Operating Instructions
**Location: underside of the unit**

**IMPORTANT**

The lightning flash with arrowhead, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

**CAUTION**

**RISK OF ELECTRIC SHOCK DO NOT OPEN**

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**CAUTION:**

TO PREVENT THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

**NOTE**

After replacing or changing a fuse, the fuse cover in the plug must be replaced with a fuse cover which corresponds to the colour of the insert in the base of the plug or the word that is embossed on the base of the plug, and the appliance must not be used without a fuse cover. If lost replacement fuse covers can be obtained from your dealer.

Only 5 A fuses approved by B.S.I or A.S.T.A to B.S.1362 should be used.

The cut-off plug should be disposed of and must not be inserted into any 13 amp socket as this can result in electric shock. The plug, or adaptor or the distribution panel should be provided with a fuse cover which is of the same colour as that of the insert in the base of the plug or the word that is embossed on the base of the plug, and the appliance must not be used without a fuse cover. If lost replacement fuse covers can be obtained from your dealer.

Do not connect either wire to the earth terminal of a three pin plug.

**IMPORTANT**

FOR USE IN THE UNITED KINGDOM

The wires in this mains lead are coloured in accordance with the following code:

Blue : Neutral
Brown : Live

If the plug provided is unsuitable for your socket outlets, the plug must be cut off and a suitable plug fitted.

**WARNING:** The apparatus is not waterproofs, to prevent fire or shocks hazard, do not expose this apparatus to rain or moisture and do not put any water source near this apparatus, such as vase, flower pot, cosmetics container and medicine bottle etc.

**WARNING:** BEFORE PLUGGING IN THE UNIT FOR THE FIRST TIME, READ THE FOLLOWING SECTION CAREFULLY. The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit will be used meets the required voltage (e.g., 230V or 120V) written on the rear panel.

**WARNING:** No naked flame sources, such as lighted candle, should be placed on the apparatus. If naked flame sources accidentally fall down, fire spread over the apparatus then may cause fire.

**VENTILATION:**

European, UK, Australian, New Zealand, Hong Kong and Taiwanese models:

When installing this unit, make sure to leave space around the unit for ventilation to improve heat radiation (at least 10 cm at top, 10 cm at rear, and 10 cm at each side).

All other models:

When installing this unit, make sure to leave space around the unit for ventilation to improve heat radiation (at least 20 cm at top, 15 cm at rear, and 15 cm at each side).

**WARNING:** Slot and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, to prevent fire hazard, the openings should never be blocked and covered with items, such as newspapers, table-cloths, curtains, etc. Also do not put the apparatus on the thick carpet, bed, sofa, or fabric having a thick pile.
Operating Environment

Operating environment temperature and humidity:
+5°C – +35°C (+41°F – +95°F); less than 85 %RH
(cooling vents not blocked)
Do not install in the following locations
- Location exposed to direct sunlight or strong artificial light
- Location exposed to high humidity, or poorly ventilated location

The STANDBY/ON switch is secondary connected and therefore, does not separate the unit from mains power in STANDBY position. Therefore install the unit suitable places easy to disconnect the MAINS plug in case of the accident. The MAINS plug of unit should be unplugged from the wall socket when left unused for a long period of time.

CAUTION
These speaker terminals can be under HAZARDOUS VOLTAGE. When you connect or disconnect the speaker cables, to prevent the risk of electric shock, do not touch uninsulated parts before disconnecting the power cord.

CAUTION: USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

CAUTION: THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.
Thank you for buying this Pioneer product.

Please read through these operating instructions so that you will know how to operate your model properly. After you have finished reading the instructions, put them in a safe place for future reference.

Chapter 1

Before you start

Features

- **24-bit/96kHz compatible DAC**
  This system is fully compatible with high sampling-rate discs, capable of delivering exceptional sound quality in terms of dynamic range, low-level resolution and high-frequency detail.

- **Surround sound entertainment with Dolby Digital and DTS software**
  The built-in Dolby Digital and DTS decoders let you enjoy great surround sound with Dolby Digital and DTS discs.

- **Pure Cinema progressive scan video**
  Not applicable to the European model
  When connected to a progressive-scan-compatible TV or monitor using the component video outputs, you can enjoy extremely stable, flicker free images, with the same frame refresh rate as the original movie.

- **Picture zoom**
  See Zooming the screen on page 36.

- **MP3 and WMA compatibility**
  See Compressed audio compatibility on page 7.

- **JPEG compatibility**
  See JPEG file compatibility on page 7.

- **Graphical on-screen displays**
  Setting up and using your DVD home theater system is made very easy using the graphical on-screen displays.

- **Energy saving design**
  This system is designed to use 0.5 W of power when in standby.

Disc / content format playback compatibility

This player is compatible with a wide range of disc types (media) and formats. Playable discs will generally feature one of the following logos on the disc and/or disc packaging. Note however that some disc types, such as recordable CD and DVD, may be in an unplayable format—see below for further compatibility information.

- **DVD-Video**
- **DVD-R**
- **DVD-RW**
- **Audio CD**
- **Video CD**
- **CD-R**
- **CD-RW**
- **Fujicolor CD**

- is a trademark of Fuji Photo Film Co. Ltd.
- Also compatible with KODAK Picture CD

This player supports the IEC’s Super VCD standard for superior picture quality, dual soundtracks, and widescreen support.

Super Video CD (Super VCD)
Before you start

CD-R/RW compatibility
• Compatible formats: CD-Audio, Video CD/ Super VCD, ISO 9660 CD-ROM* containing MP3, WMA or JPEG files
* ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this player.
• Multi-session playback: No
• Unfinalized disc playback: Yes

DVD-R/RW compatibility
• Compatible formats: DVD-Video, Video Recording (VR)*
* Edit points may not play exactly as edited; screen may go momentarily blank at edited points.
• Unfinalized playback: No
• WMA/MP3/JPEG file playback on DVD-R/ RW: No

PC-created disc compatibility
Discs recorded using a personal computer may not be playable in this unit due to the setting of the application software used to create the disc. In these particular instances, check with the software publisher for more detailed information.
Discs recorded in packet write mode (UDF format) are not compatible with this player. Check the DVD-R/RW or CD-R/RW software disc boxes for additional compatibility information.

Compressed audio compatibility
• Compatible formats: MPEG-1 Audio Layer 3 (MP3), Windows Media Audio (WMA)
• Sampling rates: 32, 44.1 or 48kHz
• Bit-rates: Any (128Kbps or higher recommended)
• VBR (variable bit rate) MP3 playback: Yes
• VBR WMA playback: No
• WMA lossless encoding compatible: No
• DRM (Digital Rights Management) compatible: Yes (DRM-protected audio files will not play in this player). See also DRM in the Glossary on page 71.
• File extensions: .mp3, .wma (these must be used for the player to recognize MP3 and WMA files – do not use for other file types)
• File structure: Up to 999 files per folder

About WMA
The Windows Media® logo printed on the box indicates that this player can playback Windows Media Audio content. WMA is an acronym for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA content can be encoded by using Windows Media® Player version 7, 7.1, Windows Media® Player for Windows® XP, or Windows Media® Player 9 Series.
Microsoft, Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

JPEG file compatibility
• Compatible formats: Baseline JPEG and EXIF 2.1* still image files up to 8 megapixels are supported (maximum vertical and horizontal resolution is 5120 pixels).
* File format used by digital still cameras
• File extensions: .jpg (must be used for the player to recognize JPEG files – do not use for other file types)
• File structure: Up to 999 files per folder
Chapter 2
Controls and displays

Front panel

1 Operation indicator
2 ▲ OPEN/CLOSE
   Press to open/close the disc tray.
3 ▶/■ DVD/CD
   Press to switch to the DVD/CD function. Also
   press to start/pause/resume playback.
4 ■
   Press to stop playback.
5 FM/AM
   Press to switch to the tuner function, then to
   toggle between the FM and AM bands.
6 VOLUME buttons
   Use to adjust the volume.
7 ◆ STANDBY/ON
   Press to switch the system on or into standby.
8 PHONES jack
   Headphone jack.
9 Timer indicator
   Lights when the wake-up timer is set (page 42).
10 Display
   See Display on page 9 for detailed information.
11 Remote sensor
12 Disc tray
Controls and displays

Display

1 Tuner indicators

European model only
Lights when in one of the RDS display or search modes.

Lights when a broadcast is being received.

Lights when a stereo FM broadcast is being received in auto stereo mode.

Lights when FM mono reception is selected.

2 Lights when a disc is playing.

3 MIDNIGHT
Lights when the Midnight mode is selected (page 27).

4 QUIET
Lights when the Quiet mode is selected (page 27).

5 PGM
Lights when a program list has been programmed (page 33).

6 RPT and RPT-1
RPT lights during repeat play. RPT-1 lights during repeat one-track play (page 31).

7 RDM
Lights during random play (page 32).

8 ATT
Lights when the input attenuator is active for the currently selected analog input (page 89).

9 REC MODE
Lights when the Rec Mode is on (page 54).

10 Timer indicators

Lights when the wake-up timer is set (page 42).

Lights when the sleep timer is active (page 43).

11 PRO LOGIC II
Lights during Dolby Pro Logic II decoding (page 24).

12 DIGITAL
Lights during playback of a Dolby Digital source (page 24).
13 Speaker indicators
These show which speakers are being used to output the current source (they are not placement diagrams). The illustrations below show some example displays.

- 5.1 channel surround sound
- Stereo (2.1 channel) sound
- 3.1 channel sound with Dialogue enhancement on the center channel
- 5.1 channel surround sound with Virtual Surround Back mode active

14 PRGSVE
*Not applicable to the European model*
Lights when progressive scan video output is selected (page 50).

15 ADV.SURR.
Lights when one of the Advanced or Front Surround listening modes is selected (page 25).

16
Lights during playback of a DTS source (page 24).

17 kHz / MHz
Indicates the unit of the frequency shown in the character display (kHz for AM, MHz for FM).

18 Character display

19
Lights during multi-angle scenes on a DVD disc (page 36).

---

Remote control

1 Central button
2 Function select buttons
- Press to select the source you want to listen to (DVD (CD), TUNER, TV, LINE).

Important
- Functions printed in green on the remote control are accessed by switching the MAIN/SUB switch to SUB.

1 Central button
- Press to switch the system on or into standby.

2 Function select buttons
- Press to select the source you want to listen to (DVD (CD), TUNER, TV, LINE).
Controls and displays

3 FRONT SURROUND
Use to select a Front Surround listening mode (page 25).

4 Disc playback controls

▶ Press to start or resume playback.

◀ and ◄/❚❚
Use for reverse slow motion playback, frame reverse and reverse scanning.

► and ▶/►
Use for forward slow motion playback, frame advance and forward scanning.

II
Press to pause playback; press again to restart.

■
Press to stop playback.

5 Press to jump to the beginning of the current chapter/track, then to previous chapters/tracks.

6 DVD MENU
Press to display a DVD disc menu, or the Disc Navigator if a VR format DVD-RW, CD, Video CD/Super VCD, MP3, WMA or JPEG disc is loaded.

7 Cursor buttons, ENTER and tuning buttons

Cursor buttons
Use the cursor buttons (↑/↓/←/→) to navigate on-screen displays and menus.

ENTER
Press to select an option or execute a command.

TUNE +/-
Use to tune the radio.

8 MUTE
Use to select station presets when listening to the radio.

9 MASTER VOLUME
Use to adjust the volume.

10 TV CONTROL (page 16)

⏻ Press to switch the TV on or into standby.

INPUT
Press to switch the TV input.

CH +/-
Use to select channels on the TV.

VOL +/-
Use to adjust the volume on the TV.

11 OPEN/CLOSE
Press to open/close the disc tray.

12 ● Press to jump to the next chapter/track.

13 RETURN
Press to return to a previous menu screen.

14 SOUND
Press to access the sound menu, from which you can adjust the DSP effect level, bass and treble, etc.

15 Surround sound mode/sound enhancement buttons

SURROUND
Use to select a Surround mode (page 24).

ADVANCED
Use to select an Advanced Surround mode (page 25).

VIRTUAL SB
Press to switch the Virtual Surround Back speaker effect on/off (page 27).
Controls and displays

BASS MODE
Use to select a Bass Mode (page 28).

DIALOGUE
Use to select a Dialogue mode (page 27).

CH LEVEL
Use to adjust the speaker level (page 46).

16 DVD/CD buttons

AUDIO
Press to select an audio channel or language (page 35).

SUBTITLE
Press to display/change the DVD subtitle display (page 35).

ANGLE
Press to change camera angle during DVD multi-angle scene playback (page 36).

PROGRAM
Use to program/play a program list (page 33–34).

REPEAT
Use to select a repeat play mode (page 31).

RANDOM
Use to select a random play mode (page 32).

17 ZOOM
Press to change the screen zoom level (page 36).

TOP MENU
Use to display the top menu of a DVD disc in the play position (this may be the same as pressing DVD MENU).

HOME MENU
Press to display (or exit) the on-screen menu for Initial Settings, Play Mode functions, etc.

18 SYSTEM SETUP
Use to make various system and surround sound settings (page 44).

TEST TONE
Use to output the test tone (for speaker setup) (page 46).

