Completing the Common Application FERPA Waiver for Naviance

In order to sign off on the Common App FERPA Waiver & Authorization on Common App you will need to add at least one College to your Common Application list and complete the Education section noting your current school and college counselor information. THEN you go into the college you have listed in Common App and you will see to the side the choice of “Recommenders and FERPA”.

Very important – you CANNOT change your mind on FERPA rights once completed
Be sure to check the correct boxes that are doing 3 things:

First says you are allowing all schools that you have attended to send information to the colleges you are applying to. Second says you waive your right to read your letters of recommendation that are going to colleges. Third states that you know you cannot make a change in this area once submitted.
