Great Features At An Affordable Price
Introducing our new DVI series of gas inserts. The 31 and 33 DVI gas inserts represent a new direction in gas heating that offers you a gas fireplace insert at an affordable price.

The DVI series is all about versatility. It offers a big, beautiful, brightly glowing fire and a simplified operating system, as well as the same construction and glass viewing area as the top selling Fireplace Xtrordinair Model 32 DVS GreenSmart and Model 34 DVL GreenSmart gas inserts. Both DVI inserts feature the split-flow Dancing-Fyre™ burner with your choice of hand-crafted logs and glowing embers or stone kit with glass media floor. The IPI (electronic ignition) gas valve provides a great fire presentation and a “green” money saving solution to home heating. For convenient hands free operation you can also add an optional wall thermostat or remote control thermostat.

Turn Your Old Fireplace Into An Efficient Heat Source
DVI gas fireplace inserts are designed to transform virtually any metal or masonry fireplace into an efficient source of heat. Traditional open fireplaces have efficiency ratings as low as 15% and can actually draw the heat out of your home! Fireplace Xtrordinair gas inserts achieve efficiency ratings as high as 80%. The 31 DVI may be used as a primary heat source in smaller homes. The 33 DVI is ideal for heating medium to large homes. Both inserts are also ideal for zone heating when you only want to heat a portion of the home.
Basic GreenSmart Technology

The GreenSmart Basic System is designed to increase efficiency as well as convenience of your fireplace. The system is easy to operate with all knobs clearly labeled and lit for maximum visibility behind the sleek concealment door.

A Comfort Control rocker switch allows you to power off the rear burner when less heat output is desired during the warmer months of the year allowing for year round enjoyment. Power outages are no longer a concern for operating the fireplace with the built-in battery backup that automatically switches back to AC when the power is restored. The Award winning Two-Stage Dancing-Fyre burner comes standard and is responsible for the tall, flickering, wood-like flames and pulsating embers distinctively found in fireplaces featuring the GreenSmart system. Choose your pilot ignition mode depending on the season. The energy saving GreenSmart Electronic Ignition mode provides instant fire whenever you want it all year long; or use the Continuous Pilot mode for colder climates where a heated chimney is needed to maintain the draft in the winter and reduces condensation on the glass. Heat and flame adjustment is simple with a huge high to low flame turndown ratio that allows you to use your insert virtually year-round. An LP Conversion kit comes standard with all GreenSmart packages. A 180 CFM Convection blower comes standard on all units, increasing efficiency and heat transfer throughout your home.

Features

• Dancing-Fyre Burner with your choice of realistic logs, glowing red embers and wood-like fire, Driftwood Fire Art with three choices of glass media, or Fyre-Stone Rock kit with three choices of glass media.

• Standard 180 CFM Convection Blower increases the efficiency and rate of heat transfer from the insert into your home.

• Easy Heat/Flame Adjustment with a large high-to-low flame turndown ratio.

• Choice of pilot ignition modes - money saving IPI Electronic Ignition mode for instant fire whenever you need it or Standing Pilot for colder climates where a heated chimney is needed to maintain the draft for proper operation.

• Comfort Control™ that allows you to turn off the rear burner for less heat when desired or for year-round enjoyment of the fire.

• Built-in battery backup allows continued operation of your gas insert during power outages. Automatically switches back to AC when the power comes back on.

• The DVI inserts are heater rated and can be used as the primary heat source in your home.

• LED lights automatically light up the control panel when you lower the concealment door. Powered by a 9 volt battery, this feature operates even during power outages.

• Approved for installation into both zero clearance (metal) and masonry fireplaces.

• LP Conversion kit included with insert at no additional cost.

Concealed Control Panel

Note: For convenience, the Main Burner ON/OFF switch can be located on the top right side of most finish panels.
Face Options
Choose from our large selection of high quality face designs in a wide variety of finishes to match virtually any decor.