QUIET/MIDNIGHT
Use to select the Quiet and Midnight modes (page 27).

19 DIMMER
Press to switch between normal and dimmed front panel display.

DISPLAY
Press to display/change disc information shown on-screen (page 36).

TIMER/CLOCK
Press to display the clock and to access the timer menu (page 14 and page 42).

20 SR+
Press to switch the SR+ mode on/off (page 58).

FOLDER –
Press to jump to previous folders.

FOLDER +
Press to jump to the next folder.

CLR
Press to clear an entry.

ENTER
Selects menu options, etc. (works exactly the same as the ENTER button in 7 above).

21 MAIN/SUB
Change from MAIN to SUB to access the functions/commands printed in green on the remote.

ROOM SETUP
Press to start Room Setup (page 15).

22 Number buttons
Use the number buttons for selecting chapters/tracks from a disc directly.
Chapter 3
Getting started

Switching on and setting up
After making sure everything is connected up properly, you’re ready to switch on. The first thing to do is to tell the system what kind of TV you’re using, standard or widescreen. After that you can set up the surround sound for your room, and set the clock so that you can use the timer features.

1. Press STANDBY/ON (on the remote or the front panel) to switch the system on. Also make sure that your TV is switched on and that the video input is set to this system (for example, if you connected this system to the VIDEO 1 input on your TV, switch your TV to VIDEO 1).

2. Follow the directions that appear on the on-screen display.
   European model:
   - Use the arrow buttons to choose a language, then press ENTER.

   All other models:
   - After you’re finished reading the welcome screen, press ENTER to move on.
3 Use the \( \leftarrow/\rightarrow \) (cursor left/right) buttons to select either 'Wide screen (16:9)' or 'Standard size screen (4:3)' according to the kind of TV you have, then press ENTER. See also Screen sizes and disc formats on page 68 if you're not sure which one to choose.

4 Press ENTER again to finish setting up.

Tip
- You can also use the function buttons (DVD/CD, TUNER, etc.) or the \( \leftarrow/\rightarrow \) OPEN/CLOSE button to switch the system on from standby.

Setting the clock
Setting the clock allows you to use the timer features.

1 Press TIMER/CLOCK. • If you are adjusting the clock, rather than setting it for the first time, press TIMER/CLOCK again.

2 If 'Clock ADJ?' isn’t already showing in the display, press \( \leftarrow \) or \( \rightarrow \) (cursor left or right) until you see it.

3 Press ENTER.

4 Use the \( \uparrow/\downarrow \) (cursor up/down) buttons to set the hour.

5 Press ENTER.

6 Use the \( \uparrow/\downarrow \) (cursor up/down) buttons to set the minute.

7 Press ENTER to confirm. The display flashes to indicate the clock is set.

Tip
- Press TIMER/CLOCK anytime to display the clock.

Note
- If you unplug the system from the wall outlet, or there is a power outage, you will need to set the clock again.
Getting started

Home theater sound setup

Depending on the size and characteristics of your room, you can choose to place your speakers in one of two ways using this system:

- **Standard surround 5-spot setup** – This is a standard multichannel surround sound speaker setup for optimal 5.1 channel home theatre sound.

- **Front surround 3-spot setup** – This setup is ideal when rear surround speaker placement isn’t possible or you want to avoid running long speaker cables in your listening area. Use this setup together with the Front Surround modes to take advantage of wall and ceiling reflections for a very realistic surround effect.

See [About the listening modes](#) on page 23 for more on using the different listening modes with each speaker setup.

Using the Room Setup

After you have set up your speakers to your liking (see Home theater sound setup above), make sure you calibrate your system for surround sound. This is a quick and easy way to get good surround sound for your room.

For a more detailed surround sound setup, see [Using the System Setup menu](#) on page 44.

1. If the system isn’t already on, press ⏻️ STANDBY/ON to switch it on.
2. Press ROOM SETUP. If you have previously set up the room type and seating position, the display will show the current room settings.
3. Press ENTER.
4. Use the ↑/↓ (cursor up/down) buttons to select a room type then press ENTER. Choose one of the following depending on your room size:
   - **S** – Smaller than average room
   - **M** – Average room
   - **L** – Larger than average room
5. Use the ↑/↓ (cursor up/down) buttons to select a seating position setting, then press ENTER. Choose one of the following depending on where your main listening position is:
   - **Fwd** – If you are nearer to the front speakers than the surround speakers
   - **Mid** – If you are equal distance from the front and surround speakers
   - **Back** – If you are nearer to the surround speakers than the front speakers

**Note**

- The Room Setup automatically sets up both channel level and channel delay. If you have already set the channel levels manually (see [Setting the channel levels](#) on page 46), you will see Room Set? in the display when you first press the ROOM SETUP button.
Setting up the remote to control your TV

You can set up the supplied remote to control your TV using the TV CONTROL buttons.

1. Switch on your TV.
2. Find the name of the manufacturer of your TV in the Preset code list on page 70. Next to each manufacturer is one or more three digit codes. These tell the remote what kind of TV you have.
   If the name of the manufacturer of your TV does not appear in the table, you won’t be able to set up this remote to control your TV.
3. Point the remote at your TV, hold down the CLR button, then enter the three digit code for your TV.
   The remote transmits an on/off signal to the TV.
   If you've entered the correct code, your TV should switch off.
   If your TV doesn’t turn off, repeat the procedure using the next code in the list until your TV switches off successfully. Once set, you can use the individual TV controls shown below.

Note

- The default setting is for a Pioneer TV.

Using the on-screen displays

For ease of use, this system makes extensive use of graphical on-screen displays (OSDs). You should get used to the way these work as you’ll need to use them when setting up the system, using some of the playback features, such as program play, and when making more advanced settings for audio and video.

All the screens are navigated in basically the same way, using the cursor buttons (↑, ↓, ←, →) to change the highlighted item and pressing ENTER to select it.

Important

- Throughout this manual, ‘Select’ means use the cursor buttons to highlight an item on-screen, then press ENTER.

<table>

Getting started

Tip
- The button guide at the bottom of every OSD screen shows you which buttons you’ll need to use for that screen.

Playing discs
The basic playback controls for playing DVD, CD, Video CD/Super VCD and WMA/MP3 discs are covered here. Further functions are detailed in chapter 5.

1 If the player isn’t already on, press ⏻ STANDBY/ON to switch it on.
If you’re playing a DVD or Video CD/Super VCD, also turn on your TV and make sure that it is set to the correct video input.

2 Press ▼ OPEN/CLOSE to open the disc tray.

3 Load a disc.
Load a disc with the label side facing up, using the disc tray guide to align the disc (if you’re loading a double-sided DVD disc, load it with the side you want to play face down).

4 Press ► (play) to start playback.
If you’re playing a DVD or Video CD/Super VCD, a menu may appear. See DVD-Video disc menus on page 19 and Video CD/Super VCD PBC menus on page 20 for how to navigate these.
If you’re playing an WMA/MP3 disc, it may take a few seconds before playback starts, depending on the complexity of the file structure on the disc.
If you loaded a CD/CD-R/RW containing JPEGs, a slideshow will start. See Viewing JPEG discs on page 38 for more on playing these discs.

5 Use the MASTER VOLUME – / + button (or the front panel VOLUME buttons) to adjust the volume.

Basic playback controls
The following table shows the basic controls on the remote for playing discs. You can find other playback features in the chapter 5.

<table>
<thead>
<tr>
<th>Button</th>
<th>What it does</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENTER</td>
<td>Selects the highlighted menu item (both ENTER buttons work in exactly the same way)</td>
</tr>
<tr>
<td>RETURN</td>
<td>Returns to the main menu without saving changes</td>
</tr>
</tbody>
</table>

Basic playback controls
Getting started

Note
You may find with some DVD discs that some playback controls don’t work in certain parts of the disc. This is not a malfunction.

Track skip and number buttons for track selection do not work with unfinalized CD-R/RW discs.

Using the front panel controls
The OPEN/CLOSE, CD, DVD/CD, FM/AM and (stop) buttons work the same way as the remote control equivalents.

Resume and Last Memory
When you stop playback of a DVD or Video CD disc, Resume shows in the display indicating that you can resume playback from that point. If the disc tray is not opened, the next time you start playback the display shows Resume and playback resumes from the resume point. For DVD discs only: If you take the disc out of the player, the play position is stored in memory. When you load the disc next time, the display shows Last Mem and you can resume playback (this works for up to five discs). If you want to clear the resume/last memory point, press (stop) while Resume or Last Mem is displayed.

<table>

<td>• If the disc is playing, playback jumps to the start of the selected chapter or track after a few seconds (or after pressing ENTER).</td>
</tr>
</tbody>
</table>

Note
• You may find with some DVD discs that some playback controls don’t work in certain parts of the disc. This is not a malfunction.
• Track skip and number buttons for track selection do not work with unfinalized CD-R/RW discs.
Getting started

Note

• When a Video CD is loaded, the Resume point is lost if the system is switched off, or switched to a function other than DVD (CD).
• For the Last Memory function to work, you must press (stop) to stop playback before opening the disc tray.
• The Last Memory function doesn’t work with VR format DVD-RW discs.

FAQ

• After I load a DVD disc, it ejects automatically after a few seconds!
Most likely, the disc is the wrong region for your system. The region number should be printed on the disc; check it against the region number of the system (which you can find on the rear panel). See also DVD Video regions on page 61.
If the region number is OK, it may be that the disc is damaged or dirty. Clean the disc and look for signs of damage. See also Using and taking care of discs on page 61.
• Why won’t the disc I loaded play?
First check that you loaded the disc the right way up (label side up), and that it’s clean and not damaged. See Using and taking care of discs on page 61 for information on cleaning discs.
If a disc loaded correctly won’t play, it’s probably an incompatible format or disc type, such as DVD-Audio or DVD-ROM. See Disc / content format playback compatibility on page 6 for more on disc compatibility.
• I have a widescreen TV so why are there black bars at the top and bottom of the screen when I play some discs?
Some movie formats are such that even when played on a widescreen TV, black bars are necessary at the top and bottom of the screen. This is not a malfunction.
• I have a standard (4:3) TV and set the system to show widescreen DVDs in pan & scan format, so why do I still get black bars top and bottom with some discs?
Some discs override the display preferences of the system, so even if you have 4:3 (Pan & Scan) selected, those discs will still be shown in letterbox format. This is not a malfunction.

DVD-Video disc menus

Many DVD-Video discs contain menus from which you can select what you want to watch. They may give access to additional features, such as subtitle and audio language selection, or special features such as slideshows. See the disc packaging for details.
Sometimes DVD-Video menus are displayed automatically when you start playback; others only appear when you press DVD MENU or TOP MENU.
Video CD/Super VCD PBC menus

Some Video CD/Super VCDs have menus from which you can choose what you want to watch. These are called PBC (Playback control) menus.

You can play a PBC Video CD/Super VCD without having to navigate the PBC menu by pressing \(\square\) (stop) then starting playback using a number button to select a track, rather than \(\triangledown\) (play) (or \(\triangledown\) on the front panel).

Listening to the radio

The tuner can receive both FM and AM broadcasts, and lets you memorize your favorite stations so you don’t have to manually tune in every time you want to listen. For more on using the radio, see More tuner features: RDS on page 40.

1 If the system isn’t already on, press \(\bigcirc\) STANDBY/ON to switch on.
2 Press TUNER to switch to the tuner, then press repeatedly to select the AM or FM band.
The display shows the tuner band and frequency.
   • If you’re using the front panel controls, the TUNER button switches between FM, AM and station presets (see Memorizing stations below).

3 Tune to a frequency.
There are three tuning modes—manual, auto, and high-speed:
   • Manual tuning: Press TUNE +/– repeatedly to change the displayed frequency.
   • Auto tuning: Press and hold TUNE +/– until the frequency display starts to move, then release. The tuner will stop on the next station it finds. Repeat to search for other stations.
   • High-speed tuning: Press and hold TUNE +/– until the frequency display starts to move rapidly. Keep the button held down until you reach the frequency you want. If necessary, fine tune the frequency using the manual tuning method.

Improving poor FM reception
If you’re listening to an FM station in stereo but the reception is weak, you can improve the sound quality by switching to mono.

1 Tune to an FM radio station.
2 Press SYSTEM SETUP.
3 Use the ←/→ (cursor left/right) buttons to choose ‘FM Mode?’ then press ENTER.
4 Use the ↑/↓ (cursor up/down) buttons to select ‘FM Mono’ then press ENTER.
The mono indicator ( ) lights when the tuner is in mono reception mode.

Select Auto above to switch back to auto-stereo mode (the stereo indicator ( ) lights when receiving a stereo broadcast).

Memorizing stations
You can save up to 30 station presets so that you always have easy access to your favorite stations without having to tune in manually each time.

1 Tune to an AM or FM radio station.
   For the FM band, select mono or auto-stereo reception as necessary. This setting is saved along with the preset.
2 Press SYSTEM SETUP.
3 Use the ←/→ (cursor left/right) buttons to choose ‘St. Memory?’ then press ENTER.
4 Use the ↑/↓ (cursor up/down) buttons to select the station preset you want.
There are 30 preset locations; each can store one station preset.
5 Press ENTER to save the station preset.
03 Getting started

Note
- If the system is unplugged from the power supply completely, saved stations will remain for several days, after which you’ll have to save them again.

