arts.

**Programme 6.2: To develop healthy lifestyles and the well being of citizens by providing mass participation opportunities through active recreation**

Recreation is not just about fun and games, it plays a pivotal role in contributing to a healthy lifestyle and well being of an individual, creating liveable communities and promoting social cohesion. In terms of the Universal Declaration of Human Rights (Article24), all people have a basic human right to recreation activities.
There is a need to use active recreation programmes as a means to develop citizenship values in young people and to teach them how to make valuable contributions to their communities. Active recreation programmes should be designed to reach broad sectors of the population, including marginalised groups, affording them to access participation and a share in the wider sport community. Recreation is a significant part of any nation’s culture, leisure time, health, economy and education. People directly involved will benefit from a significantly enhanced quality of life. The physical activities people engage in, how they are integrated into community life, the values expressed through them and how they are celebrated; help define individuals, groups and communities.

Recreational opportunities provide personal benefits such as self fulfilment and developing personal relationships, as well as social benefits such as improving social integration and developing community cultural identity. Regular and structured recreational activities can assist in addressing the social challenges of delinquency, crime, alcohol and substance abuse, domestic violence as well as health conditions such as cardiac diseases, diabetes, obesity and HIV / AIDS.

**Programme 6.3: To use arts, culture, sports, recreation and heritage as a medium to communicate environmental messages.**

Biodiversity’s existence is essential for the planet. Beyond being the key resource for human life, the future of the Earth itself and its uniqueness are immeasurably important. However, biodiversity and its significance has not enjoyed the necessary attention and space in Museum galleries and most of it is limited to museum research which seldom reaches the general public. If at all mentioned in a museum, it does not represent the overall theme but a sub-theme of other exhibitions. The term Biodiversity is poorly understood globally and in particular, by the South African public, and the responsibility for popularizing it and ensuring that Biodiversity conservation is mainstreamed to activities or functions of government departments and the private sector lies with all sectors including biodiversity research institutions and even the arts, culture, sports and recreation sectors.

For instance, the relationship between sport and the environment includes both the impact of sport on the environment and impact of the environment on sport. All sport activities, events and facilities have an impact on the environment. It is therefore important for sport to be pursued in an environmentally sustainable manner, given that the deterioration of environmental conditions reduces the health, well-being and living standards of individuals and communities as well as their levels of physical activity. The inherent link between a clean environment and participation in sport is part of what makes sport a powerful tool for communicating environmental messages and encouraging actions to clean up the environment.

**Programme 6.4: Strategic Heritage Investment**

Libraries and museums are an integral part of society; providing access to educational, cultural, and recreational information, programmes and resources. Information is a prerequisite for raising educational standards, advancing democracy, participation in decision-making, developing the economy and enhancing the quality of life. Community libraries, museums, arts and recreation centres have exceptionally important roles to play as facilitators of lifelong learning, and should be linked to education centres. Various types of libraries, museums and recreation centres play a vital role in the provision of information, support to formal and non-formal education, and the promotion of a culture of reading and learning within the Municipality. Strategies within this programme are aimed at ensuring the development of more accessible arts, culture and recreation infrastructure close to where people live thereby addressing the backlogs that exist in service delivery. This programme also aims to provide empowerment opportunities for unemployed people from the second economy through training and job creation in the development of arts, culture, sports, recreation and heritage infrastructure. It provides access to markets and skills as tools for urban regeneration, rural development and job creation.
Programme 6.5: Creating facilities accessible and awareness on the value of our green heritage to improve the quality of life

The programme aims to create awareness on the value of green heritage through various outreach, public engagements and exhibitions.

Programme 6.6: To provide integrated service to develop healthy lifestyles and well being of citizens by providing active and passive recreational empowerment opportunities

The program concentrates on building internal and external capacity for example training of lifesavers, an learn to swim program and training in permaculture. The programme will also concentrate on conducting and providing guided tours of our nature reserves and Botanical gardens.

Programme 6.7: To use arts, culture, sports facilities, recreation grounds and natural heritage as a medium to communicate environmental messages

This programme will look at a targeted approach to use existing facilities and opportunities to communicate environmental messages.

Strategic Focus Area: Utilise arts, culture, sports, recreation and heritage resources to achieve socio-economic empowerment

This strategic focus area envisages the empowerment of citizens to improve their cultural well-being and growth in the economy through the development of opportunities in arts, culture, sports, recreation and heritage. At a local level, this empowerment of citizens is important for: the intrinsic benefits and satisfactions to be gained from exposure to and involvement with culture; the potential for generating economic wealth; and the definition and assertion of South Africa’s national identity. Commitment to the development of arts and culture means that the Municipality will undertake a range of responsibilities including the operation and administration of several museums, historic sites, performing and visual arts centres, financial support for cultural activity and artists, encouraging public art projects in both private and public developments, and assisting a wide range of community arts organisations in accessing and sharing municipal services and facilities. Economic opportunities exist where heritage is conserved and enjoyed by citizens and other visitors.

Programme 6.8: Create Empowerment Opportunities in Arts, Culture and Heritage

A fundamental prerequisite for democracy is the principle of freedom of expression. Rooted in freedom of expression and creative thought; arts, culture and heritage have a vital role to play in development, nation building and sustaining our emerging democracy. They must be empowered to do so. Humans are holistic beings. They not only need improved material conditions in order that they have a better quality of life. Individuals have psychological, emotional, spiritual, and intellectual expression, all of which require nurturing and development for individuals to realise their full potential, and act as responsible and creative citizens. Projects have been formulated for developing artists (including those with disabilities) as entrepreneurs, and providing stages, gallery spaces, exhibition opportunities, and commercial channels for their work.
**Programme 6.9: Preservation and Management of Heritage Assets**

To value our heritage in all its dimensions, to care for it as a treasure bequeathed to us by our ancestors, to recognize that it is our duty to transmit it intact to our children, is a sign of wisdom. In terms of the National Heritage Resources Act, No. 25 of 1999, Heritage resources have lasting value in their own right and provide evidence of the origins of South African society and as they are valuable, finite, non-renewable and irreplaceable they must be carefully managed to ensure their survival where they are. Every generation has a moral responsibility to act as trustee of the national heritage for succeeding generations and the government has an obligation to manage heritage resources in the interest of its citizens.

Heritage resources also have the capacity to promote reconciliation, mutual understanding and respect, and contribute to the development of a unifying South African identity. To ensure that heritage resources are effectively managed (a) the skills and capacities of persons and communities involved in heritage resources management must be developed; and (b) provision must be made for the ongoing education and training of existing and new heritage resources management workers.

Heritage resources form an important part of the history and beliefs of communities and must be managed in a way that acknowledges the right of affected communities to be consulted and to participate in their management. They contribute significantly to research, education and tourism and they must be developed and presented for these purposes in a way that ensures dignity and respect for cultural values.

If a community is aware of the factors that have influenced its history and shaped its identity, it is better placed to engage with and build peaceful relations with other people and to forge its future. Conserving our heritage assets is only part of our responsibility to future generations. Interpreting them through research provides insight into what makes these places, specimens, artifacts and monuments special. Telling stories and communicating the significance of heritage items is an essential part of heritage conservation, both tangible and intangible. In this programme we employ measures aimed at ensuring the viability of the heritage, including the management, identification, documentation, research, preservation, protection, promotion, enhancement, transmission (particularly through formal and non-formal education), as well as the revitalization of the various aspects of such heritage and spaces.

**Programme 6.10: To identify and develop talented athletes through the implementation of a structured system**

A pro-active approach to identify, select and develop talent is an absolute pre-requisite if sport is to progress. A targeted talent identification process must enable the identification of athletes from disadvantaged backgrounds (particularly rural and marginalised youth) who might otherwise not be found and as such assist with the transformation of sport. There is no doubt that an effective talent optimising programme is important for the success of sport.

**Programme 6.11: To improve the performance of athletes and coaches**

Athletes and coaches have a range of specialised needs that have to be met if they are to perform optimally. Sports development and excellence in sport require an evidence-based, holistic and coordinated sport support system.
Programme 6.12: To empower the human resource capital in arts, culture, sports, recreation and heritage through education and training

These sectors can make an important contribution to the realisation of the national priority of human capital development through education and training. In this regard it is important to keep abreast with global developments and standards.

Programme 6.13: To ensure that arts, culture, sports, recreation and heritage in eThekwini benefit from strategic international relations

The Municipality, along with national and provincial government, enjoys great relations with the international community in various types of industries. The local arts, culture, sports, recreation and heritage sector is yet to fully benefit from these interactions. This will enable more structured and deliberate international exchange programmes as well as cultivate a favourable import and export environment.

Programme 6.14: To implement Legacy Programmes

Our Heritage is unique and precious and cannot be renewed. It helps us to define our cultural identity and therefore lies at the heart of our spiritual well-being and has the potential to build our nation. Our Heritage also celebrates our achievements and contributes to redressing past inequities. This programme is aimed at celebrating our heritage and shared legacy. The lead project in this programme is the National Liberation Heritage Route (NLHR). The NLHR will be a network of sites linked together through a narrative which depicts the journey to liberation. The project is aimed at ultimately designing spaces which reflect social memory for continuity and identity for the transmission of heritage to future generations. The route is a celebration of national memory associated with the history of the struggle for freedom or liberation.

The central principle and approach to this project is ensuring that the key preservers of history, people in their social spaces, contribute immensely in giving authentic reflections of their experiences during the liberation struggle. All municipalities in South Africa have been alerted about the national research programme, with active assistance requested from all of them. This will help in broadening social collaboration through this research of popular memory. eThekwini Municipality is home to some of the pioneers such as John Langalibalele Dube, Pixely ka Isaka Seme and Mahatma Gandhi to name but a few.

Programme 6.15: Ensure transformation in sport and recreation

Since democracy in 1994, in eThekwini we still have a sporting environment where there is a skewed picture of sporting facilities and opportunities. To have a real and lasting impact on our citizens we cannot continue with the exclusion of certain parts of our population. The following groups should receive priority when programmes are designed and funded to promote inclusiveness: women, persons with disability, youth, aged and rural communities within eThekwini.
Programme 6.16: Create and promote an environment that encourages economic activity for arts, culture, sports, recreation and heritage

Sports and Culture as drivers of economic growth: Strategies and projects within this programme are aimed at promoting and providing opportunities for artists and athletes in all disciplines to develop their art and talent in order to improve economic and other development opportunities in arts, culture, sports, recreation and heritage through mutually beneficial partnerships, thereby ensuring the sustainability of the sectors. The Municipality also recognises that there needs to be complementary activities to promote an environment that nurtures and develops an awareness of sports and culture as this will develop a demand for the artist’s work and heightened interest and attendance at sports and cultural events. Sports and culture are consistent sources of economic growth, during both good and difficult economic times. Specifically, sports and culture policies and programs increase economic development by attracting businesses, creating new jobs and promoting tourism. At the centre of this programme are sports- and culture-led urban revitalization and community renewal strategies.

Programme 6.17: Create empowerment opportunities in Culture and Green Heritage

The programme aims to create empowerment opportunities in the fields of urban agriculture, community gardens and nurseries.

Programme 6.18: Preservation and management of Natural Heritage Assets

To value our heritage in all its dimensions, to care for it as a treasure bequeathed to us by our ancestors, to recognize that it is our duty to transmit it intact to our children, is a sign of wisdom. If a community is aware of the factors that have influenced its history and shaped its identity, it is better placed to engage with and build peaceful relations with other people and to forge its future. Conserving our heritage assets is only part of our responsibility to future generations. Interpreting them through research provides insight into what makes these places, specimens, artifacts and monuments special. Telling stories and communicating the significance of heritage items is an essential part of heritage conservation, both tangible and intangible. In this programme we employ measures aimed at ensuring the viability of the heritage, including the identification, documentation, research, preservation, protection, promotion, enhancement, transmission, particularly through formal and non-formal education, as well as the revitalization of the various aspects of such heritage.

Programme 6.19: To improve the performance of Junior and Middle Management in Parks, Leisure & Cemeteries

Provide a range of support programmes to improve the performance of staff at junior and middle management levels.

Programme 6.20: To ensure that arts, culture, sports, recreation and heritage in Parks, Leisure & Cemeteries benefit from strategic international relations

The Municipality, along with national and provincial government, enjoys great relations with the international community in various types of industries. This will enable more structured and deliberate international exchange programmes with Parks, Leisure & Cemeteries.
Programme 6.21: Create an enabling environment by the provision of facilities for industries, culture, sports, recreation and heritage

This is to be achieved by supporting economic opportunities and through the creation of cultural precincts.

Strategic Focus Area: Position arts, culture, sports, recreation and heritage as economic development drivers

Arts, culture, sports, recreation and heritage sectors contribute to economic growth and employment in significant ways. The diversity of the municipal economy also includes the significance of the creative economy. At the national scale, part of the industry contribution in the following sectors is recorded as follows:

a) Our natural heritage, measured by the value of ecotourism, contributes R 21 billion per annum to the economy.

b) The music industry was worth around R1.7 billion in sales and ranked 17th in the world in 2007.

c) The craft sector contributes R1,1 billion annually to GDP and employs approximately 38 062 people.

d) The visual arts sector has a turnover of nearly R 2 billion and gross value added of R 1 billion per annum. There are an estimated 17 700 people working in the sector.

e) The total net turnover of the book publishing industry in 2007 was estimated to be worth R 3.2 billion with 13 769 authors and 818 other entities received royalties.

f) The film industry generates over R5.5 billion in economic activity annually and employs an estimated 30 000 people.

g) The gross advertising revenue for the broadcasting industry was close to R8.5 billion in 2006.

This strategic focus area envisages the growth in the economy through the development of opportunities in arts, culture, sports, recreation and heritage sectors. Commitment to the economic development of these sectors means that the Municipality will undertake a range of responsibilities including the operation and administration of key heritage activities; performing arts, financial support for cultural activities and artists. It is also aimed at encouraging public artistic projects in both private and public developments, as well as assisting a wide range of community art organizations in accessing and sharing municipal services and facilities. Economic opportunities exist where heritage is conserved and enjoyed by citizens and other visitors.

Programme 6.22: Address Infrastructure backlogs in terms of Access mapping

The Municipality has as part of its Infrastructure Planning documented the nature and extent of the urban and rural backlogs in service delivery across the entire metropolitan area, using digital records held by the Municipality together with input from communities and councillors. An innovative model, termed the Social Facilities Accessibility Model, has been developed to match the demand for facilities, based on population numbers and income and age profiles, with the supply and capacity of facilities geographically. This assessment shows the nature and extent of facility backlogs across the Municipality and all requests for the construction of new facilities are currently being assessed within
this context. This will help ensure that we do not generate any unnecessary and wasteful over-supply of social services in any area.

**Programme 6.23: Infrastructure Asset management register**

The goal of Infrastructure Asset Management is to meet a required level of service, in the most cost effective manner, through the management of assets for present and future generations. National Government has legislated the need for local government to formulate Asset Management Programmes in all sectors.

**Programme 6.24: Sustainable Public Spaces**

Sustainable public spaces are an essential component of a quality living environment. Therefore a strategy is being implemented to improve the quality and sustainability of the public realm, through innovation in urban design responses, and an integrated approach to aesthetics, operations, management and maintenance of public spaces.

