National Rebuilding Day - Rebuilding Together New Britain

This past academic year, the center served the School of Engineering and Technology students by providing tutoring and advising services to 452 students in 24 engineering, technology, mathematics, and science courses. This is in addition to the hiring of four engineering professors who provided “Professor-Guided Supplementary Problem Solving Sessions” in parallel with peer tutoring to 46 additional students in three “bottleneck” engineering courses.

In line with one of the objectives of the center to provide work related opportunities, the center held Career Fairs for more than one 136 Construction Management, Mechanical, and Manufacturing companies. In fact all majors within the school were invited to attend the Career Fairs. The center also had conferences and provided resume proofreading sessions to ensure that they are as powerful as possible.

Finally, the center organized resume writing workshops, networking forums, career seminars, and other meetings between employers and students so they are well prepared to search for jobs. The center posted well over 200 jobs over the past year.

School of Engineering & Technology Student Services Center Update