Listening to station presets
1. Make sure the TUNER function is selected.
2. Use the ST +/- buttons to select a station preset.

Listening to other sources
You can connect up to three external sources (TV, satellite receiver, etc.) to this system, including one digital source. See also Connecting auxiliary components on page 53.

1. If the system isn’t already on, press STANDBY/ON to switch on. Also make sure that the external source (TV, satellite receiver, etc.) is switched on.
2. Select the source you want to listen to.
   - If you’re using the remote control, press TV to select the TV IN input, or use the LINE (L1/L2) button to select the LINE 1 or LINE 2 input.
3. If necessary, start playback of the external source.
Chapter 4
Listening to your system

About the listening modes
As explained in Home theater sound setup on page 15, there are two basic surround speaker setup options available. Of course you can select any of the listening modes regardless of how you place your speakers, but you will achieve the best surround effect by using the listening modes in conjunction with your speaker setup:

- **Standard surround 5-spot setup** – Use the Standard (Listening in surround sound on page 24) and Advanced (Using the Advanced Surround effects on page 25) surround listening modes with this setup.
- **Front surround 3-spot setup** – See Using Front Surround on page 25 for the options available with this speaker setup.

Make sure you have completed Using the Room Setup on page 15. For a more detailed surround sound setup, see Using the System Setup menu on page 44.

**Note**
- Certain features explained in this section may not be possible depending on the source (for example, 88.2 / 96 kHz sources), or a conflicting system setting. See Error Messages on page 67 for more on this.

**Auto listening mode**
The Auto listening mode is the simplest way to listen to any source as it was mastered: the output from the speakers mirrors the channels in the source material.

- Press SURROUND to select the ‘Auto’ listening mode.

If the source is Dolby Digital or DTS, the \[\text{2\,DIGITAL}\] or \[\text{DTS}\] indicator on the front panel lights.

**Note**
- Any previously active Dolby Pro Logic or Advanced Surround mode is canceled when Auto listening mode is selected.
Listening in surround sound
You can listen to any source—stereo or multichannel, analog or digital—in surround sound. Surround sound is generated from stereo sources using one of the Dolby Pro Logic decoding modes.

- Press SURROUND repeatedly to select a listening mode (or press SURROUND then use the †/ ‡ (cursor up/down) buttons). The listening mode choices that appear in the display will vary according to the type of source that’s playing.
  - Auto – Auto listening mode (see above)
  - Dolby Digital / DTS – Dolby Digital or DTS decoding (depending on the source). For a multichannel source, this will be the same as Auto.
  - Pro Logic – 4.1 channel surround sound for use with any two-channel source
  - PL II Movie – Pro Logic II 5.1 channel surround sound, especially suited to movie sources, for use with any two-channel source
  - PL II Music – Pro Logic II 5.1 channel surround sound, especially suited to music sources, for use with any two-channel source (see also Dolby Pro Logic II Music settings below)
  - Stereo – See Listening in stereo below

Note
- When listening in Dolby Digital / DTS mode, two-channel material will automatically be played in surround sound using Dolby Pro Logic II decoding.
- Dolby Digital / DTS sources that use only the center channel cannot be played back in surround sound.

Dolby Pro Logic II Music settings
When listening in Dolby Pro Logic II Music mode, there are three further parameters you can adjust: Center Width, Dimension, and Panorama.

1. With Dolby Pro Logic II Music mode active, press SOUND.
2. Use the †/ ‡ (cursor left/right) buttons to select ‘C Width’, ‘Dimen.’ or ‘Pnrm.’
   - C Width (Center Width): Makes the center channel wider (higher settings) or narrower (lower settings)
   - Dimen. (Dimension): Makes the sound more distant (minus settings), or more forward (positive settings)
   - Pnrm. (Panorama): Creates more spacious surround sound
3. Use the †/ ‡ (cursor up/down) buttons to adjust the setting.
   Center Width is adjustable between 0 and 7;
   Dimension between –3 and +3. Panorama is On or Off.
4. Press ENTER to confirm.
Listening to your system

Using the Advanced Surround effects
The Advanced Surround effects can be used with any multichannel or stereo source for a variety of additional surround sound effects. The 5-spot setup described in Home theater sound setup on page 15 should be used with these effects.

For more options, see Adjusting the Advanced and Front Surround effect level below.

- Press ADVANCED to select an Advanced Surround mode (or press ADVANCED then use the \(\uparrow/\downarrow\) buttons).

Press repeatedly to select from:
- Adv. Movie – Gives a movie theater-type sound
- Adv. Music – Gives a concert hall-type sound
- Expanded – Creates an extra wide surround field
- TV Surr. – Designed for mono or stereo TV broadcasts and other sources
- Sports – Designed for sports and other programs based on commentary
- Game – Creates surround sound from video game sources
- 5ch Stereo – Designed to give powerful surround sound to stereo music sources

Using Front Surround
The Front Surround modes are effective when you are using the Front surround 3-spot speaker setup as described in Home theater sound setup on page 15. The surround speakers should be placed on top of the front speakers and oriented either towards the walls, or straight ahead, depending on which mode you are using (see below).

For more options, see Adjusting the Advanced and Front Surround effect level below.

- Press FRONT SURROUND to select an Front Surround mode (or press FRONT SURROUND then use the \(\uparrow/\downarrow\) buttons).

Press repeatedly to select from:
- Frt. Movie – The Front Surround Movie mode emphasizes directionality, giving you a realistic movie theater-type sound.
- Frt. Music – The Front Surround Music mode provides greater breadth and depth to music sources, enveloping you with a concert hall-type sound.
- ExtraPower – The Extra Power mode gives additional energy and depth to a stereo source by using the surround speakers in addition to the front speakers.
If you have selected **Frt. Movie** or **Frt. Music**, you will achieve best results by turning each surround speaker about 50º towards the closest wall. With **ExtraPower**, orient the surround speakers in the same direction as the front speakers (towards the listening position).

- When turning, you will feel the surround speaker snap correctly into place. Do not force the speaker to turn past this point.

### Adjusting the Advanced and Front Surround effect level

You can emphasize or reduce the effect of the Advanced and Front Surround modes as you like. You can set the effect level for all modes independently.

1. With one of the Advanced or Front Surround modes active, press **SOUND**.
2. Use the **cursor left/right** buttons to select ‘Effect’.
3. Use the **cursor up/down** buttons to adjust the effect level. The effect level can be adjusted from 10 (min) to 90 (max).
4. Press **ENTER** to confirm.

### Listening in stereo

You can listen to any source—stereo or multichannel, analog or digital—in stereo. When playing a multichannel source, stereo sound is created by downmixing all channels to the front left/right speakers and the subwoofer.

- Press **SURROUND** repeatedly until ‘Stereo’ shows in the display. Any active Advanced or Front Surround mode is canceled.

### Listening with headphones

When headphones are connected, only the **Stereo** (default) and **Phones Surround** (virtual surround sound for headphones) modes are available. When you disconnect them it reverts to the previous mode.

- With headphones connected, press **ADVANCED** or **FRONT SURROUND** to select ‘Phones Surround’ or **SURROUND** to select ‘Stereo’.
**Enhancing dialogue**

- Default setting: **Dialog Off** (European model) / **Dialog Mid** (All other models)

The Dialogue Enhancement feature is designed to make the dialog stand out from other background sounds in a TV or movie soundtrack.

- Press **DIALOGUE** to select the amount of dialog enhancement.

Press repeatedly to select from:
- **Dialog Off** – No dialog enhancement
- **Dialog Mid** – Moderate dialog enhancement
- **Dialog Max** – Strong dialog enhancement

**Listening with a virtual surround back speaker**

- Default setting: **Vir. SB Off**

The Virtual Surround Back feature can be used when listening in surround sound (using the 5-spot setup described in *Home theater sound setup* on page 15) to simulate an added surround back channel. In a real theater the surround back speaker would be directly behind you, creating more cohesive and realistic surround sound.

- Press **VIRTUAL SB** repeatedly to switch between ‘Vir. SB On’ and ‘Vir. SB Off’.

**Note**

- You can’t use Virtual Surround Back when using the **Stereo** listening mode (or **Auto** with stereo sources).
- If you are using the The Front surround 3-spot setup (see *Home theater sound setup* on page 15), switch the Virtual Surround Back feature off.
- If there is no surround channel, Virtual Surround Back has no effect.

**Using Quiet and Midnight listening modes**

- Default setting: **Off**

The Quiet listening feature reduces excessive bass or treble in a sound source. You can use this feature if the music is a little bit harsh and you would like a smoother sound.
04 Listening to your system

The Midnight listening feature allows you to hear effective surround sound of movies at low volume levels. The effect automatically adjusts according to the volume at which you’re listening.

1 Press SOUND.

2 Use the \(<\)/\(>\) (cursor left/right) buttons to select ‘Bass’ or ‘Treble’.

3 Use the \(\uparrow\)/\(\downarrow\) (cursor up/down) buttons to adjust the sound.

The bass and treble can be adjusted from \(-3\) to \(+3\).

4 Press ENTER to confirm.

Boosting the bass level
There are three bass modes you can use to enhance the bass in a source.

- Press QUIET/MIDNIGHT repeatedly to switch between ‘Quiet’, ‘Midnight’ and ‘Off’.

Adjusting the bass and treble
Use the bass and treble controls to adjust the overall tone. Bass and treble adjustment is not possible when the Quiet or Midnight modes are active.

- Press BASS MODE repeatedly to choose an option that fits the source you’re listening to.
  - Music – Can be used with music to give a deeper bass sound
  - Cinema – Good for action movies or movies with lots of sound effects
  - P. Bass – Can be used with music sources to bring the beat of the music (or soundtrack) to the forefront
  - Off – Switch off the bass boost if it causes excessive bass (i.e. it sounds ‘boomy’) in the source
Chapter 5
Playing discs

Note
- Some DVDs restrict the use of some functions (random or repeat, for example) in some or all parts of the disc. This is not a malfunction.
- When playing Video CD/Super VCDs, some of the functions are not available during PBC playback. If you want to use them, start the disc playing using a number button to select a track.
- Many features are not available when using unfinalized CD-R/RW discs.

Remember
- To access functions printed in green on the remote, move the slider switch from MAIN to SUB.

Scanning discs
You can fast-scan discs forward or backward at various different speeds.
1. During playback, press / or / to start scanning.
   • There is no sound while scanning DVDs and Video CD/Super VCDs, and no subtitles while scanning DVDs.
2. Press repeatedly to increase the scanning speed.
   • The scanning speed is shown on-screen.
3. To resume playback, press (play).
   • When scanning a Video CD/Super VCD or a WMA/MP3 track, playback automatically resumes at the end or beginning of the track.

Playing in slow motion
You can play DVDs and Video CD/Super VCDs at four different forward slow motion speeds. DVD discs can also be played at two reverse speeds.
1. During playback, press II (pause).
2. Press and hold or until slow motion playback starts.
   • The slow motion speed is shown on-screen.
   • There is no sound during slow motion playback.
3. Press repeatedly to change the slow motion speed.
4. To resume normal playback, press (play).
   • Depending on the disc, normal playback may automatically resume when a new chapter is reached.

Frame advance/frame reverse
You can advance or back up DVD discs frame-by-frame. With Video CD/Super VCDs you can only use frame advance.
05 Playing discs

1 During playback, press II (pause).
2 Press ◀/◄ or ▶/► to reverse or advance a frame at a time.
3 To resume normal playback, press ▶ (play).
   - Depending on the disc, normal playback may automatically resume when a new chapter is reached.

Using the Disc Navigator to browse the contents of a disc

Use the Disc Navigator to browse through the contents of a disc to find the part you want to play. You can use the Disc Navigator when a disc is playing or stopped (a disc must be loaded).

1 Press HOME MENU and select 'Disc Navigator' from the on-screen display.

   - With most discs, you can also press DVD MENU to go directly to the Disc Navigator.

2 Select what you want to play.
   Depending on the type of disc you have loaded, the Disc Navigator looks slightly different.
   The screen for DVD discs shows the titles on the left and the chapters on the right. Select a title, or a chapter within a title.

   - It's not possible to switch between Original and Playlist during playback.
   - Not all VR format DVD-RW discs have a Playlist.

   The screen for CDs and Video CD/Super VCDs shows a list of tracks.

   The screen for an WMA/MP3 disc shows the folder names on the left and the track names on the right (note that if there are more than 16 folders or names that contain accented or non-roman characters, tracks and folders may show up with generic names – F_033, T_035, etc.).
   Select a folder, or a track within a folder.

   - It's not possible to switch between Original and Playlist during playback.
   - Not all VR format DVD-RW discs have a Playlist.

For a VR (Video Recording) mode DVD-RW disc select between the Playlist and Original areas of the disc, or a title. Press ◀ (cursor right) to preview the title.