**Programme 6.25: Ensure effective management of the Nature reserves and other Conservation Areas including DMOSS, Stream Areas and Botanic Gardens**

The municipality is required to effectively manage its natural areas, this program looks at a various initiatives that would assist in effective management of the natural areas. Such as, review and development of management plans for natural areas, develop a management plan for management of invasive specifies, communicate with biodiversity stakeholders and ensuring compliance with national and provincial policies.

**Programme 6.26: Ensure compliance with legislative requirement concerning all EIA applications for development**

The unit provides comment on EIA applications, projects in this programme will assist the department in complying with the NEMA regulations in respect of EIA's.

**Programme 6.27: Contribute to compliance and enforcement function referring to biodiversity and ecosystem goods and services**

The programme concentrates on enforcement of by-laws which are relevant to the department.

**Programme 6.28: Create environmental awareness**

This will be achieved through various education campaigns and workshops as well as the compilation of relevant policies.
Programme 6.29: Supporting priority zones for effective green environment management
The programme aims to identify additional green roof projects and to provide support to community reforestation projects.

Programme 6.30: Development and Sustainable maintenance of Public Open Space and other Green areas
Projects in the programme concentrate on development of management and maintenance plans for public open space areas such as Inanda and Hazelmere dams as well as tourism and heritage routes such as the Inanda heritage Route

Programme 6.31: Planning and Coordination of City-wide Events during the Festive Season
The city is a popular tourism destination, this program looks at the planning, implementation and co-ordination of events during the festive season so as to ensure effective management.

Programme 6.32: Employment creation through Expanded Public Works programme
The EPWP is a National Government strategy aimed at eradicating poverty, while creating jobs and providing opportunities to the previously disadvantaged communities through the provision of temporary employment opportunities, labour training, learnerships and skills programmes, etc. The philosophy of the EPWP, with its focus on labour intensive methods will be adopted wherever possible and practical in the areas of housing and basic service delivery in order to provide a direct municipal response to the high unemployment rate in eThekwini.

Programme 6.33: Undertake reasonable safety and security measures in all Public facilities
To improve the security at Council owned installations and to ensure the protection of Council employees.

Programme 6.34: Securing Council assets
To provide adequate security at Council owned facilities to ensure the safety of visitors.

Programme 6.35: Contribute to the development and implementation of a Water Quality Monitoring System for streams and beaches
The programme aims to undertake an audit of all streams, develop management plans and undertake continuous monitoring thereof.
Programme 6.36: To reduce downtime as a result of equipment failures

To ensure optimal availability of vehicle and plant so that the ability to deliver municipal services is not compromised.

Programme 6.37: To improve the Unit’s Service delivery capability

To ensure optimal availability of vehicle and plant so that the ability to deliver municipal services is not compromised.

Programme 6.38: Movable assets – Plant and equipment

The Cluster is meeting the provisions of Section 63 of the MFMA (56)2003:

- An Asset Register which records all municipal assets;
- An Asset Management Procedure manual to cover the acquisition; maintenance and disposal of assets;
- Periodic physical counts are performed to verify the assets recorded in the Asset Register;
- All assets are insured following an annual verification and valuation exercise;
- Ensure that the milestones in the Asset Management Business Plan are met;
- In addition, ensure that the useful life of assets and impairment tests are done annually.

Plan Seven: Good Governance and Responsive Local Government

Goal

Ensure a strong, caring and democratic institution to promote and support a consultative and participatory local government.

Desired Outcome

- All citizens embracing, practising and benefiting from the concepts of Good Governance;
- A stronger, more efficient public service which is capable of developing and implementing policy and delivering better services to all people at all levels;
- Better and more transparent public management;
- More participative and responsive Municipality, particularly at all levels;
- A Municipality which prevents, and fights corruption and waste at all levels;
- A Municipality where all inequalities of the past are eradicated.

Why this plan?

Governance is defined as: the exercise of economic, political and administrative authority to manage a country’s affairs at all levels. As such it is concerned with the overall institutional environment, in which citizens interact and within which economic, political, legal and administrative authority are exercised.

In the context of Local Government, governance includes the citizens, private sector and civil society organisations.

Good governance is the process of translating societal demands into choices, resulting in policy formulation and implementation. Good governance is epitomised by predictable, open and enlightened policy making (that is a transparent process); a bureaucracy imbued with a professional ethos, an executive arm of government accountable for its actions; and a strong civil society participating in public affairs and all behaving under the rule of law. As such, good governance is a cross cutting issue that affects every sector of development, and therefore all the stakeholders within the Municipality must strive for good governance.

This plan focuses on the creation of enablers to ensure good governance is practised within our Municipality. The programs and projects in this plan have been formulated in order to achieve the following attributes of good governance:

Accountability – Accountability flows from the concept of stewardship and rests on the consent of the governed. It also refers to adhering to an established set of criteria in measuring the performance of local government officials to estimate the economic and financial performance of local government.

Responsiveness – It is a measure of accountability wherein leaders and public servants address the needs of the public. It can be indicated “by a deliberate citizen and customer-orientation policy being consistently espoused by the local administration” or by “the presence of mechanisms and procedures for swift recourse on unfair practices and avenues for the community to articulate issues requiring local government assistance”.

Management innovation – This refers to reforms successfully implemented by local governance in various areas of local government administrations e.g. administrative procedures, resource mobilisation, political reforms, economic sustainability, environmental preservation, community participation, etc.

Public-private partnership – This suggests an active joint working arrangement between local government and the private sector in the programmes of local government.

Local Government Citizen Participation – This indicates open communication between the government, non-government organisations and the community as a whole.

Decentralised Management – This concerns the ability of the local management to delineate and delegate responsibilities to various responsibility centres (Units) and ensure accurate reporting and monitoring of delegated responsibilities.

Networking – This refers to the ability of the local governments to forge cooperative relationships with other local governments and other entities to build infrastructural capacities.

Human resource development – This suggests the sustained implementation of a programme to recruit, train, motivate and develop a local work force to become more efficient and effective members of the public.

It is important to note that the Good Governance Plan permeates each of the other seven plans. Whilst the responsibility for overall programme co-ordination and management rests with the Deputy Municipal Manager of the Governance Cluster, every other plan owner, programme driver and project leader must interrogate what good governance means for their respective plans.

The first strategic focus area of this plan ensures that the Municipality is accessible to citizens. This is line with the “democratic and equal city” and the “caring city” filters. In response to the “sustainability”, “smart city” and “democratic and equal city” filters, key programmes under the second strategic focus have been developed.

The third focus area concerns how the Municipality manages its human resource capital by looking after the interests and well-being of its employees to create a positive organisational culture. The programmes here respond to the “Smart City”, “Caring City” and “Sustainability” filters.

Together, this package of programmes attempts to lay a solid foundation for Good Governance in the Municipality.

**Strategic Focus Area: Ensure accessibility and promote governance**

Increasingly in South Africa, and around the world, there is recognition of the value of accessibility, transparency and accountability in governance beyond the traditional domain of financial performance. This ensures that the development targets and measures set for the Municipality’s performance emanate from a strong foundation of “putting people first”.

**Programme 7.1: Promote co-operative, international and inter-governmental relations**

The range of critical issues faced by our Municipality mirror’s South Africa’s national and provincial concerns, so dealing with them in a way that is sustainable requires concerted and co-ordinated intervention by all three spheres of government, the private sector and civil society partners.
The intergovernmental relations programme ensures alignment with national and provincial government priorities. This programme ensures alignment of eThekwini’s local government system, organisation, strategy, budget and implementation programmes with those of other spheres of Government.

The international relations programme is designed to position the Municipality as a strategic global player. This is done largely through a comprehensive sister city partnership programme, donor relations programme and Africa/NEPAD programme.

In addition, CIFAL Durban provides Anglophone municipalities from throughout Africa with training in good practices and opportunities to share their development experiences.

**Programme 7.2: Implement a customer relations management programme in line with Customer Care Policy and the Batho Pele Principles**

The Municipality launched the Customer Care Policy in 2008 with an aim of displaying the Municipality’s commitment to the Principles of Batho Pele and ensuring that service excellence is an integral part of the planning and delivery of all Municipal services.

The implementation of the Customer Care policy focuses on creating an awareness of various customer related issues including the Customer Care policy and the Batho Pele principles. The implementation is to introduce the Customer Care programmes in all Units of the Municipality.

The following programmes are being introduced and implemented throughout the Municipality:

- Customer Satisfaction Questionnaire Programme;
- A post transaction telephone follow-up of a sample of returns;
- Mystery Shopper Programme where all Customer Centres will be evaluated and scored on an objective basis;
- Regular Customer Care Forum Session;
- Sizakala Toll Free line to report poor and good customer service.

These monitoring methods will assist us to develop programmes to address any shortcomings in the standard of our service.

**Programme 7.3: Create integrated mechanisms, processes and procedures for citizen participation**

Present Local Government policies and legislation put great emphasis on municipalities to develop a culture of community participation. The creation of appropriate and relevant community participation mechanisms, processes and procedures is therefore vital. This programme aims at ensuring that communities are part of decision-making processes within the Council. The programme encourages communities to utilise their strengths and move away from the dependency syndrome. Ward Committees and other civil society organisations play a critical role in making this programme come alive.
**Programme 7.4: Effectively communicate the programmes and policies of the eThekwini Municipality to the full range of audiences, both internally and externally**

Communication is central to our new organisational culture. The Municipality is committed to ensuring that all citizens and customers are well informed and are partners in the development. The communication programme seeks to devise mechanisms for making local government information (citizens’ rights and responsibilities, the Municipality’s programmes, policies and processes) available and accessible to all stakeholders. Above all, this programme will ensure the preparation of clear and comprehensive communication strategies for both internal and external communication, firstly to harness the energies of staff to deliver on the vision and strategy, and secondly to ensure that the Local Government principles of participation, engagement and information-sharing are given meaning.

**Strategic Focus Area: Create an efficient, effective and accountable administration**

The Constitution dictates, that Public Administration be governed by democratic values and principles including, among others, a high standard of accountability and professional ethics. To this end, the Municipality is introducing and implementing several programmes listed hereunder. Taking into account the size and multidisciplinary nature of our Municipality, the programmes have been designed to achieve the objectives of this Strategic Focus Area.

**Programme 7.5: Create a clean and accountable organisation**

This programme ensures the building of an ethical organisation that is free of fraud, corruption or any activities that prejudice any member of society unfairly. The Municipality has put in place a fraud prevention policy that will be implemented. This is accompanied by a redeveloped Code of Ethics for municipal staff. These measures are followed by extensive training that focus initially on senior management and later be cascaded to the rest of the staff, thus ensuring that all staff are aware of their ethical responsibilities. A whistle-blowing policy will also be developed and cascaded to all senior management. The Council has also adopted a Language Policy which will now be implemented throughout the Municipality.

**Programme 7.6: Mobilise to make the administration more effective**

eThekwini is committed to the principles of continuous improvement, management accountability and efficient and effective operations. In this context the Municipality maintains systems of Internal Audit, Enterprise Risk Management and Performance Management. This programme focuses on supporting the Municipality to accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, performance management and governance processes. The implementation of Enterprise Risk Management throughout the Municipality in line with good governance practices and monitoring the Municipality's risk profile will enable the administration’s awareness of its risk environment and effective and efficient business continuity management processes; thereby ensuring the continuity and sustainability of our operations while protecting the interest of the public. Further the implementation of an effective Performance Management system and framework; enables the monitoring and evaluation of organisational and management performance against set objectives. The aim of the programme therefore is to add value to and improve the operations of the Municipality as mandated in terms of
the Internal Audit Charter, the Audit and Risk Committee Terms of Reference, applicable legislation (the Municipal Finance Management Act, the Municipal Systems Act and Performance Regulations).

**Programme 7.7: Monitor and evaluate the performance processes of the Municipality**

Monitoring and evaluation is a crucial element in determining if the organization is performing at its highest level to ensure success. This programme focuses on the monitoring and evaluation process of the Municipality to ensure that the Municipality is abiding by legislation and Units are achieving on the targets that have been set against the indicators and projects. It assists management with relooking at resources and planning to ensure effective service delivery.

The process aligns the Organizations strategic goals that have been set in the IDP to the operational level. The IDP is translated into the Organisational Scorecard, SDBIP and Individual Performance Plans that are monitored and evaluated periodically. The final outcome of this process is the production of the Annual Report. The programme also aims at providing monitoring and evaluations tools that can be used by management for good decision making. Electronic tools are also being developed to streamline and integrate all areas of monitoring and evaluation.

**Programme 7.8: Disclosure of Interest**

This programme deals with a critical area being evaluated which is the Disclosure of Interest submission by all staff. This is a legislated process and the Municipality requires all staff provide a Disclosure of Interest. This process also monitors that staff are not involved in businesses that are contracting with the Municipality or other State organisations. Further the programme monitors whether all staff are obtaining consent prior to undertaking any outside business interests.

**Programme 7.9: Improve productivity, efficiency and effectiveness throughout the municipality**

This programme ensures the improvement of the way Output Units manage their business by providing a holistic organizational development and productivity improvement service to the Municipality. On one hand, the focus will be on introducing interventions that will support long range efforts to improve the Municipality’s problem solving and renewal processes, by enhancing congruence between organizational culture, strategy, processes, structure and people. On the other hand, interventions to measure current productivity and develop performance standards, improve and monitor productivity and eliminate wastage of resources will be implemented throughout the Municipality to achieve efficiency and effectiveness and ultimately, improved service delivery.

**Programme 7.10: Create IT mechanisms to improve efficiencies, effectiveness & accountability and eliminate wastage of resources**

This programme endeavours to use and promote the use of Information Technology in the various businesses of the Municipality. Departments of the Municipality have historically suffered from a range of legacy issues leading to a certain level of inefficiencies and subsequently leading to ineffectiveness. In addition any organization in the modern world is susceptible to corrupt practices by its employees. The objectives of this programme are to:

- Reduce risk and corruption to the organization;
- Improve efficiencies by the use of technology;
• Use IT to reduce steps in time consuming processes;
• Automate mundane tasks;
• Improve management by increasing business intelligence;
• Minimize documentation of information;
• Increase collaboration and information sharing simply and quickly.

Programme 7.11: Implement systems, policies, services and events that enhance the interface between Council, Administration and the Citizenry

Implement projects, programs and services in accordance with the City Hall Master Plan and the Units Business Plan so as to enhance accessibility and the interface between Council, the Administration and the Citizenry.

Strategic Focus Area: Healthy and Productive Employees

A healthy and well-developed human resource base will enable the Municipality to respond effectively and efficiently to its development challenges. Looking after the interests and well-being of employees is as critical as looking after the community. The Municipality has adopted a strategy of caring for its employees’ needs as a way of ensuring sustained service delivery.

Programme 7.12: Implementation of HR Projects

As part of transformation and the ever-increasing demand placed on employees to deliver, appropriate Human Resources (HR) practices and procedures must be implemented to develop a unified culture of the organisation, improve employee productivity, and ensure the retention of employees. This programme also, endeavours to create mechanisms for empowerment of staff to ensure HR’s accessibility and efficiency.

Programme 7.13: Reduce new HIV/AIDS infections in the workplace

The Municipality is determined to assist infected and affected municipal employees. The programme involves Voluntary Counselling and Testing and a vigorous awareness programme.