Complete Face/Panel
These faces do not require Finish Panels

Universal Face
31 DVI Small = 23-1/8" H x 37-7/16" W
31 DVI Large = 29" H x 40-3/8" W
33 DVI Small = 27" H x 40-3/8" W
33 DVI Large = 33-1/2" H x 44" W

Artisan™ Double Door
Requires backing plate
31 DVI Small = 23-1/8" H x 37-7/16" W
31 DVI Large = 29" H x 40-3/8" W
33 DVI Small = 27" H x 40-3/8" W
33 DVI Large = 33-1/2" H x 44" W

Architectural™ Double Door
Requires backing plate
31 DVI Small = 23-1/8" H x 37-7/8" W
31 DVI Large = 29" H x 40-3/8" W
33 DVI Small = 27" H x 40-3/8" W
33 DVI Large = 33-1/2" H x 44" W

Architectural™ Double Door Onlays
Optional accessory to the Architectural Double Door.

Rectangular Doors
31 DVI Small = 23-1/8" H x 37-7/8" W
31 DVI Large = 29" H x 40-3/8" W
33 DVI Small = 27" H x 40-3/8" W
33 DVI Large = 33-1/2" H x 44" W

Arched Doors
31 DVI Small = 23-1/8" H x 37-7/8" W
31 DVI Large = 29" H x 40-3/8" W
33 DVI Small = 27" H x 40-3/8" W
33 DVI Large = 33-1/2" H x 44" W

Faces That Require Panels
These faces require Finish Panels to complete - see page 6.
Face dimensions are listed.

Shadowbox™ (shown with one piece finish panel)
31 DVI = 30 1/2" W x 20 13/16" H
33 DVI = 34" W x 25" H

Classic Arch™
31 DVI = 22" H x 30" W
33 DVI = 26 1/2" H x 34 3/4" W

Metropolitan™
31 DVI = 22" H x 30" W
33 DVI = 26 1/2" H x 34 3/4" W

Artisan™
31 DVI = 22" H x 30" W
33 DVI = 26 1/2" H x 34 3/4" W

French Country™
31 DVI = 22" H x 30" W
33 DVI = 27 7/8" H x 33 5/8" W

Finish Options

Personalize your fireplace from the inside out by choosing the option to make your DVI truly your own. Interior options are available from the Traditional log set with glowing embers to the Driftwood Fire Art with Glass Media or the Fyre-Stone Rock Kit with Glass Media. Even the Glass Media is available in a choice of three colors, platinum, bronze or cobalt blue. Customize your fireplace interior to fit your own decor by selecting from classic Handmade Brick, Straight Common Brick, Herringbone Brick, transitional Black Enamel or a contemporary Stainless Steel.

Choose either Logset, Stone Kit or Driftwood Fire Art

Easily transforms the overall look and appearance by allowing the insert to fit a wide range of architectural styles. The Traditional Log Set comes with glowing embers and beautifully detailed logs. The Fyre-Stone Rock Kit and Driftwood Fire Art comes with three reflective glass colors - platinum, bronze or cobalt blue.

Firebacks

Leave the interior basic black for a very simple contemporary look, or add a decorative fireback. Traditional firebacks come in a choice of Common Brick, Herringbone Brick and Handmade Brick patterns. For a strikingly more contemporary look, choose the stainless steel or beautiful black enamel liner, which can be used with either logs or rock kits.
Wall Thermostat Option
The wall thermostat allows you to set the desired temperature for your room. The fireplace insert will cycle on and off to maintain your set temperature. The wall thermostat can be wired up to 25 feet away from the appliance and allows for easy hands-free convenience.

Basic Remote Control Option
Adding a remote provides for the ultimate in convenient operation of your fireplace insert. The remote offers ON/OFF and thermostat setting. This remote control also offers a clock, fireplace timer to turn off your insert after a set time and a child-proof lockout.

Insert Wiring Kit Option
The insert wiring kit allows you to hard-wire your AC power from inside the fireplace if you are using the optional fan or remote control. Don’t want the power cord running across the front of the hearth? Ask your dealer for details.
**Installation Specifications**
Always refer to and use the Installation Manual for complete install information.

