COLLEGE OF BUSINESS & MANAGEMENT

GENERAL EDUCATION COURSEWORK
At DeVry University, we believe in the value of a comprehensive education. This means broadening your knowledge and skill sets beyond the area of your degree program, to prepare you to succeed in today’s diverse and evolving workplace.

From day one, you can learn important analytical and communication skills, such as problem-solving, reasoning and analysis, academic and professional writing, and mathematics and statistics skills. These skills can better equip you to work across cultures and understand a wide range of concepts that influence your area of study.

General Education Coursework:
• Communication Skills
• Humanities
• Mathematics
• Natural Sciences
• Social Sciences

Approximately three elective courses are chosen through academic advising, from courses that are different from those used to meet any other graduation requirement. They may be selected from other courses in the Business Administration program, or from other courses listed in the academic catalog, provided prerequisites are satisfied. Qualifying prior college coursework not meeting other program requirements may be applied to the elective hours.

ALL of these courses
9 semester-credit hours

About this Degree Program
For those with prior college education or professional experience, the bachelor’s degree in Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. If you’re currently employed, this can be a great way to further develop your management skills. With previously earned qualifying college credits, you may be able to earn your bachelor’s degree in less time.

Our Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today’s business world.

If you have prior work or educational experience, you may also want to consider our Technical Management degree program, which is available with many of the same specializations.

Programs, course requirements and availability vary by location. Some courses may be available online only. DeVry’s academic catalog, available via devry.edu/catalogs, contains the most current and detailed program information, including admission, progression and graduation requirements. Information contained herein is effective as of date of publishing.
DeVry University’s bachelor’s degree program in Management helps prepare you for the workplace with a solid business foundation. Our specialization in Project Management can further focus your studies.

Project managers guide a project from planning to completion by facilitating ideas, resources and information from team members and outside resources. In this role, you may manage a team of developers, builders, designers, manufacturers or other professionals in order to create final products that may range from software to consumer goods. Our Project Management specialization can help you learn key tasks such as setting budgets and timelines, providing estimates, acquiring outside resources, and identifying and evaluating project goals and deliverables.

Graduates of DeVry University’s Management program with a specialization in Project Management may consider careers including, but not limited to, the following:

- Construction Manager
- Cost Estimator
- General and Operations Manager
- Industrial Production Manager
- Management Consultant
- Organizational Change Manager

Employment in some occupations may require years of relevant experience.

### KNOWLEDGE AND SKILLS

**ADMINISTRATION AND MANAGEMENT** — Understand the fundamental management theories and traditional managerial responsibilities in formal and informal organizational structures, including planning, organizing, directing, controlling and staffing.

**PROJECT PLANNING** — Develop or update project plans, including information such as project objectives, technologies, systems, information specifications, schedules, funding and staffing.

**PROJECT EXECUTION** — Manage projects to ensure adherence to budget, schedule and scope.

**STATUS REPORTING** — Monitor and report on project progress by collecting, analyzing and summarizing information and trends.

**PROJECT TASK SETTING** — Assign duties, responsibilities and spans of authority to project personnel.

**PROJECT TEAM SELECTION** — Coordinate recruitment or selection of project personnel.

**BUDGET MANAGEMENT** — Develop and manage annual budgets for projects.

**PROJECT ANALYSIS** — Develop implementation plans that include cost-benefit or return on investment (ROI) analyses.

**PROJECT COMMUNICATION** — Establish and execute a plan for keeping internal and external contacts apprised of project developments and deliverables.

**TOTAL QUALITY MANAGEMENT** — Understand quality procedures and concepts for enhancing goods, services and the entire business process.

**CONTRACTS AND PROCUREMENT** — Understand how to acquire goods and services in order to meet project requirements from planning, solicitation and source selection, to contract administration and completion.

**BUSINESS SYSTEMS ANALYSIS** — Learn current techniques to review the activities and processes of a business, identify problems and create solutions. Hone interviewing skills; navigate group dynamics; and develop process flows, data flows and data models to identify, define, document and solve business challenges.