Co-ordinated planning and interventions within the Municipality, including effective implementation of mainstreaming HIV/AIDS awareness in all departments, ensures ongoing implementation of an integrated HIV/AIDS workplace policy in the Municipality. Access to HIV/AIDS related information has also been improved through the updated eThekwini HIV/AIDS website.

Programme 7.14: Be compliant with occupational health and safety legislation

It is the Municipality’s duty to provide an enabling environment for its employees to be productive and oversee effective implementation of municipal services.

Against this background, the Municipality has committed itself to ensuring a healthy and safe work environment for its employees and service providers as a means of responding to legislative requirements for occupational health and safety.
Programme 7.15: Create processes of employment transformation through corrective legislation

It is the duty of eThekwini Municipality to implement employment practices subject to transformation legislation so as to give equal employment opportunities and develop Affirmative Action measures to redress the past discrimination in employment practices, and adhere to principles of fair and equitable access to employment opportunities.

In light of creating the above conditions the municipality will embark on an employee profiling system, develop EE statistics as a system of record, develop EE training manuals, develop EE Unit plans/processes, create EE Committees, develop a Council wide EE plan, develop disability training programmes and a BEE internal scorecard for Council.

Plans/Strategies/Policies Applicable to Plan Seven

Service Delivery and Budget Implementation Plan:
The Service Delivery and Budget Implementation Plan serves as a strategic financial management tool to ensure that budgetary decisions that are adopted by the Municipality for the financial year are aligned with their IDP strategy. SDBIP’s objective is to ensure that the organization actually delivers on the IDP targets and improves capital as well as operational planning, spending and service delivery.

Employment Equity Plan:
The plan aims to achieve equity in the workplace by promoting equal opportunity and air treatment in employment. The Municipality aims to eliminate all unfair discrimination and implement affirmative action measures to redress the disadvantages in employment experienced by designated groups and to ensure their equitable representation in all occupational categories and levels in the workforce.

Community Participation Policy:
The main purpose of the policy is to provide guidelines for increasing the level of active citizen participation in the decision-making process of local government and to create an enabling environment for civil society in which ordinary citizens and social groups may find platform upon which they voice out their concerns and take part in the fundamental decision making on issues that affect their lives.

Workplace Skill Plan:
The plan has been developed so as to ensure that education and training is closely aligned with the needs of the Municipality. As such education and training needs are integrated with the broader municipal objectives.

Employee Practices Policy:
The policy aims to ensure that Council pursues non-discriminatory employment practices and promotes an affirmative action policy. This entails pursuing employment practices designed to produce an employment profile reflective of the population demographics within which the Council operates. To ensure that employment practices are jointly monitored and regulated by the Council and the signatory Unions on a regular basis.

Scarce Skills Policy:
The Municipality recognizes that its most valuable asset is its Human Resources. A great deal of time and money is invested in the recruitment, training and development of employees and as such every effort should be made to retain those employees who have scarce skills. The application of the policy for scarce skills will contribute to a more competent and stable workforce to meet the objectives of the IDP and the operations, maintenance and service delivery plans of individual units and the Municipality.

Talent Management Strategy:
The strategy aims to manage the talent within eThekwini in order to ensure the right people with the right skills are in the right roles at the right time to deliver the eThekwini 2020 vision and IDP. The talent framework processes and tools are explained to ensure effective talent identification, succession planning, attraction and sourcing, development, retention and release.

Anti-Fraud and Anti-Corruption Policy:
The Anti-Fraud and Corruption Policy is about changing organisational features that allow the events to occur and possibly go unnoticed or unreported. The strategies incorporated in the Fraud and Corruption Prevention Plan address issues such as accountability, transparency, efficiency, effective and clean administration. Further, these strategies focus on improving systems and procedures, changing the attitudes of the staff and members of the public and improving the overall integrity and
performance of or as we are attempting here, to incorporate in several such as Anti-Fraud and Anti-Corruption policy, Fraud and Prevention Plan and Code of Ethics etc. The Anti-Fraud and Corruption Policy covers the prevention, detection and management of fraud and corruption and for fair dealing in matters pertaining to fraud and corruption. It aims to raise the awareness of fraud and corruption and its prevention in the eThekwini Municipality environment and to give guidance to both the reporting of suspected fraud and corruption and how the investigation of that report will proceed. The eThekwini Municipality has a duty to protect the public funds under its control against fraud and corruption both from within the Municipality and from external sources. This Anti-Fraud and Corruption Policy is part of the Municipality’s commitment to sound corporate governance.

**Fraud and Corruption Prevention Strategy**
The Municipal Finance Management Act No 56 of 2003 (MFMA) requires the Municipality to protect its assets and to prevent wasteful expenditure and other losses. It also requires the management team to ensure that internal controls are operating effectively. Furthermore, MFMA requires that all necessary steps are taken to identify and manage the exposure to commercial crime. The focus of the strategy is to create in eThekwini Municipality, a culture of zero tolerance, a high level of awareness and a management and control environment that makes it as difficult as possible to misappropriate assets or to succumb to fraud. The fraud prevention strategy is based on the municipality’s commitment to:

- Establish proactive mechanisms to understand and manage the risks of fraud and corruption;
- Create a zero-tolerant and highly compliant environment;
- Develop a system to detect and deter perpetrators of fraud;
- Respond swiftly and efficiently to allegations of crime and irregularities.

The Strategy is in line with the Anti Fraud and Corruption Policy of eThekwini Municipality.

**Customer Care Policy**
The aim of the policy is to ensure that whenever customers have contact with the eThekwini Municipality they will consistently experience standards of service excellence. The Municipality aims to ensure that the human rights principles set out in the National Constitution, the eight Batho Pele principles as well as “getting it right the first time” are experienced whenever customers access our municipal services. We aim to ensure that service excellence is an integral part of the planning and delivery of all municipal services to its people.

**Travel Policy**
The policy aims to provide clarity and economic efficiency in terms of international and domestic travel; to centralize, consolidate, coordinate, rationalize, regulate, monitor and report on travel and to deal with matters related or incidental thereto.

**City Stars Recognition and Rewards Policy**
It is important to recognise excellence in performance and achievement through the use of rewards that are creative, meaningful and flexible. When administered and communicated effectively, recognition and rewards are an important part of a total compensation program.

It is evident that a reward and recognition system can contribute to employees satisfaction and their willingness and desire to learn and improve their skills and can lead to greater retention. The types of rewards and recognition that employees receive are a major contributing factor to their level of satisfaction. The more highly rewarded and recognised employees are, the more satisfied they tend to be with their job and with their life. This implies that satisfied employees are less likely to quit, change jobs, or be absent.

**Communications Policy**
The eThekwini Municipality is committed to two-way communication, building relationships with its internal and external stakeholders and to form partnerships with the public and private sector. The purpose of this policy is to provide clear principles and guidelines for communication in the Municipality. The different roles and responsibilities within the Municipality's communication are made
clear, what is communicated, and by whom. This policy will ensure that communication takes place in a coordinated and uniform way.

**Incapacity Management Policy and Procedure: Ill Health/Injury**
The Municipality is committed to treating employees who are incapacitated due to illness or injury in a fair and appropriate manner depending on their circumstance. The policy shall only be used in cases of poor performance or non-performance that are directly related to ill health/injury. The Municipality is committed to using the policy not as a punitive measure but to assist employees. It will also ensure that when a termination for reasons of ill health and injury occurs it is effected for a fair reason and in accordance with a fair procedure and as a last resort.

**Performance Management Policy and Procedure**
In recognition of the fact that organizational performance is dependant not just on top management, but on the actions of individuals within the entire organization, all staff of the municipality will develop performance plans and agreements in collaboration with their managers/supervisors. This performance management system is also to be linked to the municipality's outcomes and outputs.

**Guidelines for the Prevention and Management of Posttraumatic stress Disorder**
The document provides a guideline as to the steps to be followed in the event of employees being subjected to acts of violence, criminal attacks, severe accidents or other life threatening incidents. This document focuses on the prevention of the development of Posttraumatic Stress Disorder and as such focusses specifically on the operational management of employees who have been exposed to a particular category of traumatic event whilst in the course of their official duties.

**Employee Assistance Programme Policy**
The Municipality recognises that employees may experience personal or social problems which may adversely affect job performance and/or health. As a result, the Council provides an Employee Assistance Programme which is a confidential assistance/advisory service designed to assist employees in dealing with their problems. Such problems may include but not be limited to personal/psychological, marital, substance dependency or work related problems. The programme is further aimed at assisting Management to improve or restore impaired job performance.

**Policy on sexual Harassment**
The objective of the policy is to eliminate sexual harassment in the workplace. It provides appropriate procedures to deal with the problem and prevent its recurrence. This would result in the creation of a Municipal workplace that is free of sexual harassment, in which employers and employees respect one another's integrity and dignity, their privacy, and their right to equity in the workplace.

**HIV/AIDS Workplace Policy**
The Municipality's HIV/AIDS Policy is based on the fundamental principles of human and patient rights. The policy aims to achieve a balance in protecting the rights of all parties including those infected and affected and a balance between rights and responsibilities and also between individual protection and co-operation between all the parties/stakeholders involved. The policy provides for dealing with HIV testing, equitable employee benefits, measures to prevent the spread of HIV/AIDS, managing grievance procedures and a Wellness Centre amongst other objectives.

**Information Security Policy for eThekwini Municipality**
Information and the supporting information technology (IT) are fundamental to sustain business operations and to grow and innovate the business (or services). They are therefore regarded as valuable assets to eThekwini Municipality. Accordingly management has a fiduciary duty to preserve, improve and account for municipal information and information systems. This policy formulates the acceptable use of information assets. It provides a framework for the responsible exercise of privileged access to the information assets and resources of eThekwini Municipality and is consequently a charter for information security. In addition this document sets out certain primary governance rules to achieve information security at eThekwini Municipality. Although the main focus
of this document is on computerised information, its provisions are equally applicable to information contained in other media.

**Batho Pele Policy**
The aim of the policy is to ensure that Municipal employees deliver services in a customer focussed way as outlined in the Batho Pele national policy. It therefore strives:

- To have a customer-centric approach to service delivery;
- To improve service delivery, with a shift away from inward-looking, bureaucratic systems, processes and attitudes as in increased commitment, personal sacrifice, dedication and a search for new ways of working which puts the needs of the public first, which are better, faster and more responsive to the citizen’s needs;
- To provide easy access to information and services of the eThekwini Municipality, as provided by the Access to Public Information Act;
- To make the employees of the eThekwini Municipality more accountable to citizens;
- To build effective relationships with the end users;
- To apply high standards and professional ethics.

**Wellness Policy and Programmes**
The Employee Wellness Programme is designed to improve the quality of life of affected employees by providing support and assistance to alleviate work, personal and family problems. The policy objectives include:

- Confidential assistance to employees and their immediate family who are affected or who have the potential to be adversely affected in both their work performance.
- Fostering employee well-being, enhanced productivity and social functioning.
- Improved quality of life for employees and their immediate families.
- Encouragement and fostering of an organisational culture that is caring.
- Reduced absenteeism and utilisation of sick leave.
- Improved recruitment and retention.
- Reduce absenteeism, staff turnover, interpersonal conflict, disciplines grievances and work related accidents and incidents within the Municipality.
- Provide employees with life skills, awareness and educational programmes and promote healthy life styles and coping skills.
- Promote co-operation, motivation and improved employee morale in order to improve productivity and workplace efficiency.

**Code of Conduct for Employees**
The Municipal Systems Act (Act No. 32, 200) prescribes a code of conduct for all municipal staff members. As such municipal employees must conduct themselves in a manner that is both acceptable and justifiable to ensure service delivery at a high or acceptable standard. The code states that staff members of the Municipality must at all times:

- Perform the functions of office in good faith, diligently, honestly and in a transparent manner.
- Act in such a way that the spirit, purport and objects of section 50 of the MSA are promoted.
- Act in the best interest of the municipality and in such a way that the credibility and integrity of the municipality are not compromised.
- Act impartially and treat all people, including other staff members, equally without favour or prejudice.

**Policy on the Control of Firearms, Dangerous Objects and Weapons at the Workplace**
The Municipality has a legal duty, as per the Occupational Health and Safety Act as amended, to establish, within reason, the dangers to the safety of persons on Council premises, and to take the necessary steps to remove such risks or potential risks as far as is practicable. The policy is designed to prohibit the unauthorized use and possession of firearms, dangerous objects and weapons at Municipal premises. It also provides and maintains, as far as reasonable practicable, a workplace that is safe and without risk for municipal employees, and as results this contributes in avoiding loss or
damage that may be caused by firearms, dangerous objects or weapons to municipal premises and property.

**Driver Training and License Verification Policy**

The Council acknowledges that driving of vehicles in the course of municipal duties has potential to be hazardous to employees and other persons. This policy is established in terms of the Occupational Health and Safety Act in order to as far as is reasonably practicable reduce hazardous behaviour associated with driving. This policy gives right to the relevant Head of Department that he/she be satisfied of certain objectives such as making sure that the candidate applying to use the Municipal vehicle is medically fit to drive the vehicle and suffers no visual, hearing or mental defect, is in possession of the relevant civil licence compatible with the class of vehicle he/she intends to operate and the candidate has been familiarised with the type of vehicle he/she is to operate and is competent to operate it.

**eThekwini Municipality Policy on Acceleration of Salary**

The purpose of the policy is to give the Unit Head the right or power to adjust an employee’s salary to within the applicable range. This may be done to avoid or limit the employee to leave his or her job for a better salary. It gives way for structural adjustment to an employee's basic rate of pay in order to correct an anomaly which has created an inequitable situation vis-à-vis the pay of other employees in the same post. This policy also helps in dealing with any other exceptional circumstances pertaining to the remuneration of an employee, excluding rewarding for good performance which shall only occur as a consequence of the annual appraisal process.

**Municipal Organogram**

The municipal organogram gives an indication of the senior management posts within each cluster, department and unit within the Municipality.
Plan Eight: Financially Accountable and Sustainable City

Goal
To maximise the Municipality’s financial resources to ensure long-term financial viability and sustainability.

Desired Outcomes
- Confidence of all internal and external stakeholders in municipal financial management.
- Excellence in the service delivery of municipal financial services.
- Compliance with prevailing municipal financial legislation.

Why this Plan?
The Municipality is mandated to implement National Government policies. This legislation is aimed at improving systems and processes to ensure an effective, efficient and economical service-delivery system. Whilst some new legislation is intricate and complex, its implementation has not negatively impacted on the Municipality’s service-delivery programmes to meet the needs of local communities. In order to meet the needs of the poor and improve the local economy, much of the Municipality’s Capital Budget has been directed towards infrastructure development.