### 31 DVI Insert

- **Heating Capacity:** 500 to 1,500 Sq. Ft.
- **Maximum BTU/HR Input:** 31,000 (NG/LP)
- **Minimum BTU/HR Input:** 10,700 (NG) 12,600 (LP)
- **Steady State Efficiency:** Up to 85% (NG) 85.5% (LP)
- **Canadian P-4 Efficiency:** 70% (NG) 72.35 (LP)
- **Dimensions:**
  - Height = 19-1/2"
  - Width = 26-1/2" (Front), 18" (Back)
  - Depth = 15-1/8"
  - Glass Area = 24-1/8"W x 12-7/8"H

### 33 DVI Insert

- **Heating Capacity:** 600 to 2,000† Sq. Ft. (†with optional fan)
- **Maximum BTU/HR Input:** 40,000 (NG/LP)
- **Minimum BTU/HR Input:** 11,900 (NG) 7,400 (LP)
- **Steady State Efficiency:** Up to 84% (NG) 86% (LP)
- **Canadian P-4 Efficiency:** 70.05 (NG) 70.23 (LP)
- **Dimensions:**
  - Height = 23-3/4"
  - Width = 31-1/2" (Front), 20" (Back)
  - Depth = 14-1/2"
  - Glass Area = 27-7/8"W x 16-7/8"H

*Heating Capacity will vary with floor plan and ceiling height, Insulation, and outside ambient temperature.

**Efficiency rating is a product of thermal efficiency determined under continuous operation independent of installed system.

### Venting Requirements:
- Requires UL listed (441 or 1775) Gas Liner for exhaust and air inlet.
- 31 DVI - Simpson Duravent 6 5/8" to 3" & 3" Co-linear Adapter and flashing.
- 33 DVI - Simpson Duravent 6 5/8" to 3" & 4" Co-linear Adapter and flashing.
- Simpson Duravent High-Wind Vertical Termination Cap

### Minimum Clearances:

<table>
<thead>
<tr>
<th>31 DVI</th>
<th>33 DVI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sidewall to insert: A = 4 1/2&quot;</td>
<td>A = 4&quot;</td>
</tr>
<tr>
<td>Side facing: B = 4 1/2&quot;</td>
<td>B = 4&quot;</td>
</tr>
<tr>
<td>Top facing: C = 35&quot;*</td>
<td>C = 35 1/2&quot;*</td>
</tr>
<tr>
<td>Mantel: D = 35&quot;*</td>
<td>D = 35 1/2&quot;*</td>
</tr>
<tr>
<td>Extension on Hearth: E = 1 1/4&quot;</td>
<td>E = 4 1/4&quot;</td>
</tr>
</tbody>
</table>

*Measured from the base of the insert.

### Mantel & Top Face Clearance:
- Maximum Mantel Depth is 12"
- Maximum Top Facing Depth is 3/4" (otherwise considered a Mantel)

### Hearth Requirements:
A non-combustible hearth extension is not required. However, if the heater is installed next to the floor, we recommend a hearth to protect the flooring surface from discoloration.

### Listings:
This appliance was listed by OMNI Test Labs to ANSI Z21.88 - report # 028-F-73-5. The listing label is attached to the appliance near the gas control valve.

### IAS (ICBO) Approval
This appliance was listed by OMNI Test Labs - IAS # TL130.

### Massachusetts Approval
Submitted to the Massachusetts Board of State Examiners of Plumbers and Gas Fitters

Children, like most of us, are fascinated by fire, and for families with young children, fireplaces pose a potential safety hazard. Take the time to educate young children about the dangers of fire and the hot surface temperatures of glass and metal surrounding the fireplace insert. If you have an infant or toddler consider installing a fire screen; make sure it’s tall enough so that children can’t climb over it, and that it’s placed far enough away so that reaching arms can’t touch the surfaces of the fireplace. A few precautions such as these will allow everyone in your home to safely enjoy the comfort and warmth of your new gas fireplace insert.

How To Use QR Codes

Want to see what the fire looks like burning? Use the QR codes on the left with your Smart Phone or tablet to see a video of the beautiful fire with the different interior options.
