INFUSION NURSING

STANDARDS OF PRACTICE

Developed by

Infusion Nurses Society

REVISED 2011

315 Norwood Park South, Norwood, MA 02062
www.ins1.org
The Journal of Infusion Nursing, the official publication of the Infusion Nurses Society (INS), seeks to promote excellence in infusion nursing by presenting new research, clinical reviews, case studies, and professional development information relevant to the practice of infusion therapy. Articles selected for publication represent the broad scope of the infusion specialty and draw on the expertise of all healthcare providers who participate in the delivery of infusion.

STANDARDS OF PRACTICE

NURSING PRACTICE
1. Practice Setting S6
2. Neonatal and Pediatric Patients S6
3. Older Adult Patients S7
4. Ethics S8
5. Scope of Practice S8
6. Competence and Competency Validation S11
7. Quality Improvement S12
8. Research and Evidence-based Practice S13
9. Policies, Procedures, and/or Practice Guidelines S14

PATIENT CARE
10. Orders for the Initiation and Management of Infusion Therapy S15
11. Patient Education S16
12. Informed Consent S17
13. Plan of Care S18

DOCUMENTATION
14. Documentation S20
15. Unusual Occurrence and Sentinel Event Reporting S21
16. Product Evaluation, Integrity, and Defect Reporting S22
17. Verification of Products and Medications S24

INFECTION PREVENTION AND SAFETY COMPLIANCE
18. Infection Prevention S25
19. Hand Hygiene S26
20. Compounding of Parenteral Solutions and Medications S27
21. Scissors S27
23. Disinfection of Durable Medical Equipment S29
24. Transmission-based Precautions S29
25. Latex Sensitivity or Allergy S30

INFUSION EQUIPMENT
26. Add-on Devices S31
27. Needleless Connectors S32
28. Filters S33
29. Flow-Control Devices S34
30. Blood and Fluid Warmers S35
31. Tourniquets S36

VASCULAR ACCESS DEVICE SELECTION AND PLACEMENT
32. Vascular Access Device Selection S37
II. Midline Catheters S37
III. Central Vascular Access Devices (CVADs) (Nontunneled, PICC, Tunneled, Implanted Port) S38
IV. Arterial Catheters S38
33. Site Selection S40
I. Peripheral Venous Access via Short Peripheral Catheters S40
II. Peripheral Venous Access via Midline Catheters S41
III. Central Venous Access via Peripherally Inserted Central Catheters (PICCs) S41
IV. Central Venous Access via Nontunneled Central Venous Access Devices (CVADs) S42
V. Central Venous Access via Tunneled Central Venous Access Devices and Implanted Ports S42

ACCESS DEVICES
39. Implanted Vascular Access Ports S50
40. Hemodialysis Vascular Access Devices S51
41. Umbilical Catheters S52
42. Apheresis and Ultrafiltration Catheters S53

SITE CARE and MAINTENANCE
43. Administration Set Change S55
I. General S55
II. Primary and Secondary Continuous Infusions S55
III. Primary Intermittent Infusions S55
IV. Parenteral Nutrition S56
V. Intravenous Fat Emulsions (IVFE) and Other Lipid Product Infusions S56
VI. Blood and Blood Components S56
VII. Hemodynamic and Arterial Pressure Monitoring S56
Contents

Note: The “S” in page numbers denotes supplement issue and does not refer to a specific standard.

44. Vascular Access Device Removal  S57
   I. Short Peripheral Catheters  S57
   II. Midline Catheters  S57
   III. Nontunneled Central Vascular Access Devices (CVADs)  S58
   IV. Surgically Placed CVADs: Tunneled/Implanted Ports  S58
   V. Arterial Catheters  S58
45. Flushing and Locking  S59
46. Vascular Access Device Site Care and Dressing Changes  S63

INFUSION-RELATED COMPLICATIONS
47. Phlebitis  S65
48. Infiltration and Extravasation  S66
49. Infection  S68
50. Air Embolism  S69
51. Catheter Embolism  S70
52. Catheter-Associated Venous Thrombosis  S71
53. Central Vascular Access Device Malposition  S72

OTHER INFUSION-RELATED PROCEDURES
54. Vascular Access Device Repair  S75
55. Central Vascular Access Device Exchange  S75
56. Catheter Clearance: Occluded Central Vascular Access Devices  S76
57. Phlebotomy  S77
   I. Phlebotomy via Direct Venipuncture  S78
   II. Blood Sampling via a Vascular Access Device  S78
   III. Therapeutic Phlebotomy  S79

NONVASCULAR INFUSION DEVICES
58. Intraspinal Access Devices  S81
59. Intraosseous Access Devices  S82

60. Continuous Subcutaneous Infusion and Access Devices  S84

INFUSION THERAPIES
61. Parenteral Medication and Solution Administration  S86
62. Antineoplastic Therapy  S87
63. Biologic Therapy  S89
64. Patient-Controlled Analgesia  S89
65. Parenteral Nutrition  S91
66. Transfusion Therapy  S93
67. Moderate Sedation/Analgesia Using Intravenous Infusion  S95
68. Administration of Parenteral Investigational Drugs  S96

Index  S109

The Infusion Nursing Standards of Practice is intended to reflect current knowledge and practices of the clinical nursing specialty of infusion therapy. Because clinical practice continually evolves based on ongoing research, users should make an independent assessment of the appropriateness and applicability of a standard in any specific instance, and should also consider the applicable federal and state laws and regulations, as well as the standard of care in a particular jurisdiction, as these may take precedence. INS is not responsible for injury to persons or property, or other harm, arising from the use of the Standards.