This re-orientation of the budget has, however, created other financial challenges in terms of the following:

- The effects of the global slowdown in the world economy will impact on the local economy and affect the revenues of the Municipality. Accordingly, this will impact on the overall rollout of services, and further municipalities have to review their service delivery programmes;
- In addition, due to the economic recession, the availability of municipal lendings from financial institutions will also be negatively impacted upon which will lead to increased cost of borrowing;
- The extension of municipal services has contributed to an increase in debtors due to affordability problems, however, the overall collection rate of over 95% is still excellent;
- New capital expenditure has not been aligned with related operating requirements;
- Unfunded mandates, including healthcare, housing delivery and library services, undertaken by the Municipality are growing, however, Province have committed to increase the subsidies for libraries and health services over the MTEF and agency agreements are in the process of being finalised;
- Due to the urgency and need of the indigent it is difficult to ensure that the Operating Budget can be entirely strategically-focused to support development priorities, as the Municipality’s response needs to be reactive in certain instances;
- The strategic split of the Capital Budget between social, strategic, maintenance of infrastructure and economic expenditure ensures that the Municipality addresses all issues in a sustainable manner;
- In keeping with the Batho Pele principles, the Municipality ensures effective customer service;
- The setting of tariffs will continue to be a challenge due to the impact of the high electricity tariff increases of Eskom, especially on medium and low income households.
In order to maintain our financial health and still align with the Municipality’s sustainable development strategy, new approaches to risk and growth need to be created. Thus, the challenge for financial sustainability amid increasing alignment with the ecological, economic and social demands of the IDP means that budget adjustments need to be made on a regular basis.

Despite the above challenges, it is important to note that the Municipality still maintains a Credit Rating of “AA-” for long-term loans and “A1” for the short-term. In addition, during the 2009/2010 Operating Budget process, the Municipality had embarked on an Outcomes Based Budgeting approach which makes reference to all 8 Plans within the IDP. This process attempts to address some of our developmental challenges.

All operating and capital programs in the 2012/13 medium-term budget have been evaluated through a prioritisation mechanism that was developed to ensure that there is alignment to the development strategy of the Municipality. The IDP formed the basis of the priorities identified in the strategic plan and all resources are focused on the achievement of the priorities. One of the Municipality’s achievements has been its ability to align its budgeting process with Municipal strategies, ensuring that they are inclusive and participatory. As new strategies are adopted and increasing sustainability pressures are brought to bear on municipal finances, new programmes need to be accommodated.

A PARTICIPATORY BUDGET PROCESS

Figure 32: Integrated Budgeting Process
Source: eThekwini Municipality, Treasury
Strategic Focus Area: Strategic and Sustainable Budgeting

Programme 8.1: Compile and annually update the City’s Medium Term Expenditure Framework

While the MTIEF sets out a medium-term income and expenditure plan for the Municipality, it must also show the specific intentions of the Council with respect to:

- Setting clear, affordable development targets (e.g. housing, free basic services);
- Developing a 10-year maintenance plan for infrastructure and services;
- Targeting expenditure to unlock economic development and grow the rates base;
- Adequate provision for the replacement of vehicles and plant.

In this regard, a forecasting model has been developed that allows for informed decisions to be made in terms of cash flow, investments, borrowings and long-term sustainability of the Municipality.

Programme 8.2: Budget according to IDP Priorities

In compliance with the Municipal Structures Act (1998) and Municipal Financial Management Act (2003), our Municipality budget is informed and aligned to the IDP objectives. The IDP determines and prioritises the needs of the community. The budgetary allocations for both the capital and operating expenditure are undertaken in a manner that will not only ensure that our IDP outcomes are achieved but also to ensure that our Municipality’s 2020 vision is realised.

We have come a long way in capital budgeting – away from departmental budgeting. Currently the capital budget is allocated according to the IDP eight-point plan. In terms of the operating budget we have made excellent progress but are now more committed than ever to ensure that critical operating budget resources are prioritised in terms of stated IDP outcomes.

This gives rise to approval of policies and programmes that guide service delivery, for example:

- An infrastructure delivery programme aligned to the IDP;
- A 10-year maintenance plan for infrastructure;
- A plan for the maintenance and replacement of plant and equipment.

Key to success of this approach is ensuring that the Municipality focuses its limited resources on the challenges expressed by the people of eThekwini and, most importantly, aligning with other spheres of government. The creation of Public Private Partnerships (PPPs) is another possibility, as this facilitates the use of private sector capital in developing public infrastructure.

More importantly, the Performance Monitoring & Evaluation Systems [EPM and IPM] allows the Municipality an opportunity to monitor and evaluate individual and organisational performance in meeting our IDP outcomes and vision. As with previous year’s, our IDP remains the strategic driver of both our budget and performance management system.

Programme 8.3: Budget for sustainability

The Municipality is creating mechanisms to ensure sustainable tariff increases for all stakeholders, thereby improving our delivery to all citizens. One of these is the development of financial-model scenarios that will give the Municipality a long-term look at financial health and inform the budgeting
process for the future. In addition, our Municipal Infrastructure Investment Framework (MIIF) model will assist in prioritising all the development needs of the Municipality in a sustainable manner.

**Programme 8.4: Implementation of Municipal Property Rates Act (MPR)**

The Municipality implemented the raising of rates based on the Local Government: Municipal Property Rates Act on 1 July 2008 following the original publication of the Valuation Roll in February 2008. Key activities since publication have been processing objections and queries to the Roll, publishing of 4 Supplementary Rolls in the first financial year with a target of 2 Supplementary Rolls per year thereafter. The General Valuation will have an effective Date of 1 July 2011 and that Roll will be used for raising rates for the 2012/13 Financial Year. Work on the 2012 General Valuation commenced in 2010.

The Appeals Board was set up by Province in February 2010. In view of delays by Province, the Municipality put in place a mechanism to review all appeals to ensure ratepayers were not adversely affected. These decisions will be considered and ratified by the Appeals Board where necessary.

**Programme 8.5: Reduce Council Debts**

The objective of this programme is to reduce municipal debt by actively reviewing and implementing a Council Credit Control and Debt Management Policy.

The implementation of this Policy will include the following:

- The consolidation of all debts owing in respect of electricity, water and rates onto one account; The consolidation of arrear amounts gives Council more leverage to pursue recovery action against non-paying consumers;
- The stratification of the total outstanding debtors into Government, Commercial, Residential and vacant land;
- Each category has different collection strategies:
  - All debts in excess of R20 000 are handed to attorneys for collection
  - All debts below R20 000 are being pursued via the Magistrate's Court
  - Judgements are taken on all ratepayers that owe more than R20 000 via the High Court in terms of the sale-in-execution process
  - Active attention to government debt by arranging meetings with government officials regularly and disconnecting services for non-payment if necessary. In this regard, it must be noted that the debt has been substantially reduced due to the interventions by the MEC for Finance, especially through the establishment of a dedicated team to help resolve all debt issues and the commitment to pay all undisputed accounts.

**Strategic Focus Area: Grow and Diversify Our Revenues**

**Programme 8.6: Management of Cluster Assets**

To effectively and efficiently maintain assets in council owned building, excluding City Fleet and Durban Transport

**Programme 8.7: Develop and implement a new Billing system**

The RMS application with the required functionality has been received. As part of our risk mitigation strategy the Municipality will go live with incremental components of the application. Already live is
Revenue Receipting, the Rates calculation module and the Business Support System which went live on 1 December 2010. Bulk Electricity, Hostels and Sundries have also gone live. The remaining components will be rolled out together with the requisite user testing, training and change management initiatives.

**Programme 8.8: Seek alternative sources of funding**

In addition to the obvious need to grow revenue by increasing its tax base, other means to secure funding for projects must be explored. Some of these include government grant funding, partnerships with international agencies, some of whom already contribute to the funding of key projects in the Municipality, and entering into partnerships with the private sector on key projects and programmes.

**Programme 8.9: Maximise revenue from Council properties**

Council releases property in support of:
- A program or initiative that is surplus to Council needs or;
- As a consequence of an application.

**Grow property sales income**

An annual schedule of property planned for release is prepared against which income is projected and work scheduled. This plan takes account of Programs, Strategic Projects, ABM initiatives and the like. Performance is measured quarterly against these forecasts.

**Grow property lease income**

- Long lease rental income must accord with lease rental clauses;
- Short term rental income must escalate annually in accordance with market escalation rates;
- This ensures that annual rental income targets will be achieved.

**Strategic Focus Area: Value-For-Money Expenditure**

**Programme 8.10: Reduce cost to the organization**

Costs and productivity are scrutinised on an ongoing basis to determine whether our services are being offered in the most efficient and effective way. A special Task Team is actively spearheading various initiatives to reduce costs, increase productivity and deliver an enhanced service. Alternate technological and operational initiatives are being explored with a view to reduced cost, e.g. outsourcing versus in-house activities, PPPs, etc. Outsourcing versus in-house activities have to date shown significant savings through the Municipality owning its vehicle and plant fleet in comparison to hiring or a leasing option.

**Programme 8.11: Improve Productivity**

To ensure optimal availability of vehicle and plant so that the ability to deliver municipal services is not compromised.

**Programme 8.12: An effective Asset Management Programme**

In order to maintain a reasonable fleet age it is critical that an effective vehicle replacement model is developed. This will ensure that the Municipality is adequately resourced to meet challenges in providing services.
Programme 8.13: Efficient Fleet Management
In order to maintain a high percentage of vehicle availability standardisation of vehicle makes and types is critical. Standardisation improves workshop productivity as artisans are trained and have knowledge on the product. The variety of spare parts and inventory holding is reduced to the standardised product. Driver training is limited to the standardised vehicle thereby improving driver skills and reducing driver abuse.

Programme 8.14: To improve the Municipality’s Service Delivery Capability
To ensure optimal availability of vehicle and plant so that the ability to deliver municipal services is not compromised.

Strategic Focus Area: Sound Financial Management and Reporting

Programme 8.15: Train staff on the Credit Control & Debt Management Policy
In terms of Section 96 of the Municipal Systems Act council is required to adopt, maintain and implement a Credit Control and Debt Collection Policy in order to support the debt collection procedures of the council. It is necessary to ensure that staff is properly trained to apply and implement the Credit Control and Debt Management Policy.

Programme 8.16: Investment management
- Source borrowings for implementation of Capital Expenditure projects: Due to its very strong credit ratings the eThekwini Municipality is still in the enviable position that it can borrow long-term loans for capital projects at extremely favourable rates. The Municipality has a well-documented borrowing policy in terms of which borrowings are made. The shape of the interest yield curve and review of economic conditions are considered before any long-term loan is negotiated. Borrowing Reviews are done quarterly and the quantum and period in which a loan is to be taken out are determined;
- Diversify Investments: Due to legislation restrictions, the Municipality can only invest in money market instruments and Government Bonds and to a lesser degree on certain Corporate Bonds. At this juncture, taking cognisance of the economic climate, it is only prudent to invest in money market instruments. In essence, the legislative restrictions preclude any meaningful diversification in investments;
- Optimise Returns on Investment (ROI). Within the context of the legislative restrictions, every endeavour is made to optimize returns from money market instruments. In a rising interest rate market investments are kept as short as possible to take advantage of the higher interest rate and consequently to maximise investment returns and, conversely, in a falling interest rate market investments will be placed as long as possible to maximise the investment return;
- The Municipality has a well documented Investment Framework Policy documented in terms of which investments are made;
- The Municipality actively manages its cash resources with a view to maximising its return on investment. Cash forecast and Investment Plan (formula driven) are the tools used to effectively manage the Municipality’s cash resources.
Programme 8.17:  Asset & Liability Insurance Cover

The Municipality has insurance cover in place so as to deal with any accident or disaster which may occur. A self insurance reserve is currently in place which provides compensation to incidents which are within certain limits whilst a reinsurance programme provides for compensation which are above these limits.

Programme 8.18:  Deadline Monitoring

It is important that the Legislative reporting deadlines and operational deadlines are monitored and controlled to ensure that the Municipality meets these deadlines by the due date.

The Deadline Monitoring System (DLMS):

- Alerts via email are sent to task owners 5 days before the deadline is due as a prompt for them to ensure deadlines are completed before due date;
- The responsible senior official and the task owner get and additional reminder, via email, 1 day before the deadline is due;
- If legislative and operational deadlines are not completed by due date this is escalated to the Head of Department to take action;
- A monthly report detailing all completed and outstanding deadlines is sent to Heads of departments.

The objective of the Deadline Monitoring System is to monitor and control all legislative reporting deadlines and critical operational deadlines to ensure that these are completed by the required due date.

Programme 8.19:  Movable Assets – plant and equipment

The Treasury Cluster is meeting the provisions of Section 63 of the MFMA (56)2003:

- An Asset Register which records all municipal assets;
- An Asset Management Procedure manual to cover the acquisition; maintenance and disposal of assets;
- Periodic physical counts are performed to verify the assets recorded in the Asset Register;
- All assets are insured following an annual verification and valuation exercise;
- Ensure that the milestones in the Asset Management Business Plan are met;
- In addition, ensure that the useful life of assets and impairment tests are done annually.

Programme 8.20:  Completion of Financial Statements

In accordance with the requirements of the MFMA the Annual Financial statements must be completed within two months after the financial year end.

The MFMA prescribes the accounting framework for local government i.e. Generally Recognised Accounting Practice (GRAP). GRAP is currently an incomplete framework in its developmental stages. GRAP 17: Property, plant and equipment is one of the most challenging accounting standards to comply with. Full compliance with the GRAP accounting framework is required to maintain the Municipality’s record of an unqualified Audit Report.
Programme 8.21: Payment of all Creditors and verification of SCM procedures

An electronic monitoring system has been developed to report on payments made outside the legislative period of 30 days from receipt of invoice.

Programme 8.22: Cash Control and Management

In terms of Section 64(d) of the MFMA the accounting officer must take all reasonable steps to ensure that all monies received is promptly deposited into the municipal primary and other banking accounts and 64 (h) that all monies received is reconciled on a regular basis.

Strategic Focus Area: Durban Energy Office

Programme 8.23: Conceptualising and initiating energy efficiency programmes

The objective of this program is to reduce the consumption of energy throughout the municipality, and in so doing, reduce operating costs for the municipality and making energy resources available for further economic development activities. The finalization and implementation of the eThekwini Municipality’s Energy Strategy has outlined 4 core themes for energy efficiency interventions, namely:

- **Theme A Residential Sector**: To encourage clean and sustainable domestic energy use to improve energy security and contribute towards the social health and welfare of communities throughout the EMA;
- **Theme B Local Authority and Public sector**: To work towards the elimination of all global and local pollutants arising from energy use within eThekwini Municipality’s own activities, as well as throughout the wider EMA, thereby promoting sustainable energy use and production across all sectors;
- **Theme C Industrial, Commercial and Agribusiness Sector**: To support the application of energy efficiency and renewable energy technologies in the industrial, commercial and agricultural sectors to work towards the elimination of net GHG emissions and all other energy-related atmospheric pollutants;
- **Theme D Transport Sector**: To work towards the elimination of all atmospheric pollutants arising from transport energy use by maximising the application of sustainable, energy efficient and renewable energy technology in both the public and private sector. To promote non –motorised transport and disincentivise private motorised transport. Development of a clean, safe, accessible and affordable integrated public transport system for all is key to achieving this goal.