Playback starts after you press ENTER.
Tip

- Another way to find a particular place on a disc is to use one of the search modes. See Searching a disc on page 34.

Looping a section of a disc

The A-B Repeat function allows you to specify two points (A and B) within a track (CD and Video CD) or title (DVD) that form a loop which is played over and over.

- You can’t use A-B Repeat with Super VCD or WMA/MP3 discs.

1. During playback, press HOME MENU and select ‘Play Mode’.
2. Select ‘A-B Repeat’ from the list of functions on the left.

3. Press ENTER on ‘A(Start Point)’ to set the loop start point.
4. Press ENTER on ‘B(End Point)’ to set the loop end point.
   After pressing ENTER, playback jumps back to the start point and plays the loop.
   - The minimum loop time is 2 seconds.
5. To resume normal playback, select ‘Off’ from the menu.

Using repeat play

There are various repeat play options, depending on the kind of disc loaded. It’s also possible to use repeat play together with program play to repeat the tracks/chapters in the program list (see Creating a program list on page 33). However, note that you can’t use repeat and random play at the same time.

1. During playback, press HOME MENU and select ‘Play Mode’.
2. Select ‘Repeat’ from the list of functions on the left.
3. Select a repeat play option.
   If program play is active, select Program Repeat to repeat the program list, or Repeat Off to cancel.
   - For DVD discs, select Title Repeat or Chapter Repeat (or Repeat Off).
   - For CDs and Video CD/Super VCDs, select Disc Repeat or Track Repeat (or Repeat Off).
   - For WMA/MP3 discs, select Disc Repeat, Folder Repeat or Track Repeat (or Repeat Off).
You can also use the REPEAT button on the remote to select a repeat play option. The repeat mode is indicated in the front panel display and on-screen. The repeat modes available are the same as when choosing from the Play Mode menu.

- If you’ve created a program list, Program Repeat is also available.
- During playback, you can cancel repeat play by pressing CLR.

Using random play

Use this function to play titles or chapters (DVD-Video) or tracks (CD, Video CD/Super VCD and WMA/MP3 discs) in a random order.

You can set the random play option when a disc is playing or stopped. However, you can’t use random play together with program or repeat play.

- You can’t use random play with VR format DVD-RW discs, or while a DVD disc menu is being displayed.

1. During playback, press HOME MENU and select ‘Play Mode’.
2. Select ‘Random’ from the list of functions on the left.

3. Select a random play option.
   • For DVD discs, select Random Title or Random Chapter. (or Random Off).
   • For CDs and Video CD/Super VCDs, select On or Off to switch random play on or off.
   • For WMA/MP3 discs, select Random All (all folders) or Random Track (current folder only). (or Random Off).

Tip

Use the following controls during random play:

<table>
<thead>
<tr>
<th>Button</th>
<th>What it does</th>
</tr>
</thead>
<tbody>
<tr>
<td>■</td>
<td>Stop and cancel random play.</td>
</tr>
<tr>
<td>▶▶❙</td>
<td>Selects another track/chapter at random from those remaining.</td>
</tr>
<tr>
<td>◄◄❚</td>
<td>Returns to the beginning of the current track/chapter. You can’t go back further than this.</td>
</tr>
</tbody>
</table>

- You can also use the RANDOM button on the remote to select a random play mode. The random mode is indicated in the front panel display and on-screen. The random modes available are the same as when choosing from the Play Mode menu. Press ENTER to start random play.
- To cancel random playback without stopping playback, press CLR. The disc will play to the end, then stop.
Creating a program list

This feature lets you program the play order of titles/chapters/folders/tracks on a disc.

- You can’t use Program play with VR format DVD-RW discs, or while a DVD disc menu is being displayed.

Using the OSD

1. During playback, press HOME MENU and select ‘Play Mode’.
2. Select ‘Program’ from the list of functions on the left.
3. Select ‘Create/Edit’ from the list of program options.
4. Use the cursor buttons and ENTER to select a title, chapter, folder or track for the current step in the program list.
   For a DVD disc, you can add a title or a chapter to the program list.
   For a CD or Video CD/Super VCD, select a track to add to the program list.
   For an WMA/MP3 disc, you can add a whole folder, or a track within a folder to the program list.

After pressing ENTER to select the title/chapter/folder/track, the step number automatically moves down one.

5. Repeat step 4 to build up a program list. A program list can contain up to 24 titles/chapters/folders/tracks.
   - You can insert steps into the middle of a program list by just highlighting the position where you want the new step to appear and entering a title/chapter/folder/track number.
   - To delete a step, highlight it and press CLR.
6. To play the program list, press ◄ (play). Program play remains active until you turn off program play (see below), erase the program list (see below), eject the disc or switch off the player.

Tip

- Use the following controls during program play:

<table>
<thead>
<tr>
<th>Button</th>
<th>What it does</th>
</tr>
</thead>
<tbody>
<tr>
<td>HOME MENU</td>
<td>Save the program list and exit the program edit screen without starting playback.</td>
</tr>
<tr>
<td>►</td>
<td>Skip to the next step in the program list.</td>
</tr>
<tr>
<td>CLR</td>
<td>Switch off program play. Press while stopped to erase the program list.</td>
</tr>
<tr>
<td>RETURN</td>
<td>Exit the program edit screen without saving any changes.</td>
</tr>
</tbody>
</table>

Other functions available from the program menu

There are a number of other options in the program menu in addition to Create/Edit.
05 Playing discs

- Playback Start – Starts playback of a saved program list
- Playback Stop – Turns off program play, but does not erase the program list
- Program Delete – Erases the program list and turns off program play
- Program Memory (DVD only) – Select On to save the program list for the disc loaded. (Select Off to cancel the program memory for the disc loaded)

Using the front panel display
Even though the OSD is available for CDs and WMA/MP3 discs, the front panel display provides enough information to make a program list easily. If a disc is playing, stop it first.

1 Press PROGRAM.
You’re prompted to enter a track or folder for the first step in the program list.

2 Use ↑/↓ (cursor up/down) to select a track or a folder, then press ENTER.
   - For WMA/MP3 discs only: To select an individual track within a folder, use the ↑/↓ (cursor up/down) buttons to select the folder, then press •, then use ↑/↓ (cursor up/down) to select a track. Press ENTER.

4 To play the program list, press ▶ (play).
Program play remains active until you press ■ (stop), clear the playlist (see below), eject the disc or switch off the player.

Clearing the program list
You must clear the program list to program a new one.
1 If a disc is playing, press ■ (stop).
2 Press CLR.

Note
- Program lists are saved for the DVD disc loaded. When you load a disc with a saved program list, program play is automatically turned on.
- You can save program lists for up to 24 discs. After that, the oldest one is replaced with the new one saved.

Searching a disc
You can search DVD discs by title or chapter number, or by time. CD/Super VCDs can be searched by track number, and Video CDs by track number or time. WMA/MP3 discs can be searched by folder or track number.

3 Repeat step 2 to build up a program list.
A program list can contain up to 24 steps.
Playing discs

1. Press HOME MENU and select ‘Play Mode’.

2. Select ‘Search Mode’ from the list of functions on the left.
   The search options that appear depend on the kind of disc loaded. The screen below shows the DVD search options.

3. Select a search mode.
   - The disc must be playing in order to use time search.

4. Use the number buttons to enter a title, chapter, folder or track number, or a time.
   - For a time search, enter the number of minutes and seconds into the currently playing title (DVD) or track (Video CD) you want playback to resume from. For example, press 4, 5, 0, 0 to have playback start from 45 minutes into the disc. For 1 hour, 20 minutes and 30 seconds, press 8, 0, 3, 0.

5. Press ENTER to start playback.

Switching subtitles

Some DVD discs have subtitles in one or more languages; the disc box will usually tell you which subtitle languages are available. You can switch subtitle language during playback.

- Press SUBTITLE repeatedly to select a subtitle option.

Note
- Some discs only allow you to change subtitle language from the disc menu. Press TOP MENU to access.
- To set subtitle preferences, see Language settings on page 50.

Switching the DVD audio language

When playing a DVD disc recorded with dialog in two or more languages, you can switch audio language during playback.

- Press AUDIO repeatedly to select an audio language option.

Note
- Some discs only allow you to change audio language from the disc menu. Press TOP MENU to access.
- To set audio language preferences, see Language settings on page 50.
Switching VR format DVD-RW audio channel

When playing a VR format DVD-RW disc recorded with dual-mono audio, you can switch between the main, sub, and mixed channels during playback.

1. Press AUDIO repeatedly to select an audio channel option.

Switching the Video CD/Super VCD audio channel

When playing a Video CD/Super VCD, you can switch between stereo, just the left channel or just the right channel.

Some Super VCDs have two soundtracks. With these discs you can switch between the two soundtracks as well as individual channels in each.

- Press AUDIO repeatedly to select an audio channel option.

Zooming the screen

Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while watching a DVD or Video CD/Super VCD or playing a JPEG disc.

1. During playback, use the ZOOM button to select the zoom factor (Normal, 2x or 4x).

- Since DVD, Video CD/Super VCD and JPEG pictures have a fixed resolution, picture quality will deteriorate, especially at 4x zoom. This is not a malfunction.

2. Use the cursor buttons to change the zoomed area.

You can change the zoom factor and the zoomed area freely during playback.

- If the navigation square at the top of the screen disappears, press ZOOM again to display it.

**Note**

- If you are displaying subtitles, these will disappear when the screen is zoomed. They will reappear when you return the screen to normal.

Switching camera angles

Some DVD discs feature scenes shot from two or more angles—check the disc box for details.

When a multi-angle scene is playing, a icon appears on screen to let you know that other angles are available (this can be switched off if you prefer—see Display settings on page 51).

- During playback (or when paused), press ANGLE to switch angle.

Displaying disc information

**OSD disc information**

Various track, chapter and title information can be displayed on-screen while a disc is playing.

- To show/switch/hide the information displayed, press DISPLAY repeatedly.

- When a disc is playing, the information appears at the top of the screen.
Playing discs

Front panel display information
Limited disc information also appears in the front panel display. Press DISPLAY to change the displayed information.

Chapter 6
Viewing JPEG discs

Playing a JPEG slideshow
After loading a CD/CD-R/RW containing JPEG pictures, press \( \rightarrow \) to start a slideshow from the first folder/picture on the disc. The player displays the pictures in each folder in alphabetical order.

Pictures are automatically adjusted so that they fill as much of the screen as possible (if the aspect ratio of the picture is different to your TV screen you may notice black bars at the sides, or at the top and bottom of the screen).

While the slideshow is running:

<table>
<thead>
<tr>
<th>Button</th>
<th>What it does</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \rightarrow )</td>
<td>Pauses the slideshow; press again to restart.</td>
</tr>
<tr>
<td>( \leftarrow )</td>
<td>Displays the previous picture.</td>
</tr>
<tr>
<td>( \rightarrow )</td>
<td>Displays the next picture.</td>
</tr>
<tr>
<td>ANGLE</td>
<td>Pauses the slideshow and rotates the currently displayed picture 90° clockwise. Press ( \rightarrow ) (play) to restart slideshow.</td>
</tr>
<tr>
<td>ZOOM</td>
<td>Pauses the slideshow and zooms the screen (see below). Press ( \rightarrow ) (play) to restart slideshow.</td>
</tr>
<tr>
<td>DVD MENU</td>
<td>Displays the Disc Navigator screen (see below).</td>
</tr>
<tr>
<td>FOLDER +/-</td>
<td>Skips to the next/previous folder when playing a JPEG disc.</td>
</tr>
</tbody>
</table>

Note
- The \( \rightarrow \), ANGLE and ZOOM buttons do not work while the display shows LOADING.
- The time it takes for the player to load a file increases with large file sizes.
- Up to 999 files are viewable on a disc. If there are more files than this on a disc, only the first 999 files are viewable.
- If you want to play the WMA/MP3 tracks on a disc that also contains JPEG picture files, you should first set the Photoviewer option to Off. See Options on page 51.

Using the JPEG Disc Navigator and Photo Browser
Use the JPEG Disc Navigator to find a particular folder or picture by filename on the disc in the play position; use the Photo Browser to find a picture within a folder by thumbnail image.

1. Press DVD MENU to display the Disc Navigator screen.

The left column shows the folders on the disc, the right column shows the files in a folder.
Viewing JPEG discs

2 Use the cursor buttons (↑/↓/←/→) to navigate.
When a file is highlighted, a thumbnail image is displayed.
  • When a folder is highlighted you can press ENTER to open the Photo Browser screen for that folder. See below for more on using the Photo Browser.

3 To resume the slideshow from the highlighted file, press ENTER.

Using the Photo Browser
The Photo Browser displays nine thumbnail images at a time from the current folder.

1 From the Disc Navigator screen, highlight a folder to display then press ENTER.
The Photo Browser screen opens with the first nine pictures displayed as thumbnails.

2 Use the cursor buttons (↑/↓/←/→) to highlight a thumbnail picture.
  • Use the track skip buttons (← and →) to see the previous / next page of thumbnails. Keep the button pressed if you want to skip several pages; release when you reach the page you want.
  • To return to the Disc Navigator screen, press RETURN.

