**Feature of the ANGLE POST SYSTEM**

- **All Steel Construction**
  No Plastic or Rubber. Steel Foot Plate. Extremely fire resistant.

- **Durable**
  Resistant to Termites, UV, Moisture, Rust and Fire.

- **Reusable**
  Can be removed without damage to posts.

- **Heavy Duty**
  Up to 13 High tensile wires. Over 2000kg total tension with only minimal deflection.

- **Versatile**
  Gateways or Corners. Suitable for all types of wire.

- **Light Weight**
  Fence inaccessible areas with ease.

- **Affordable**
  The most economical, quality end assembly on the market.

- **Hot Dip Galvanized**
  Long lasting protection.

- **Huge Labour Saving**
  Rapid installation - No post holes, no welding, no drilling, no concrete.

- **Australian Made**
  Quality Guaranteed.

---

**Application**

For use in Rural Fencing for all posts, Strainers and Gateways, Vineyard and Trellis Systems.

**STAY-TIGHT**

Product Information

**TECHNICAL Details**

**Stay**

40NB diameter galvanized steel pipe stay with flattened end for simple attachment to both steel posts. Also available in 50NB pipe.

**Tensioning Assembly**

240mm x 300mm heavy duty Hot Dip Galvanized foot plate fitted to base of pipe stay with 12mm galvanized tensioning rod bolted through. The rod has flattened sections for ease of tightening.

**Posts**

Hot Dip Galvanized 75mm x 75mm angle 2250mm long available in standard and heavy duty options. Pre-punched holes for stays and tensioning rods. Includes two ground pin lugs to suit “Y” pegs. These prevent posts lifting out of the ground.

**Important Information**

Wire must be installed Parallel with Angle Flange for maximum strength!
