Since they are using FSSO for authentication, do I need to uninstall the old Fortigate Client? For FSSO, no need any change, the user information will get from Windows AD.
Comments Off on HTTP error 400 on Fortigate admin interface on a Windows server that provides the Fortigate with authentication information. If you have Terminal Services such as Microsoft or Citrix, the user doesn't have an IP address. Is link aggregation supported in FortiOS versions 4.00 MR2, 4.00 MR3 and 5.0.x?
