Financial Aid Outreach - I Can Afford College // General Outreach

Join us for a preview of the new ad campaign, and to learn about the exciting promotion happening in conjunction with iHeart Radio in April, which includes a chance for students to win a scholarship, MacBook Air, or an iPad, plus weekly prizes! Sharing this promotion with your students is a great way to engage with them and connect them with financial aid resources. At this workshop you will also learn more about how we can support you in the work you do to help students every day. The "I Can" website, available in English and Spanish, is the heart of the campaign and provides current and prospective students with direct links to applications, free one-one assistance with the application process, as well as other important information for students, such as the BOG Fee Waiver eligibility changes and financial literacy resources. Additionally, colleges can advertise workshops and events on the website, and order financial aid informational materials to support your outreach to students. We invite you to attend this workshop for an update on "I Can Afford College" campaign activities, and more information about the resources the campaign has available for you.

**Catching At-Risk Students**

Addressing student loan default rates is a pivotal strategy for improving student success patterns in the California Community College system, particularly for those who are disproportionately impacted due to economic challenges. To the extent that financially needy students can receive fiscal literacy training early in their career, colleges can help increase the odds of a student’s overall success by limiting the financial stresses of obtaining a higher education degree and diminishing the equity gap for economically disadvantaged students. This session will not only describe a statistical model for predicting which students are more likely to default than others, but it will outline specific plans that the College’s financial aid department has for impacting these at-risk students and reducing the default rate.