Programme 8.24: Conceptualising and initiating renewable energy programmes

The objective of this program is to promote the development of renewable energy initiatives in the municipality, and in so doing, decreasing the dependence on the national energy supply and facilitating market transformation in the energy sector. The elements of this program include:

- Facilitating innovative financial incentives to stimulate the production of renewable energy and assist the market in over-coming financial barriers associated with renewable energy generation;
- Assessing key institutional, legislative, policy, socio-economic, technical and financial barriers and preparing actions that need to be taken to address these barriers;
- Development of an enabling policy that will involve developing a policy that addresses the key barriers and creates an enabling environment for decentralised renewable energy;
- Promoting large scale and decentralised grid-tied renewable energy generation.
Programme 8.25: Conceptualising and initiating climate change programmes

The objective of this program is to ensure that the municipality is able to respond to the risks and opportunities associated with climate change mitigation. The elements of the program include:

- Adopting national greenhouse gas emission reduction targets and identifying mitigation interventions to achieve these targets;
- Assessing the long term mitigation scenarios for the municipality and prioritising those that have affordable and achievable greenhouse gas reduction options;
- Developing and promoting tools for greenhouse gas emission inventory development;
- Facilitating access to information on climate change mitigation options in the municipality.

Programme 8.26: Energy Savings

The object of the programme is to reduce the consumption of energy within council and in so doing reduce operating costs to the municipality and making energy resource available for further economic development opportunities.

Strategic Focus Area: INK ABM

Programme 8.27: Implement INK projects

The implementation of the INK projects are reported under Plan 8. The projects identified are cross-cutting and impact all 8 plans. The programme is a multi-faceted urban and rural development programme to enhance service delivery, address spatial and social inequality, as well as deepen democracy, using an area based approach. The nature of work undertaken includes both infrastructure, social and economic projects.

Plans/Strategies/Policies Applicable to Plan Eight

Budget: Medium Term Budget 2010-11 to 2012-13:
The medium term budget plan sets out the economic context and assumptions that informs the following year’s budget, as well as the framework in which the budget is prepared. The budget framework consists of the fiscal framework; council’s spending priorities, the division of resources, and a tabulation of the conditional grants. The budget framework enables the Municipality to prepare their detailed budget for the following year.

Credit Control:
This policy has been compiled as required in terms of Section 97 of the Local Government: Municipal Systems Act 32 of 2000 and is designed to provide for credit control and debt collection procedures and mechanisms.

Rates Policy:
This document outlines the procedure and criteria applied by the Municipality to recover rates on different types of properties as the Municipality has the power to levy a rate on the property in its area as per the MPRA Act.

Tariff Policy:
It is the purpose of the policy to ensure that appropriate municipal services (whether commercial or not) are provided in a sustainable and equitable manner by setting realistic tariffs and to help to provide democratic and accountable government for the local community by providing meaningful information about the real costs of municipal services. It is believed that such information will encourage the involvement of civil society in the affairs of this Municipality.

Enterprise Risk Management Framework
Risk Management is identified as an integral part of responsible management and eThekwini therefore adopts a comprehensive approach to the management of risk. It is expected that all departments work together in a consistent and integrated manner, with the overall objective of reducing risks, as far as reasonably practicable. Effective risk management is imperative to eThekwini to fulfil its mandate, the service delivery expectations of the public and the performance expectations within eThekwini.

eThekwini Municipality Internal Energy Management Policy
The policy provides a systems approach for the Municipality that will enable it to optimise energy use on an on-going basis and to promote the development of renewable energy sources for its own use. The policy develops an accurate energy monitoring and evaluation management process for ensuring the implementation of energy efficiency measures that will manage the municipality’s internal energy demand as well as to identify potential renewable energy opportunities for implementation.
Chapter 4: Implementing the IDP

4.1 Introduction

The IDP is the Municipality’s single most strategic document that drives and directs all implementation and related processes. The Municipality’s budget is developed based on the priorities, programmes and projects of the IDP, after which a Service Delivery and Budget Implementation Plan (SDBIP) is developed to ensure that the organisation actually delivers on the IDP targets. Finally, the Annual Report records the success or otherwise of the previous year’s implementation. The organisation’s performance is monitored at various levels and within different processes, thereby underpinning the entire cycle. It is important to note here that the senior management of the Municipality is currently developing their annual 2012-2013 Individual Performance Plans (IPP). This integrated process is summarised diagrammatically below:

4.2 Our Municipality’s Capital and Operating Budget to deliver on our Strategy

It is important to note that the budget is compiled according to IDP principles and follows a process that prioritises the strategic programmes within the Municipality. It is monitored internally on a monthly and quarterly basis to ensure maximum expenditure, especially of the capital budget.

The Municipality’s total budget comprises of an operational budget and a capital budget. The Operational Budget is based on a detailed estimation of income and expenses which are forecasted on revenue from various resources to address cost needs for a given period of time. A Capital Budget is a Plan for raised large sums for long term investments towards the initiatives by the municipality e.g. project funding.
Our Capital Budget

2012/13 Budget Year
Capital expenditure program per vote

- Procurement & Infra. 90.1%
- Office of the City Manager 3%
- Treasury 1.3%
- Sustainable Dev. & City Enterprises 3.6%
- Corporate & Human Resources 0.0%
- Governance 0.3%
- Health, Safety & Social Services 2.2%

Our Operating Budget

WHERE THE MONEY COMES FROM

Penalties & Collection Charges R 132.1
Fines, Licences & Permits R 134.1
Interest on Investment R 234.7
Rental of Facilities & Equipment R 349.1
Other Income R 458.9
Fuel Levy R 1 690.6
Assessment Rates R 4 711.9
Grants and Subsidies R 4 841.6
Service Charges R 13 513.5

TOTAL OPERATING BUDGET R 26 066.5M
4.3. The SDBIP

The implementation of the Municipality’s IDP over the 2012/13 financial year is given effect through the Service Delivery Budget Implementation Plan (SDBIP). The SDBIP is the implementation tool used to align the budget to the IDP. The focus of the SDBIP is both financial and non-financial measurable performance objectives in the form of service delivery targets and other performance indicators.

The SDBIP is essentially the management and implementation tool which sets in-year information, such as quarterly service delivery and monthly budget targets, and links each service delivery output to the budget of the Municipality, thus providing credible management information and a detailed plan for how the Municipality will provide such services and the inputs and financial resources to be used.

The Service Delivery and Budget Implementation Plan (SDBIP) has to also detail the implementation of service delivery and the budget for the financial year in compliance with the Municipality Financial management Act (MFMA) which is the budget for a specific year or period, 2003 (act 56 of 2003). The MFMA is there to ensure that Local Government arranges it finance in a sustainable way to ensure that the prioritized objectives of the SDBIP/ Municipal Budget are met, and that the financials are used properly.

The SDBIP is structured for easy reference to the IDP, i.e. according to the programmes and projects of the Eight Point Plan. The SDBIP is available to the public for inspection and comment.
4.4 Departmental Business Plans

There are a number of processes and actions that are not captured in the IDP which take place throughout the Municipality. These are not programme-based initiatives and do not vertically integrate with other initiatives, but are activities that are based in and specific to the workings of the departments concerned. Together with the projects that are contained in the IDP, these activities are captured in the business plans of the various Clusters and departments. The business plan provides the basis for determining, not only the performance plans for senior management, but also for the rest of the organisation, as is required by the Municipal Systems Act.

4.5. The Annual Report

The Annual Report for the current five year IDP has been structured in line with our IDP 8 Point Plan. The Annual Report provides a collation of the year’s activities as recorded by the Municipal scorecard, the budget and the quarterly targets. Note that full copies of the Municipality’s latest Annual Reports are available at any municipal office.

4.6. The Municipality’s Performance Management System

The Municipal scorecard sets the broad five year targets which are assessed annually. Five-year targets coincide with the term of office of new Councillors. The performance management system is broken down into the development of the individual performance plans for senior management and the revision of the municipal scorecard. The Municipal scorecard can be read with the national KPAs and against the Eight Point Plan of the IDP.

The five National Key Performance Areas are:

1. Basic Service Delivery
2. Local Economic Development
3. Good Governance and Public Participation
4. Municipal Institutional Development and Transformation
5. Municipal Financial Viability and Management.
The table below outlines the relevant assessment authority that ensures legal compliance of each of the processes:

Table 12: National and Provincial Assessment Process for each Task
Source: eThekwini Municipality

### 4.7. Risk Management

Through an intensive internal consultation process the municipality has identified its’ risks in terms of delivering on its mandate. These risks were classified from priority 1 – 5 rating, where 1 is highest risk and 5 being lowest risk. Detailed risk management plans are being developed at a departmental level for the following risks with a priority rating of 1 – 3:

1. Financial sustainability
2. Fraud and corruption
3. Existing infrastructure (existing infrastructure failure)
4. Supply Chain Management
5. IT systems
6. Skills
7. Business Continuity
8. Adequacy and pace of service delivery
9. Social cohesion
10. Private sector investment in the City
11. Sustainability of natural resource base, including climate change
12. Compliance
13. Credit rating
Annexure 1: Functions and Structure of the Municipality

In the new dispensation, the eThekwini council has 205 councillors. One hundred and three (103) of them are elected ward councillors and the other hundred and two (102) candidates were elected to represent political parties on the basis of proportional representation.

Functions and Powers

Mayor

The Mayor of our Municipality is the chairman of the Executive Committee. He performs the duties, including any ceremonial functions, and exercises the powers delegated to the mayor by the municipal council or executive committee.

Executive Committee (EXCO)

The council established an Executive committee comprising 10 members. The mayor decides when and where EXCO meets. It is composed in such a way that parties and interests represented in the Council are represented in EXCO in the same proportion.

The Executive committee is the management or principle committee of the Municipality. It receives reports from other committees of council and must forward these reports together with its recommendations to the full council.

Support Committees

The council has five committees and every councillor serves on one committee. The support committees, which are advisory bodies to the Executive Committee, are chaired by Members of the Executive Committee.

The support committees are:

- Economic Development & Planning Committee
- Finance & Procurement Committee
- Governance & Human Resources Committee
- Health, Safety & Social Services Committee
- Human Settlements & Infrastructure Committee

Oversight Committees

The council has three oversight committees in place. These include:

- Audit Committee
  The Committee, which is an advisory body to the council, political office bearers, the accounting officer and management of the municipality and the municipal entities, comprises six external independent members. The Committee meets at least once a
quarter. Its responsibilities are outlined in Section 166 (2) of the Municipal Finance Management Act (MFMA)

- Civilian Oversight Committee
  The Committee advises the Municipality on matters related to the Metropolitan Police Service.

- Municipal Public Accounts Committee
  The primary function of the MPAC is to assist council to hold the Administration, municipal agencies and entities accountable for their management of municipal funds and assets in order to ensure the efficient and effective utilization of council resources.

Office of the Speaker

The Local Government Municipal Structures Act provides that each municipal council must have a chairperson who is called the Speaker. The Speaker is elected by the council from among the councilors at the first sitting of the council after the local government elections.

The Speaker acts as a chairperson at council meetings, and ensures compliance with the councillors’ code of conduct and the council’s rules and orders. He or she also ensures the proper functioning of the legislative side of the council, and is required to be impartial. The Speaker also ensures community participation in legislative initiatives and should communicate with the public on the performance of the council. The speaker has ex officio sitting in all committees of the council, with no voting rights.

Reporting lines

The Municipal Manager reports to the Council, its Executive Committee and its office-bearers (particularly the Mayor and Speaker).

The Administration is organized as follows:

- Municipal Manager, with some Offices reporting directly to the Municipal Manager;
- Deputy Municipal Managers who report to the Municipal Manager: These Deputy Municipal Managers have defined strategic and line function responsibilities;
- Heads of Units which report to specific Deputy Municipal Managers; and
- Departments which report to Heads of Units.
Organisational Structure

Figure 1: Organisational Structure
Source: eThekwini Municipality, Approved 23/04/2010
Figure 2: Organisational Structure
Source: eThekwini Municipality
Municipal Manager's office

In addition to managing the Deputy Municipal Managers, four offices will report directly to the Municipal Manager:

- Office of Geographical Information and Policy: This office will drive the municipal geographic and information technology programme and integrate all policy review programmes;
- Office of Audit, including performance management;
- Office of the Ombudsperson;
- Performance Monitoring and Evaluation;
- Legal Services; and
- Strategic Projects.

Strategic Management Team

The Municipal Manager will establish a Strategic Management Team consisting of the Manager and his Deputy Municipal Managers. This committee will meet once per week. The majority of the team will be on Section 57 contracts linked to the Manager. The roles of Deputy Municipal Managers will be to drive and integrate programmes across functional areas as well as to head up clusters.

Seven Deputy Municipal Managers (DCMs) will be appointed into the following portfolios:
- Governance;
- Sustainable Development and City Enterprises;
- Procurement and Infrastructure;
- Health;
- Safety and Social Services;
- Corporate And Human Resources;
- Treasury.

Broad Management Forum

The Broad Management Forum will consist of the Municipal Managers, Heads of the Municipal Manager's Offices, Deputy Municipal Managers and all Heads of Units.

The Broad Management Forum will meet at least on a monthly basis (after Council) to deal with general issues and programmes of council.

In addition, the Deputy Municipal Managers will head clusters of Units which meet at least on a monthly basis to (i) review strategic directions and progress on the Integrated Development Plan (IDP) and (ii) ensure coordination between departments.

How the EPWP responds to our IDP’s Development Matrix

The objectives of the EPWP are as follows:

- Decreasing the number of the masses of the unemployed people in the Greater eThekwini Municipality area of jurisdiction.
- Provision or facilitation of access to training of the unemployed to enhance their chances of being employable.
- Scaling up the provision of Work Experience Opportunities for Graduates.
- Scaling up provision of opportunities to Skills Programmes, Learnerships and Recognition of Prior Learning for people with experience and potential to enhance their employment or self-employment opportunities.
- Continuation with research, surveys, community needs assessments, skills audits and verification of needs of the most vulnerable families working closely with community structures and other key stakeholders and role players.
- Strengthen linkages and partnerships to maximize resources and enhance capacity to accelerate service delivery.

This multi-sectoral approach of the EPWP can be seen in the table below:

Annexure 3: Long Term Development Framework (LTDF) - Imagine Durban

Many cities around the world are competing with one another on the global open market to become economically competitive and in so doing, are inadvertently creating unsustainable environments. Pressure is increasingly been placed on our natural resources and the citizens that live in the Municipality and surrounding areas. To truly embed sustainability it is important to hold a compelling vision of public good, to address inequality amongst rich and poor, to ensure a more caring and committed society and to address the lack of human development and access to amenities that improve the quality of life for all.

Against this background then, it is clear that the Municipality has indeed a direct role to play in the facilitation and management of long-term planning and development processes that consider the issue of sustainability. In rising to this challenge, the Municipality has used the opportunity of the review of the Council’s Long Term Development Framework (LTDF) that was adopted in 2001, to ensure that sustainability in all its facets is embedded into the Municipality.

The Municipality decided that the LTDF would be revised through the longer term planning process that is being marketed as the “Imagine Durban Process”. In essence, the Imagine Durban process involves enabling us to place a long term lens over the existing planning framework to produce a clear and effective long term action plan that outlines the steps to be followed in order to implement and operationalise our vision for the future. More importantly, it is about creating a community-based process to agree on a desired development path and to mobilize resources across the Municipality which will afford an action oriented framework with specific aspirational targets, implementable programmes and measurable project outcomes. It is hoped that through the implementation of these programmes that we will be able to reach a far more sustainable municipality with an educated and empowered citizenry who will enjoy a high quality of life.

The revised LTDP was finalised and adopted by Council in January 2010. The implementation phase has now begun with the facilitation of action by government and social partners towards achieving the vision of the Municipality.