3 Press ENTER to display the selected thumbnail full size on screen.
The slideshow resumes from the selected picture.

Zooming the screen
Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while viewing pictures from a JPEG disc.

1 During slideshow playback, use the ZOOM button to select the zoom factor.
  • Normal
  • 2x
  • 4x

• The slideshow is paused when the screen is zoomed.
• Since JPEG pictures have a fixed resolution, picture quality may deteriorate, especially at 4x zoom. This is not a malfunction.

2 Use the cursor buttons (↑/↓/←/→) to change the zoomed area.
You can change the zoom factor and the zoomed area freely.

3 To resume the slideshow, press ► (play).
Chapter 7:
More tuner features: RDS

An introduction to RDS
Radio Data System, or RDS as it’s usually known, is a system used by FM radio stations to provide listeners with various kinds of information—the name of the station and the kind of show they’re broadcasting, for example. This information shows up as text on the display, and you can switch between the kind of information shown. Although you don’t get RDS information from all FM radio stations, you do with most.

Probably the best feature of RDS is that you can search automatically by type of program. So, if you felt like listening to jazz, you could search for a station that’s broadcasting a show with the program type, Jazz. There are around 30 such program types, including various genres of music, news, sport, talk shows, financial information, and so on.

The receiver lets you display three different kinds of RDS information: Radio Text, Program Service Name, and Program Type.
Radio Text (RT) is messages sent by the radio station. These can be anything the broadcaster chooses—a talk radio station might give out its telephone number as RT, for example.
Program Service Name (PS) is the name of the radio station.
Program Type (PTY) indicates the kind of program currently being broadcast.
The receiver can search for and display the following program types:

- **News** – News
- **Affairs** – Current affairs
- **Info** – General information
- **Sport** – Sport
- **Educate** – Educational material
- **Drama** – Radio plays or serials
- **Culture** – National or regional culture, theater, etc.
- **Science** – Science and technology
- **Varied** – Usually talk-based material, such as quiz shows or interviews.
- **Pop M** – Pop music
- **Rock M** – Rock music
- **Easy M** – Easy listening music
- **Light M** – ‘Light’ classical music
- **Classics** – ‘Serious’ classical music
- **Other M** – Other music not fitting any of the above categories
- **Weather** – Weather reports
- **Finance** – Stock market reports, commerce, trading, etc.
- **Children** – Programs for children
- **Social** – Social affairs
- **Religion** – Programs concerning religion
- **Phone In** – Public expressing their views by phone
- **Travel** – Holiday-type travel rather than traffic announcements
- **Leisure** – Leisure interests and hobbies
- **Jazz** – Jazz
- **Country** – Country music
- **Nation M** – Popular music in a language other than English
- **Oldies** – Popular music from the ’50s and ’60s
- **Folk M** – Folk music
- **Document** – Documentaries
More tuner features: RDS

In addition, there are three other program types, TEST, Alarm!, and None. Alarm! and TEST are used for emergency announcements. You can't search for these, but the tuner will switch automatically to this RDS broadcast signal. None appears when a program type cannot be found.

Displaying RDS information
Use the DISPLAY button to display the different types of RDS information available (RT, PS and PTY).
- Press DISPLAY to select the RDS information display. Each press changes the display as follows:
  - RT – Radio Text display
  - PS – Program Service display
  - PTY – Program Type display
  - PTY SEARCH – see Searching for RDS programs below
  - Current tuner frequency

Searching for RDS programs
One of the most useful features of RDS is the ability to search for a particular kind of radio program. You can search for any of the program types listed on the previous page.

1. Press the TUNER button to select the FM band.
2. Press DISPLAY repeatedly until PTY SEARCH appears in the display.
3. Use ←/→ (cursor left/right) to select the program type you want to hear.
4. Press ENTER to search for the program type.
The system starts searching through the station presets for a match. When it finds one, the search stops and the station plays for five seconds.
5. If you want to keep listening to the station, press ENTER within the 5 seconds. If you don’t press ENTER, searching resumes.

Note
- If any noise is picked up while displaying the RT scroll, some characters may be displayed incorrectly.
- If you see No Data in the RT display, it means no RT data is transmitted from the broadcast station. If you have entered a name for the station, it is broadcast instead of RT data. If you haven’t, the display will automatically switch to the PS data display. If no PS data is transmitted from the station, the frequency will be displayed.
- In the PTY display, there are cases where No Data or None is shown. If this happens, the PS display is shown after a few seconds.
Chapter 8

Using the timer

Setting the wake-up timer
Use the wake-up timer to set the system to switch on at any time and start playing whatever source you want.

Important
• The clock must be set to the correct time for the wake-up timer to work properly (see Setting the clock on page 14).

1 Select the source you want played.
For example, press TUNER (FM/AM on the front panel) to select the radio as your source.

2 Prepare the source.
For example, tune in the radio station you want to wake up to.

3 Set the volume.

4 Press TIMER/CLOCK twice to reach the timer menu.

5 Use the ←/ → (cursor left/right) buttons to select ‘Wake-Up?’ then press ENTER.

6 Use the ←/ → (cursor left/right) buttons to select ‘TimerEdit’ then press ENTER.

7 Set the switch-on time.
Use the ↑/↓ (cursor up/down) buttons to set the hour, then press ENTER. Set the minute in the same way, pressing ENTER when you’re done.

8 Set the switch-off time.
Use the ↑/↓ (cursor up/down) buttons to set the hour, then press ENTER. Set the minute in the same way, pressing ENTER when you’re done.

After pressing ENTER this last time, the wake-up indicator lights, and the switch-on, switch-off times, the function (DVD/CD, etc.) and volume are confirmed in the display.

9 Switch the system into standby mode.
The wake-up timer will not work if the system is left on!

Tip
• You can check the timer settings in standby by pressing TIMER/CLOCK twice.
  (Press TIMER/CLOCK once to display the current time.)

Turning the wake-up timer on/off
If the wake-up timer is on, it will switch on the system everyday at the time you have set.
**Using the timer**

1. Press TIMER/CLOCK twice to reach the timer menu.
2. Use the ←/→ (cursor left/right) buttons to select ‘Wake-Up?’ then press ENTER.
3. Use the ←/→ (cursor left/right) buttons to select ‘Timer On?’ or ‘Timer Off?’.
   - You must have the timer set (see above) to select ON. The wake-up timer switches on and off according to your previous settings.
4. Press ENTER.

   **Note**
   - The wake-up timer will automatically be canceled if the clock is reset.

**Setting the sleep timer**

The sleep timer switches off the system after a specified time so you can fall asleep without worrying about it.

**Important**

- If you set the sleep timer while either the wake-up timer is active, the earlier switch off time takes priority.

1. Press TIMER/CLOCK twice to reach the timer menu.
2. Use the ←/→ (cursor left/right) buttons to select ‘Sleep?’ then press ENTER.
3. Use the ↑/↓ (cursor up/down) buttons to select a switch-off time then press ENTER.
   - Choose between the following options:
     - **Sleep Auto** – System switches off automatically after the currently playing CD, Video CD or WMA/MP3 disc has finished.
     - **Sleep 90** – System switches off after 90 minutes
     - **Sleep 60** – System switches off after an hour
     - **Sleep 30** – System switches off after 30 minutes
     - **Sleep Off** – cancels the sleep timer
4. To check how much time is left, repeat steps 1 and 2.
   - The remaining time is displayed momentarily.

   **Note**
   - **Sleep Auto** will not work with Video CDs during PBC playback or CDs in repeat play.
Chapter 9

Surround sound and other settings

Using the System Setup menu
All the available settings in the setup menu are listed in Surround and sound setup options and SR+ control options for Pioneer plasma displays below. See the notes in each section for additional information about the settings. Follow the steps below to customize the settings in the System Setup menu.

1. Press SYSTEM SETUP.
2. Use the ←/→ (cursor left/right) buttons to choose the setting you want to adjust. The current setting is shown for each option as you cycle through the display. See below for a full list and description of each.
3. Use the ↑/↓ (cursor up/down) buttons to adjust the setting.
4. Repeat steps 2 and 3 to make other settings.
5. When you’re done, press ENTER to leave the System Setup menu.

Note
- You can’t change the Surround and sound setup options with the Recording Mode (page 54) switched on.

Surround and sound setup options
The Room Setup feature (page 15) is designed to give you a basic surround sound setup, however you can make more detailed settings that may improve the surround sound in your listening room. Note that the first setting in each section is the default.

Front speakers distance setting
Specifies the distance from your listening position to the front speakers:
- Front 0.3 m ~ Front 9 m – Distance can be set in increments of 0.3 m. The default is 3 m.

Center speaker distance setting
Specifies the distance from your listening position to the center speaker:
- Center 0.3 m ~ Center 9 m – Distance can be set in increments of 0.3 m. The default is 3 m.

Surround speakers distance setting
Specifies the distance from your listening position to the surround speakers:
- Surr. 0.3 m ~ Surr. 9 m – Distance can be set in increments of 0.3 m. The default is 3 m.

Dynamic Range Control
Specifies the amount of dynamic range adjustment to Dolby Digital or DTS soundtracks:
Surround sound and other settings

- **DRC Off** – No dynamic range adjustment (use when listening at higher volume)
- **DRC Mid** – Mid setting
- **DRC High** – Dynamic range is reduced (loud sounds are reduced in volume while quieter sounds are increased)

**Note**
- This setting works only with Dolby Digital and some DTS soundtracks. For other sources, you can create a similar effect using the Midnight mode (see Using Quiet and Midnight listening modes on page 27).

**Dual mono setting**
Specifies how dual mono encoded Dolby Digital or DTS soundtracks should be played. You can also use this setting to switch the audio channel on DVD-RW discs recorded with two separate soundtracks.

- **L-Ch1 R-Ch2** – Both channels are played through the front speakers
- **Ch1 Mono** – Only channel 1 is played
- **Ch2 Mono** – Only channel 2 is played

**Note**
- On the Ch1 Mono and Ch2 Mono settings the sound comes only from the center speaker (or from the front speakers if listening in STEREO mode).
- This setting works only with dual mono encoded Dolby Digital or DTS soundtracks. See the disc packaging for channel information.

**LFE attenuator setting**
Dolby Digital and DTS audio sources include ultra-low bass tones. Set the LFE attenuator as needed to prevent the ultra-low bass from distorting the sound.

- **LFE ATT 0** – The LFE channel is played with no attenuation
- **LFE ATT 10** – LFE channel is attenuated by 10dB
- **LFE OFF** – LFE channel is not played

**SR+ control options for Pioneer plasma displays**
You only need to make the following settings if you have connected a Pioneer plasma display to this unit using an SR+ cable (not supplied).

**Control mode setting**
- **SR+ Off** – Switches SR+ off (this unit and the plasma display work independently)
- **SR+ On** – Switches SR+ on (this unit sends control signals to the plasma display)

The following settings are only available if the Control mode setting (above) is switched on.

**Volume control setting**
- **Vol C.Off** – This unit does not control the volume of the plasma display
- **Vol C.On** – When this unit is switched to an input that used the plasma display (DVD, for example), the volume on the plasma display is muted so only sound from this unit is heard.

**Function setting for DVD input**
- **DVD -> OFF/PDP1–5/PDPTV** – Matches the DVD function of this unit with a numbered video input on the plasma display. For example, DVD -> PDP2 matches the DVD input with video input 2 on the plasma display.
Surround sound and other settings

Function setting for TV input
- TV -> OFF/PDP1–5/PDPTV – Matches the TV function of this unit with a numbered video input on the plasma display. For example, TV -> PDP1 matches the TV input with video input 1 on the plasma display.

Function setting for L1 input
- LINE1 -> OFF/PDP1–5/PDPTV – Matches the LINE (L1) function of this unit with a numbered video input on the plasma display. For example, LINE1 -> PDP3 matches the LINE1 input with video input 3 on the plasma display.

Function setting for L2 input
- LINE2 -> OFF/PDP1–5/PDPTV – Matches the LINE (L2) function of this unit with a numbered video input on the plasma display. For example, LINE2 -> PDP3 matches the LINE2 input with video input 3 on the plasma display.

Setting the channel levels
You can set the relative channel levels from your main listening position for all of the listening modes independently. However, the SURROUND modes are divided into two independent groups: multichannel listening modes and stereo listening modes only.

If you used the Room Setup feature (page 15), the channel levels for each listening mode will already be set. However, you can still fine-tune the levels here if you need to.

1 Select a listening mode.
Press SURROUND, ADVANCED or FRONT SURROUND repeatedly to select the listening mode you want.

2 Switch the remote control to SUB, then press TEST TONE to hear the test tone.
The test tone is output in the following order (from the speakers active in the current listening mode):
- L – Front left speaker
- C – Center speaker
- R – Front right speaker
- RS – Right surround speaker
- LS – Left surround speaker
- SW – Subwoofer
Surround sound and other settings

3 Use the MASTER VOLUME +/– button to adjust the volume to an appropriate level. Turn down the volume to 40 or less to ensure you have adequate headroom.

4 Use the ↑/↓ (cursor up/down) buttons to adjust the speaker levels in turn. You should hear the test tone at the same volume from each speaker when seated in the main listening position. The channel level range is ± 10 dB.

