Debi Wayne Retires

Archives Branch, I worked on the preservation of the Nixon artifacts that were stored at the facility prior to the opening of the Nixon Presidential Library. I assisted individuals with their research in original records, did preservation on our most valuable documents, and wrote series descriptions for permanent records.

A few years later, due to budget issues in the Archives Branch, I moved to the Federal Records Center where I pulled and refiled files for agencies. In 1984, I was asked if I wanted to go full time, and within a few months there I was working 9-5 in the Accessioning and Disposition (A&D) Branch. During this time, I assisted agencies with their records management programs and the military with base closures – cleaning out bunkers, condemned warehouses, attic and basements. I only refused one request -- to enter a trailer

shipping route from New York to San Francisco by 7,700 miles; and the city’s reconstruction after the great 1906 Earthquake and Fire. Out of the ashes, San Francisco hosted one of the largest gatherings of all time. Over the course of its 10-month span, nearly 19 million people attended the World’s Fair. At the time, California’s population was roughly 3.5 million.

Lantern slides were a popular form of photography at the time. Photographers would often develop images onto light-sensitive lantern glass, cover the image with an additional layer of protective glass, and bind the two layers together with paper tape. In some instances, such as the examples in the blog post, slides were hand-colored using oil paints, dyes, or pigments. The lantern slides could then be projected to a viewing audience, and were ideal for educational or professional settings.

A sample of the slides is on the Unwritten Record Blog referenced below. They are all part of the record series, Panama-Pacific International Exposition. The photos were taken by Joseph Abel under the auspices of the Department of Agriculture. Abel was a scientist with the Department of Agriculture’s Bureau of Animal Industry, and Chief of Exhibits for the Bureau’s exhibit at the fair.

where records were stored. As we stood before the trailer door, my agency contact said: “Just wanted to let you know before we enter that there is a hole in the floor and there are snakes and scorpions in the trailer.” Nope, not happening – I drew the line in the sand!

While working in A&D, I helped develop and present training for the agencies with which we worked. I continued to work my way up in NARA (earning the rights to the desk next to the only window in the facility) and when I was asked to be part of the core training team to develop a unified training program for all of NARA, I gladly jumped at the opportunity.

The team worked long and hard to develop the Certificate of Federal Records Management Training material. We rolled out the program, and I never looked back. I have loved my time providing training and guidance to so many Federal employees.

What a wonderful journey I have had. I traveled to 22 states and 2 countries, worked under five Archivists, received two Archivist’s Special Achievement Awards, attended the opening of two Presidential Libraries, and celebrated NARA independence from GSA.

Best of all, I have met and worked with so many wonderful people and formed lasting friendships that I will cherish long after leaving NARA. I will not miss getting up at 5 a.m. to be at work by 6 or racing to catch an early flight somewhere, teleconference after teleconference, and cramming to meet deadlines. Wait...what am I saying, of course I will miss it all.

Farewell NARA and all my friends in the federal family, on to my next journey...

Update on GRS 1.1 and the FAR

In August last year, NARA announced the fact that the Federal Acquisition Regulation (FAR) had not yet caught up with changes in the General Records Schedule for contracts (GRS 1.1, published September 2014 in GRS Transmittal 23).

Previously, major contracts were retained for 6 years and three months and minor contracts for two years. Under GRS 1.1, all contracts are to be maintained for a uniform 6 years. The lag in FAR adoption of the GRS change resulted in the FAR and the GRS stating different retention periods for records.

NARA is pleased to announce that these necessary alterations to the FAR were published as a final rule in the Federal Register on December 4, 2015. The new rule is effective January 4, 2016.

We appreciate the work of the FAR Implementation Team comprised of GSA, DOD, and NASA representatives bringing this to fruition. The unfortunate disconnect between the GRS and the FAR is now history. Both authorities once again state the same retention periods for records.

And we would also like to take this opportunity to wish everyone a great 2016!