The Imagine Durban process which is being implemented in partnership with the Sustainable Cities International, a Non-governmental organisation from Canada and the Sustainable Cities International Network, a network of 40 cities in 14 countries established to share experiences in sustainable planning has begun mobilising thousands of eThekwini citizens from all walks of life. The following key issues have emerged as the top priorities in the Long Term Plan:

- Creating a SAFE city;
- Ensuring a more ENVIRONMENTALLY SUSTAINABLE city;
- Promoting an ACCESSIBLE city;
- Creating a PROSPEROUS city where all enjoy SUSTAINABLE livelihoods;
- Fostering a CARING and EMPOWERING city;
- Celebrating our CULTURAL DIVERSITY, HISTORY and HERITAGE.
The diagram below demonstrates the need for Local Government, Individuals, Business and Organisations to each play a role in order to achieve targets and a path towards sustainable living for all.

During the 2010 / 2011 year, the emerging Imagine Durban goals and strategies began to inform the IDP goals and strategies.

What appears below is an indicative framework of how the various priorities outlined in the IDP can be achieved in the longer term. Note that the priorities are listed as milestones to be achieved by a projected date, and not when the programme will commence. For example, climate protection interventions must begin now if a sustainable city is to be achieved by 2100.

Annexure 7: Municipal Turnaround Strategy

eThekwini Municipality

Local Government Turn Around Strategy
1. Background and Purpose of Report

The Local Government Turn Around Strategy (LGTAS) was developed by National Department of Co-operative Governance and Traditional Affairs (COGTA) in November 2009. The process was launched provincially at the ICC on the 11 March 2010. Each Municipality would need to embark on a process to develop a LGTAS based on the COGTA assessment of the municipality.

The internal process with the Deputy City Managers and Portfolio Chairpersons had commenced in 2010. Against this background, the purpose of this report is to:

- Summarize the findings of the COGTA Assessment
- Identify the key areas of intervention for the municipality
- Incorporate the key intervention areas into the 2012/13 IDP
- Report on progress of the LGTAS for the year ended

2. Summary of COGTA Assessment

The COGTA assessment was based on the following key focus areas. The findings are summarized as follows

Governance
- Good relations between ruling party and larger opposition parties
- No instances of complete breakdown in relations
- Opposition parties accuse Senior Administration of pursuing their own agenda’s
- Opposition parties accuse Senior Administration of depriving them of information

Council System and Procedure
- Council systems are in place and working well
- Opposition parties raised the issue of clarifying the role of the Chief Whip
- Communication with councilors and communities need to be improved
- Inadequate support to ward committees by the municipality
- The accountability of the CDW’s in the municipality
- No formal agreement in place to interact with Traditional Leaders, even though this does take place
- Lack of understanding of the Oversight role of Councilors
- Improving the response to the Complaint Management Systems

Financial Management
- Municipality continued to receive unqualified audits
- Employment equity and representivity needs to be improved in the finance department
- Retention and recruitment strategy’s for the finance department need to be addressed
- Establishment of SCOPA and the use of existing monitoring systems eg Audit Committee must be effectively utilized
Service delivery
- Well performing municipality in terms of service delivery
- Rural areas however are underdeveloped
- Service delivery protest are limited
- Unfunded mandates were raised as concerns by the municipality as well as the communities
- Debt from provincial and national departments need to be recovered

Labour Relations
- Unions raised the issue that the Labor Relation Forum do not meet as planned, which results in delays in resolving labor disputes
- The issues of agency and contract workers were raised by the union as a serious concern

4. The Priorities for the LGTAS

Through the internal process of consultation with the DCM’s and portfolio chairpersons the following priorities were determined. Progress for each of the priorities is noted accordingly.
<table>

| Monitoring of revenue to meet costs | - Continue to enforce debt collection and credit control policy. Review expenditure if income projections are not realized  
- Need to reduce debtors  
- Focus on outstanding debt from National and provincial government  
- Focus on resolving Unfunded mandates  
- Impact of MPRA on the ratios requires careful analysis in terms of impacts. Especially with regards to schools, hospital and security(2,5% of residential) | Ongoing                  | Krish Kumar        | - Debt Collection & Credit Control Policy being strictly adhered to. Ongoing disconnections, redlining of customers, final demands and legal process. No need to change as income in line with projections.  
- Government debt under control. The amount for schools has been paid and we are currently finalizing the confirmation of the unconfirmed properties. There is only R60M due for Hostels which will be paid in this current financial year.  
- As regards the Ingonyama Trust, the municipality is following up with the relevant authority. The appeal has been heard, we are waiting for the judgment.  
- The issue of unfunded mandates has been raised with the appropriate Provincial and National forums.  
- The case with the Private schools on this matter is still sub judice. The impact has been done and the Municipality will stand to lose a lot of revenue should we not charge rates on these properties |

Annexure 8: 2011/12 MEC Comments

The eThekwini IDP is as per previous years been kept short, crisp and strategically focussed. The MEC for Co-operative Governance and Traditional Affairs noted in her November 2011 assessment of the 2011/12 IDP, that the IDP had a credibility rating of 91% (up from the 90% for the 2010/11 IDP) and was ranked 2nd in the Province. The MEC made the following observations with regard to the 2011/12 IDP (IDP office responses are indicated in bullets):

Municipal Transformation and Institutional Development:

The Municipality’s commitment to municipal transformation and institutional development was commended. The high quality of the Municipality’s Performance Management System was noted as well as the exceptional manner in which it has been aligned and integrated into the Key Performance Areas, 8 point plan, strategic focus areas and the SDBIP. The current format of the Municipality’s Organogram was seen as being difficult to assess where specific activities take place and a recommendation was made that a more detailed Organogram be provided. A summary report on the results of a Skills Audit should also be included in the IDP.

- An electronic copy of the organogram giving an indication of the senior management posts within each cluster, department and unit within the Municipality has been included in the submission.

Local Economic Development:

Plan 2 of the IDP is dedicated to the economic development of the area which is in line with the provincial priority to create decent work and economic growth and it also updates areas of the LED Plan which makes it relevant for the future economic development of the municipal area. Plans supplementing the LED components have been highlighted however there is a need for additional economic sector plans and ABM profiles and/or plans to be developed.

- Additional economic sector plans/policies have been included.

Basic Service Delivery and Infrastructure Investment:

The significant impacts which the Municipality has made in terms of service delivery and the provision of free services to its citizens was acknowledged. In addition, the Municipality was commended for aligning its service delivery issues with the provincial priorities, accepting its role in implementing the EPWP programme and the various plans its has compiled in dealing with infrastructure issues.

Financial Viability and Financial Management:

The Municipality’s approaches to generate income and to identify new targets for growing and diversifying its revenue base were acknowledged. Further advised to address the irregularities raised in the Auditor Generals comments.
Good Governance and Community Participation:

The Municipality's commitment to good governance was commended. It was recommended that an HIV/AIDS plan be compiled or existing one be updated and an existing portfolio committee be assigned the youth development function.

- Youth development/programmes are dealt with in the Governance & Human Resources Committee.
- HIV/AIDS Workplace Policy and HIV/AIDS 2012/16 Strategic Plan has been included.

Spatial Development Framework:

The SDF was commended for promoting a systematic implementation of special directives through a suite of plans as well as for its alignment with the PSEDS and PGDS. It advised that a hardcopy of the SDF should be submitted for each IDP and IDP review, the SDF illustrate with greater clarity the locality of IDP projects in the spatial context of the SDF.

- Hard copy of SDF will be submitted.
- Due to the size and extent of the Municipality as well as the large number of projects it is not practically possible to include all the projects on the SDF.

Implementation of the Provincial Flagship Program:

The Programme has been extended to all wards and as a result the IDP would need to reflect the implementation of the programme in all wards.

- Due to the number of projects per ward a digital copy of the capital budgets will be included in the final submission.

General Comments:

The Municipality was requested to communicate with the Department of Community Safety and Liaison regarding the incorporation of a Community Safety Plan.

- The Safer Cities unit has initiated a process to incrementally develop ward safety plans.

REPORT OF THE AUDITOR-GENERAL TO THE KWAZULU-NATAL PROVINCIAL LEGISLATURE AND THE COUNCIL ON ETHEKWINI MUNICIPALITY REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

Introduction

1. I have audited the accompanying consolidated and separate financial statements of the eThekwin Municipality, which comprise the consolidated and separate statement of financial position as at 30 June 2011, and the consolidated and separate statement of financial performance, statement of changes in net assets and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information as set out on pages 192 to 277.

Accounting officer’s responsibility for the consolidated financial statements

2. The accounting officer is responsible for the preparation and fair presentation of these consolidated and separate financial statements in accordance with the South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) and the requirements of the Local Government: Municipal Finance Management Act of South Africa, 2003 (Act No. 56 of 2003) (MFMA) and the Division of Revenue Act of South Africa, 2010 (Act No. 1 of 2010) (DORA), and for such internal control as management determines necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor-General’s responsibility

3. As required by section 188 of the Constitution of the Republic of South Africa, 1996 (Act No. 108 of 1996) and section 4 of the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA) and section 126(3) of the MFMA, my responsibility is to express an opinion on these consolidated and separate financial statements based on my audit.

4. I conducted my audit in accordance with International Standards on Auditing and General Notice No. 1111 of 2010 issued in Government Gazette No. 33872 of 15 December 2010. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance that the consolidated and separate financial statements are free from material misstatement.

5. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated and separate financial statements. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the municipality’s preparation and fair presentation of the consolidated and separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of
expressing an opinion on the effectiveness of the municipality’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated and separate financial statements.

6. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

7. In my opinion, the consolidated and separate financial statements present fairly, in all material respects, the financial position of the eThekwini Municipality and its subsidiaries as at 30 June 2011, and their financial performance and cash flows for the year then ended in accordance with the SA Standards of GRAP and the requirements of the MFMA and DORA.

Emphasis of matters

8. I draw attention to the matters below. My opinion is not modified in respect of these matters:

Irregular expenditure

9. As disclosed in note 43 to the consolidated financial statements, irregular expenditure amounting to R1,329 billion was incurred mainly as a result of contracts awarded to suppliers, which was in contravention of the Local Government: Municipal Supply Chain Management Regulations (GNR 868 of 30 May 2005) (Municipal SCM Regulations). An amount of R2,056 billion relating to the current and prior year was condoned by council during the year under review.

Material losses and impairment

10. As disclosed in note 51 to the consolidated financial statements, material losses relating to water and electricity amounting to R360,4 million and R262,8 million, respectively, were incurred by the municipality mainly due to the deterioration of the water reticulation system and illegal water and electricity connections. Furthermore, an amount of R271 million was written off as bad debts during the year.

Additional matter

11. I draw attention to the matter below. My opinion is not modified in respect of this matter:

Unaudited supplementary schedules

12. The supplementary information set out on pages 278 to 287 does not form part of the financial statements and is presented as additional information. I have not audited these schedules and, accordingly, I do not express an opinion thereon.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

13. In accordance with the PAA and in terms of General Notice No.1111 of 2010, issued in Government Gazette No. 33872 of 15 December 2010, I include below my findings on the annual performance report as set out on pages 48 to 105 and material non-compliance with laws and regulations applicable to the municipality.
Predetermined objectives

14. There are no material findings on the annual performance report.

Compliance with laws and regulations

Procurement and contract management

15. Awards were made to service providers who were persons in the service of the municipality or other state institutions, which is contrary to Municipal SCM Regulation 44.

16. Contracts were extended without the reasons for the proposed amendments being tabled in council. The local community was not given reasonable notice of the intention to amend the contract as well as being invited to submit representations as required by section 116(3) of the MFMA.

Expenditure management

17. The accounting officer did not take all reasonable steps to prevent irregular expenditure, as required by section 62(1) (d) of the MFMA.

INTERNAL CONTROL

18. In accordance with the PAA and in terms of General Notice No.1111 of 2010, issued in Government Gazette No. 33872 of 15 December 2010, I considered internal control relevant to my audit, but not for the purpose of expressing an opinion on the effectiveness of internal control. The matter reported below is limited to the material deficiencies that resulted in the basis for the findings on compliance with laws and regulations included in this report.

Financial management

19. The municipality and its municipal entities did not implement an effective internal monitoring system in the form of a compliance checklist for the year under review to ensure that all SCM regulations were adhered to prior to awards being made.

OTHER REPORTS

Investigations completed during the financial year

20. Ten internal investigations relating to alleged procurement irregularities and non-compliance with Municipal SCM Regulations by council employees were finalised during the year. In four cases, the procurement process was found to be in compliance with the Municipal SCM Regulations and no further action was deemed necessary and in six cases, council employees were found to have breached SCM regulations, which resulted in disciplinary action and the resignation of employees.

Investigations in progress

21. Thirteen internal investigations relating to alleged procurement irregularities and non-compliance with Municipal SCM Regulations by council employees are in progress. In addition, the forensic investigation initiated by the KwaZulu-Natal Department of Cooperative Governance and Traditional Affairs relating to alleged tender irregularities at the eThekwini Municipality housing department is in progress.
Performance audit

22. The performance audit report on the use of consultants has been discussed with management and is in the process of being finalised.

Pietermaritzburg
22 December 2011
Annexure 10: Management response to Auditor Generals Comments

EMPHASIS OF MATTER
IRREGULAR EXPENDITURE
Irregular Expenditure for the year relates to the non compliance of the Supply Chain Management Regulations. The details of which are:

### 20. ETHEKWINI MUNICIPALITY

Awards made to entities whose directors/ members/ principal shareholders/ stakeholders were in the service of eThekwini municipality 37,546

123 awards made to 109 entities whose directors/ members/ principal shareholders/ stakeholders were in the service of other state institutions 84,650

7 awards made to entities whose directors/ members/ principal shareholders/ stakeholders were in the service of eThekwini municipality as Councillors 1,658

**TOTAL IRREGULAR EXPENDITURE FOR THE YEAR** 1,328,799

Condonation & recoveries of irregular expenditure amounted to R2.056billion for the year.
The Cumulative balance of Irregular Expenditure at 20 June 2011 is R188 million.

The following initiatives have been implemented to ensure compliance with the Supply Chain Management Regulations:

A. Monitoring Controls

In order to improve monitoring controls and the bid process prior to the awarding of contracts to service providers, the following measures have been implemented:

- The screening of tender documents in respect of compliance issues in terms of SCM Regulations
- Pre budget checks by accounting staff
- Business process re-engineering of SCM
- An E-Procurement System is currently being implemented to mitigate against the risk of splitting of orders and cover quoting of orders under R200 000
- Access to the Contract Management System has been restricted to authorised personnel
- Mandatory field included at order entry level to ensure orders can only be placed with accredited suppliers
- Blacklisting policy now approved and implemented

B. Non disclosure of business interests

The following controls are being implemented:

- Pre checking of directors and members of CC’s, Sole Proprietors and (Pty)Ltd companies
- Amended disclosure forms being developed for completion by all staff
- Procurement Unit allowed access to DRL – Staff details.

C. In terms of disciplinary enquiries instituted against employees that have transacted with the municipality and all affected contracts cancelled/terminated:

Disciplinary action has been instituted against 39 employees and the services of 6 employees have been terminated.

D. Cancellation of Contracts

With due regard to basic service delivery, all contracts awarded to employees, councillors or employees of the state will be terminated upon the finalisation of an investigation. The supplier shall be blacklisted and added to the register of restricted suppliers.