5 When you’re done, press ENTER to exit test tone setup.

Tip
- The speaker volume can be adjusted while listening to any sound source you want by pressing CH LEVEL and then using the ↑/↓ (cursor up/down) buttons to adjust the channel levels. After you’re finished with one channel, use the ←/→ (cursor left/right) buttons to move to the next.

Note
- When the Auto listening mode is selected, using the test tone method will adjust levels for multichannel sources only. Use CH LEVEL and the ↑/↓ (cursor up/down) buttons (see tip above) to set levels for the Auto listening mode with two channel sources.
- Since the subwoofer produces ultra-low frequencies its sound may seem quieter than it actually is.
Chapter 10

Video Adjust menu

Video Adjust
• Default setting: Standard
From the Video Adjust screen you can select the standard video presentation or define presets of your own.

1 Press HOME MENU and select 'Video Adjust' from the on-screen display.

2 Use the ↑/↓ (cursor up/down) buttons to select a preset.

- Standard – Normal
- Memory1–2 – Use for saving your own presets (see below)

3 Press ENTER to make the setting and exit the Video Adjust screen.

Note
• Depending on the disc and the TV/monitor, you may not see the effect clearly.

Creating your own presets
You can create up to three presets of your own.

1 Select one of the Memory presets (see above).

2 Press ↓ (cursor down) to select 'Detailed Settings' then press ENTER.

3 Adjust the picture quality settings.

- Use the ↑/↓ (cursor up/down) buttons to select a setting.
- Use the ←/→ (cursor left/right) buttons to adjust the current setting.
- Press DISPLAY to switch between full and single view.
- You can change the preset number from the Recall Settings menu item.

You can adjust any or all of the following picture quality settings:
- Contrast – Adjusts the contrast between light and dark.
- Brightness – Adjusts the overall brightness.
- Chroma Level – Adjusts how saturated colors appear.

4 Press ENTER to save the preset and exit the Video Adjust screen.
Chapter 11
Initial Settings menu

Using the Initial Settings menu
The Initial Settings menu provides audio and video output settings, parental lock settings, and display settings, among others.
If an option is grayed out it means that it cannot be changed at the current time. This is usually because a disc is playing. Stop the disc, then change the setting.

1. Press HOME MENU and select 'Initial Settings'.

2. Use the cursor buttons and ENTER to select the setting and option you want to set.
All the settings and options are explained on the following pages.

Note
In the table below, the default setting is shown in **bold**: other settings are shown in *italics*.

- Some settings, such as **TV Screen**, **Audio Language**, and **Subtitle Language** may be overridden by the DVD disc. Often these settings can also be made from the DVD disc menu.
- **European model only** – The **AV Connector Out** setting only needs to be set if you have connected this player to your TV using a SCART cable (See Using the SCART AV output on page 56).

### Video Output settings

## Initial Settings menu

### Setting | Option | What it means
--- | --- | ---
Component Out | Interface | Set if your TV is not compatible with progressive scan video.
| Progressive | Set if your TV is compatible with progressive scan video (see your TV's instruction manual for details). Press ENTER once more to confirm (or RETURN to cancel). Note that progressive scan video is only output from the component video jacks and that there is no output from the composite and S-video jacks when this setting is selected.

Not applicable to the European model (See also Connecting using the component video output on page 55.)

S-Video Out | S2 | Standard setting.
| S1 | If you find that the picture is stretched or distorted on the default S2 setting, try changing it to this setting.

Not applicable to the European model (See also Connecting using the S-video output on page 55.)

### Language settings

#### Setting | Option | What it means
--- | --- | ---
Audio Language | English | If there is an English soundtrack on the disc then it will be played.
| Languages as displayed | If there is the language selected on the disc, then it will be played.
| Other Language | Select to choose a language other than the ones displayed (see Selecting languages using the language code list on page 68).

Subtitle Language | English | If there is are English subtitles on the disc then they will be displayed.
| Languages as displayed | If there is the subtitle language selected on the disc, then it will be displayed.
| Other Language | Select to choose a language other than the ones displayed (see Selecting languages using the language code list on page 68).

DVD Menu Language | w/Subtitle Lang. | DVD disc menus will be displayed in the same language as your selected subtitle language, if possible.
| Languages as displayed | DVD disc menus will be displayed in the selected language, if possible.
| Other Language | Select to choose a language other than the ones displayed (Selecting languages using the language code list on page 68).

Subtitle Display | On | Subtitles are displayed according to your selected subtitle language (see above).
| Off | Subtitles are always off by default when you play a DVD disc (note that some discs override this setting).

Parental Lock

- Default level: Off. Default password: none; Default Country code: us (2119)

To give you some control over what your children watch on your DVD player, some DVD-Video discs feature a Parental Lock level. If your player is set to a lower level than the disc, the disc won’t play.

Some discs also support the Country Code feature. The player does not play certain scenes on these discs, depending on the Country Code you set.

Note

- Not all discs use Parental Lock, and will play without requiring the password first.

- If you forget your password, you’ll need to reset the player to register a new password. (see Resetting the system on page 60)

Registering a new password

You must register a password before you can change the Parental Lock level or enter a Country code.

1. Select ‘Password’.
2 Use the number buttons to enter a 4-digit password.
The numbers you enter show up as asterisks (*) on-screen.
3 Press ENTER to register the password.
You will return to the Options menu screen.

Changing your password
To change your password, confirm your existing password then enter a new one.
1 Select 'Password Change'.
2 Use the number buttons to enter your existing password, then press ENTER.
3 Enter a new password and press ENTER.
This registers the new password and you will return to the Options menu screen.

Setting/changing the Parental Lock
1 Select 'Level Change'.
2 Use number buttons to enter your password, then press ENTER.
3 Select a new level and press ENTER.
• Press ⇪ (cursor left) repeatedly to lock more levels (more discs will require the password); press ↩ (cursor right) to unlock levels. You can’t lock level 1.
This sets the new level and you will return to the Options menu screen.

Setting/changing the Country code
You can find the Country code list on page 69.
1 Select 'Country Code'.
2 Use number buttons to enter your password, then press ENTER.
3 Select a Country code and press ENTER.
There are two ways you can do this:
• Select by code number: Press ⇪ (cursor right) then use the number buttons to enter the 4-digit Country code.
The new Country code is set and you will return to the Options menu screen. Note that the new Country code doesn’t take effect until the next disc is loaded (or the current disc is reloaded).
Chapter 12
Other connections

Connecting external antennas

External AM antenna
Use 5–6 meters of vinyl-insulated wire and set up either indoors or outdoors. Leave the AM loop antenna connected.

External FM antenna
Use a PAL connector to hook up an external FM antenna.

Connecting auxiliary components
This system has both stereo analog inputs and outputs, as well as a optical digital input. Use these to connect external components, such as your VCR, MD or CD-R recorder.

- Connect the TV (IN) jacks to the audio outs of your TV (or VCR). This will enable you to hear the TV (or VCR) through this system. Connect using RCA pin-plug stereo cables.
Other connections

- Connect the LINE 1 (IN) jacks to the analog outputs of an external playback component. These include components such as a VCR or cassette deck. Connect using RCA pin-plug stereo cables.

- Connect the LINE 1 (OUT) jacks to the analog inputs of an external recording component. These include components such as a cassette deck, VCR, MD, or another recorder with analog inputs. Connect using RCA pin-plug stereo cables.

- Connect the LINE 2 (OPTICAL IN) jack on the rear panel to the optical digital output of an external playback component. These include digital components such as an MD player, digital satellite, or a game system. Connect using a optical digital cable (not supplied).

Tip

- If you’re playing a high signal level source which is producing unpleasant distortion from the speakers, you can reduce the signal level of the auxiliary source (connected to the TV or LINE 1 analog inputs) by switching on the attenuator. See Optional system settings on page 59 to do this.

Recording mode

The Recording mode allows you to make surround-compatible analog recordings from the LINE 1 (OUT) jacks. Dolby multichannel sources will be downmixed to stereo for improved playback with systems that can provide matrix-decoding (like Dolby Pro Logic).

1. Press SOUND.
2. Use the ←/→ (cursor left/right) buttons to select ‘Rec Mode?’.
3. Press ENTER.
4. Use the ↑/↓ (cursor up/down) buttons to select ‘R.Mode On’ or ‘R.Mode Off’.

- **R.Mode On** – A surround-compatible downmix (left-total/right-total, or Lt/Rt) of Dolby multichannel sources is output, (suitable for Dolby Surround Pro Logic or other matrix decoding).
- **R.Mode Off** – A simple stereo downmix (left-only/right-only, or Lo/Ro) is output (suitable for playback on a two-channel stereo system or on headphones).

Note

- When Recording mode is on, most surround sound-related functions cannot be used. The display will briefly blink RecMode On if you try and use a prohibited function while Recording mode is on.
Other connections

- When Recording mode is off, the audio from the analog output may be interrupted, depending on the operation.
- The Recording mode automatically switches off if you change the input function (DVD/CD, TUNER, etc.) or switch the power off.

Connecting using the S-video output

Not applicable to the European model

If your TV has an S-video input, you can use this instead of the standard video output for a better quality picture.

- Use an S-video cable (not supplied) to connect the S-VIDEO OUT to an S-video input on your TV.
  Line up the small triangle above the jack with the same mark on the plug before plugging in.

Note
- The S-video output is switchable between S1 and S2 formats for compatibility with all TVs. See Video Output settings on page 49 to change this setting.

Connecting using the component video output

Not applicable to the European model

If your TV has component video inputs, you can use these instead of the standard video output to connect this system to your TV. This should give you the best quality picture from the three types of video output available.

- Use a component video cable (not supplied) to connect the COMPONENT VIDEO OUT to a set of component inputs on your TV.

Note
- The component video output is switchable between interlaced and progressive formats. See Video Output settings on page 49 for more on this.

About progressive scan video

Compared to interlace video, progressive scan video effectively doubles the scanning rate of the picture, resulting in a very stable, flicker-free image. Progressive scan video is available only from the component video output.
Important

- If you connect a TV that is not compatible with a progressive scan signal and switch the system to progressive, you will not be able to see any picture at all. In this case, press \star STANDBY/ON to put the system in standby, then press and hold the front panel (stop) button for about 8 seconds until the display shows Mem.Clr.? Press the front panel VOLUME – (DOWN) or + (UP) button so that the display shows Interface?. Press the front panel \star\star button to set to interlace and switch the system back on.

When TV format is set to AUTO or NTSC:

- When set to Progressive, PAL and NTSC discs are both output as progressive NTSC video. See also TV format setting on page 60.
- When Component Out (above) is set to Progressive, there is no video output from the VIDEO and S-VIDEO jacks. If you want to display video on more than one monitor simultaneously, make sure that it is set to Interlace. See also TV format setting on page 60.

When TV format is set to PAL:

- Progressive cannot be selected. See also TV format setting on page 60.

Compatibility of this player with progressive-scan and high-definition TVs.

This player is compatible with progressive video Macro Vision System Copy Guard. Consumers should note that not all high-definition television sets are fully compatible with this product and may cause artifacts to be displayed in the picture. In case of 525 progressive scan picture problems, it is recommended that the user switch the connection to the “standard definition” output (Interlace). If there are questions regarding our TV set compatibility with this model, please contact our customer service center.

This system is compatible with the following Pioneer displays and monitors: PDP-803HDG, PDP-504HDG, PDP-433HDG, PDP-434HDG.

Using the SCART AV output

European model only

There are two different kinds of video outputs you can use to connect this system to your TV. The SCART output should give you better picture quality than the standard composite video output. The SCART AV connector functions as both a video and audio output.

- Use a commercially available SCART cable to connect the AV CONNECTOR to your TV.

Note

- SCART cables are available in several configurations. Make sure that the one you get will work with this system and your TV/monitor. You can find the pin assignments below.
Switching the TV audio input from SCART to RCA

You can set the TV audio input to RCA or SCART.

1. Press TV.
2. Press SYSTEM SETUP.
3. Use the arrow left/right buttons to select 'TV Audio?'.
4. Press ENTER.
5. Use the arrow up/down buttons to select SCART or RCA.
6. Press ENTER

SCART pin assignment

The diagram below shows the SCART 21-pin connector assignment. This connector provides the video and audio signals for connection to a compatible color TV or monitor.

Using this unit with a Pioneer plasma display

If you have a Pioneer plasma display (models PDP-504HDG and PDP-434HDG or (European model only) PDP-504HDE and PDP-434 HDE), you can use an SR+ cable (see note below) to connect it to this unit and take advantage of various convenient features, such as automatic video input switching of the plasma display when the input is changed.

The illustration above shows the European model.
Use a 3-ringed miniplug SR+ cable to connect the CONTROL IN jack of this unit through a media receiver to the CONTROL OUT jack of your plasma display. Before you can use the extra SR+ features, you need to make a few settings in the unit. See SR+ control options for Pioneer plasma displays on page 45 for detailed instructions.

Using the SR+ mode with a Pioneer plasma display
When connected using an SR+ cable, a number of features (such as automatic video input switching and volume muting on the plasma display) become available to make using this unit with your Pioneer plasma display even easier. See also SR+ control options for Pioneer plasma displays on page 45 for information on setting up the unit.

