What does the Fund invest in?

This Fund seeks to provide capital appreciation by investing in equity securities based on a prescribed allocation among three distinct asset classes: Canadian equity, U.S. equity and international equity. The Fund invests primarily in equity securities.

The Canadian equity component seeks to replicate the S&P/TSX 60 Index; the U.S. equity component seeks to replicate the S&P 500 Index; and the international equity component seeks to replicate the MSCI EAFE (Europe, Australasia and Far East) Index.

**How risky is it?**

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

Tangerine Investment Management Inc. has rated the volatility of the Fund as **medium to high**.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the “**Who Should Invest in this Fund?**” section of the Fund’s simplified prospectus.

**No guarantees**

Like most mutual funds, this Fund doesn’t have any guarantees. You may not get back the amount of money you invest.

**How has the Fund performed?**

This section tells you how units of the Fund have performed over the past 3 years. Returns are after expenses have been deducted. These expenses reduce the Fund’s returns.

**Year-by-year returns**

This chart shows how units of the Fund performed in each of the past 3 years. The Fund dropped in value in 0 of the 3 years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for the units of the Fund in a 3-month period over the past 3 years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

**Average return**

If $1,000 had been invested in this Fund since the inception date, a person would have $1,598 as at August 31, 2015. This works out to an annual compound return of 13.0%.
Who is this Fund for?

The Fund is for investors who seek growth potential and are comfortable with the level of risk shown here. The Fund is suitable for investors with medium-high risk tolerance and with medium-term time horizons who are looking for capital appreciation and some income.

A word about tax

In general, you’ll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan or a Tax-Free Savings Account. Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell units of the Fund. The fees and expenses – including any commissions – can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales charges

There are currently no sales charges payable when you buy, switch or redeem units of the Fund.

2. Fund expenses

You don’t pay these expenses directly. They affect you because they reduce the Fund’s returns.

As of June 30, 2015, the Fund’s expenses were 1.10% of its value. This equals $11.00 for every $1,000 invested.

More about the trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the Fund. It is for the services and advice that your representative and their firm provide to you.

Tangerine Investment Management Inc. pays the trailing commission to your representative’s firm. It is paid from the Fund’s management fee and is based on the value of your investment. A trailing commission is up to 0.4% of the value of your investment each year in recognition of the services provided. If you invest $1,000 annually, a 0.4% commission would equal to $4.00.

3. Other fees

There are no other fees associated with this Fund.