E. Non-compliance with 116(3) of the MFMA

SCM Circular 004-2011 has been prepared and issued to ensure the appropriate information is included in reports to Bid Adjudication Committee that, from the 1st Quarter of 2011/2012,
will be included as a separate report in addition to the other reports submitted by the SCM Unit.

MATERIAL LOSSES

WATER LOSS

Water losses of 104,321,876 kl (2010: 124,847,528 kl) occurred during the year under review, which resulted in material revenue losses to the municipality.

The estimated water losses amounting to R360.4m (2010: R406.2m).

The water loss reduced from 37.5 % in 2009/10 to 33.2 % in 2010/11 with a target of 25 % in the next 8 years. The current South African average is 34.7 % whilst the African average is 36.0 %.

About 1600 kms of pipeline has already been replaced via the Asbestos Cement Pipe replacement programme and further replacements will be undertaken in terms of the normal programme.

In addition these are some of the water loss interventions that are being implemented:

1. During the year 230 Pressure Reducing Valves and 7 innovative i 20 Pressure Controllers were installed with more installations to be done in the 2011/12 year.

2. The Leak Detection and Repair Strategy with a total of 16 Category B plumbers in formal and informal areas have proved extremely successful with a dramatic increase in the number of leaks repaired.

3. With the Informal Area Metering 185 meters of the targeted 600 connections were installed and registered on the COINS Billing Database. Further dedicated support has been assigned to this intervention.

4. 760 consumer meters less than 40mm in diameter and 335 meters greater than 40mm were replaced in terms of the Meter Replacement Programme for ICI customers.

5. 2 Custody Transfer Point Check Meters which measure 50 % of the total volumes from Umgeni have been ordered and will be installed in due course. Verification and testing of other meters is also being done.
6. In terms of the programme for Meter Replacement for Domestic Consumers which are more than 20 years old a total of 3049 out of a target of 22136 has been achieved.

7. With the Water Amnesty programme a total of 1397 new connections were registered.

**ELECTRICITY LOSSES**

Electricity losses of 630,883,534 kWh (2010: 567,719,675 kWh) occurred during the year under review which resulted in revenue losses to the municipality. These estimated electricity losses amounted to R262.8m (2010: R160.4m).

The norm for electricity losses ranges from 5.6% to 12%. The loss incurred by the municipality is 5.5% (2010: 4.9%) and is due to a combination of transmission losses (Technical energy losses) and losses due to illegal connections (Non-technical energy losses).

In comparison to other Metro's, eThekwini Municipality maintains its losses at a lower end of the norm.

Transmission losses are inevitable, however, the following interventions have been implemented:

1. **Optimal Network Configuration:**
   The Planning and Design engineers ensure that all network additions are implemented with correct equipment ratings and configuration so as to minimize losses.

2. **Effective Maintenance on Network:**
   The unit has adopted a comprehensive maintenance schedule to promote the reliability of the network as well as enhance the efficiency of the network.

3. **Efficient Network Loading:**
   Power flow into the network is carefully monitored on a 24 hour basis and the correct, most efficient electrical loading configuration is adopted.
Illegal electricity connections are a major contributing factor to non-technical losses. The following interventions have been implemented to curb illegal connections:

1. Area Sweeps:
The Revenue protection teams continuously investigate high theft area's to remove all illegal connections.

2. Employment of security Intelligence Teams:
Private investigators are deployed to site to try and gather evidence to apprehend suspects.

3. Installation of anti-theft technologies at substations:
The employment of this technology deters intruders from entering into substations and carrying out illegal connections.

4. Theft Hotline:
A 24 hour hotline has been set up to report acts of theft and illegal connections - Once a suspicious activity is reported, security will be dispatched immediately to the affected site.

**BAD DEBTS WRITTEN OFF**

Debt of R271m (2010:456m) was written off during the year.

30% of the debt written off was interest raised on prescribed debt. Only the capital amount was written off in the previous year, in the current year interest relating to this debt was written off.

Prescribed debt is debt that cannot be legally recovered. The Municipality took steps to write-off this debt which is considered irrecoverable so that efforts can be focused on debt that can still be recovered.

This debt was written off in terms of Prescription Act which forbids the Municipality to recover prescribed debt as advised by our legal advisor.
38% of the debt written off was rental debt owed by Hostel residents.

Debt Written off in the current year has decreased by 41% in comparison to the previous year.
Annexure 11: List of Sector Plans

Plan 1
- eThekwini Municipality Generic EMP for Construction Activities
- Spatial Development Framework
- LTDF – “Imagine Durban”
- eThekwini Industrial Spatial Strategy
- Durban Environmental Services Management Plan

Plan 2
- eThekwini Agricultural Status Guidelines
- Agricultural Policy for eThekwini
- Economic Development Strategy
- INK Economic Development Profile
- Markets Policy for eThekwini Municipality
- Allocations Policy Governing Trading Opportunities and Permits to Informal Traders on Council Owned Properties
- Durban’s Informal Economy Policy
- A strategy for Development of Community Tourism organizations within the eThekwini Municipal Area
- Business Support and Markets Unit Improvement of SMME access to Finance Strategy
- A Strategy for the Improved Management and Development of Container and Itinerant Traders within the eThekwini Municipal Area
- A Consistent Rental Policy for Informal Trading in eThekwini Unicity

Plan 3
- EPWP Policy Framework
- Housing Sector Plan
- Transport Plan
- Waste Management Plan
- Water Services Development Plan
- Policies and Practices of the eThekwini Municipality Water and Sanitation Unit
- Guidelines and Policy for the Design of Stormwater Drainage and Stormwater Management System

Plan 4
- Vulnerable Groups Policy
- eThekwini Disaster Management Framework
- Crime Prevention through Environmental Design (CPTED)
- Safe drums Policy
- HIV/Aids 2012/16 Strategic Plan
Plan 5
• Youth Development Policy
• Employment Equity Plan
• Workplace Skills Plan
• Employee Practices Policy
• Scarce Skills Policy
• Talent Management Strategy
• Assisted Education Policy

Plan 7
• Service Delivery and Budget Implementation Plan
• Community Participation Policy
• Anti-Fraud and Anti-Corruption Policy
• City Stars Recognition and Rewards Policy
• Communications Policy
• Fraud and Corruption Prevention Strategy
• Incapacity Management Policy and Procedure: Ill Health/Injury
• Performance Management Policy and Procedure
• Guidelines for the Prevention and Management of Posttraumatic stress Disorder
• Batho Pele Policy
• Wellness Policy and Programmes
• Employee Assistance Programme Policy
• Policy on sexual Harassment
• HIV/AIDS Workplace Policy
• Code of Conduct for Employees
• Policy on the Control of Firearms, Dangerous Objects and Weapons at the Workplace
• Driver Training and License Verification Policy
• eThekwini Municipality Policy on Acceleration of Salary
• Information Security Policy for eThekwini Municipality
• Customer Care Policy
• Travel Policy

Plan 8
• Budget: Medium Term Budget 2010-11 to 2012-13
• Credit Control
• Rates Policy
• Tariff Policy
• Enterprise Risk Management Framework
• eThekwini Municipality Internal Energy Management Policy

Sanitation and waste water treatment - gravity feed; Interchange upgrade; electrical

**Project Scope - Key economic sectors**
Metal products; Food and beverage; Transport equipment; Transport and warehousing

**Project Scope - Economic strategy**
Conversion of non-viable commercial sugar cane farms into industrial to support growth opportunities along N3 corridor (PMB-DBN Port corridor)

**Project schedule**
Preliminary Layout, Design and Statutory Approvals in 2012

**Challenges**
EIA phase to be concluded. Environmental restrictions on phase 2 development which caters for housing of employees and social amenities. GLA restrictions posed for wider region based on road and waste water capacity constraints along N3 and Hammarsdale treatment works respectively. Funding Constraints.
Project Name
BRIDGE CITY NEW TOWN CENTRE

Project Description
Industrial, Retail, Residential

Status
Multiple projects, so range of project statuses. Retail, intermodal and magistrates court being built

Construction employment per annum
696

Operational employment per annum
1,855

Projected cost to completion (Rand Billion)
0.77

Project Scope - Typology
Mixed use retail, housing and government precinct

Project Scope - Land uses
Mixed Government; Hospital; Retail and Housing

Project Scope - Infrastructure requirements
New 4km rail line supplied by PRASA. Interchange funded by NDPG and EMA

Project Scope - Key economic sectors
Government; Retail; Public transport; community services; offices

Project Scope - Economic strategy
New Town Centre to serve the INK and Phoenix Townships

Project schedule
Detail Design and-or Construction to continue in 2012

Challenges
Funding Constraints.
**Project Name**  
**CAMPERDOWN-PORT FREIGHT ROUTE IMPROVEMENTS**

**Project Description**  
Transport and warehousing

**Status**  
Preliminary Layout and Design

**Construction employment per annum**  
5,793

**Operational employment per annum**  
538

**Projected cost to completion (Rand Billion)**  
10.00

**Project Scope - Typology**  
Specialized road infrastructure network that comprises of a dedicated freight route between Camperdown and Durban Harbour as well as associated freight terminal / staging areas.

**Project Scope - Land uses**  
Transport network and associated terminals / depots managed by the state and private sector

**Project Scope - Infrastructure requirements**  
Upgrade of N3; Cato ridge interchange; Kassier road interchange; Hans Detmman highway; M1 Richmond Road; M7 Interchange; Langerberg / Bayhead Road

**Project Scope - Key economic sectors**  
Transport and warehousing

**Project Scope - Economic strategy**  
Port support infrastructure and services

**Project schedule**  
Detail Design and Statutory Approvals to commence in 2012

**Challenges**  
Funding Constraints.
Project Name
CATO RIDGE INDUSTRIAL DEVELOPMENT

Project Description
Manufacturing, Transport and warehousing

Status
Preliminary Layout and Design

Construction employment per annum
10,621

Operational employment per annum
15,575

Projected cost to completion (Rand Billion)
11.75

Project Scope - Typology
Mixed use Industrial, Warehousing precincts

Project Scope - Land uses
Warehousing; Container and truck depots; MHI; General and Light industrial; Office and limited retail.

Project Scope - Infrastructure requirements
Widening of N3; dedicated Freight route along N3; 1 New interchange between Hammarsdale and Cato Ridge; Expansion of Hammarsdale Treatment works

Project Scope - Key economic sectors
Metal products; Food and beverage; Transport equipment; Transport and warehousing; Port-related; Freight sectors; Depots for the logistics industry

Project Scope - Economic strategy
 Provision of a port support zone between the Port of Durban and PMB, with a dedicated freight management facility for both inbound and outbound cargo. Conversion of non-viable commercial sugar cane farms into industrial to support growth opportunities along PMB-DBN Port corridor

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
The current infrastructure can only allow for approximately 120ha of industrial development in the catchment. This represents 10% of the total land required to support port and industrial expansion linked to the port. An intermodal between freight rail and road will be required in the future which will require at minimum 250ha for the terminal area alone. Funding Constraints.
Project Name
DURBAN INNER CITY AND POINT REVITALISATION

Project Description
Services, Retail, Residential, Tourism, B13

Status
Pre-feasibility

Construction employment per annum
3,403

Operational employment per annum
45,361

Projected cost to completion (Rand Billion)
7.77

Project Scope - Typology
Special zones comprising of dedicated Office; Residential; Tourism; Financial services; Shipping industry services; Recreation and Sporting; Intermodals; Theme Parks; High density developments along Coastal strip and passive Harbour interfaces (including a passenger terminal); Light service industrial; Retail along Warwick and further development of Greyville into office and residential. Special zones comprising of dedicated Office; Residential; Tourism and accommodation; Financial services; Establishment of a New Marina development (small craft harbour)

Project Scope - Land uses
Several Mixed use precincts

Project Scope - Infrastructure requirements
Integrated Rapid public transport for the Inner City. BRT. Increased parking facilities

Project Scope - Key economic sectors
Office, Tourism, Retail, Government service. Community services; Financial and Business services; Shipping Services; Light industry in special precincts; Markets; Public Transport; Housing

Project Scope - Economic strategy
Urban renewal of the Primary CBD and provision of increased Tourism; Accommodation; Shipping Services to support Port Expansion; Inner City Housing and Mega Events

Project schedule
Preliminary Layout and Design and Statutory Approvals to commence in 2012

Challenges
There is a need to finalize development concepts for the entire Inner City. Finalization of the concepts and approvals for the Waterfront; Victoria Embankment; Block AK; Upper Congella.

Funding Constraints.
Project Name
GREATER PINETOWN NODAL IMPROVEMENTS

Project Description
Mixed-use Nodal Development

Status
Preliminary Layout and Design

Construction employment per annum
2,223

Operational employment per annum
3,260

Projected cost to completion (Rand Billion)
2.46

Project Scope - Typology
Upgrading of the public realm; maintenance of transport infrastructure and upgrade of the Industrial areas and Town Centre

Project Scope - Land uses
Industrial and Mixed use Town Centre

Project Scope - Infrastructure requirements
Transport network and electrical

Project Scope - Key economic sectors
Mixed Industrial - all manufacturing sub-sectors

Project Scope - Economic strategy
Support and grow existing industrial areas and CBDs. There is a need for innovation in redefining the industrial areas and creating miniindustrial parks through interventions in the public realm. The intention is to create secure industrial parks.

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
The establishment of Urban Improvement nodes within the Greater Pinetown area.

Funding Constraints.
Project Name
HAMMARSDALE INDUSTRIAL DEVELOPMENT

Project Description
Manufacturing

Status
Preliminary Layout and Design

Construction employment per annum
6,056

Operational employment per annum
8,881

Projected cost to completion (Rand Billion)
6.70

Project Scope - Typology
Industrial parks

Project Scope - Land uses
Light industrial and warehousing

Project Scope - Infrastructure requirements
Sanitation and waste water treatment - gravity feed; electrical

Project Scope - Key economic sectors
Metal products; Food and beverage; Transport equipment; Transport and warehousing

Project Scope - Economic strategy
Conversion of non-viable commercial sugar cane farms into industrial to support growth opportunities along N3 corridor (PMB-DBN Port corridor)

Project schedule

Detail Design and Statutory Approvals to commence in 2012

Challenges
GLA restrictions posed for wider region based on road and waste water capacity constraints along N3 and Hammarsdale treatment works respectively.