1 Make sure that the plasma display and this unit are switched on and that they are connected with an SR+ cable. See Using this unit with a Pioneer plasma display above for more on connecting these components.

2 To switch SR+ mode on/off, press SR+ (SHIFT + 7). The front panel display shows the new setting: SR+ ON or SR+ OFF.

• If SR+ Error shows in the display, it means there is a communication problem between the unit and the plasma display. Check all connections and retry.

Note
• You won’t be able to use the remote sensor of this unit with the CONTROL IN jack of this unit connected to the CONTROL OUT jack of your plasma display. You can use the remote sensor of the plasma display (even in standby) as long as the power isn’t switched off.
• The automatic volume muting feature is enabled separately; see SR+ control options for Pioneer plasma displays on page 45. (You can also use the System Setup menu to switch the SR+ mode of this unit.)
• If you disconnect the SR+ cable or switch the plasma display off while SR+ is on, the setting automatically reverts to SR+ OFF. This displays an error if you switch the input of the unit with the plasma display switched off. Likewise, if this unit is switched off, the link with the plasma display will be terminated.

• The 3-ringed SR+ cable from Pioneer is commercially available under the part number ADE7095. Contact the Pioneer Customer Support division for more information on obtaining an SR+ cable.
Chapter 13
Additional information

Optional system settings
These settings are accessed by using the System Setup menu while in standby.

1 Switch the system into standby.
2 Press SYSTEM SETUP.
3 Use the ⇧∕⇧ (cursor left/right) buttons to choose the setting you want to adjust then press ENTER.
   The current setting is shown for each option as you cycle through the display. See below for a full list and description of each.
4 Use the ⇧∕⇧ (cursor up/down) buttons to adjust the setting.
5 Repeat steps 2 and 3 to make other settings.
6 Press ENTER to confirm.

System Setup menu options in standby
Below are all the available settings in the setup menu. The first setting in each section is the default. See also the notes in each section for additional information about the settings.

Child lock setting
The Child Lock feature is useful when you’ve set the wake-up timer and don’t want the system switched on before it activates.
   • Lock On – Makes the front panel buttons and controls inoperative.
   • Lock Off – Restores regular use of the front panel buttons and controls.

Clock format setting
Specifies how the clock is displayed:
   • 12-Hour – Sets the clock to show in 12-hour format in the display.
   • 24-Hour – Sets the clock to show in 24-hour format in the display.

TV attenuator setting
If the source connected to the TV analog input is producing distortion through the speakers, the attenuator will reduce the signal level.
   • ATT 6dB – Reduces the signal level by 6dB.
   • ATT 10dB – Reduces the signal level by 10dB.
   • ATT Off – No attenuation

Line attenuator setting
If the source connected to the LINE analog input is distorting, the attenuator can reduce the signal level.
   • ATT 6dB – Reduces the signal level by 6dB.
   • ATT 10dB – Reduces the signal level by 10dB.
   • ATT Off – No attenuation
Additional information

Frequency step setting
Not applicable to the European model
If you find that you can’t tune into stations successfully, the frequency step may not be suitable for your country/region.

- FM50. AM9
- FM100. AM10

TV format setting
The default setting of this system is AUTO, and unless you notice that the picture is distorted when playing some discs, you should leave it set to AUTO. If you experience picture distortion with some discs, set the TV system to match your country or region’s system. Doing this, however, may restrict the kinds of disc you can watch. The table below shows what kinds of disc are compatible with each setting (AUTO, PAL and NTSC).

<table>
<thead>
<tr>
<th>Disc Type</th>

</tbody>
</table>

System demo setting
Switches the automatic demo feature on or off (this starts when the system is plugged in for the first time):

- Demo On – Switches the demo feature on.
- Demo Off – Switches the demo feature off.

Note
- After setting the clock, the demo mode switches off automatically. However, if you unplug the system from the wall outlet, the demo mode will revert to Demo On (and the clock will be reset).

Watching NTSC on a PAL TV (MOD. PAL)
Most models of the newly developed countdown PAL TV system detect 50 Hz (PAL)/60 Hz (NTSC) and automatically switch vertical amplitude, resulting in a display without vertical shrinkage. However, in some cases, the image may appear without color.

If your PAL TV does not have a V-Hold control, you may not be able to watch NTSC discs because of picture roll. If the TV has a V-Hold control, adjust it until the picture stops rolling.

On some TVs, the picture may shrink vertically, leaving black bands at the top and bottom of the screen. This is not a malfunction; it is caused by the NTSC to PAL conversion.

Resetting the system
Use this procedure to reset all system settings to the factory default.

1  Switch the system into standby.
2  Press and hold the front panel ■ (stop) button for about 8 seconds until the display shows ‘Mem.Clr.?’.  
3  Press the front panel ▶/II button. All the system’s settings are now reset, and you should see the ‘Let’s Get Started’ screen.
Using and taking care of discs

Titles, chapters and tracks
DVD discs are generally divided into one or more titles. Titles may be further subdivided into chapters.

CDs and Video CD/Super VCDs are divided into tracks.

CD-ROMs contain folders and files. MP3 and WMA files are referred to as tracks. Folders may contain further folders.

Handling discs
When holding discs of any type, take care not to leave fingerprints, dirt or scratches on the disc surface. Hold the disc by its edge or by the center hole and edge.

Damaged or dirty discs can affect playback performance. Take care also not to scratch the label side of the disc. Although not as fragile as the recorded side, scratches can still result in a disc becoming unusable.

Should a disc become marked with fingerprints, dust, etc., clean using a soft, dry cloth, wiping the disc lightly from the center to the outside edge as shown in the diagram below.

Wipe lightly from the center of the disc using straight strokes.

DVD Video regions
All DVD Video discs carry a region mark on the case somewhere that indicates which region(s) of the world the disc is compatible with. Your DVD system also has a region mark, which you can find on the rear panel. Discs from incompatible regions will not play in this player. Discs marked ALL will play in any player.

Don’t wipe the disc surface using circular strokes.
If necessary, use a cloth soaked in alcohol, or a commercially available CD/DVD cleaning kit to clean a disc more thoroughly. Never use benzine, thinner or other cleaning agents, including products designed for cleaning vinyl records.

**Storing discs**

Although CDs and DVD discs are more durable than vinyl records, you should still take care to handle and store discs correctly. When you’re not using a disc, return it to its case and store upright. Avoid leaving discs in excessively cold, humid, or hot environments (including under direct sunlight).

Don’t glue paper or put stickers onto the disc, or use a pencil, ball-point pen or other sharp-tipped writing instrument. These could all damage the disc.

For more detailed care information see the instructions that come with discs.

Do not load more than one disc into the player at a time.

**Discs to avoid**

Discs spin at high speed inside the player. If you can see that a disc is cracked, chipped, warped, or otherwise damaged, don’t risk using it in your player—you could end up damaging the unit.

This unit is designed for use with conventional, fully circular discs only. Use of shaped discs is not recommended for this product. Pioneer disclaims all liability arising in connection with the use of shaped discs.

**Proper installation and maintenance of this system**

**Hints on installation**

We want you to enjoy using this system for years to come, so please bear in mind the following points when choosing a suitable location for it:

**Do...**

✓ Use in a well-ventilated room.
✓ Place on a solid, flat, level surface, such as a table, shelf or stereo rack.

**Don’t...**

✗ Use in a place exposed to high temperatures or humidity, including near radiators and other heat-generating appliances.
✗ Place on a window sill or other place where the system will be exposed to direct sunlight.
✗ Use in an excessively dusty or damp environment.
✗ Place directly on top of an amplifier, or other component in your stereo system that becomes hot in use.
✗ Use near a television or monitor as you may experience interference—especially if the television uses an indoor antenna.
✗ Use in a kitchen or other room where the system may be exposed to smoke or steam.
✗ Use on a thick rug or carpet, or cover with cloth—this may prevent proper cooling of the system.
Place on an unstable surface, or one that is not large enough to support all four of the unit’s feet.

Cleaning the pickup lens
The DVD player’s lens should not become dirty in normal use, but if for some reason it should malfunction due to dust or dirt, consult your nearest Pioneer authorized service center. Although lens cleaners are commercially available, we do not recommend using them since some may damage the lens.

Problems with condensation
Condensation may form inside the player if it is brought into a warm room from outside, or if the temperature of the room rises quickly. Although the condensation won’t damage the player, it may temporarily impair its performance. For this reason you should leave it to adjust to the warmer temperature for about an hour before switching on and using.

Moving the system unit
If you need to move the main unit, first remove a disc if there’s one in the player, then press STANDBY/ON on the front panel to turn the system off. Wait for Good Bye to disappear from the display, then unplug the power cord. Never lift or move the unit during playback—discs rotate at a high speed and may be damaged.

Note
• Unplugging the unit before Good Bye disappears from the display may cause the system to return to the factory settings.

Power cord caution
Handle the power cord by the plug. Do not pull out the plug by tugging the cord and never touch the power cord when your hands are wet as this could cause a short circuit or an electric shock. Do not place this unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed such that they are not likely to be stepped on. A damaged power cord can cause a fire or give you an electrical shock. Check the power cord once in a while. When you find it damaged, ask your nearest Pioneer authorized service center or your dealer for a replacement.
**Troubleshooting**

Incorrect operations are often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Investigate the other components and electrical appliances being used. If the trouble cannot be rectified even after exercising the checks listed below, ask your nearest Pioneer authorized service center or your dealer to carry out repair work.

**Important**

- If the system does not operate normally due to external effects such as static electricity disconnect the power plug from the outlet and insert again to return to normal operating conditions.

### General

<table>

</table>
## Additional information

### Problem | Remedy
---|---
**Sound Demo** shows in the display and the unit can't be controlled. | • Press and hold ▪ (stop) on the front panel for about five seconds. The disc tray ejects automatically to indicate the Sound Demo mode is disabled.

**Timer indicator is blinking and the system will not switch on.** | • Unplug the unit, then plug back in. Wait for one minute then switch on.
• Make sure the fan at the rear of the unit is not being blocked.
• Check that the speakers are connected correctly.
• Make sure the voltage of the mains power source is correct for the model.
• If the problem persists, take it to your nearest Pioneer authorized service center or your dealer for servicing.

### DVD/CD/Video CD player

| Problem | Remedy |
---|---|
**The disc is ejected automatically after loading.** | • Clean the disc.
• Align the disc properly in the disc guide.
• If the region number on a DVD-video disc does not match the number on the player, the disc cannot be used (see DVD Video regions on page 61).
• Allow time for any condensation inside the player to evaporate. Avoid using the player near an air-conditioning unit.

**Playback is not possible.** | • If the disc is loaded upside down, reload the disc with the label side face up.

**Picture playback stops and the operation buttons cannot be used.** | • Press ▪ (stop), then ▶ (play) to start playback again.
• Switch the power off once, then on again using the front panel ▶ STANDBY/ON button.

**Settings are canceled.** | • When the power is cut due to power failure or by unplugging the power cable, settings will be canceled.

**No picture/No color.** | • Check that connections are correct and that plugs are inserted fully.
• Check the instruction manual of the TV/monitor to make sure the TV/monitor settings are incorrect.

**Screen is stretched or aspect does not change.** | • The TV Screen setting is incorrect. Set the TV Screen option to match the TV/monitor you're using (see Video Output settings on page 49).

**When recorded on a VCR or passed through an AV selector, there is disturbance in the playback picture.** | • This system uses copy-protection technology which may prevent recording or cause picture problems when connected through a VCR or AV selector. This is not a malfunction.
## Additional information

### Problem | Remedy
--- | ---
CD won’t play | • Set the PhotoViewer menu option in the Initial Settings menu to **Off** to be able to play some copy-protected CDs. See *Options* on page 51.

Picture disturbance during playback or dark. | • This player is compatible with Macro-Vision System copy guard. Some discs include a copy prevention signal, and when this type of disc is played back, stripes etc., may appear on some sections of the picture depending on the TV. This is not a malfunction.
• Discs respond differently to particular player functions. This may result in the screen becoming black for a brief instant or shaking slightly when the function is executed. These problems are largely due to differences between discs and disc content and are not malfunctions of this player.

Noticeable difference in DVD and CD volume. | • DVDs and CDs use different recording methods. This is not a malfunction.

### WMA/MP3/JPEG discs

<table>
<thead>
<tr>
<th>Problem</th>
<th>Remedy</th>
</tr>
</thead>
</table>
CD-ROM disc is not recognized by the system. | • Make sure that the CD-ROM was recorded using the ISO 9660 disc format. See *Disc / content format playback compatibility* on page 6 for other disc compatibility information. |

Files don’t show up in the Disc Navigator/Photo Browser. | • The files on the disc must be named with the correct file extension: .mp3 for MP3 files; .wma for WMA files; .jpg for JPEG files (upper or lower-case is OK). See *Disc / content format playback compatibility* on page 6 for other disc compatibility information. |

Can play JPEG files, but not WMA/MP3 files on the same disc (or vice versa). | • Set the PhotoViewer menu option in the Initial Settings menu to **Off** to be able to access the WMA/MP3 files. Set to **On** to be able to play the JPEG files. See *Options* on page 51. |

Can’t play WMA files. | • The files were recorded using DRM (digital rights management). This is not a malfunction. See *DRM* in the *Glossary* on page 71. |

### Tuner

<table>
<thead>
<tr>
<th>Problem</th>
<th>Remedy</th>
</tr>
</thead>
</table>
Considerable noise in radio broadcasts. | • Connect the antenna (refer to the Setup Guide) and adjust the direction and position for best reception.
• Fully extend the FM wire antenna, position for best reception, and secure to a wall. |
**Additional information**

**Problem**

Considerable noise in radio broadcasts (continued).

- Connect an outdoor FM antenna (see Connecting external antennas on page 53).
- Connect an additional internal or external AM antenna (refer to the Setup Guide and Connecting external antennas on page 53).
- Turn off any other equipment that may be causing the noise or move it away from the main unit.
- *Not applicable to the European model – The tuning interval is incorrect for your country or region. Try switching the tuning interval (frequency step) (see Frequency step setting on page 60).*

**Remedy**

- Connect an outdoor FM antenna (see Connecting external antennas on page 53).
- Connect an additional internal or external AM antenna (refer to the Setup Guide and Connecting external antennas on page 53).
- Turn off any other equipment that may be causing the noise or move it away from the main unit.
- *Not applicable to the European model – The tuning interval is incorrect for your country or region. Try switching the tuning interval (frequency step) (see Frequency step setting on page 60).*

Auto tuning does not pick up some stations.

- The radio signal is weak. Auto tuning will only detect radio stations with a good signal. For more sensitive tuning, connect an outdoor antenna.

Sound is mono only.

- Check that the tuner is not set to FM mono (see Improving poor FM reception on page 21).

**Error Messages**

<table>
<thead>

</tbody>
</table>
Screen sizes and disc formats

DVD-Video discs come in several different screen aspects, ranging from TV programs, which are generally 4:3, to CinemaScope widescreen movies, with an aspect ratio of up to about 7:3.

Televisions also come in different aspect ratios; 'standard' 4:3 and widescreen 16:9.

**Widescreen TV users**

If you have a widescreen TV, the TV Screen setting (see Video Output settings on page 49) of this system should be set to **16:9 (Wide)**.

When you watch discs recorded in 4:3 format, you can use the TV controls to select how the picture is presented. Your TV may offer various zoom and stretch options; see the instructions that came with your TV for details.

Please note that some movie aspect ratios are wider than 16:9, so even though you have a widescreen TV, these discs will still play in a ‘letterbox’ style with black bars at the top and bottom of the screen.

**Standard TV users**

If you have a standard TV, the **TV Screen** setting (see Video Output settings on page 49) of this system should be set to **4:3 (Letter Box)** or **4:3 (Pan&Scan)**, depending on which you prefer.

Set to **4:3 (Letter Box)**, widescreen discs are shown with black bars top and bottom.

Set to **4:3 (Pan&Scan)**, widescreen discs are shown with the left and right sides cropped. Although the picture looks larger, you don’t actually see the whole picture.

Please note that many widescreen discs override the system’s settings so that the disc is shown in letterbox format regardless of the setting.

**Tip**

- Using the **16:9 (Wide)** setting with a standard 4:3 TV, or either of the **4:3** settings with a widescreen TV, will result in a distorted picture.

Selecting languages using the language code list

Some of the language options (see Language settings on page 50) allow you to set your preferred language from any of the 136 languages listed in the Language code list on page 69.

1. Select ‘Other Language’.
2. Use the ←/→ (cursor left/right) buttons to select either a code letter or a code number.
3. Use the ↑/↓ (cursor up/down) buttons to select a code letter or a code number.

See the Language code list (next page) for a complete list of languages and codes.

### Glossary

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Analog audio</td>
<td>Direct representation of sound by an electrical signal. See also Digital audio.</td>
</tr>
<tr>
<td>Aspect ratio</td>
<td>The width of a TV screen relative to its height. Conventional TVs are 4:3; widescreen models are 16:9.</td>
</tr>
<tr>
<td>Digital audio</td>
<td>Indirect representation of sound using numbers. See also Sampling frequency and Analog audio.</td>
</tr>
<tr>
<td>Dolby Digital</td>
<td>A multi-channel audio encoding system developed by Dolby Laboratories that enables far more audio to be stored on a disc than PCM encoding. See also PCM (Pulse Code Modulation).</td>
</tr>
<tr>
<td>DRM copy protection</td>
<td>DRM (digital rights management) copy protection is a technology designed to prevent unauthorized copying by restricting playback, etc. of material on devices other than the PC (or other WMA recording equipment) used to record it. For detailed information, please see the instruction manuals or help files that came with your PC (or other WMA recording equipment) and/or software.</td>
</tr>
<tr>
<td>Dynamic range</td>
<td>The difference between the quietest and loudest sounds possible in an audio signal.</td>
</tr>
<tr>
<td>EXIF (Exchangeable Image File)</td>
<td>A file format developed by Fuji Photo Film for digital still cameras. Digital cameras from various manufacturers use this compressed file format which carries date, time and thumbnail information, as well as the picture data.</td>
</tr>
<tr>
<td>File extension</td>
<td>A tag added to the end of a filename to indicate the type of file. For example, &quot;.mp3&quot; indicates an MP3 file.</td>
</tr>
<tr>
<td>ISO 9660 format</td>
<td>International standard for the volume and file structure of CD-ROM discs.</td>
</tr>
</tbody>
</table>
| JPEG                                    | A standard file format used for still images. JPEG files are identified by the file extension ".jpg".

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
</table>
| MP3                                     | MP3 (MPEG1 audio layer 3) is a compressed stereo audio file format. Files are recognized by their file extension ".mp3".

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPEG audio</td>
<td>An audio format used on Video CD/ Super VCDs and some DVD discs.</td>
</tr>
<tr>
<td>MPEG video</td>
<td>A video format used on Video CD/Super VCDs and DVD discs.</td>
</tr>
<tr>
<td>PBC (Playback Control)</td>
<td>A system of navigating a Video CD/Super VCD through on-screen menus recorded onto the disc.</td>
</tr>
<tr>
<td>PCM (Pulse Code Modulation)</td>
<td>Digital audio encoding system found on CDs. Good quality, but requires a lot of data compared to Dolby Digital, DTS and MPEG encoded audio. See also Digital audio.</td>
</tr>
<tr>
<td>Progressive scan video</td>
<td>All the lines that make up a video picture are updated in one pass (compared to interface which takes two passes to update the whole picture).</td>
</tr>
<tr>
<td>Regions</td>
<td>These associate DVD-Video discs and players with particular areas of the world. See DVD Video regions on page 61 for more information.</td>
</tr>
<tr>
<td>Sampling frequency</td>
<td>The rate at which sound is measured to be turned into digital audio data. The higher the rate, the better the sound quality. CD is 44.1 kHz; DVD can be up to 96 kHz. See also Digital audio.</td>
</tr>
<tr>
<td>WMA</td>
<td>WMA is short for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. Files are recognized by their file extension &quot;wma&quot;.</td>
</tr>

### Specifications

#### Amplifier section
Continuous Power Output (RMS):
- **Argentina and Brazil models:**
  - Front, Center, Surround: 90 W per channel (1 kHz, 10% T.H.D., 6 Ω)
  - Subwoofer: 90 W (100 Hz, 10% T.H.D., 6 Ω)
- **All other models:**
  - Front, Center, Surround: 100 W per channel (1 kHz, 10% T.H.D., 6 Ω)
  - Subwoofer: 100 W (100 Hz, 10% T.H.D., 6 Ω)

Continuous Power Output:
- **Argentina and Brazil models:**
  - Front, Center, Surround: 68 W per channel (1 kHz, 1% T.H.D., 6 Ω)
  - Subwoofer: 68 W (100 Hz, 1% T.H.D., 6 Ω)
- **All other models:**
  - Front, Center, Surround: 75 W per channel (1 kHz, 1% T.H.D., 6 Ω)
  - Subwoofer: 75 W (100 Hz, 1% T.H.D., 6 Ω)

#### Disc section
Digital audio characteristics: DVD fs: 96 kHz, 24-bit
Type: DVD system, video CD system and compact disc digital audio system
Total harmonic distortion: 0.004%
Frequency response: 4 Hz to 44 kHz (96kHz sampling) / 4 Hz to 22 kHz (48kHz sampling)
Wow and Flutter: Limit of measurement (+/-0.001 % W.PEAK) or less (JEITA)

#### FM tuner section
Frequency range: 87.5 – 108 MHz
Antenna: 75 Ω, unbalanced

#### AM tuner section
Frequency range:
- With 9kHz step: 531 kHz to 1,602 kHz
- With 10kHz step (Not applicable to the European model): 530 kHz to 1,700 kHz
Antenna: Loop antenna

### Miscellaneous
**Power requirements**
- European/Singapore/South African models: AC 220-230 V, 50/60 Hz
- U.K. model: AC 230 V, 50/60 Hz
- Australian/New Zealand/Malaysian models: AC 240 V, 50/60 Hz
- Argentina/Brazil models: AC 220 V, 50/60 Hz
- Hong Kong model: AC 220-230 V, 50 Hz
- Taiwan model: AC 110-120 V, 60 Hz
- Mexican model: AC 127 V, 50/60 Hz
- Power consumption: 175W
- Power consumption in standby: 0.5 W
- Dimensions: 420 (W) x 70 (H) x 396 (D) mm
- Weight: 7.0 kg

**Accessories (DVD/CD receiver)**
- Remote control: 1
- AA/R6 dry cell batteries: 2
- Video cable (yellow plugs): 1
- AM loop antenna: 1
- FM antenna: 1
- Power cord: 1
- Setup Guide: 1
- These operating instructions: 1
- Warranty Card: 1

**Speaker System (S-DV323/424)**
- (Front speakers x2, surround speakers x2, center speaker x1, subwoofer x1)

**Front speakers (S-DV323)**
- Enclosure: Closed-box bookshelf type (magnetically shielded)
- System: 10x7 cm 1-way system
- Speakers: 10x7 cm cone type
- Nominal impedance: 6 Ω
- Frequency range: 90 Hz to 20 kHz
- Maximum Input Power: 100 W
- Dimensions: 105 (W) x 158 (H) x 83 (D) mm
- Weight: 0.8 kg

### Speaker System (S-DV323/424)
- (Front speakers x2, surround speakers x2, center speaker x1, subwoofer x1)
**Front speakers (S-DV424)**
- Enclosure: Closed-box bookshelf type (magnetically shielded)
- System: 2-way system
- Woofer: 10x7 cm cone-type
- Tweeter: 6 cm dome-type
- Nominal impedance: 6 Ω
- Frequency range: 90 Hz to 20 kHz
- Maximum Input Power: 100 W
- Dimensions: 240 (W) x 240 (H) x 962 (D) mm
- Weight: 3.6 kg

**Center speaker**
- Enclosure: Closed-box bookshelf type (magnetically shielded)
- System: 10x7 cm 1-way system
- Speakers: 10x7 cm cone type
- Nominal impedance: 6 Ω
- Frequency range: 78 Hz to 20 kHz
- Maximum Input Power: 100 W
- Dimensions: 240 (W) x 87 (H) x 79 (D) mm
- Weight: 0.85 kg

**Surround speakers**
- Enclosure: Closed-box bookshelf type (magnetically shielded)
- System: 7 cm 1-way system
- Speakers: 7 cm cone type
- Nominal impedance: 6 Ω
- Frequency range: 90 Hz to 20 kHz
- Maximum Input Power: 100 W
- Dimensions: 105 (W) x 139 (H) x 83 (D) mm
- Weight: 0.55 kg

**Subwoofer**
- Enclosure: Bass-reflex floor type (magnetically shielded)
- System: 16 cm 1-way system
- Speaker: 16 cm cone type
- Nominal impedance: 6 Ω
- Frequency range: 35 Hz to 2.8 kHz
- Maximum Input Power: 100 W
- Dimensions: 108 (W) x 420 (H) x 390 (D) mm
- Weight: 5 kg

**Accessories (Speaker system)**
- Speaker cables: 6
- Speaker setup guide: 1
- Non-slip pads (small): 20
- Non-slip pads (large): 9
- Subwoofer stands: 3
- Front speaker covers: 2
- Surround speaker bases: 2
- S-DV323 only: Wall mounts: 2

**Note**
- Specifications and design subject to possible modification without notice, due to improvements.

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

This product is intended for household purposes. Any failure due to use for other than household purposes (such as long-term use for business purposes in a restaurant or use in a car or ship) and which requires repair will be charged for even in the warranty period.
AFTER-SALES SERVICE FOR PIONEER PRODUCTS

Please contact the dealer or distributor from where you purchased
the product for its after-sales service (including warranty conditions).
For any other information, in case the necessary information is not
available, please contact the Pioneer’s subsidiaries (regional service
headquarters) listed below:

PLEASE DO NOT SHIP YOUR PRODUCT TO THE COMPANIES AT
the addresses listed below for repair without advance contact, for
these companies are not repair locations.