Funding Constraints.
ISIPINGO TOWN CENTRE IMPROVEMENTS

Community and social services

Preliminary Layout and Design

Construction employment per annum
95

Operational employment per annum
633

Projected cost to completion (Rand Billion)
0.11

Upgrading of the public realm; maintenance of transport infrastructure and upgrade of the Town Centre

Mixed use Town Centre

Transport network and electrical

Light service industrial, retail, commercial and government services

Support and grow existing CBDs. This is an extension of the NDPG objectives to other CBDs that have not been supported by National Treasury however requires local municipal support

Detail Design and Statutory Approvals to commence in 2012

Funding Constraints.
Project Name
KWA MASHU TOWN CENTRE IMPROVEMENTS

Project Description
Retail

Status
Preliminary Layout and Design

Construction employment per annum
384

Operational employment per annum
1,024

Projected cost to completion (Rand Billion)
0.43

Project Scope - Typology
Upgrading of the public realm; maintenance of transport infrastructure
and upgrade of the Town Centre

Project Scope - Land uses
Mixed use Town Centre

Project Scope - Infrastructure requirements
Upgrade of KwaMashu Station, Transport network and electrical
Project Scope - Key economic sectors
Light service industrial, retail, commercial and government services

Project Scope - Economic strategy
NDPG supported initiative

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
Funding Constraints.
Project Name
MPUMALANGA TOWN CENTRE IMPROVEMENTS

Project Description
Retail

Status
Preliminary Layout and Design

Construction employment per annum
1,056

Operational employment per annum
2,817

Projected cost to completion (Rand Billion)
1.17

Project Scope - Typology
Upgrading of the public realm; maintenance of transport infrastructure and establishment of the New Town Centre to service wider region

Project Scope - Land uses
Mixed use Town Centre

Project Scope - Infrastructure requirements
Upgrade of Mpumalanga Station; Transport network and electrical

Project Scope - Key economic sectors
Light service industrial, retail, commercial and government services

Project Scope - Economic strategy
NDPG supported initiative

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
Funding Constraints.

Mpumalanga Town Centre Improvements
Project Name
PHOENIX AND INK NODAL IMPROVEMENTS

Project Description
Mixed-use Nodal Development

Status
Pre-feasibility

Construction employment per annum
3,620

Operational employment per annum
5,308

Projected cost to completion (Rand Billion)
4.01

Project Scope - Typology
Unlock infill opportunities; Upgrading of the public realm; maintenance of transport infrastructure and upgrade of the Industrial areas

Project Scope - Land uses
Industrial activity street upgrade

Project Scope - Infrastructure requirements
Transport network and electrical

Project Scope - Key economic sectors
Light service industrial

Project Scope - Economic strategy
Support and grow existing industrial areas

Project schedule
Preliminary Layout and Design to commence in 2012

Challenges
Funding Constraints.
Thekwini Municipality:
2011/2012 IDP

Project Name
SHONGWENI INDUSTRIAL DEVELOPMENT

Project Description
Manufacturing

Status
Preliminary Layout and Design

Construction employment per annum
912

Operational employment per annum
1,337

Projected cost to completion (Rand Billion)
1.01

Project Scope - Typology
New regional node along N3 from Dbn to PMB. Extension of the Hillcrest/ Assegay region closer to the N3. Introduction of industrial and warehousing to maximize on Freight route opportunities

Project Scope - Land uses
New Town Centre; retail, housing, government services; light industrial and warehousing

Project Scope - Infrastructure requirements
Upgrade of Kassier Road Interchange at Shongweni/N3; electrical; sanitation and waste water treatment

Project Scope - Key economic sectors
Government; Retail; Public transport; community services; offices; Light industrial and warehousing

Project Scope - Economic strategy
New Economic Node emerging on the N3 to support Port Expansion and growth of Inner West nodes

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
EIA phase to be concluded. Funding Constraints.
Project Name
SIBAYA RECREATIONAL NODE DEVELOPMENT

Project Description
Tourism

Status
Preliminary Layout and Design

Construction employment per annum
622

Operational employment per annum
8,289

Projected cost to completion (Rand Billion)
0.69

Project Scope - Typology
Extension of the recreational and resort development at Sibaya Casino

Project Scope - Land uses
New Resort

Project Scope - Infrastructure requirements
Upgrade of the M4 northbound (Ruth First Highway) at Sibaya; waste water

Project Scope - Key economic sectors
Tourism facilities

Project Scope - Economic strategy
Support and grow the Tourism sector. Increasing tourism products and services

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
EIA phase to be concluded. Environmental restrictions exist on the coastal zone. Conversion of non-viable coastal sugar cane farms. Funding Constraints.
**Project Name**  
**TONGAAT & DUBE TRADEPORT NEW TOWN DEVELOPMENT**

**Project Description**  
Manufacturing

**Status**  
Pre-feasibility. ToR issued for Preliminary Layout and Design

**Construction employment per annum**  
6,922

**Operational employment per annum**  
10,150

**Projected cost to completion (Rand Billion)**  
7.66

**Project Scope - Typology**  
Special zones comprising of dedicated Office; Residential; Tourism and accommodation; Financial services; Theme Parks; High density developments. Establishment of a New Motor Racing Circuit within Dube Trade Port and establishment of Airport support zones in neighbouring small Town of Tongaat and Verulam

**Project Scope - Land uses**  
Mixed use - Industrial. Office; Recreational; Housing; Retail and Entertainment

**Project Scope - Infrastructure requirements**  
Integrated Rapid public transport network. High speed rail between Durban CBD and Dube Trade Port

**Project Scope - Key economic sectors**  
Office, Tourism, Retail, Financial and Business services; Airfreight Services; Housing, Warehousing; Agrizone; Airport ancillary uses. Light industry

**Project Scope - Economic strategy**  
Urban renewal of the neighbouring small towns; facilitating infill opportunities to support the Airport precinct; Facilitating the growth of Dube Trade Port and increasing consumer thresholds for sustainability of the existing investments

**Project schedule**  
Preliminary Layout and Design to commence in 2012

**Challenges**  
 Provision of road infrastructure to support developments; electrical. Funding Constraints.
Project Name
UMGENI SPRINGFIELD INDUSTRIAL IMPROVEMENTS

Project Description
Transport and warehousing

Status
Multiple projects, so range of project statuses. Freeway interchange being completed

Construction employment per annum
1,409

Operational employment per annum
18,783

Projected cost to completion (Rand Billion)
1.56

Project Scope - Typology
Upgrading of the public realm; maintenance of transport infrastructure and upgrade of the Industrial areas. Upgrade of the interchange

Project Scope - Land uses
Industrial and Mixed use retail / offices

Project Scope - Infrastructure requirements
Upgrade of Springfield Station; Transport network and electrical

Project Scope - Key economic sectors
Light service industrial; Office; retail; ICT and strip retail

Project Scope - Economic strategy
Support and grow existing industrial areas. Densification of the Public transport corridors

Project schedule
Detail Design and-or Construction to continue in 2012

Challenges
Funding Constraints.
Project Name
UMLAZI NODES IMPROVEMENTS

Project Description
Mixed-use Nodal Development

Status
Pre-feasibility

Construction employment per annum
4,477

Operational employment per annum
1,194

Projected cost to completion (Rand Billion)
4.95

Project Scope - Typology
Upgrading of the public realm; maintenance of transport infrastructure and upgrade of the Town Centre

Project Scope - Land uses
Mixed use Town Centre

Project Scope - Infrastructure requirements
Upgrade of KwaMnyandu and Umlazi Station, Transport network and electrical

Project Scope - Key economic sectors
Light service industrial, retail, commercial and government services

Project Scope - Economic strategy
NDPG supported initiative

Project schedule
Preliminary Layout and Design to commence in 2012

Challenges
Funding Constraints.
Project Name
VERULAM & CORNUBIA NEW TOWN DEVELOPMENT

Project Description
Industrial, Retail, Residential

Status
Preliminary Layout and Design

Construction employment per annum
7,073

Operational employment per annum
18,858

Projected cost to completion (Rand Billion)
17.83

Project Scope - Typology
New regional node along R102 from Dbn to Dube Trade Port. Extension of the Verulam / Phoenix /Ottawa region closer to the R102 and N2. Introduction of industrial and warehousing; residential and retail uses

Project Scope - Land uses
New Town Centre; retail, housing, government services; light industrial and warehousing

Project Scope - Infrastructure requirements
Upgrade of R102; electrical; sanitation and waste water treatment

Project Scope - Key economic sectors
Government; Retail; Public transport; community services; offices; Light industrial and warehousing

Project Scope - Economic strategy
New Economic Node emerging on the R102 to support Dube Trade Port and the extension / revitalization of Verulam / Phoenix / Ottawa. Provision of 16,000 houses as part of the housing backlog

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
EIA phase to be concluded. Funding Constraints.
**Project Name**  
PORT IMPROVEMENTS  

**Project Description**  
Transport and warehousing  

**Status**  
Pre-feasibility  

**Construction employment per annum**  
71,292  

**Operational employment per annum**  
27,268  

**Projected cost to completion (Rand Billion)**  
325.00  

**Project Scope - Typology**  
Upgrade of the existing Durban Port and the development of a new Dig Out Port at the old Airport site in Prospecton  

**Project Scope - Land uses**  
Upgrade of existing Port; development of a New Port; transport; warehousing; industrial (general and light), office developments  

**Project Scope - Infrastructure requirements**  
Upgrade of Pier 1, Maydon Wharf, berth deepening, construction of airport site dig-out, road and rail expansions, development of hubs and terminals, Bayhead terminal  

**Project Scope - Key economic sectors**  
Development of a New Port and expansion of the existing Bayhead complex to take advantage of the growth in container trade; further develop manufacturing capabilities; service inbound trade; service trans-shipments into SADC; service exports.  

**Project Scope - Economic strategy**  
Reposition Durban as the Largest Port in the Southern Hemisphere and Durban at the Gateway to Africa  

**Project schedule**  
Preliminary Layout and Design to commence in 2012  

**Challenges**  
Land acquisitions, environmental approvals, interim leasing of airport site, dedicated freight route to N2.  

Funding Constraints.
Project Name
BACK OF PORT IMPROVEMENTS

Project Description
Transport and warehousing

Status
Preliminary Layout and Design

Construction employment per annum
10,572

Operational employment per annum
15,855

Projected cost to completion (Rand Billion)
26.32

Project Scope - Typology
Mixed use Industrial and warehousing precinct

Project Scope - Land uses
Warehousing; Container and truck depots; General and Light industrial; Office and limited retail. Interface with strip retail along South Coast road

Project Scope - Infrastructure requirements
Dedicated freight route; Multi-purpose pipeline between Island View and Refineries; Electrical

Project Scope - Key economic sectors
Port ancillary and support industries

Project Scope - Economic strategy
Provision of a port support zone between the Port of Durban and the proposed New Dig Out Port at the Old Airport Site in Prospecton

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
Department of public works and Department of Health are delayed in terms of finalizing the business case for the Provincial hospital.

Funding Constraints.
Project Name
CITY-WIDE REGENERATION PROJECTS

Project Description
Mixed-use Nodal Development

Status
Preliminary Layout and Design

Construction employment per annum
11,796

Operational employment per annum
4,718

Projected cost to completion (Rand Billion)
13.05

Project Scope - Typology
Regeneration of minor community-level nodes within Old Line Suburbs. Upgrading of the public realm such as improved landscaping and street-scaping; upgrading taxi and bus ranks; provision of formal traders stalls and markets; incentives / rebates for recycling of derelict buildings; unlocking infill opportunities and densification incentives along IRPTN

Project Scope - Land uses
Social housing; government services; community services and facilities; public realm upgrades

Project Scope - Infrastructure requirements
Public realm upgrades and maintenance of infrastructure - EPWP initiatives and MIG related

Project Scope - Key economic sectors
Community and social; government; retail; construction maintenance

Project Scope - Economic strategy
General Urban Renewal of areas that are not supported by Provincial and National Government however local priorities in terms of supporting ratepayers; enhancing the public realm; safety and security design; general environmental health

Project schedule
Detail Design and Statutory Approvals to commence in 2012

Challenges
Need for Area-Based Management.
Funding Constraints.
**Project Name**  
CITY-WIDE PUBLIC TRANSPORT IMPROVEMENTS

**Project Description**  
Transport

**Status**  
Preliminary Layout and Design

**Construction employment per annum**  
140

**Operational employment per annum**  
400

**Projected cost to completion (Rand Billion)**  
10.00

**Project Scope - Typology**  
Development of the high priority transport network into an integrated transport system incorporating rail and BRT. Provision and upgrade of existing stations as part of the National Station improvement plan with PRASA. And DoT

**Project Scope - Land uses**  
Extension and upgrade of the public transport network and services including terminals

**Project Scope - Infrastructure requirements**  
Road infrastructure; rail upgrades; rolling stock; rail, bus and taxi terminals

**Project Scope - Key economic sectors**  
Public transport services; integrated retail and office developments; financial business services and government services located within terminals

**Project Scope - Economic strategy**  
Integrating services and high priority developments through public transport network upgrades. Reducing travel times; reducing congestion; reduction in private vehicle usage; reduce cost of travel for citizens; and low carbon footprint

**Project schedule**  
Detail Design and Statutory Approvals to commence in 2012

**Challenges**  
Funding Constraints.
Project Name
CITY-WIDE FIBRE OPTICS BACKBONE

Project Description
Utilities

Status
Detail Design, Construction. Test sites have been established

Construction employment per annum
491

Operational employment per annum
240

Projected cost to completion (Rand Billion)
0.56

Project Scope - Typology
Development of a Fibre optic network and backbone including a redundancy network. Linking all municipal offices through the fibre network Facilitating the development of a much wider Fibre network throughout the city for various service providers in the ICT industry to invest

Project Scope - Land uses
Fibre optics within the sewer system.

Project Scope - Infrastructure requirements
Access to Ethekwini sewer system

Project Scope - Key economic sectors
ICT; BPOs; Media; Film; Communications

Project Scope - Economic strategy
Support and grow the ICT sector - New industry development

Project schedule
Detail Design and-or Construction to continue in 2012

Challenges
Right of use and Approval of wayleaves / access to sewer systems
Project Name
CITY-WIDE INFORMAL SETTLEMENT UPGRADES

Project Description
Housing

Status
Multiple projects, so range of project statuses

Construction employment per annum
6,438

Operational employment per annum
29,920

Projected cost to completion (Rand Billion)
57.97

Project Scope - Typology
Conversion or replacement or improvement of informal housing stock through the provision of interim services or in situ upgrades or greenfields projects. Development and improvement of low-income rental stock and of social housing. Integrated and mixed use residential developments with other uses at significant public transport points

Project Scope - Land uses
Residential (with provision for future commercial and social uses)

Project Scope - Infrastructure requirements
Dependant on the location of each development site

Project Scope - Key economic sectors
Housing; Public Transport; (with future provisions for Retail; Community services; Offices)

Project Scope - Economic strategy
Enable urban efficiencies, in particular reductions in transportation and energy costs

Project schedule
Prefeasibility, Preliminary Layout & Design, Detail Design and-or Construction to continue in 2012

Challenges
Scarcity and-or expense of well-located land, and inadequate funding for land acquisition. The housing subsidy is inadequate to achieve functional urban densities.

Funding Constraints.
Project Name
CITY-WIDE SOCIAL FACILITIES PROVISION

Project Description
Social Facilities

Status
Pre-feasibility

Construction employment per annum
4,477

Operational employment per annum
1,194

Projected cost to completion (Rand Billion)
4.83

Project Scope - Typology
Significant reduction in the backlog of social services to residential communities, particularly on health care, education and libraries, basic recreation, and community safety

Project Scope - Land uses
Education, Health, Community Safety & Security, Emergency Services, Basic Recreation, Cemeteries

Project Scope - Infrastructure requirements
Dependant on the location of each development site

Project Scope - Key economic sectors
Government; Retail; Public Transport; Community services; Offices

Project Scope - Economic strategy
Enable urban efficiencies, in particular a stable, fit, and better skilled economically active population

Project schedule
Preliminary Layout and Design to commence in 2012

Challenges
Intra-government complexities and overlaps around Health, Education, Community Safety and Security.
Funding Constraints.
